Chapter I

Resolutions adopted by the Conference

1. At its 6th plenary meeting, on 22 June 2012, the United Nations Conference on Sustainable Development adopted the following draft resolutions (for the discussion, see chapters V, VI and VII of the present report).

Resolution I

Outcome document: “The future we want”

*The United Nations Conference on Sustainable Development,
Having met in Rio de Janeiro, Brazil, from 20 to 22 June 2012,*

1. *Adopts* the outcome document, entitled “The future we want”, which is annexed to the present resolution;

2. *Recommends* to the General Assembly that it endorse the outcome document as adopted by the Conference.

Annex

The future we want

I. Our common vision

1. We, the Heads of State and Government and high-level representatives, having met at Rio de Janeiro, Brazil, from 20 to 22 June 2012, with the full participation of civil society, renew our commitment to sustainable development and to ensuring the promotion of an economically, socially and environmentally sustainable future for our planet and for present and future generations.

2. Poverty eradication is the greatest global challenge facing the world today and an indispensable requirement for sustainable development. In this regard, we are committed to freeing humanity from poverty and hunger as a matter of urgency.

3. We therefore acknowledge the need to further mainstream sustainable development at all levels, integrating economic, social and environmental aspects and recognizing their interlinkages, so as to achieve sustainable development in all its dimensions.

4. We recognize that poverty eradication, changing unsustainable and promoting sustainable patterns of consumption and production and protecting and managing the natural resource base of economic and social development are the overarching objectives of and essential requirements for sustainable development. We also reaffirm the need to achieve sustainable development by promoting sustained, inclusive and equitable economic growth, creating greater opportunities for all, reducing inequalities, raising basic standards of living, fostering equitable social development and inclusion, and promoting the integrated and sustainable management of natural resources and ecosystems that supports, inter alia, economic, social and human development while facilitating ecosystem conservation, regeneration and restoration and resilience in the face of new and emerging challenges.

5. We reaffirm our commitment to make every effort to accelerate the achievement of the internationally agreed development goals, including the Millennium Development Goals by 2015.

6. We recognize that people are at the centre of sustainable development and, in this regard, we strive for a world that is just, equitable and inclusive, and we commit to work together to promote sustained and inclusive economic growth, social development and environmental protection and thereby to benefit all.

7. We reaffirm that we continue to be guided by the purposes and principles of the Charter of the United Nations, with full respect for international law and its principles.

8. We also reaffirm the importance of freedom, peace and security, respect for all human rights, including the right to development and the right to an adequate standard of living, including the right to food, the rule of law, gender equality, women's empowerment and the overall commitment to just and democratic societies for development.

9. We reaffirm the importance of the Universal Declaration of Human Rights,¹ as well as other international instruments relating to human rights and international law. We emphasize the responsibilities of all States, in conformity with the Charter, to respect, protect and promote human rights and fundamental freedoms for all, without distinction of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth, disability or other status.

10. We acknowledge that democracy, good governance and the rule of law, at the national and international levels, as well as an enabling environment, are essential for sustainable development, including sustained and inclusive economic growth, social development, environmental protection and the eradication of poverty and hunger. We reaffirm that, to achieve our sustainable development goals, we need institutions at all levels that are effective, transparent, accountable and democratic.

11. We reaffirm our commitment to strengthen international cooperation to address the persistent challenges related to sustainable development for all, in particular in developing countries. In this regard, we reaffirm the need to achieve economic stability, sustained economic growth, the promotion of social equity and the protection of the environment, while enhancing gender equality, women's empowerment and equal opportunities for all, and the protection, survival and development of children to their full potential, including through education.

12. We resolve to take urgent action to achieve sustainable development. We therefore renew our commitment to sustainable development, assessing the progress to date and the remaining gaps in the implementation of the outcomes of the major summits on sustainable development and addressing new and emerging challenges. We express our determination to address the themes of the United Nations Conference on Sustainable Development, namely, a green economy in the context of sustainable development and poverty eradication, and the institutional framework for sustainable development.

13. We recognize that opportunities for people to influence their lives and future, participate in decision-making and voice their concerns are fundamental for

¹ Resolution 217 A (III).

sustainable development. We underscore that sustainable development requires concrete and urgent action. It can only be achieved with a broad alliance of people, governments, civil society and the private sector, all working together to secure the future we want for present and future generations.

II. Renewing political commitment

A. Reaffirming the Rio Principles and past action plans

14. We recall the Declaration of the United Nations Conference on the Human Environment, adopted at Stockholm on 16 June 1972.²

15. We reaffirm all the principles of the Rio Declaration on Environment and Development,³ including, inter alia, the principle of common but differentiated responsibilities, as set out in principle 7 thereof.

16. We reaffirm our commitment to fully implement the Rio Declaration, Agenda 21,⁴ the Programme for the Further Implementation of Agenda 21,⁵ the Plan of Implementation of the World Summit on Sustainable Development (Johannesburg Plan of Implementation)⁶ and the Johannesburg Declaration on Sustainable Development,⁷ the Programme of Action for the Sustainable Development of Small Island Developing States (Barbados Programme of Action)⁸ and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States.⁹ We also reaffirm our commitment to the full implementation of the Programme of Action for the Least Developed Countries for the Decade 2011-2020 (Istanbul Programme of Action),¹⁰ the Almaty Programme of Action: Addressing the Special Needs of Landlocked Developing Countries within a New Global Framework for Transit Transport Cooperation for Landlocked and Transit Developing Countries,¹¹ the political declaration on Africa's development needs¹² and the New Partnership for Africa's

Development.¹³ We recall as well our commitments in the outcomes of all the major United Nations conferences and summits in the economic, social and environmental fields, including the United Nations Millennium Declaration,¹⁴ the 2005 World Summit Outcome,¹⁵ the Monterrey Consensus of the International Conference on Financing for Development,¹⁶ the Doha Declaration on Financing for Development: outcome document of the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus,¹⁷ the outcome document of the High-level Plenary Meeting of the General Assembly on the Millennium Development Goals,¹⁸ the Programme of Action of the International Conference on Population and Development,¹⁹ the key actions for the further implementation of the Programme of Action of the International Conference on Population and Development²⁰ and the Beijing Declaration²¹ and Platform for Action.²²

17. We recognize the importance of the three Rio conventions for advancing sustainable development, and in this regard we urge all parties to fully implement their commitments under the United Nations Framework Convention on Climate Change,²³ the Convention on Biological Diversity²⁴ and the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa,²⁵ in accordance with their respective principles and provisions, as well as to take effective and concrete actions and measures at all levels and enhance international cooperation.

18. We are determined to reinvigorate political will and to raise the level of commitment by the international community to move the sustainable development agenda forward, through the achievement of the internationally agreed development goals, including the Millennium Development Goals. We further reaffirm our respective commitments to other relevant internationally agreed goals in the economic, social and environmental fields since 1992. We therefore resolve to take concrete measures that accelerate implementation of sustainable development commitments.

B. Advancing integration, implementation and coherence: assessing the progress to date and the remaining gaps in the implementation of the outcomes of the major summits on sustainable development and addressing new and emerging challenges

19. We recognize that the twenty years since the United Nations Conference on Environment and Development in 1992 have seen uneven progress, including in sustainable development and poverty eradication. We emphasize the need to make progress in implementing previous commitments. We also recognize the need to accelerate progress in closing development gaps between developed and developing countries, and to seize and create opportunities to achieve sustainable development through economic growth and diversification, social development and environmental protection. To this end, we underscore the continued need for an enabling environment at the national and international levels, as well as continued and strengthened international cooperation, particularly in the areas of finance, debt, trade and technology transfer, as mutually agreed, and innovation, entrepreneurship, capacity-building, transparency and accountability. We recognize the diversification of actors and stakeholders engaged in the pursuit of sustainable development. In this context, we affirm the continued need for the full and effective participation of all countries, in particular developing countries, in global decision-making.

20. We acknowledge that, since 1992, there have been areas of insufficient progress and setbacks in the integration of the three dimensions of sustainable development, aggravated by multiple financial, economic, food and energy crises, which have threatened the ability of all countries, in particular developing countries, to achieve sustainable development. In this regard, it is critical that we do not backtrack from our commitment to the outcome of the United Nations Conference on Environment and Development. We also recognize that one of the current major challenges for all countries, particularly for developing countries, is the impact from the multiple crises affecting the world today.

21. We are deeply concerned that one in five people on this planet, or over 1 billion people, still live in extreme poverty, and that one in seven — or 14 per cent — is undernourished, while public health challenges, including pandemics and epidemics, remain omnipresent threats. In this context, we note the ongoing discussions in the General Assembly on human security. We acknowledge that with the world's population projected to exceed 9 billion by 2050, with an estimated two thirds living in cities, we need to increase our efforts to achieve sustainable development and, in particular, the eradication of poverty, hunger and preventable diseases.

22. We recognize examples of progress in sustainable development at the regional, national, subnational and local levels. We note that efforts to achieve sustainable development have been reflected in regional, national and subnational policies and plans, and that governments have strengthened their commitment to sustainable development since the adoption of Agenda 21 through legislation and institutions, and the development and implementation of international, regional and subregional agreements and commitments.

23. We reaffirm the importance of supporting developing countries in their efforts to eradicate poverty and promote empowerment of the poor and people in vulnerable situations, including removing barriers to opportunity, enhancing productive capacity, developing sustainable agriculture and promoting full and productive employment and decent work for all, complemented by effective social policies,

including social protection floors, with a view to achieving the internationally agreed development goals, including the Millennium Development Goals.

24. We express deep concern about the continuing high levels of unemployment and underemployment, particularly among young people, and note the need for sustainable development strategies to proactively address youth employment at all levels. In this regard, we recognize the need for a global strategy on youth and employment building on the work of the International Labour Organization.

25. We acknowledge that climate change is a cross-cutting and persistent crisis, and express our concern that the scale and gravity of the negative impacts of climate change affect all countries and undermine the ability of all countries, in particular, developing countries, to achieve sustainable development and the Millennium Development Goals, and threaten the viability and survival of nations. Therefore, we underscore that combating climate change requires urgent and ambitious action, in accordance with the principles and provisions of the United Nations Framework Convention on Climate Change.

26. States are strongly urged to refrain from promulgating and applying any unilateral economic, financial or trade measures not in accordance with international law and the Charter that impede the full achievement of economic and social development, particularly in developing countries.

27. We reiterate our commitment, expressed in the Johannesburg Plan of Implementation, the 2005 World Summit Outcome and the outcome document of the High-level Plenary Meeting of the General Assembly on the Millennium Development Goals of 2010, to take further effective measures and actions, in conformity with international law, to remove the obstacles to the full realization of the right of self-determination of peoples living under colonial and foreign occupation, which continue to adversely affect their economic and social development as well as their environment, are incompatible with the dignity and worth of the human person and must be combated and eliminated.

28. We reaffirm that, in accordance with the Charter, this shall not be construed as authorizing or encouraging any action against the territorial integrity or political independence of any State.

29. We resolve to take further effective measures and actions, in conformity with international law, to remove obstacles and constraints, strengthen support and meet the special needs of people living in areas affected by complex humanitarian emergencies and in areas affected by terrorism.

30. We recognize that many people, especially the poor, depend directly on ecosystems for their livelihoods, their economic, social and physical well-being, and their cultural heritage. For this reason, it is essential to generate decent jobs and incomes that decrease disparities in standards of living in order to better meet people's needs and promote sustainable livelihoods and practices and the sustainable use of natural resources and ecosystems.

31. We emphasize that sustainable development must be inclusive and people-centred, benefiting and involving all people, including youth and children. We recognize that gender equality and women's empowerment are important for sustainable development and our common future. We reaffirm our commitments to

ensure women's equal rights, access and opportunities for participation and leadership in the economy, society and political decision-making.

32. We recognize that each country faces specific challenges to achieve sustainable development, and we underscore the special challenges facing the most vulnerable countries and, in particular, African countries, least developed countries, landlocked developing countries and small island developing States, as well as the specific challenges facing the middle-income countries. Countries in situations of conflict also need special attention.

33. We reaffirm our commitment to take urgent and concrete action to address the vulnerability of small island developing States, including through the sustained implementation of the Barbados Programme of Action and the Mauritius Strategy, and underscore the urgency of finding additional solutions to the major challenges facing small island developing States in a concerted manner so as to support them in sustaining momentum realized in implementing the Barbados Programme of Action and the Mauritius Strategy and achieving sustainable development.

34. We reaffirm that the Istanbul Programme of Action outlines the priorities of least developed countries for sustainable development and defines a framework for renewed and strengthened global partnership to implement them. We commit to assist the least developed countries with the implementation of the Istanbul Programme of Action as well as in their efforts to achieve sustainable development.

35. We recognize that more attention should be given to Africa and the implementation of previously agreed commitments related to its development needs that were made at major United Nations summits and conferences. We note that aid to Africa has increased in recent years. However, it still lags behind commitments that were previously made. We underscore the key priority for the international community of supporting Africa's sustainable development efforts. In this regard, we recommit to fully implement the internationally agreed commitments related to Africa's development needs, particularly those contained in the Millennium Declaration, the United Nations Declaration on the New Partnership for Africa's Development,²⁶ the Monterrey Consensus, the Johannesburg Plan of Implementation and the 2005 World Summit Outcome, as well as the 2008 political declaration on Africa's development needs.

36. We recognize the serious constraints to achieving sustainable development in all its three dimensions in landlocked developing countries. In this regard, we reaffirm our commitment to address the special development needs and the challenges faced by landlocked developing countries through the full, timely and effective implementation of the Almaty Programme of Action, as contained in the declaration on the midterm review of the Almaty Programme of Action.²⁷

37. We recognize the progress made by middle-income countries in improving the well-being of their people, as well as the specific development challenges they face in their efforts to eradicate poverty, reduce inequalities and achieve their development goals, including the Millennium Development Goals, and to achieve sustainable development in a comprehensive manner integrating the economic, social and environmental dimensions. We reiterate that these efforts should be

²⁶ See resolution 57/2.

²⁷ See resolution 63/2.

adequately supported by the international community, in various forms, taking into account the needs and the capacity to mobilize domestic resources of these countries.

38. We recognize the need for broader measures of progress to complement gross domestic product in order to better inform policy decisions, and in this regard we request the United Nations Statistical Commission, in consultation with relevant United Nations system entities and other relevant organizations, to launch a programme of work in this area, building on existing initiatives.

39. We recognize that planet Earth and its ecosystems are our home and that “Mother Earth” is a common expression in a number of countries and regions, and we note that some countries recognize the rights of nature in the context of the promotion of sustainable development. We are convinced that in order to achieve a just balance among the economic, social and environmental needs of present and future generations, it is necessary to promote harmony with nature.

