Executive Board

**Annual session 2011**

20-23 June 2011

Item 6 (b) of the provisional agenda\*

### **Draft country programme document\*\***

#### **Montenegro**

##### **Corrigendum**

*Paragraph 5, paragraph should read:*

5. According to official statistics from Montenegro, the national under-five mortality rate was reduced by half over the past five years, reaching 6 deaths per 1,000 live births in 2009.<sup>6</sup> UNICEF research has indicated that the under-five mortality rate is approximately three times higher for Roma.<sup>7</sup> The current HIV/AIDS prevalence rate is 0.01 per cent (Institute for Public Health, Annual Report on HIV/AIDS in Montenegro, 2009). However, research funded by Irish Aid conducted among Roma most-at-risk-adolescents, revealed low levels of knowledge on HIV/AIDS; evidence of high-risk behaviour among males; and low levels of formal education, especially among girls.

\* E/ICEF/2011/8.

\*\* In accordance with Executive Board decision 2006/19, the present document will be revised and posted on the UNICEF website, along with the results matrix, no later than six weeks after discussion of the CPD at the 2011 annual session of the Executive Board. The revised CPD will then be presented to the Executive Board for approval at the second regular session of 2011.