40. We call for holistic and integrated approaches to sustainable development that will guide humanity to live in harmony with nature and lead to efforts to restore the health and integrity of the Earth’s ecosystem.

41. We acknowledge the natural and cultural diversity of the world, and recognize that all cultures and civilizations can contribute to sustainable development.

C. Engaging major groups and other stakeholders

42. We reaffirm the key role of all levels of government and legislative bodies in promoting sustainable development. We further acknowledge efforts and progress made at the local and subnational levels, and recognize the important role that such authorities and communities can play in implementing sustainable development, including by engaging citizens and stakeholders and providing them with relevant information, as appropriate, on the three dimensions of sustainable development. We further acknowledge the importance of involving all relevant decision makers in the planning and implementation of sustainable development policies.

43. We underscore that broad public participation and access to information and judicial and administrative proceedings are essential to the promotion of sustainable development. Sustainable development requires the meaningful involvement and active participation of regional, national and subnational legislatures and judiciaries, and all major groups: women, children and youth, indigenous peoples, non-governmental organizations, local authorities, workers and trade unions, business and industry, the scientific and technological community, and farmers, as well as other stakeholders, including local communities, volunteer groups and foundations, migrants and families, as well as older persons and persons with disabilities. In this regard, we agree to work more closely with the major groups and other stakeholders, and encourage their active participation, as appropriate, in processes that contribute to decision-making, planning and implementation of policies and programmes for sustainable development at all levels.

44. We acknowledge the role of civil society and the importance of enabling all members of civil society to be actively engaged in sustainable development. We recognize that improved participation of civil society depends upon, inter alia, strengthening access to information and building civil society capacity and an enabling environment. We recognize that information and communications technology is facilitating the flow of information between governments and the

public. In this regard, it is essential to work towards improved access to information and communications technology, especially broadband networks and services, and bridge the digital divide, recognizing the contribution of international cooperation in this regard.

45. We underscore that women have a vital role to play in achieving sustainable development. We recognize the leadership role of women, and we resolve to promote gender equality and women's empowerment and to ensure their full and effective participation in sustainable development policies, programmes and decision-making at all levels.

46. We acknowledge that the implementation of sustainable development will depend on the active engagement of both the public and the private sectors. We recognize that the active participation of the private sector can contribute to the achievement of sustainable development, including through the important tool of public-private partnerships. We support national regulatory and policy frameworks that enable business and industry to advance sustainable development initiatives, taking into account the importance of corporate social responsibility. We call upon the private sector to engage in responsible business practices, such as those promoted by the United Nations Global Compact.

47. We acknowledge the importance of corporate sustainability reporting, and encourage companies, where appropriate, especially publicly listed and large companies, to consider integrating sustainability information into their reporting cycle. We encourage industry, interested governments and relevant stakeholders, with the support of the United Nations system, as appropriate, to develop models for best practice and facilitate action for the integration of sustainability reporting, taking into account experiences from already existing frameworks and paying particular attention to the needs of developing countries, including for capacity-building.

48. We recognize the important contribution of the scientific and technological community to sustainable development. We are committed to working with and fostering collaboration among the academic, scientific and technological community, in particular in developing countries, to close the technological gap between developing and developed countries and strengthen the science-policy interface, as well as to foster international research collaboration on sustainable development.

49. We stress the importance of the participation of indigenous peoples in the achievement of sustainable development. We also recognize the importance of the United Nations Declaration on the Rights of Indigenous Peoples²⁸ in the context of global, regional, national and subnational implementation of sustainable development strategies.

50. We stress the importance of the active participation of young people in decision-making processes, as the issues we are addressing have a deep impact on present and future generations and as the contribution of children and youth is vital to the achievement of sustainable development. We also recognize the need to promote intergenerational dialogue and solidarity by recognizing their views.

51. We stress the importance of the participation of workers and trade unions in the promotion of sustainable development. As the representatives of working people,

²⁸ Resolution 61/295, annex.

trade unions are important partners in facilitating the achievement of sustainable development, in particular the social dimension. Information, education and training on sustainability at all levels, including in the workplace, are key to strengthening the capacity of workers and trade unions to support sustainable development.

52. We recognize that farmers, including small-scale farmers and fisherfolk, pastoralists and foresters, can make important contributions to sustainable development through production activities that are environmentally sound, enhance food security and the livelihood of the poor and invigorate production and sustained economic growth.

53. We note the valuable contributions that non-governmental organizations could and do make in promoting sustainable development through their well-established and diverse experience, expertise and capacity, especially in the area of analysis, the sharing of information and knowledge, promotion of dialogue and support of implementation of sustainable development.

54. We recognize the central role of the United Nations in advancing the sustainable development agenda. We acknowledge as well, in this regard, the contributions of other relevant international organizations, including international financial institutions and multilateral development banks, and stress the importance of cooperation among them and with the United Nations, within their respective mandates, recognizing their role in mobilizing resources for sustainable development.

55. We commit ourselves to reinvigorating the global partnership for sustainable development that we launched in Rio de Janeiro in 1992. We recognize the need to impart new momentum to our cooperative pursuit of sustainable development, and commit to work together with major groups and other stakeholders in addressing implementation gaps.

III. Green economy in the context of sustainable development and poverty eradication

56. We affirm that there are different approaches, visions, models and tools available to each country, in accordance with its national circumstances and priorities, to achieve sustainable development in its three dimensions which is our overarching goal. In this regard, we consider green economy in the context of sustainable development and poverty eradication as one of the important tools available for achieving sustainable development and that it could provide options for policymaking but should not be a rigid set of rules. We emphasize that it should contribute to eradicating poverty as well as sustained economic growth, enhancing social inclusion, improving human welfare and creating opportunities for employment and decent work for all, while maintaining the healthy functioning of the Earth's ecosystems.

57. We affirm that policies for green economy in the context of sustainable development and poverty eradication should be guided by and in accordance with all the Rio Principles, Agenda 21 and the Johannesburg Plan of Implementation and contribute towards achieving relevant internationally agreed development goals, including the Millennium Development Goals.

58. We affirm that green economy policies in the context of sustainable development and poverty eradication should:

- (a) Be consistent with international law;

(b) Respect each country's national sovereignty over their natural resources, taking into account its national circumstances, objectives, responsibilities, priorities and policy space with regard to the three dimensions of sustainable development;

(c) Be supported by an enabling environment and well-functioning institutions at all levels, with a leading role for governments and with the participation of all relevant stakeholders, including civil society;

(d) Promote sustained and inclusive economic growth, foster innovation and provide opportunities, benefits and empowerment for all and respect for all human rights;

(e) Take into account the needs of developing countries, particularly those in special situations;

(f) Strengthen international cooperation, including the provision of financial resources, capacity-building and technology transfer to developing countries;

(g) Effectively avoid unwarranted conditionalities on official development assistance and finance;

(h) Not constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction on international trade, avoid unilateral actions to deal with environmental challenges outside the jurisdiction of the importing country and ensure that environmental measures addressing transboundary or global environmental problems, as far as possible, are based on international consensus;

(i) Contribute to closing technology gaps between developed and developing countries and reduce the technological dependence of developing countries, using all appropriate measures;

(j) Enhance the welfare of indigenous peoples and their communities, other local and traditional communities and ethnic minorities, recognizing and supporting their identity, culture and interests, and avoid endangering their cultural heritage, practices and traditional knowledge, preserving and respecting non-market approaches that contribute to the eradication of poverty;

(k) Enhance the welfare of women, children, youth, persons with disabilities, smallholder and subsistence farmers, fisherfolk and those working in small and medium-sized enterprises, and improve the livelihoods and empowerment of the poor and vulnerable groups, in particular in developing countries;

(l) Mobilize the full potential and ensure the equal contribution of both women and men;

(m) Promote productive activities in developing countries that contribute to the eradication of poverty;

(n) Address the concern about inequalities and promote social inclusion, including social protection floors;

(o) Promote sustainable consumption and production patterns;

(p) Continue efforts to strive for inclusive, equitable development approaches to overcome poverty and inequality.

59. We view the implementation of green economy policies by countries that seek to apply them for the transition towards sustainable development as a common

undertaking, and we recognize that each country can choose an appropriate approach in accordance with national sustainable development plans, strategies and priorities.

60. We acknowledge that green economy in the context of sustainable development and poverty eradication will enhance our ability to manage natural resources sustainably and with lower negative environmental impacts, increase resource efficiency and reduce waste.

61. We recognize that urgent action on unsustainable patterns of production and consumption where they occur remains fundamental in addressing environmental sustainability and promoting conservation and sustainable use of biodiversity and ecosystems, regeneration of natural resources and the promotion of sustained, inclusive and equitable global growth.

62. We encourage each country to consider the implementation of green economy policies in the context of sustainable development and poverty eradication, in a manner that endeavours to drive sustained, inclusive and equitable economic growth and job creation, particularly for women, youth and the poor. In this respect, we note the importance of ensuring that workers are equipped with the necessary skills, including through education and capacity-building, and are provided with the necessary social and health protections. In this regard, we encourage all stakeholders, including business and industry, to contribute, as appropriate. We invite governments to improve knowledge and statistical capacity on job trends, developments and constraints and integrate relevant data into national statistics, with the support of relevant United Nations agencies within their mandates.

63. We recognize the importance of the evaluation of the range of social, environmental and economic factors, and encourage, where national circumstances and conditions allow, their integration into decision-making. We acknowledge that it will be important to take into account the opportunities and challenges, as well as the costs and benefits, of green economy policies in the context of sustainable development and poverty eradication, using the best available scientific data and analysis. We acknowledge that a mix of measures, including regulatory, voluntary and others applied at the national level and consistent with obligations under international agreements, could promote green economy in the context of sustainable development and poverty eradication. We reaffirm that social policies are vital to promoting sustainable development.

64. We acknowledge that involvement of all stakeholders and their partnerships, networking and experience-sharing at all levels could help countries to learn from one another in identifying appropriate sustainable development policies, including green economy policies. We note the positive experiences in some countries, including in developing countries, in adopting green economy policies in the context of sustainable development and poverty eradication through an inclusive approach, and welcome the voluntary exchange of experiences, as well as capacity-building, in the different areas of sustainable development.

65. We recognize the power of communications technologies, including connection technologies and innovative applications, to promote knowledge exchange, technical cooperation and capacity-building for sustainable development. These technologies and applications can build capacity and enable the sharing of

experiences and knowledge in the different areas of sustainable development in an open and transparent manner.

66. Recognizing the importance of linking financing, technology, capacity-building and national needs for sustainable development policies, including green economy in the context of sustainable development and poverty eradication, we invite the United Nations system, in cooperation with relevant donors and international organizations, to coordinate and provide information upon request on:

(a) Matching interested countries with the partners that are best suited to provide requested support;

(b) Toolboxes and/or best practices in applying policies on green economy in the context of sustainable development and poverty eradication at all levels;

(c) Models or good examples of policies on green economy in the context of sustainable development and poverty eradication;

(d) Methodologies for evaluation of policies on green economy in the context of sustainable development and poverty eradication;

(e) Existing and emerging platforms that contribute in this regard.

67. We underscore the importance of governments taking a leadership role in developing policies and strategies through an inclusive and transparent process. We also take note of the efforts of those countries, including developing countries, that have already initiated processes to prepare national green economy strategies and policies in support of sustainable development.

68. We invite relevant stakeholders, including the United Nations regional commissions, United Nations organizations and bodies, other relevant intergovernmental and regional organizations, international financial institutions and major groups involved in sustainable development, according to their respective mandates, to support developing countries, upon request, to achieve sustainable development, including through, inter alia, green economy policies in the context of sustainable development and poverty eradication, in particular in least developed countries.

69. We also invite business and industry as appropriate and in accordance with national legislation to contribute to sustainable development and to develop sustainability strategies that integrate, inter alia, green economy policies.

70. We acknowledge the role of cooperatives and microenterprises in contributing to social inclusion and poverty reduction, in particular in developing countries.

71. We encourage existing and new partnerships, including public-private partnerships, to mobilize public financing complemented by the private sector, taking into account the interests of local and indigenous communities when appropriate. In this regard, governments should support initiatives for sustainable development, including promoting the contribution of the private sector to support green economy policies in the context of sustainable development and poverty eradication.

72. We recognize the critical role of technology as well as the importance of promoting innovation, in particular in developing countries. We invite governments, as appropriate, to create enabling frameworks that foster environmentally sound

technology, research and development, and innovation, including in support of green economy in the context of sustainable development and poverty eradication.

73. We emphasize the importance of technology transfer to developing countries, and recall the provisions on technology transfer, finance, access to information and intellectual property rights, as agreed in the Johannesburg Plan of Implementation, in particular its call to promote, facilitate and finance, as appropriate, access to and the development, transfer and diffusion of environmentally sound technologies and corresponding know-how, in particular to developing countries, on favourable terms, including on concessional and preferential terms, as mutually agreed. We also take note of the further evolution of discussions and agreements on these issues since the adoption of the Johannesburg Plan of Implementation.

74. We recognize that the efforts of developing countries that choose to implement green economy policies in the context of sustainable development and poverty eradication should be supported through technical and technological assistance.

IV. Institutional framework for sustainable development

A. Strengthening the three dimensions of sustainable development

75. We underscore the importance of a strengthened institutional framework for sustainable development which responds coherently and effectively to current and future challenges and efficiently bridges gaps in the implementation of the sustainable development agenda. The institutional framework for sustainable development should integrate the three dimensions of sustainable development in a balanced manner and enhance implementation by, inter alia, strengthening coherence and coordination, avoiding duplication of efforts and reviewing progress in implementing sustainable development. We also reaffirm that the framework should be inclusive, transparent and effective and that it should find common solutions related to global challenges to sustainable development.

76. We recognize that effective governance at the local, subnational, national, regional and global levels representing the voices and interests of all is critical for advancing sustainable development. The strengthening and reform of the institutional framework should not be an end in itself, but a means to achieve sustainable development. We recognize that an improved and more effective institutional framework for sustainable development at the international level should be consistent with the Rio Principles, build on Agenda 21 and the Johannesburg Plan of Implementation, and its objectives on the institutional framework for sustainable development, contribute to the implementation of our commitments in the outcomes of United Nations conferences and summits in the economic, social, environmental and related fields and take into account national priorities and the development strategies and priorities of developing countries. We therefore resolve to strengthen the institutional framework for sustainable development, which will, inter alia:

(a) Promote the balanced integration of the three dimensions of sustainable development;

(b) Be based on an action- and result-oriented approach giving due regard to all relevant cross-cutting issues with the aim to contribute to the implementation of sustainable development;

(c) Underscore the importance of interlinkages among key issues and challenges and the need for a systematic approach to them at all relevant levels;

(d) Enhance coherence, reduce fragmentation and overlap and increase effectiveness, efficiency and transparency, while reinforcing coordination and cooperation;

(e) Promote full and effective participation of all countries in decision-making processes;

(f) Engage high-level political leaders, provide policy guidance and identify specific actions to promote effective implementation of sustainable development, including through voluntary sharing of experiences and lessons learned;

(g) Promote the science-policy interface through inclusive, evidence-based and transparent scientific assessments, as well as access to reliable, relevant and timely data in areas related to the three dimensions of sustainable development, building on existing mechanisms, as appropriate; in this regard, strengthen participation of all countries in international sustainable development processes and capacity-building especially for developing countries, including in conducting their own monitoring and assessments;

(h) Enhance the participation and effective engagement of civil society and other relevant stakeholders in the relevant international forums and, in this regard, promote transparency and broad public participation and partnerships to implement sustainable development;

(i) Promote the review and stocktaking of progress in the implementation of all sustainable development commitments, including commitments related to means of implementation.

B. Strengthening intergovernmental arrangements for sustainable development

77. We acknowledge the vital importance of an inclusive, transparent, reformed, strengthened and effective multilateral system in order to better address the urgent global challenges of sustainable development today, recognizing the universality and central role of the United Nations and reaffirming our commitment to promote and strengthen the effectiveness and efficiency of the United Nations system.

78. We underscore the need to strengthen United Nations system-wide coherence and coordination, while ensuring appropriate accountability to Member States, by, inter alia, enhancing coherence in reporting and reinforcing cooperative efforts under existing inter-agency mechanisms and strategies to advance the integration of the three dimensions of sustainable development within the United Nations system, including through exchange of information among its agencies, funds and programmes, and also with the international financial institutions and other relevant organizations such as the World Trade Organization, within their respective mandates.

79. We emphasize the need for an improved and more effective institutional framework for sustainable development which should be guided by the specific functions required and mandates involved; address the shortcomings of the current system; take into account all relevant implications; promote synergies and coherence; seek to avoid duplication and eliminate unnecessary overlaps within the United Nations system; and reduce administrative burdens and build on existing arrangements.

General Assembly

80. We reaffirm the role and authority of the General Assembly on global matters of concern to the international community, as set out in the Charter.

81. We further reaffirm the central position of the General Assembly as the chief deliberative, policymaking and representative organ of the United Nations. In this regard, we call for the Assembly to further integrate sustainable development as a key element of the overarching framework for United Nations activities and adequately address sustainable development in its agenda-setting, including through periodic high-level dialogues.

Economic and Social Council

82. We reaffirm that the Economic and Social Council is a principal body for policy review, policy dialogue and recommendations on issues of economic and social development and for the follow-up to the Millennium Development Goals, and is a central mechanism for the coordination of the United Nations system and supervision of the subsidiary bodies of the Council, in particular its functional commissions, and for promoting the implementation of Agenda 21 by strengthening system-wide coherence and coordination. We also reaffirm the major role the Council plays in the overall coordination of funds, programmes and specialized agencies, ensuring coherence among them and avoiding duplication of mandates and activities.

83. We commit to strengthen the Economic and Social Council within its mandate under the Charter, as a principal organ in the integrated and coordinated follow-up of the outcomes of all major United Nations conferences and summits in the economic, social, environmental and related fields, and recognize its key role in achieving a balanced integration of the three dimensions of sustainable development. We look forward to the review of the implementation of General Assembly resolution 61/16 of 20 November 2006 on the strengthening of the Council.

High-level political forum

84. We decide to establish a universal, intergovernmental, high-level political forum, building on the strengths, experiences, resources and inclusive participation modalities of the Commission on Sustainable Development, and subsequently replacing the Commission. The high-level political forum shall follow up on the implementation of sustainable development and should avoid overlap with existing structures, bodies and entities in a cost-effective manner.

85. The high-level forum could:

(a) Provide political leadership, guidance and recommendations for sustainable development;

(b) Enhance integration of the three dimensions of sustainable development in a holistic and cross-sectoral manner at all levels;

(c) Provide a dynamic platform for regular dialogue and for stocktaking and agenda-setting to advance sustainable development;

(d) Have a focused, dynamic and action-oriented agenda, ensuring the appropriate consideration of new and emerging sustainable development challenges;

(e) Follow up and review progress in the implementation of sustainable development commitments contained in Agenda 21, the Johannesburg Plan of Implementation, the Barbados Programme of Action, the Mauritius Strategy and the outcome of the present Conference and, as appropriate, relevant outcomes of other United Nations summits and conferences, including the outcome of the Fourth United Nations Conference on the Least Developed Countries,²⁹ as well as their respective means of implementation;

(f) Encourage high-level system-wide participation of United Nations agencies, funds and programmes and invite to participate, as appropriate, other relevant multilateral financial and trade institutions and treaty bodies, within their respective mandates and in accordance with United Nations rules and provisions;

(g) Improve cooperation and coordination within the United Nations system on sustainable development programmes and policies;

(h) Promote transparency and implementation by further enhancing the consultative role and participation of major groups and other relevant stakeholders at the international level in order to better make use of their expertise, while retaining the intergovernmental nature of discussions;

(i) Promote the sharing of best practices and experiences relating to the implementation of sustainable development and, on a voluntary basis, facilitate sharing of experiences, including successes, challenges and lessons learned;

(j) Promote system-wide coherence and coordination of sustainable development policies;

(k) Strengthen the science-policy interface through review of documentation, bringing together dispersed information and assessments, including in the form of a global sustainable development report, building on existing assessments;

(l) Enhance evidence-based decision-making at all levels and contribute to strengthening ongoing capacity-building for data collection and analysis in developing countries.

86. We decide to launch an intergovernmental and open, transparent and inclusive negotiation process under the General Assembly to define the format and organizational aspects of the high-level forum, with the aim of convening the first high-level forum at the beginning of the sixty-eighth session of the Assembly. We will also consider the need for promoting intergenerational solidarity for the achievement of sustainable development, taking into account the needs of future generations, including by inviting the Secretary-General to present a report on this issue.

C. Environmental pillar in the context of sustainable development

87. We reaffirm the need to strengthen international environmental governance within the context of the institutional framework for sustainable development in order to promote a balanced integration of the economic, social and environmental dimensions of sustainable development, as well as coordination within the United Nations system.

²⁹ *Report of the Fourth United Nations Conference on the Least Developed Countries, Istanbul, Turkey, 9-13 May 2011 (A/CONF.219/7)*, chaps. I and II.

88. We are committed to strengthening the role of the United Nations Environment Programme as the leading global environmental authority that sets the global environmental agenda, promotes the coherent implementation of the environmental dimension of sustainable development within the United Nations system and serves as an authoritative advocate for the global environment. We reaffirm General Assembly resolution 2997 (XXVII) of 15 December 1972 establishing the United Nations Environment Programme and other relevant resolutions that reinforce its mandate, as well as the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme of 7 February 1997³⁰ and the Malmö Ministerial Declaration of 31 May 2000.³¹ In this regard, we invite the Assembly, at its sixty-seventh session, to adopt a resolution strengthening and upgrading the United Nations Environment Programme in the following manner:

(a) Establish universal membership in the Governing Council of the United Nations Environment Programme, as well as other measures to strengthen its governance as well as its responsiveness and accountability to Member States;

(b) Have secure, stable, adequate and increased financial resources from the regular budget of the United Nations and voluntary contributions to fulfil its mandate;

(c) Enhance the voice of the United Nations Environment Programme and its ability to fulfil its coordination mandate within the United Nations system by strengthening its engagement in key United Nations coordination bodies and empowering it to lead efforts to formulate United Nations system-wide strategies on the environment;

(d) Promote a strong science-policy interface, building on existing international instruments, assessments, panels and information networks, including the Global Environment Outlook, as one of the processes aimed at bringing together information and assessment to support informed decision-making;

(e) Disseminate and share evidence-based environmental information, and raise public awareness on critical, as well as emerging, environmental issues;

(f) Provide capacity-building to countries, as well as support, and facilitate access to technology;

(g) Progressively consolidate headquarters functions in Nairobi, as well as strengthen its regional presence, in order to assist countries, upon request, in the implementation of their national environmental policies, collaborating closely with other relevant entities of the United Nations system;

(h) Ensure the active participation of all relevant stakeholders, drawing on best practices and models from relevant multilateral institutions and exploring new mechanisms to promote transparency and the effective engagement of civil society.

89. We recognize the significant contributions to sustainable development made by the multilateral environmental agreements. We acknowledge the work already undertaken to enhance synergies among the three conventions in the chemicals and waste cluster (Basel Convention on the Control of Transboundary Movements of

³⁰ *Official Records of the General Assembly, Fifty-second Session, Supplement No. 25 (A/52/25)*, annex, decision 19/1, annex.

³¹ *Ibid.*, *Fifty-fifth Session, Supplement No. 25 (A/55/25)*, annex I, decision SS.VI/1, annex.

Hazardous Wastes and their Disposal,³² Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade³³ and Stockholm Convention on Persistent Organic Pollutants³⁴). We encourage parties to multilateral environmental agreements to consider further measures, in these and other clusters, as appropriate, to promote policy coherence at all relevant levels, improve efficiency, reduce unnecessary overlap and duplication and enhance coordination and cooperation among the multilateral environmental agreements, including the three Rio conventions, as well as with the United Nations system in the field.

90. We stress the need for the continuation of a regular review of the state of the Earth's changing environment and its impact on human well-being, and in this regard we welcome such initiatives as the Global Environment Outlook process aimed at bringing together environmental information and assessments and building national and regional capacity to support informed decision-making.

D. International financial institutions and United Nations operational activities

91. We recognize that sustainable development should be given due consideration by the programmes, funds and specialized agencies of the United Nations system and other relevant entities such as international financial institutions and the United Nations Conference on Trade and Development, in accordance with their respective existing mandates. In this regard, we invite them to further enhance the mainstreaming of sustainable development in their respective mandates, programmes, strategies and decision-making processes, in support of the efforts of all countries, in particular developing countries, in the achievement of sustainable development.

92. We reaffirm the importance of broadening and strengthening the participation of developing countries in international economic decision-making and norm-setting, and in this regard take note of recent important decisions on reform of the governance structures, quotas and voting rights of the Bretton Woods institutions, better reflecting current realities and enhancing the voice and participation of developing countries, and reiterate the importance of the reform of the governance of those institutions in order to deliver more effective, credible, accountable and legitimate institutions.

93. We call for the further mainstreaming of the three dimensions of sustainable development throughout the United Nations system, and request the Secretary-General to report to the General Assembly, through the Economic and Social Council, on the progress made in this regard. We also call for and recognize the importance of the strengthening of policy coordination within key structures of the Secretariat of the United Nations so as to ensure system-wide coherence in support of sustainable development, while ensuring accountability to Member States.

94. We invite the governing bodies of the funds, programmes and specialized agencies of the United Nations development system to consider appropriate measures for integrating the social, economic and environmental dimensions across the operational activities of the United Nations system. We also emphasize that

³² United Nations, *Treaty Series*, vol. 1673, No. 28911.

³³ *Ibid.*, vol. 2244, No. 39973.

³⁴ *Ibid.*, vol. 2256, No. 40214.

increasing the financial contributions to the United Nations development system is key to achieving the internationally agreed development goals, including the Millennium Development Goals, and in this regard we recognize the mutually reinforcing links among increased effectiveness, efficiency and coherence of the United Nations development system, achieving concrete results in assisting developing countries in eradicating poverty and achieving sustained economic growth and sustainable development.

95. We emphasize the need to strengthen operational activities for development of the United Nations system in the field that are well aligned with national sustainable development priorities of developing countries. In this regard, we emphasize that the fundamental characteristics and principles of United Nations operational activities set forth in the relevant General Assembly resolutions provide the overarching framework for all matters pertaining to the United Nations development assistance operations in the field. We recognize the importance of strengthening United Nations system coordination. We look forward to receiving the outcome of the independent evaluation of the “Delivering as one” initiative.

96. We call upon the United Nations system to improve the management of facilities and operations, by taking into account sustainable development practices, building on existing efforts and promoting cost effectiveness, and in accordance with legislative frameworks, including financial rules and regulations, while maintaining accountability to Member States.

E. Regional, national, subnational and local levels

97. We acknowledge the importance of the regional dimension of sustainable development. Regional frameworks can complement and facilitate effective translation of sustainable development policies into concrete action at the national level.

98. We encourage regional, national, subnational and local authorities, as appropriate, to develop and utilize sustainable development strategies as key instruments for guiding decision-making and implementation of sustainable development at all levels, and in this regard we recognize that integrated social, economic and environmental data and information, as well as effective analysis and assessment of implementation, are important in decision-making processes.

99. We encourage action at the regional, national, subnational and local levels to promote access to information, public participation and access to justice in environmental matters, as appropriate.

100. We emphasize that regional and subregional organizations, including the United Nations regional commissions and their subregional offices, have a significant role to play in promoting a balanced integration of the economic, social and environmental dimensions of sustainable development in their respective regions. We underscore the need to support these institutions, including through the United Nations system, in the effective operationalization and implementation of sustainable development, and to facilitate institutional coherence and harmonization of relevant development policies, plans and programmes. In this regard, we urge these institutions to prioritize sustainable development through, inter alia, more efficient and effective capacity-building, development and implementation of regional agreements and arrangements as appropriate, and exchange of information,

best practices and lessons learned. We also welcome regional and cross-regional initiatives for sustainable development. We, furthermore, recognize the need to ensure effective linkage among global, regional, subregional and national processes to advance sustainable development. We encourage the enhancement of the United Nations regional commissions and their subregional offices in their respective capacities to support Member States in implementing sustainable development.

101. We underline the need for more coherent and integrated planning and decision-making at the national, subnational and local levels as appropriate, and to this end we call upon countries to strengthen national, subnational and/or local institutions or relevant multi-stakeholder bodies and processes, as appropriate, dealing with sustainable development, including to coordinate on matters of sustainable development and to enable effective integration of the three dimensions of sustainable development.

102. We welcome regional and cross-regional initiatives for sustainable development, such as the Green Bridge Partnership Programme, which is voluntary and open for participation by all partners.

103. We underscore the need to ensure long-term political commitment to sustainable development taking into account national circumstances and priorities, and in this regard we encourage all countries to undertake the necessary actions and measures to achieve sustainable development.

V. Framework for action and follow-up

A. Thematic areas and cross-sectoral issues

104. We recognize that in order to achieve the objective of the United Nations Conference on Sustainable Development, namely to secure renewed political commitment for sustainable development, as well as to address the themes of a green economy in the context of sustainable development and poverty eradication and the institutional framework for sustainable development, we commit to address remaining gaps in the implementation of the outcomes of the major summits on sustainable development, to address new and emerging challenges and to seize new opportunities through the actions enumerated below in this framework for action, supported, as appropriate, through provision of means of implementation. We recognize that goals, targets and indicators, including, where appropriate, gender-sensitive indicators, are valuable in measuring and accelerating progress. We further note that progress in the implementation of the actions stipulated below can be enhanced by voluntarily sharing information, knowledge and experience.

Poverty eradication

105. We recognize that, three years from the 2015 target date of the Millennium Development Goals, while there has been progress in reducing poverty in some regions, this progress has been uneven and the number of people living in poverty in some countries continues to increase, with women and children constituting the majority of the most affected groups, especially in the least developed countries and particularly in Africa.

106. We recognize that sustained, inclusive and equitable economic growth in developing countries is a key requirement for eradicating poverty and hunger and achieving the Millennium Development Goals. In this regard, we emphasize that

national efforts of developing countries should be complemented by an enabling environment aimed at expanding the development opportunities of developing countries. We also emphasize the need to accord the highest priority to poverty eradication within the United Nations development agenda, addressing the root causes and challenges of poverty through integrated, coordinated and coherent strategies at all levels.

107. We recognize that promoting universal access to social services can make an important contribution to consolidating and achieving development gains. Social protection systems that address and reduce inequality and social exclusion are essential for eradicating poverty and advancing the achievement of the Millennium Development Goals. In this regard, we strongly encourage initiatives aimed at enhancing social protection for all people.

Food security and nutrition and sustainable agriculture

108. We reaffirm our commitments regarding the right of everyone to have access to safe, sufficient and nutritious food, consistent with the right to adequate food and the fundamental right of everyone to be free from hunger. We acknowledge that food security and nutrition has become a pressing global challenge and, in this regard, we further reaffirm our commitment to enhancing food security and access to adequate, safe and nutritious food for present and future generations in line with the Five Rome Principles for Sustainable Global Food Security, adopted on 16 November 2009,³⁵ including for children under the age of 2, and through, as appropriate, national, regional and global food security and nutrition strategies.

109. We recognize that a significant portion of the world's poor live in rural areas, and that rural communities play an important role in the economic development of many countries. We emphasize the need to revitalize the agricultural and rural development sectors, notably in developing countries, in an economically, socially and environmentally sustainable manner. We recognize the importance of taking the necessary actions to better address the needs of rural communities by, inter alia, enhancing access by agricultural producers, in particular small producers, women, indigenous peoples and people living in vulnerable situations, to credit and other financial services, markets, secure land tenure, health care, social services, education, training, knowledge and appropriate and affordable technologies, including for efficient irrigation, reuse of treated wastewater and water harvesting and storage. We reiterate the importance of empowering rural women as critical agents for enhancing agricultural and rural development and food security and nutrition. We also recognize the importance of traditional sustainable agricultural practices, including traditional seed supply systems, including for many indigenous peoples and local communities.

110. Noting the diversity of agricultural conditions and systems, we resolve to increase sustainable agricultural production and productivity globally, including by improving the functioning of markets and trading systems and strengthening international cooperation, particularly for developing countries, by increasing public and private investment in sustainable agriculture, land management and rural development. Key areas for investment and support include sustainable agricultural practices; rural infrastructure, storage capacities and related technologies; research

³⁵ See Food and Agriculture Organization of the United Nations, document WSFS 2009/2.

and development on sustainable agricultural technologies; development of strong agricultural cooperatives and value chains; and the strengthening of urban-rural linkages. We also recognize the need to significantly reduce post-harvest and other food losses and waste throughout the food supply chain.

111. We reaffirm the necessity to promote, enhance and support more sustainable agriculture, including crops, livestock, forestry, fisheries and aquaculture, that improves food security, eradicates hunger and is economically viable, while conserving land, water, plant and animal genetic resources, biodiversity and ecosystems and enhancing resilience to climate change and natural disasters. We also recognize the need to maintain natural ecological processes that support food production systems.

112. We stress the need to enhance sustainable livestock production systems, including by improving pasture land and irrigation schemes in line with national policies, legislation, rules and regulations, enhanced sustainable water management systems and efforts to eradicate and prevent the spread of animal diseases, recognizing that the livelihoods of farmers, including pastoralists, and the health of livestock are intertwined.

113. We also stress the crucial role of healthy marine ecosystems, sustainable fisheries and sustainable aquaculture for food security and nutrition and in providing for the livelihoods of millions of people.

114. We resolve to take action to enhance agricultural research, extension services, training and education to improve agricultural productivity and sustainability through the voluntary sharing of knowledge and good practices. We further resolve to improve access to information, technical knowledge and know-how, including through new information and communications technologies that empower farmers, fisherfolk and foresters to choose among diverse methods of achieving sustainable agricultural production. We call for the strengthening of international cooperation on agricultural research for development.

115. We reaffirm the important work and inclusive nature of the Committee on World Food Security, including through its role in facilitating country-initiated assessments on sustainable food production and food security, and we encourage countries to give due consideration to implementing the Committee on World Food Security Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security. We take note of the ongoing discussions on responsible agricultural investment in the framework of the Committee on World Food Security, as well as the principles for responsible agricultural investment.

116. We stress the need to address the root causes of excessive food price volatility, including its structural causes, at all levels, and the need to manage the risks linked to high and excessively volatile prices in agricultural commodities and their consequences for global food security and nutrition, as well as for smallholder farmers and poor urban dwellers.

117. We underline the importance of timely, accurate and transparent information in helping to address excessive food price volatility, and in this regard take note of the Agricultural Market Information System hosted by the Food and Agriculture Organization of the United Nations and urge the participating international

organizations, private sector actors and governments to ensure the public dissemination of timely and quality food market information products.

118. We reaffirm that a universal, rules-based, open, non-discriminatory and equitable multilateral trading system will promote agricultural and rural development in developing countries and contribute to world food security. We urge national, regional and international strategies to promote the participation of farmers, especially smallholder farmers, including women, in community, domestic, regional and international markets.

Water and sanitation

119. We recognize that water is at the core of sustainable development as it is closely linked to a number of key global challenges. We therefore reiterate the importance of integrating water into sustainable development, and underline the critical importance of water and sanitation within the three dimensions of sustainable development.

120. We reaffirm the commitments made in the Johannesburg Plan of Implementation and the Millennium Declaration regarding halving by 2015 the proportion of people without access to safe drinking water and basic sanitation and the development of integrated water resource management and water efficiency plans, ensuring sustainable water use. We commit to the progressive realization of access to safe and affordable drinking water and basic sanitation for all, as necessary for poverty eradication, women's empowerment and to protect human health, and to significantly improve the implementation of integrated water resource management at all levels as appropriate. In this regard, we reiterate the commitments to support these efforts, in particular for developing countries, through the mobilization of resources from all sources, capacity-building and technology transfer.

121. We reaffirm our commitments regarding the human right to safe drinking water and sanitation, to be progressively realized for our populations, with full respect for national sovereignty. We also highlight our commitment to the International Decade for Action, "Water for Life", 2005-2015.

122. We recognize the key role that ecosystems play in maintaining water quantity and quality, and support actions within respective national boundaries to protect and sustainably manage these ecosystems.

123. We underline the need to adopt measures to address floods, droughts and water scarcity, addressing the balance between water supply and demand, including, where appropriate, non-conventional water resources, and to mobilize financial resources and investment in infrastructure for water and sanitation services, in accordance with national priorities.

124. We stress the need to adopt measures to significantly reduce water pollution and increase water quality, significantly improve wastewater treatment and water efficiency and reduce water losses. In order to achieve this, we stress the need for international assistance and cooperation.

Energy

125. We recognize the critical role that energy plays in the development process, as access to sustainable modern energy services contributes to poverty eradication,

saves lives, improves health and helps to provide for basic human needs. We stress that these services are essential to social inclusion and gender equality, and that energy is also a key input to production. We commit to facilitate support for access to these services by 1.4 billion people worldwide who are currently without them. We recognize that access to these services is critical for achieving sustainable development.

126. We emphasize the need to address the challenge of access to sustainable modern energy services for all, in particular for the poor, who are unable to afford these services even when they are available. We emphasize the need to take further action to improve this situation, including by mobilizing adequate financial resources, so as to provide these services in a reliable, affordable, economically viable and socially and environmentally acceptable manner in developing countries.

127. We reaffirm support for the implementation of national and subnational policies and strategies, based on individual national circumstances and development aspirations, using an appropriate energy mix to meet developmental needs, including through increased use of renewable energy sources and other low-emission technologies, the more efficient use of energy, greater reliance on advanced energy technologies, including cleaner fossil fuel technologies, and the sustainable use of traditional energy resources. We commit to promoting sustainable modern energy services for all through national and subnational efforts, inter alia, on electrification and dissemination of sustainable cooking and heating solutions, including through collaborative actions to share best practices and adopt policies, as appropriate. We urge governments to create enabling environments that facilitate public and private sector investment in relevant and needed cleaner energy technologies.

128. We recognize that improving energy efficiency, increasing the share of renewable energy and cleaner and energy-efficient technologies are important for sustainable development, including in addressing climate change. We also recognize the need for energy efficiency measures in urban planning, buildings and transportation and in the production of goods and services and the design of products. We also recognize the importance of promoting incentives in favour of, and removing disincentives to, energy efficiency and the diversification of the energy mix, including promoting research and development in all countries, including developing countries.

129. We note the launching of the “Sustainable Energy for All” initiative by the Secretary-General, which focuses on access to energy, energy efficiency and renewable energies. We are all determined to act to make sustainable energy for all a reality and, through this, help to eradicate poverty and lead to sustainable development and global prosperity. We recognize that the activities of countries in broader energy-related matters are of great importance and are prioritized according to their specific challenges, capacities and circumstances, including their energy mix.

Sustainable tourism

130. We emphasize that well-designed and managed tourism can make a significant contribution to the three dimensions of sustainable development, has close linkages to other sectors and can create decent jobs and generate trade opportunities. We recognize the need to support sustainable tourism activities and relevant capacity-building that promote environmental awareness, conserve and protect the environment, respect wildlife, flora, biodiversity, ecosystems and cultural diversity,

and improve the welfare and livelihoods of local communities by supporting their local economies and the human and natural environment as a whole. We call for enhanced support for sustainable tourism activities and relevant capacity-building in developing countries in order to contribute to the achievement of sustainable development.

131. We encourage the promotion of investment in sustainable tourism, including ecotourism and cultural tourism, which may include creating small and medium-sized enterprises and facilitating access to finance, including through microcredit initiatives for the poor, indigenous peoples and local communities in areas with high ecotourism potential. In this regard, we underline the importance of establishing, where necessary, appropriate guidelines and regulations, in accordance with national priorities and legislation, for promoting and supporting sustainable tourism.

Sustainable transport

132. We note that transportation and mobility are central to sustainable development. Sustainable transportation can enhance economic growth and improve accessibility. Sustainable transport achieves better integration of the economy while respecting the environment. We recognize the importance of the efficient movement of people and goods and access to environmentally sound, safe and affordable transportation as a means to improve social equity, health, resilience of cities, urban-rural linkages and productivity of rural areas. In this regard, we take into account road safety as part of our efforts to achieve sustainable development.

133. We support the development of sustainable transport systems, including energy-efficient multimodal transport systems, notably public mass transportation systems, clean fuels and vehicles, as well as improved transportation systems in rural areas. We recognize the need to promote an integrated approach to policymaking at the national, regional and local levels for transport services and systems to promote sustainable development. We also recognize that the special development needs of landlocked and transit developing countries need to be taken into account while establishing sustainable transit transport systems. We acknowledge the need for international support to developing countries in this regard.

Sustainable cities and human settlements

134. We recognize that, if they are well planned and developed, including through integrated planning and management approaches, cities can promote economically, socially and environmentally sustainable societies. In this regard, we recognize the need for a holistic approach to urban development and human settlements that provides for affordable housing and infrastructure and prioritizes slum upgrading and urban regeneration. We commit to work towards improving the quality of human settlements, including the living and working conditions of both urban and rural dwellers in the context of poverty eradication so that all people have access to basic services, housing and mobility. We also recognize the need for conservation, as appropriate, of the natural and cultural heritage of human settlements, the revitalization of historic districts and the rehabilitation of city centres.

135. We commit to promote an integrated approach to planning and building sustainable cities and urban settlements, including by supporting local authorities, increasing public awareness and enhancing participation of urban residents, including the poor, in decision-making. We also commit to promote sustainable

development policies that support inclusive housing and social services; a safe and healthy living environment for all, particularly children, youth, women and the elderly and disabled; affordable and sustainable transport and energy; the promotion, protection and restoration of safe and green urban spaces; safe and clean drinking water and sanitation; healthy air quality; the generation of decent jobs; and improved urban planning and slum upgrading. We further support the sustainable management of waste through the application of the 3Rs (reduce, reuse and recycle). We underline the importance of considering disaster risk reduction, resilience and climate risks in urban planning. We recognize the efforts of cities to balance development with rural regions.

136. We emphasize the importance of increasing the number of metropolitan regions, cities and towns that are implementing policies for sustainable urban planning and design in order to respond effectively to the expected growth of urban populations in the coming decades. We note that sustainable urban planning benefits from the involvement of multiple stakeholders as well as from full use of information and sex-disaggregated data, including on demographic trends, income distribution and informal settlements. We recognize the important role of municipal governments in setting a vision for sustainable cities, from the initiation of city planning through to revitalization of older cities and neighbourhoods, including by adopting energy efficiency programmes in building management and developing sustainable, locally appropriate transport systems. We further recognize the importance of mixed-use planning and of encouraging non-motorized mobility, including by promoting pedestrian and cycling infrastructures.

137. We recognize that partnerships among cities and communities play an important role in promoting sustainable development. In this regard, we stress the need to strengthen existing cooperation mechanisms and platforms, partnership arrangements and other implementation tools to advance the coordinated implementation of the Habitat Agenda³⁶ with the active involvement of all relevant United Nations entities and with the overall aim of achieving sustainable urban development. We further recognize the continuing need for adequate and predictable financial contributions to the United Nations Habitat and Human Settlements Foundation so as to ensure timely, effective and concrete global implementation of the Habitat Agenda.

Health and population

138. We recognize that health is a precondition for and an outcome and indicator of all three dimensions of sustainable development. We understand the goals of sustainable development can only be achieved in the absence of a high prevalence of debilitating communicable and non-communicable diseases, and where populations can reach a state of physical, mental and social well-being. We are convinced that action on the social and environmental determinants of health, both for the poor and the vulnerable and for the entire population, is important to create inclusive, equitable, economically productive and healthy societies. We call for the full realization of the right to the enjoyment of the highest attainable standard of physical and mental health.

³⁶ *Report of the United Nations Conference on Human Settlements (Habitat II), Istanbul, 3-14 June 1996* (United Nations publication, Sales No. E.97.IV.6), chap. I, resolution 1, annex II.

139. We also recognize the importance of universal health coverage to enhancing health, social cohesion and sustainable human and economic development. We pledge to strengthen health systems towards the provision of equitable universal coverage. We call for the involvement of all relevant actors for coordinated multisectoral action to address urgently the health needs of the world's population.

140. We emphasize that HIV and AIDS, malaria, tuberculosis, influenza, polio and other communicable diseases remain serious global concerns, and we commit to redouble efforts to achieve universal access to HIV prevention, treatment, care and support and to eliminate mother-to-child transmission of HIV, as well as to renew and strengthen the fight against malaria, tuberculosis and neglected tropical diseases.

141. We acknowledge that the global burden and threat of non-communicable diseases constitutes one of the major challenges for sustainable development in the twenty-first century. We commit to strengthen health systems towards the provision of equitable, universal coverage and promote affordable access to prevention, treatment, care and support related to non-communicable diseases, especially cancer, cardiovascular diseases, chronic respiratory diseases and diabetes. We also commit to establish or strengthen multisectoral national policies for the prevention and control of non-communicable diseases. We recognize that reducing, inter alia, air, water and chemical pollution leads to positive effects on health.

142. We reaffirm the right to use, to the fullest extent, the provisions contained in the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement),³⁷ the Doha Declaration on the TRIPS Agreement and Public Health,³⁸ the decision of the General Council of the World Trade Organization of 30 August 2003 on the implementation of paragraph 6 of the Doha Declaration,³⁹ and, when formal acceptance procedures are completed, the amendment to article 31 of the TRIPS Agreement, which provide flexibilities for the protection of public health, and in particular to promote access to medicines for all and encourage the provision of assistance to developing countries in this regard.

143. We call for further collaboration and cooperation at the national and international levels to strengthen health systems through increased health financing, recruitment, development and training and retention of the health workforce, through improved distribution and access to safe, affordable, effective and quality medicines, vaccines and medical technologies, and by improving health infrastructure. We support the leadership role of the World Health Organization as the directing and coordinating authority on international health work.

144. We commit to systematically consider population trends and projections in our national, rural and urban development strategies and policies. Through forward-looking planning, we can seize the opportunities and address the challenges associated with demographic change, including migration.

145. We call for the full and effective implementation of the Beijing Platform for Action and the Programme of Action of the International Conference on Population and Development, and the outcomes of their review conferences, including the

³⁷ See *Legal Instruments Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations, done at Marrakesh on 15 April 1994* (GATT secretariat publication, Sales No. GATT/1994-7).

³⁸ World Trade Organization, document WT/MIN(01)/DEC/2.

³⁹ See World Trade Organization, document WT/L/540 and Corr.1.

commitments leading to sexual and reproductive health and the promotion and protection of all human rights in this context. We emphasize the need for the provision of universal access to reproductive health, including family planning and sexual health, and the integration of reproductive health into national strategies and programmes.

146. We commit to reduce maternal and child mortality and to improve the health of women, youth and children. We reaffirm our commitment to gender equality and to protect the rights of women, men and youth to have control over and decide freely and responsibly on matters related to their sexuality, including access to sexual and reproductive health, free from coercion, discrimination and violence. We will work actively to ensure that health systems provide the necessary information and health services addressing the sexual and reproductive health of women, including by working towards universal access to safe, effective, affordable and acceptable modern methods of family planning, as this is essential for women's health and advancing gender equality.

Promoting full and productive employment, decent work for all and social protection

147. We recognize that poverty eradication, full and productive employment and decent work for all, and social integration and protection are interrelated and mutually reinforcing, and that enabling environments to promote them need to be created at all levels.

148. We are concerned about labour market conditions and widespread deficits of available decent work opportunities, especially for young women and men. We urge all governments to address the global challenge of youth employment by developing and implementing strategies and policies that provide young people everywhere access to decent and productive work, as over the coming decades, decent jobs will need to be created to be able to ensure sustainable and inclusive development and reduce poverty.

149. We recognize the importance of job creation by investing in and developing sound, effective and efficient economic and social infrastructure and productive capacities for sustainable development and sustained, inclusive and equitable economic growth. We call upon countries to enhance infrastructure investment for sustainable development, and we agree to support United Nations funds, programmes and agencies to help to assist and promote the efforts of developing countries, particularly the least developed countries, in this regard.

150. We recognize the importance of job creation by adopting forward-looking macroeconomic policies that promote sustainable development and lead to sustained, inclusive and equitable economic growth, increase productive employment opportunities and promote agricultural and industrial development.

151. We emphasize the need to enhance employment and income opportunities for all, especially for women and men living in poverty, and in this regard we support national efforts to provide new job opportunities to the poor in both rural and urban areas, including support to small and medium-sized enterprises.

152. We recognize that workers should have access to education, skills, health care, social security, fundamental rights at work, social and legal protections, including occupational safety and health, and decent work opportunities. Governments, trade

unions, workers and employers all have a role to play in promoting decent work for all, and all should help young people to gain access to needed skills and employment opportunities, including in new and emerging sectors. Women and men should have equal access to opportunities to acquire job skills, as well as to worker protections. We recognize the importance of a just transition, including programmes to help workers to adjust to changing labour market conditions.

153. We also recognize that informal unpaid work, performed mostly by women, contributes substantially to human well-being and sustainable development. In this regard, we commit to work towards safe and decent working conditions and access to social protection and education.

154. We recognize that opportunities for decent work for all and job creation can be generated through, inter alia, public and private investments in scientific and technological innovation, public works in restoring, regenerating and conserving natural resources and ecosystems, and social and community services. We are encouraged by government initiatives to create jobs for poor people in restoring and managing natural resources and ecosystems, and we encourage the private sector to contribute to decent work for all and job creation for both women and men, and particularly for young people, including through partnerships with small and medium-sized enterprises and cooperatives. In this regard, we acknowledge the importance of efforts to promote the exchange of information and knowledge on decent work for all and job creation, including green jobs initiatives and related skills, and to facilitate the integration of relevant data into national economic and employment policies.

155. We encourage the sharing of experiences and best practices on ways to address the high levels of unemployment and underemployment, in particular among young people.

156. We stress the need to provide social protection to all members of society, fostering growth, resilience, social justice and cohesion, including those who are not employed in the formal economy. In this regard, we strongly encourage national and local initiatives aimed at providing social protection floors for all citizens. We support global dialogue on best practices for social protection programmes that takes into account the three dimensions of sustainable development and, in this regard, we note International Labour Organization Recommendation No. 202 concerning national floors of social protection.

157. We call upon States to promote and protect effectively the human rights and fundamental freedoms of all migrants regardless of migration status, especially those of women and children, and to address international migration through international, regional or bilateral cooperation and dialogue and a comprehensive and balanced approach, recognizing the roles and responsibilities of countries of origin, transit and destination in promoting and protecting the human rights of all migrants, and avoiding approaches that might aggravate their vulnerability.

Oceans and seas

158. We recognize that oceans, seas and coastal areas form an integrated and essential component of the Earth's ecosystem and are critical to sustaining it, and that international law, as reflected in the United Nations Convention on the Law of

the Sea,⁴⁰ provides the legal framework for the conservation and sustainable use of the oceans and their resources. We stress the importance of the conservation and sustainable use of the oceans and seas and of their resources for sustainable development, including through their contributions to poverty eradication, sustained economic growth, food security and creation of sustainable livelihoods and decent work, while at the same time protecting biodiversity and the marine environment and addressing the impacts of climate change. We therefore commit to protect, and restore, the health, productivity and resilience of oceans and marine ecosystems, to maintain their biodiversity, enabling their conservation and sustainable use for present and future generations, and to effectively apply an ecosystem approach and the precautionary approach in the management, in accordance with international law, of activities having an impact on the marine environment, to deliver on all three dimensions of sustainable development.

159. We recognize the importance of the Convention on the Law of the Sea to advancing sustainable development and its near universal adoption by States, and in this regard we urge all its parties to fully implement their obligations under the Convention.

160. We recognize the importance of building the capacity of developing countries to be able to benefit from the conservation and sustainable use of the oceans and seas and their resources, and in this regard we emphasize the need for cooperation in marine scientific research to implement the provisions of the Convention on the Law of the Sea and the outcomes of the major summits on sustainable development, as well as for the transfer of technology, taking into account the Intergovernmental Oceanographic Commission Criteria and Guidelines on the Transfer of Marine Technology.⁴¹

161. We support the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects, established under the auspices of the General Assembly, and look forward to the completion of its first global integrated assessment of the state of the marine environment by 2014 and the subsequent consideration by the Assembly. We encourage consideration by States of the assessment findings at appropriate levels.

162. We recognize the importance of the conservation and sustainable use of marine biodiversity beyond areas of national jurisdiction. We note the ongoing work under the auspices of the General Assembly of the Ad Hoc Open-ended Informal Working Group to study issues relating to the conservation and sustainable use of marine biological diversity beyond areas of national jurisdiction. Building on the work of the Ad Hoc Open-ended Informal Working Group and before the end of the sixty-ninth session of the General Assembly, we commit to address, on an urgent basis, the issue of the conservation and sustainable use of marine biological diversity beyond areas of national jurisdiction, including by taking a decision on the development of an international instrument under the Convention on the Law of the Sea.

163. We note with concern that the health of oceans and marine biodiversity are negatively affected by marine pollution, including marine debris, especially plastic, persistent organic pollutants, heavy metals and nitrogen-based compounds, from a number of marine and land-based sources, including shipping and land run-off. We

⁴⁰ United Nations, *Treaty Series*, vol. 1833, No. 31363.

⁴¹ See Intergovernmental Oceanographic Commission, document IOC/INF-1203.

commit to take action to reduce the incidence and impacts of such pollution on marine ecosystems, including through the effective implementation of relevant conventions adopted in the framework of the International Maritime Organization, and the follow-up of relevant initiatives such as the Global Programme of Action for the Protection of the Marine Environment from Land-based Activities,⁴² as well as the adoption of coordinated strategies to this end. We further commit to take action to, by 2025, based on collected scientific data, achieve significant reductions in marine debris to prevent harm to the coastal and marine environment.

164. We note the significant threat that alien invasive species pose to marine ecosystems and resources, and commit to implement measures to prevent the introduction and manage the adverse environmental impacts of alien invasive species, including, as appropriate, those adopted in the framework of the International Maritime Organization.

165. We note that sea-level rise and coastal erosion are serious threats for many coastal regions and islands, particularly in developing countries, and in this regard we call upon the international community to enhance its efforts to address these challenges.

166. We call for support to initiatives that address ocean acidification and the impacts of climate change on marine and coastal ecosystems and resources. In this regard, we reiterate the need to work collectively to prevent further ocean acidification, as well as to enhance the resilience of marine ecosystems and of the communities whose livelihoods depend on them, and to support marine scientific research, monitoring and observation of ocean acidification and particularly vulnerable ecosystems, including through enhanced international cooperation in this regard.

167. We stress our concern about the potential environmental impacts of ocean fertilization. In this regard, we recall the decisions related to ocean fertilization adopted by the relevant intergovernmental bodies, and resolve to continue addressing ocean fertilization with utmost caution, consistent with the precautionary approach.

168. We commit to intensify our efforts to meet the 2015 target as agreed to in the Johannesburg Plan of Implementation to maintain or restore stocks to levels that can produce maximum sustainable yield on an urgent basis. In this regard, we further commit to urgently take the measures necessary to maintain or restore all stocks at least to levels that can produce the maximum sustainable yield, with the aim of achieving these goals in the shortest time feasible, as determined by their biological characteristics. To achieve this, we commit to urgently develop and implement science-based management plans, including by reducing or suspending fishing catch and fishing effort commensurate with the status of the stock. We further commit to enhance action to manage by-catch, discards and other adverse ecosystem impacts from fisheries, including by eliminating destructive fishing practices. We also commit to enhance actions to protect vulnerable marine ecosystems from significant adverse impacts, including through the effective use of impact assessments. Such actions, including those through competent organizations, should be undertaken consistent with international law, the applicable international instruments and

⁴² See A/51/116, annex II.

relevant General Assembly resolutions and guidelines of the Food and Agriculture Organization of the United Nations.

169. We urge States parties to the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks⁴³ to fully implement that Agreement and to give, in accordance with Part VII of the Agreement, full recognition to the special requirements of developing States. Furthermore, we call upon all States to implement the Code of Conduct for Responsible Fisheries⁴⁴ and the international plans of action and technical guidelines of the Food and Agriculture Organization of the United Nations.

170. We acknowledge that illegal, unreported and unregulated fishing deprive many countries of a crucial natural resource and remain a persistent threat to their sustainable development. We recommit to eliminate illegal, unreported and unregulated fishing as advanced in the Johannesburg Plan of Implementation, and to prevent and combat these practices, including by the following: developing and implementing national and regional action plans in accordance with the Food and Agriculture Organization of the United Nations International Plan of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing; implementing, in accordance with international law, effective and coordinated measures by coastal States, flag States, port States, chartering nations and the States of nationality of the beneficial owners and others who support or engage in illegal, unreported and unregulated fishing by identifying vessels engaged in such fishing and by depriving offenders of the benefits accruing from it; as well as cooperating with developing countries to systematically identify needs and build capacity, including support for monitoring, control, surveillance, compliance and enforcement systems.

171. We call upon States that have signed the Food and Agriculture Organization of the United Nations Agreement on Port State Measures to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing⁴⁵ to expedite procedures for its ratification with a view to its early entry into force.

172. We recognize the need for transparency and accountability in fisheries management by regional fisheries management organizations. We recognize the efforts already made by those regional fisheries management organizations that have undertaken independent performance reviews, and call upon all regional fisheries management organizations to regularly undertake such reviews and make the results publicly available. We encourage implementation of the recommendations of such reviews and recommend that the comprehensiveness of those reviews be strengthened over time, as necessary.

173. We reaffirm our commitment in the Johannesburg Plan of Implementation to eliminate subsidies that contribute to illegal, unreported and unregulated fishing and overcapacity, taking into account the importance of this sector to developing

⁴³ United Nations, *Treaty Series*, vol. 2167, No. 37924.

⁴⁴ *International Fisheries Instruments with Index* (United Nations publication, Sales No. E.98.V.11), sect. III.

⁴⁵ Food and Agriculture Organization of the United Nations, *Report of the Conference of FAO, Thirty-sixth Session, Rome, 18-23 November 2009* (C 2009/REP and Corr.1-3), appendix E.

countries, and we reiterate our commitment to conclude multilateral disciplines on fisheries subsidies that will give effect to the mandates of the World Trade Organization Doha Development Agenda⁴⁶ and the Hong Kong Ministerial Declaration⁴⁷ to strengthen disciplines on subsidies in the fisheries sector, including through the prohibition of certain forms of fisheries subsidies that contribute to overcapacity and overfishing, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of World Trade Organization fisheries subsidies negotiation, taking into account the importance of the sector to development priorities, poverty reduction and livelihood and food security concerns. We encourage States to further improve the transparency and reporting of existing fisheries subsidies programmes through the World Trade Organization. Given the state of fisheries resources, and without prejudicing the Doha and Hong Kong ministerial mandates on fisheries subsidies or the need to conclude these negotiations, we encourage States to eliminate subsidies that contribute to overcapacity and overfishing, and to refrain from introducing new such subsidies or from extending or enhancing existing ones.

174. We urge the identification and mainstreaming by 2014 of strategies that further assist developing countries, in particular the least developed countries and small island developing States, in developing their national capacity to conserve, sustainably manage and realize the benefits of sustainable fisheries, including through improved market access for fish products from developing countries.

175. We commit to observe the need to ensure access to fisheries and the importance of access to markets, by subsistence, small-scale and artisanal fisherfolk and women fish workers, as well as indigenous peoples and their communities, particularly in developing countries, especially small island developing States.

176. We also recognize the significant economic, social and environmental contributions of coral reefs, in particular to islands and other coastal States, as well as the significant vulnerability of coral reefs and mangroves to impacts, including from climate change, ocean acidification, overfishing, destructive fishing practices and pollution. We support international cooperation with a view to conserving coral reef and mangrove ecosystems and realizing their social, economic and environmental benefits, as well as facilitating technical collaboration and voluntary information-sharing.

177. We reaffirm the importance of area-based conservation measures, including marine protected areas, consistent with international law and based on best available scientific information, as a tool for conservation of biological diversity and sustainable use of its components. We note decision X/2 of the tenth meeting of the Conference of the Parties to the Convention on Biological Diversity, held in Nagoya, Japan, from 18 to 29 October 2010, that, by 2020, 10 per cent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are to be conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures.⁴⁸

⁴⁶ See A/C.2/56/7, annex.

⁴⁷ World Trade Organization, document WT/MIN(05)/DEC.

⁴⁸ See United Nations Environment Programme, document UNEP/CBD/COP/10/27, annex.

Small island developing States

178. We reaffirm that small island developing States remain a special case for sustainable development in view of their unique and particular vulnerabilities, including their small size, remoteness, narrow resource and export base, and exposure to global environmental challenges and external economic shocks, including to a large range of impacts from climate change and potentially more frequent and intense natural disasters. We note with concern that the outcome of the five-year review of the Mauritius Strategy⁴⁹ concluded that small island developing States have made less progress than most other groupings, or even regressed, in economic terms, especially in terms of poverty reduction and debt sustainability. Sea-level rise and other adverse impacts of climate change continue to pose a significant risk to small island developing States and their efforts to achieve sustainable development and, for many, represent the gravest of threats to their survival and viability, including for some through the loss of territory. We also remain concerned that, while small island developing States have progressed in the areas of gender, health, education and the environment, their overall progress towards achieving the Millennium Development Goals has been uneven.

179. We call for continued and enhanced efforts to assist small island developing States in implementing the Barbados Programme of Action and the Mauritius Strategy. We also call for a strengthening of United Nations system support to small island developing States in keeping with the multiple ongoing and emerging challenges faced by these States in achieving sustainable development.

180. Building on the Barbados Programme of Action and the Mauritius Strategy, we call for the convening in 2014 of a third international conference on small island developing States, recognizing the importance of coordinated, balanced and integrated actions to address the sustainable development challenges facing small island developing States, and we invite the General Assembly at its sixty-seventh session to determine the modalities of the conference.

Least developed countries

181. We agree to effectively implement the Istanbul Programme of Action and to fully integrate its priority areas into the present framework for action, the broader implementation of which will contribute to the overarching goal of the Istanbul Programme of Action of enabling half the least developed countries to meet the criteria for graduation by 2020.

Landlocked developing countries

182. We invite Member States, including development partners, organizations of the United Nations system and other relevant international, regional and subregional organizations, to speed up further the implementation of the specific actions in the five priorities agreed upon in the Almaty Programme of Action and those contained in the declaration on the midterm review of the Almaty Programme of Action, in a better coordinated manner, in particular for the construction, maintenance and improvement of their transport, storage and other transit-related facilities, including alternative routes, completion of missing links and improved communications and

⁴⁹ See resolution 65/2.

energy infrastructure, so as to support the sustainable development of landlocked developing countries.

Africa

183. While we acknowledge that some progress has been made towards the fulfilment of international commitments related to Africa's development needs, we emphasize that significant challenges remain in achieving sustainable development on the continent.

184. We call upon the international community to enhance support and fulfil commitments to advance action in areas critical to Africa's sustainable development, and welcome the efforts by development partners to strengthen cooperation with the New Partnership for Africa's Development. We also welcome the progress made by African countries in deepening democracy, human rights, good governance and sound economic management, and encourage African countries to continue their efforts in this regard. We invite all Africa's development partners, in particular developed countries, to support African countries in strengthening human capacities and democratic institutions, consistent with their priorities and objectives, with a view to furthering Africa's development at all levels, including by facilitating the transfer of technology needed by African countries as mutually agreed. We recognize the continued efforts by African countries to create enabling environments for inclusive growth in support of sustainable development and the need for the international community to make continued efforts to increase the flow of new and additional resources for financing for development from all sources, public and private, domestic and foreign, to support these development efforts by African countries, and welcome the various important initiatives established between African countries and their development partners in this regard.

Regional efforts

185. We encourage coordinated regional actions to promote sustainable development. We recognize, in this regard, that important steps have been taken to promote sustainable development, in particular in the Arab region, Latin America and the Caribbean and the Asia-Pacific region, through relevant forums, including within the United Nations regional commissions. While noting that challenges remain in several areas, the international community welcomes these efforts, and the results already achieved, and calls for actions at all levels for their further development and implementation.

Disaster risk reduction

186. We reaffirm our commitment to the Hyogo Framework for Action 2005-2015: Building the Resilience of Nations and Communities to Disasters,⁵⁰ and call for States, the United Nations system, the international financial institutions, subregional, regional and international organizations and civil society to accelerate implementation of the Hyogo Framework for Action and the achievement of its goals. We call for disaster risk reduction and the building of resilience to disasters to be addressed with a renewed sense of urgency in the context of sustainable development and poverty eradication and, as appropriate, to be integrated into

⁵⁰ A/CONF.206/6 and Corr.1, chap. I, resolution 2.

policies, plans, programmes and budgets at all levels and considered within relevant future frameworks. We invite governments at all levels, as well as relevant subregional, regional and international organizations, to commit to adequate, timely and predictable resources for disaster risk reduction in order to enhance the resilience of cities and communities to disasters, according to their own circumstances and capacities.

187. We recognize the importance of early warning systems as part of effective disaster risk reduction at all levels in order to reduce economic and social damages, including the loss of human life, and in this regard encourage States to integrate such systems into their national disaster risk reduction strategies and plans. We encourage donors and the international community to enhance international cooperation in support of disaster risk reduction in developing countries, as appropriate, through technical assistance, technology transfer as mutually agreed, capacity-building and training programmes. We further recognize the importance of comprehensive hazard and risk assessments, and knowledge- and information-sharing, including reliable geospatial information. We commit to undertake and strengthen in a timely manner risk assessment and disaster risk reduction instruments.

188. We stress the importance of stronger interlinkages among disaster risk reduction, recovery and long-term development planning, and call for more coordinated and comprehensive strategies that integrate disaster risk reduction and climate change adaptation considerations into public and private investment, decision-making and the planning of humanitarian and development actions, in order to reduce risk, increase resilience and provide a smoother transition between relief, recovery and development. In this regard, we recognize the need to integrate a gender perspective into the design and implementation of all phases of disaster risk management.

189. We call for all relevant stakeholders, including governments, international, regional and subregional organizations, the private sector and civil society, to take appropriate and effective measures, taking into account the three dimensions of sustainable development, including by strengthening coordination and cooperation to reduce exposure to risk for the protection of people, and infrastructure and other national assets, from the impact of disasters, in line with the Hyogo Framework for Action and any post-2015 framework for disaster risk reduction.

Climate change

190. We reaffirm that climate change is one of the greatest challenges of our time, and we express profound alarm that emissions of greenhouse gases continue to rise globally. We are deeply concerned that all countries, particularly developing countries, are vulnerable to the adverse impacts of climate change and are already experiencing increased impacts, including persistent drought and extreme weather events, sea-level rise, coastal erosion and ocean acidification, further threatening food security and efforts to eradicate poverty and achieve sustainable development. In this regard, we emphasize that adaptation to climate change represents an immediate and urgent global priority.

191. We underscore that the global nature of climate change calls for the widest possible cooperation by all countries and their participation in an effective and appropriate international response, with a view to accelerating the reduction of

global greenhouse gas emissions. We recall that the United Nations Framework Convention on Climate Change provides that parties should protect the climate system for the benefit of present and future generations of humankind on the basis of equity and in accordance with their common but differentiated responsibilities and respective capabilities. We note with grave concern the significant gap between the aggregate effect of mitigation pledges by parties in terms of global annual emissions of greenhouse gases by 2020 and aggregate emission pathways consistent with having a likely chance of holding the increase in global average temperature below 2° C, or 1.5° C above pre-industrial levels. We recognize the importance of mobilizing funding from a variety of sources, public and private, bilateral and multilateral, including innovative sources of finance, to support nationally appropriate mitigation actions, adaptation measures, technology development and transfer and capacity-building in developing countries. In this regard, we welcome the launching of the Green Climate Fund, and call for its prompt operationalization so as to have an early and adequate replenishment process.

192. We urge parties to the United Nations Framework Convention on Climate Change and parties to the Kyoto Protocol thereto⁵¹ to fully implement their commitments, as well as decisions adopted under those agreements. In this regard, we will build upon the progress achieved, including at the seventeenth session of the Conference of the Parties to the Convention and the seventh session of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol, held in Durban, South Africa, from 28 November to 9 December 2011.

Forests

193. We highlight the social, economic and environmental benefits of forests to people and the contributions of sustainable forest management to the themes and objective of the United Nations Conference on Sustainable Development. We support cross-sectoral and cross-institutional policies promoting sustainable forest management. We reaffirm that the wide range of products and services that forests provide creates opportunities to address many of the most pressing sustainable development challenges. We call for enhanced efforts to achieve the sustainable management of forests, reforestation, restoration and afforestation, and we support all efforts that effectively slow, halt and reverse deforestation and forest degradation, including promoting trade in legally harvested forest products. We note the importance of such ongoing initiatives as reducing emissions from deforestation and forest degradation in developing countries, and the role of conservation, sustainable management of forests and enhancement of forest carbon stocks in developing countries. We call for increased efforts to strengthen forest governance frameworks and means of implementation, in accordance with the non-legally binding instrument on all types of forests,⁵² in order to achieve sustainable forest management. To this end, we commit to improving the livelihoods of people and communities by creating the conditions needed for them to sustainably manage forests, including by strengthening cooperation arrangements in the areas of finance, trade, transfer of environmentally sound technologies, capacity-building and governance, as well as by promoting secure land tenure, particularly with regard to

⁵¹ United Nations, *Treaty Series*, vol. 2303, No. 30822.

⁵² Resolution 62/98, annex.

decision-making and benefit-sharing, in accordance with national legislation and priorities.

194. We call for urgent implementation of the non-legally binding instrument on all types of forests and the ministerial declaration of the high-level segment of the ninth session of the United Nations Forum on Forests on the occasion of the launch of the International Year of Forests.⁵³

195. We recognize that the United Nations Forum on Forests, with its universal membership and comprehensive mandate, plays a vital role in addressing forest-related issues in a holistic and integrated manner and promoting international policy coordination and cooperation to achieve sustainable forest management. We invite the Collaborative Partnership on Forests to continue its support to the Forum and encourage stakeholders to remain actively engaged in the work of the Forum.

196. We stress the importance of integrating sustainable forest management objectives and practices into the mainstream of economic policy and decision-making, and to that end we commit to working through the governing bodies of member organizations of the Collaborative Partnership on Forests to integrate, as appropriate, the sustainable management of all types of forests into their strategies and programmes.

Biodiversity

197. We reaffirm the intrinsic value of biological diversity, as well as the ecological, genetic, social, economic, scientific, educational, cultural, recreational and aesthetic values of biological diversity and its critical role in maintaining ecosystems that provide essential services, which are critical foundations for sustainable development and human well-being. We recognize the severity of the global loss of biodiversity and the degradation of ecosystems, and emphasize that these undermine global development, affecting food security and nutrition, the provision of and access to water and the health of the rural poor and of people worldwide, including present and future generations. This highlights the importance of the conservation of biodiversity, enhancing habitat connectivity and building ecosystem resilience. We recognize that the traditional knowledge, innovations and practices of indigenous peoples and local communities make an important contribution to the conservation and sustainable use of biodiversity, and their wider application can support social well-being and sustainable livelihoods. We further recognize that indigenous peoples and local communities are often the most directly dependent on biodiversity and ecosystems and thus are often the most immediately affected by their loss and degradation.

198. We reiterate our commitment to the achievement of the three objectives of the Convention on Biological Diversity, and call for urgent actions that effectively reduce the rate of, halt and reverse the loss of biodiversity. In this context, we affirm the importance of implementing the Strategic Plan for Biodiversity 2011-2020 and achieving the Aichi Biodiversity Targets adopted by the Conference of the Parties to the Convention at its tenth meeting.⁴⁸

⁵³ *Official Records of the Economic and Social Council, 2011, Supplement No. 22 (E/2011/42)*, chap. I, sect. A, draft decision I; see also decision 66/543.

199. We note the adoption of the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from Their Utilization to the Convention on Biological Diversity,⁴⁸ and we invite parties to the Convention on Biological Diversity to ratify or accede to the Protocol, so as to ensure its entry into force at the earliest possible opportunity. We acknowledge the role of access and benefit-sharing arising from the utilization of genetic resources in contributing to the conservation and sustainable use of biological diversity, poverty eradication and environmental sustainability.

200. We welcome the strategy for resource mobilization in support of the achievement of the three objectives of the Convention on Biological Diversity, including the commitment to substantially increasing resources from all sources in support of biodiversity, in accordance with decisions taken at the Conference of the Parties at its tenth meeting.

201. We support mainstreaming the consideration of the socioeconomic impacts and benefits of the conservation and sustainable use of biodiversity and its components, as well as ecosystems that provide essential services, into relevant programmes and policies at all levels, in accordance with national legislation, circumstances and priorities. We encourage investments, through appropriate incentives and policies, which support the conservation and sustainable use of biological diversity and restoration of degraded ecosystems, consistent and in harmony with the Convention on Biological Diversity and other relevant international obligations.

202. We agree to promote international cooperation and partnerships, as appropriate, and information exchange, and in this context we welcome the United Nations Decade on Biodiversity, 2011-2020, for the purpose of encouraging the active involvement of all stakeholders in the conservation and sustainable use of biodiversity, as well as access to and the fair and equitable sharing of benefits arising from the utilization of genetic resources, with the vision of living in harmony with nature.

203. We recognize the important role of the Convention on International Trade in Endangered Species of Wild Fauna and Flora,⁵⁴ an international agreement that stands at the intersection between trade, the environment and development, promotes the conservation and sustainable use of biodiversity, should contribute to tangible benefits for local people and ensures that no species entering into international trade is threatened with extinction. We recognize the economic, social and environmental impacts of illicit trafficking in wildlife, where firm and strengthened action needs to be taken on both the supply and demand sides. In this regard, we emphasize the importance of effective international cooperation among relevant multilateral environmental agreements and international organizations. We further stress the importance of basing the listing of species on agreed criteria.

204. We take note of the establishment of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services, and invite an early commencement of its work in order to provide the best available policy-relevant information on biodiversity to assist decision makers.

⁵⁴ United Nations, *Treaty Series*, vol. 1760, No. 30619.

Desertification, land degradation and drought

205. We recognize the economic and social significance of good land management, including soil, particularly its contribution to economic growth, biodiversity, sustainable agriculture and food security, eradicating poverty, women's empowerment, addressing climate change and improving water availability. We stress that desertification, land degradation and drought are challenges of a global dimension and continue to pose serious challenges to the sustainable development of all countries, in particular developing countries. We also stress the particular challenges this poses for Africa, the least developed countries and the landlocked developing countries. In this regard, we express deep concern at the devastating consequences of cyclical drought and famine in Africa, in particular in the Horn of Africa and the Sahel region, and call for urgent action through short-, medium- and long-term measures at all levels.

206. We recognize the need for urgent action to reverse land degradation. In view of this, we will strive to achieve a land-degradation-neutral world in the context of sustainable development. This should act to catalyse financial resources from a range of public and private sources.

207. We reaffirm our resolve, in accordance with the United Nations Convention to Combat Desertification, to take coordinated action nationally, regionally and internationally, to monitor, globally, land degradation and restore degraded lands in arid, semi-arid and dry sub-humid areas. We resolve to support and strengthen the implementation of the Convention and the ten-year strategic plan and framework to enhance its implementation (2008-2018),⁵⁵ including by mobilizing adequate, predictable and timely financial resources. We note the importance of mitigating the effects of desertification, land degradation and drought, including by preserving and developing oases, restoring degraded lands, improving soil quality and improving water management, in order to contribute to sustainable development and poverty eradication. In this regard, we encourage and recognize the importance of partnerships and initiatives for the safeguarding of land resources. We also encourage capacity-building, extension training programmes and scientific studies and initiatives aimed at deepening understanding and raising awareness of the economic, social and environmental benefits of sustainable land management policies and practices.

208. We stress the importance of the further development and implementation of scientifically based, sound and socially inclusive methods and indicators for monitoring and assessing the extent of desertification, land degradation and drought, as well as the importance of efforts under way to promote scientific research and strengthen the scientific base of activities to address desertification and drought in accordance with the United Nations Convention to Combat Desertification. In this respect, we take note of the decision of the Conference of the Parties to the Convention at its tenth session, held in Changwon City, Republic of Korea, from 10 to 21 October 2011, to establish an ad hoc working group, taking into account regional balance, to discuss specific options for the provision of scientific advice to its parties.⁵⁶

⁵⁵ A/C.2/62/7, annex.

⁵⁶ See ICCD/COP(10)/31/Add.1, decision 20/COP.10.

209. We reiterate the need for cooperation through the sharing of climate and weather information and forecasting and early warning systems related to desertification, land degradation and drought, as well as to dust storms and sandstorms, at the global, regional and subregional levels. In this regard, we invite States and relevant organizations to cooperate in the sharing of related information, forecasting and early warning systems.

Mountains

210. We recognize that the benefits derived from mountain regions are essential for sustainable development. Mountain ecosystems play a crucial role in providing water resources to a large portion of the world's population; fragile mountain ecosystems are particularly vulnerable to the adverse impacts of climate change, deforestation and forest degradation, land use change, land degradation and natural disasters; and mountain glaciers around the world are retreating and getting thinner, with increasing impacts on the environment and human well-being.

211. We further recognize that mountains are often home to communities, including indigenous peoples and local communities, that have developed sustainable uses of mountain resources. These communities are, however, often marginalized, and we therefore stress that continued effort will be required to address poverty, food security and nutrition, social exclusion and environmental degradation in these areas. We invite States to strengthen cooperative action with effective involvement and sharing of experience of all relevant stakeholders, by strengthening existing arrangements, agreements and centres of excellence for sustainable mountain development, as well as exploring new arrangements and agreements, as appropriate.

212. We call for greater efforts towards the conservation of mountain ecosystems, including their biodiversity. We encourage States to adopt a long-term vision and holistic approaches, including by incorporating mountain-specific policies into national sustainable development strategies, which could include, inter alia, poverty reduction plans and programmes for mountain areas, particularly in developing countries. In this regard, we call for international support for sustainable mountain development in developing countries.

Chemicals and waste

213. We recognize that the sound management of chemicals is crucial for the protection of human health and the environment. We further recognize that growing global production and use of chemicals and their prevalence in the environment calls for increased international cooperation. We reaffirm our aim to achieve, by 2020, the sound management of chemicals throughout their life cycle and of hazardous waste in ways that lead to minimization of significant adverse effects on human health and the environment, as set out in the Johannesburg Plan of Implementation. We also reaffirm our commitment to an approach for the sound management of chemicals and waste, at all levels, that responds in an effective, efficient, coherent and coordinated manner to new and emerging issues and challenges, and encourage further progress across countries and regions in order to fill the gaps in the implementation of commitments.

214. We call for the effective implementation and strengthening of the Strategic Approach to International Chemicals Management⁵⁷ as part of a robust, coherent, effective and efficient system for the sound management of chemicals throughout their life cycle, including to respond to emerging challenges.

215. We are deeply concerned that many countries, in particular the least developed countries, lack the capacity for sound management of chemicals and waste throughout their life cycles. Additional efforts are needed to enhance work towards strengthening capacities, including through partnerships, technical assistance and improved governance structures. We encourage countries and organizations which have made progress towards achieving the goal of sound management of chemicals by 2020 to assist other countries by sharing knowledge, experience and best practices.

216. We commend the increased coordination and cooperation among chemical and waste conventions, namely the Basel Convention, the Rotterdam Convention and the Stockholm Convention, and encourage continued enhanced coordination and cooperation among them and with the Strategic Approach to International Chemicals Management. We take note of the important role of the regional and coordinating centres of the Basel Convention and of those of the Stockholm Convention.

217. We commend existing public-private partnerships, and call for continued, new and innovative public-private partnerships among industry, governments, academia and other non-governmental stakeholders, aiming to enhance capacity and technology for environmentally sound chemicals and waste management, including for waste prevention.

218. We recognize the importance of adopting a life-cycle approach and of further development and implementation of policies for resource efficiency and environmentally sound waste management. We therefore commit to further reduce, reuse and recycle waste (the 3Rs) and to increase energy recovery from waste, with a view to managing the majority of global waste in an environmentally sound manner and, where possible, as a resource. Solid wastes, such as electronic waste and plastics, pose particular challenges, which should be addressed. We call for the development and enforcement of comprehensive national and local waste management policies, strategies, laws and regulations.

219. We urge countries and other stakeholders to take all possible measures to prevent the unsound management of hazardous wastes and their illegal dumping, particularly in countries where the capacity to deal with these wastes is limited, in a manner consistent with the obligations of countries under relevant international instruments. In this context, we welcome the relevant decisions taken at the tenth meeting of the Conference of the Parties to the Basel Convention, held in Cartagena, Colombia, from 17 to 21 October 2011.⁵⁸

220. We recognize the importance of science-based assessments of the risks posed by chemicals to human beings and the environment and of reducing human and environmental exposure to hazardous chemicals. We encourage the development of environmentally sound and safer alternatives to hazardous chemicals in products and processes. To this end, we encourage, inter alia, life-cycle assessment, public

⁵⁷ See the report of the International Conference on Chemicals Management on the work of its first session (SAICM/ICCM.1/7), annexes I-III.

⁵⁸ See United Nations Environment Programme, document UNEP/CHW.10/28, annex I.

information, extended producer responsibility, research and development, sustainable design and knowledge-sharing, as appropriate.

221. We welcome the ongoing negotiating process on a global legally binding instrument on mercury to address the risks to human health and the environment, and call for a successful outcome to the negotiations.

222. We recognize that the phase-out of ozone-depleting substances is resulting in a rapid increase in the use and release of high global warming potential hydrofluorocarbons to the environment. We support a gradual phase-down in the consumption and production of hydrofluorocarbons.

223. We acknowledge that sustainable and adequate long-term funding is a key element for the sound management of chemicals and waste, in particular in developing countries. In this regard, we welcome the consultative process on financing options for chemicals and waste, initiated to consider the need for heightened efforts to increase the political priority accorded to sound management of chemicals and waste, and the increased need for sustainable, predictable, adequate and accessible financing for the chemicals and waste agenda. We look forward to the forthcoming proposals by the Executive Director of the United Nations Environment Programme, which will be considered by the International Conference on Chemicals Management and at the twenty-seventh session of the Governing Council of the United Nations Environment Programme, which will be held in Nairobi, from 18 to 22 February 2013.

Sustainable consumption and production

224. We recall the commitments made in the Rio Declaration, Agenda 21 and the Johannesburg Plan of Implementation on sustainable consumption and production and, in particular, the request in chapter III of the Johannesburg Plan of Implementation to encourage and promote the development of a ten-year framework of programmes. We recognize that fundamental changes in the way societies consume and produce are indispensable for achieving global sustainable development.

225. Countries reaffirm the commitments they have made to phase out harmful and inefficient fossil fuel subsidies that encourage wasteful consumption and undermine sustainable development. We invite others to consider rationalizing inefficient fossil fuel subsidies by removing market distortions, including restructuring taxation and phasing out harmful subsidies, where they exist, to reflect their environmental impacts, with such policies taking fully into account the specific needs and conditions of developing countries, with the aim of minimizing the possible adverse impacts on their development and in a manner that protects the poor and the affected communities.

226. We adopt the ten-year framework of programmes on sustainable consumption and production patterns,⁵⁹ and highlight the fact that the programmes included in the framework are voluntary. We invite the General Assembly, at its sixty-seventh session, to designate a Member State body to take any necessary steps to fully operationalize the framework.

⁵⁹ A/CONF.216/5, annex.

Mining

227. We acknowledge that minerals and metals make a major contribution to the world economy and modern societies. We note that mining industries are important to all countries with mineral resources, in particular developing countries. We also note that mining offers the opportunity to catalyse broad-based economic development, reduce poverty and assist countries in meeting internationally agreed development goals, including the Millennium Development Goals, when managed effectively and properly. We acknowledge that countries have the sovereign right to develop their mineral resources according to their national priorities and a responsibility regarding the exploitation of resources, as described in the Rio Principles. We further acknowledge that mining activities should maximize social and economic benefits, as well as effectively address negative environmental and social impacts. In this regard, we recognize that governments need strong capacities to develop, manage and regulate their mining industries, in the interest of sustainable development.

228. We recognize the importance of strong and effective legal and regulatory frameworks, policies and practices for the mining sector that deliver economic and social benefits and include effective safeguards that reduce social and environmental impacts, as well as conserve biodiversity and ecosystems, including during post-mining closure. We call upon governments and businesses to promote the continuous improvement of accountability and transparency, as well as the effectiveness of the relevant existing mechanisms to prevent illicit financial flows from mining activities.

Education

229. We reaffirm our commitments to the right to education, and in this regard we commit to strengthen international cooperation to achieve universal access to primary education, particularly for developing countries. We further reaffirm that full access to quality education at all levels is an essential condition for achieving sustainable development, poverty eradication, gender equality and women's empowerment, as well as human development, for the attainment of the internationally agreed development goals, including the Millennium Development Goals, and for the full participation of both women and men, in particular young people. In this regard, we stress the need for ensuring equal access to education for persons with disabilities, indigenous peoples, local communities, ethnic minorities and people living in rural areas.

230. We recognize that the younger generations are the custodians of the future, and the need for better quality and access to education beyond the primary level. We therefore resolve to improve the capacity of our education systems to prepare people to pursue sustainable development, including through enhanced teacher training, the development of sustainability curricula, the development of training programmes that prepare students for careers in fields related to sustainability, and more effective use of information and communications technologies to enhance learning outcomes. We call for enhanced cooperation among schools, communities and authorities in efforts to promote access to quality education at all levels.

231. We encourage Member States to promote sustainable development awareness among youth, inter alia by promoting programmes for non-formal education in accordance with the goals of the United Nations Decade of Education for Sustainable Development (2005-2014).

232. We emphasize the importance of greater international cooperation to improve access to education, including by building and strengthening education infrastructure and increasing investment in education, particularly investment to improve the quality of education for all in developing countries. We encourage international educational exchanges and partnerships, including the creation of fellowships and scholarships to help to achieve global education goals.

233. We resolve to promote education for sustainable development and to integrate sustainable development more actively into education beyond the Decade of Education for Sustainable Development.

234. We strongly encourage educational institutions to consider adopting good practices in sustainability management on their campuses and in their communities, with the active participation of, inter alia, students, teachers and local partners, and teaching sustainable development as an integrated component across disciplines.

235. We underscore the importance of supporting educational institutions, especially higher educational institutions in developing countries, to carry out research and innovation for sustainable development, including in the field of education, and to develop quality and innovative programmes, including entrepreneurship and business skills training, professional, technical and vocational training and lifelong learning, geared to bridging skills gaps for advancing national sustainable development objectives.

Gender equality and women's empowerment

236. We reaffirm the vital role of women and the need for their full and equal participation and leadership in all areas of sustainable development, and decide to accelerate the implementation of our respective commitments in this regard as contained in the Convention on the Elimination of All Forms of Discrimination against Women,⁶⁰ as well as Agenda 21, the Beijing Declaration and Platform for Action and the United Nations Millennium Declaration.

237. We recognize that, although progress on gender equality has been made in some areas, the potential of women to engage in, contribute to and benefit from sustainable development as leaders, participants and agents of change has not been fully realized, owing to, inter alia, persistent social, economic and political inequalities. We support prioritizing measures to promote gender equality and women's empowerment in all spheres of our societies, including the removal of barriers to their full and equal participation in decision-making and management at all levels, and we emphasize the impact of setting specific targets and implementing temporary measures, as appropriate, for substantially increasing the number of women in leadership positions, with the aim of achieving gender parity.

238. We resolve to unlock the potential of women as drivers of sustainable development, including through the repeal of discriminatory laws and the removal of formal barriers, ensuring equal access to justice and legal support, the reform of institutions to ensure competence and capacity for gender mainstreaming and the development and adoption of innovative and special approaches to address informal, harmful practices that act as barriers to gender equality. In this regard, we commit to creating an enabling environment for improving the situation of women and girls

⁶⁰ United Nations, *Treaty Series*, vol. 1249, No. 20378.

everywhere, particularly in rural areas and local communities and among indigenous peoples and ethnic minorities.

239. We commit to actively promote the collection, analysis and use of gender-sensitive indicators and sex-disaggregated data in policy, programme design and monitoring frameworks, in accordance with national circumstances and capacities, in order to deliver on the promise of sustainable development for all.

240. We are committed to equal rights and opportunities for women in political and economic decision-making and resource allocation and to removing any barriers that prevent women from being full participants in the economy. We resolve to undertake legislative and administrative reforms to give women equal rights with men to economic resources, including access to ownership and control over land and other forms of property, credit, inheritance, natural resources and appropriate new technology.

241. We are committed to promote the equal access of women and girls to education, basic services, economic opportunities and health-care services, including addressing women's sexual and reproductive health, and ensuring universal access to safe, effective, affordable and acceptable modern methods of family planning. In this regard, we reaffirm our commitment to implement the Programme of Action of the International Conference on Population and Development and the key actions for the further implementation of the Programme of Action.

242. We recognize that gender equality and the effective participation of women are important for effective action on all aspects of sustainable development.

243. We support the work of the United Nations system, including the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), in promoting and achieving gender equality and women's empowerment in all aspects of life, including with respect to the linkages between gender equality and women's empowerment and the promotion of sustainable development. We support the work of UN-Women in leading, coordinating and promoting the accountability of the United Nations system in this regard.

244. We invite donors and international organizations, including the United Nations system organizations, as well as the international financial institutions, regional banks and major groups, including the private sector, to integrate fully commitments and considerations on gender equality and women's empowerment and to ensure the participation of women and effective gender mainstreaming in their decision-making and full programming cycle. We invite them to play a supportive role in the efforts of developing countries to integrate fully commitments and considerations on gender equality and women's empowerment and ensure the participation of women and effective gender mainstreaming in their decision-making, programme planning, budgeting and implementation, in accordance with national legislation, priorities and capacities.

B. Sustainable development goals

245. We underscore that the Millennium Development Goals are a useful tool in focusing achievement of specific development gains as part of a broad development vision and framework for the development activities of the United Nations, for national priority-setting and for mobilization of stakeholders and resources towards

common goals. We therefore remain firmly committed to their full and timely achievement.

246. We recognize that the development of goals could also be useful for pursuing focused and coherent action on sustainable development. We further recognize the importance and utility of a set of sustainable development goals, based on Agenda 21 and the Johannesburg Plan of Implementation, which fully respect all the Rio Principles, taking into account different national circumstances, capacities and priorities, are consistent with international law, build upon commitments already made and contribute to the full implementation of the outcomes of all major summits in the economic, social and environmental fields, including the present outcome document. The goals should address and incorporate in a balanced way all three dimensions of sustainable development and their interlinkages. They should be coherent with and integrated into the United Nations development agenda beyond 2015, thus contributing to the achievement of sustainable development and serving as a driver for implementation and mainstreaming of sustainable development in the United Nations system as a whole. The development of these goals should not divert focus or effort from the achievement of the Millennium Development Goals.

247. We also underscore that sustainable development goals should be action-oriented, concise and easy to communicate, limited in number, aspirational, global in nature and universally applicable to all countries, while taking into account different national realities, capacities and levels of development and respecting national policies and priorities. We also recognize that the goals should address and be focused on priority areas for the achievement of sustainable development, being guided by the present outcome document. Governments should drive implementation with the active involvement of all relevant stakeholders, as appropriate.

248. We resolve to establish an inclusive and transparent intergovernmental process on sustainable development goals that is open to all stakeholders, with a view to developing global sustainable development goals to be agreed by the General Assembly. An open working group shall be constituted no later than at the opening of the sixty-seventh session of the Assembly and shall comprise thirty representatives, nominated by Member States from the five United Nations regional groups, with the aim of achieving fair, equitable and balanced geographical representation. At the outset, this open working group will decide on its methods of work, including developing modalities to ensure the full involvement of relevant stakeholders and expertise from civil society, the scientific community and the United Nations system in its work, in order to provide a diversity of perspectives and experience. It will submit a report, to the Assembly at its sixty-eighth session, containing a proposal for sustainable development goals for consideration and appropriate action.

249. The process needs to be coordinated and coherent with the processes to consider the post-2015 development agenda. The initial input to the work of the working group will be provided by the Secretary-General, in consultation with national Governments. In order to provide technical support to the process and to the work of the working group, we request the Secretary-General to ensure all necessary input and support to this work from the United Nations system, including by establishing an inter-agency technical support team and expert panels, as needed, drawing on all relevant expert advice. Reports on the progress of work will be made regularly to the General Assembly.

250. We recognize that progress towards the achievement of the goals needs to be assessed and accompanied by targets and indicators, while taking into account different national circumstances, capacities and levels of development.

251. We recognize that there is a need for global, integrated and scientifically based information on sustainable development. In this regard, we request the relevant bodies of the United Nations system, within their respective mandates, to support the regional economic commissions in collecting and compiling national inputs in order to inform this global effort. We further commit to mobilizing financial resources and capacity-building, particularly for developing countries, to achieve this endeavour.

VI. Means of implementation

252. We reaffirm that the means of implementation identified in Agenda 21, the Programme for the Further Implementation of Agenda 21, the Johannesburg Plan of Implementation, the Monterrey Consensus and the Doha Declaration on Financing for Development are indispensable for achieving the full and effective translation of sustainable development commitments into tangible sustainable development outcomes. We reiterate that each country has primary responsibility for its own economic and social development and that the role of national policies, domestic resources and development strategies cannot be overemphasized. We reaffirm that developing countries need additional resources for sustainable development. We recognize the need for significant mobilization of resources from a variety of sources and the effective use of financing in order to promote sustainable development. We acknowledge that good governance and the rule of law at the national and international levels are essential for sustained, inclusive and equitable economic growth, sustainable development and the eradication of poverty and hunger.

A. Finance

253. We call upon all countries to prioritize sustainable development in the allocation of resources in accordance with national priorities and needs, and we recognize the crucial importance of enhancing financial support from all sources for sustainable development for all countries, in particular developing countries. We recognize the importance of international, regional and national financial mechanisms, including those accessible to subnational and local authorities, to the implementation of sustainable development programmes, and call for their strengthening and implementation. New partnerships and innovative sources of financing can play a role in complementing sources of financing for sustainable development. We encourage their further exploration and use, alongside the traditional means of implementation.

254. We recognize the need for significant mobilization of resources from a variety of sources and the effective use of financing, in order to give strong support to developing countries in their efforts to promote sustainable development, including through actions undertaken in accordance with the outcome of the United Nations Conference on Sustainable Development and for achieving sustainable development goals.

255. We agree to establish an intergovernmental process under the auspices of the General Assembly, with technical support from the United Nations system and in open and broad consultation with relevant international and regional financial

institutions and other relevant stakeholders. The process will assess financing needs, consider the effectiveness, consistency and synergies of existing instruments and frameworks and evaluate additional initiatives, with a view to preparing a report proposing options on an effective sustainable development financing strategy to facilitate the mobilization of resources and their effective use in achieving sustainable development objectives.

256. An intergovernmental committee, comprising thirty experts nominated by regional groups, with equitable geographical representation, will implement this process, concluding its work by 2014.

257. We request the General Assembly to consider the report of the intergovernmental committee and take appropriate action.

258. We recognize that the fulfilment of all commitments related to official development assistance is crucial, including the commitments by many developed countries to achieve the target of 0.7 per cent of gross national product for official development assistance to developing countries by 2015, as well as a target of 0.15 to 0.20 per cent of gross national product for official development assistance to the least developed countries. To reach their agreed timetables, donor countries should take all necessary and appropriate measures to raise the rate of aid disbursements in order to meet their existing commitments. We urge those developed countries that have not yet done so to make additional concrete efforts towards the target of 0.7 per cent of gross national product for official development assistance to developing countries, including the specific target of 0.15 to 0.20 per cent of gross national product for official development assistance to the least developed countries, in accordance with their commitments. To build on progress achieved in ensuring that official development assistance is used effectively, we stress the importance of democratic governance, improved transparency and accountability, and managing for results. We strongly encourage all donors to establish, as soon as possible, rolling indicative timetables that illustrate how they aim to reach their goals, in accordance with their respective budget allocation process. We stress the importance of mobilizing greater domestic support in developed countries towards the fulfilment of their commitments, including by raising public awareness, providing data on the development impact of aid provided and demonstrating tangible results.

259. We welcome increasing efforts to improve the quality of official development assistance and to increase its development impact. We also recognize the need to improve development effectiveness, increase programme-based approaches, use country systems for activities managed by the public sector, reduce transaction costs and improve mutual accountability and transparency, and in this regard we call upon all donors to untie aid to the maximum extent. We will further make development more effective and predictable by providing developing countries with regular and timely indicative information on planned support in the medium term. We recognize the importance of efforts by developing countries to strengthen leadership of their own development, national institutions, systems and capacity to ensure the best results for effective development by engaging with parliaments and citizens in shaping those policies and deepening engagement with civil society organizations. We should also bear in mind that there is no one-size-fits-all formula that will guarantee development effectiveness. The specific situation of each country needs to be fully considered.

260. We note that the aid architecture has changed significantly in the current decade. New aid providers and novel partnership approaches, which utilize new modalities of cooperation, have contributed to increasing the flow of resources. Further, the interplay of development assistance with private investment, trade and new development actors provides new opportunities for aid to leverage private resource flows. We reiterate our support for South-South cooperation, as well as triangular cooperation, which provide much-needed additional resources to the implementation of development programmes. We recognize the importance and different history and particularities of South-South cooperation, and stress that South-South cooperation should be seen as an expression of solidarity and cooperation between countries, based on their shared experiences and objectives. Both forms of cooperation support a development agenda that addresses the particular needs and expectations of developing countries. We also recognize that South-South cooperation complements rather than substitutes for North-South cooperation. We acknowledge the role played by middle-income developing countries as providers and recipients of development cooperation.

261. We invite the international financial institutions, within their respective mandates, to continue providing financial resources, including through specific mechanisms for the promotion of sustainable development and poverty eradication in developing countries.

262. We recognize that greater coherence and coordination among the various funding mechanisms and initiatives related to sustainable development are crucial. We reiterate the importance of ensuring that developing countries have steady and predictable access to adequate financing from all sources to promote sustainable development.

263. We recognize that ongoing serious global financial and economic challenges carry the possibility of undoing years of hard work and gains made in relation to the debt of developing countries. We further recognize the need to assist developing countries in ensuring long-term debt sustainability through coordinated policies aimed at fostering debt financing, debt relief and debt restructuring, as appropriate.

264. We stress the need for adequate funding for the operational activities of the United Nations development system, as well as the need to make funding more predictable, effective and efficient as part of wider efforts to mobilize new, additional and predictable resources to achieve the objectives that we have set forth in the present outcome document.

265. We recognize the important achievements of the Global Environment Facility over the past twenty years in funding environmental projects and welcome important reform processes that the Facility has carried out during recent years, and we call for its further improvement and encourage the Facility to take additional steps, within its mandate, to make resources more accessible to meet country needs for the national implementation of their international environmental commitments. We support further simplification of procedures and assistance to developing countries, in particular in assisting the least developed countries, Africa and small island developing States in accessing resources from the Facility, and enhanced coordination with other instruments and programmes focusing on environmentally sustainable development.

266. We stress that fighting corruption and illicit financial flows at both the national and international levels is a priority and that corruption is a serious barrier to

effective resource mobilization and allocation, and diverts resources away from activities that are vital for poverty eradication, the fight against hunger and sustainable development. We are determined to take urgent and decisive steps to continue to combat corruption in all its manifestations, which requires strong institutions at all levels, and urge all States that have not yet done so to consider ratifying or acceding to the United Nations Convention against Corruption⁶¹ and begin its implementation.

267. We consider that innovative financing mechanisms can make a positive contribution in assisting developing countries to mobilize additional resources for financing for development on a voluntary basis. Such financing should supplement and not be a substitute for traditional sources of financing. While recognizing the considerable progress in innovative sources of financing for development, we call for a scaling-up of present initiatives, where appropriate.

268. We recognize that a dynamic, inclusive, well-functioning and socially and environmentally responsible private sector is a valuable instrument that can offer a crucial contribution to economic growth and reducing poverty and promoting sustainable development. In order to foster private sector development, we shall continue to pursue appropriate national policy and regulatory frameworks in a manner consistent with national laws to encourage public and private initiatives, including at the local level, to foster a dynamic and well-functioning business sector, and to facilitate entrepreneurship and innovation, including among women, the poor and the vulnerable. We will work to improve income growth and distribution, inter alia, by raising productivity, empowering women, protecting labour rights and taxation. We recognize that the appropriate role of government in relation to the promotion and regulation of the private sector will vary from country to country, depending on national circumstances.

B. Technology

269. We emphasize the importance of technology transfer to developing countries, and recall the provisions on technology transfer, finance, access to information and intellectual property rights as agreed in the Johannesburg Plan of Implementation, in particular its call to promote, facilitate and finance, as appropriate, access to and the development, transfer and diffusion of environmentally sound technologies and corresponding know-how, in particular to developing countries, on favourable terms, including on concessional and preferential terms, as mutually agreed. We also take note of the further evolution of discussions and agreements on these issues since the adoption of the Plan of Implementation.

270. We stress the importance of access by all countries to environmentally sound technologies, new knowledge, know-how and expertise. We further stress the importance of cooperative action on technology innovation, research and development. We agree to explore modalities in the relevant forums for enhanced access to environmentally sound technologies by developing countries.

271. We underline the need for enabling environments for the development, adaptation, dissemination and transfer of environmentally sound technologies. In this context, we note the role of foreign direct investment, international trade and international cooperation in the transfer of environmentally sound technologies. We

⁶¹ Ibid., vol. 2349, No. 42146.

engage in our countries as well as through international cooperation to promote investment in science, innovation and technology for sustainable development.

272. We recognize the importance of strengthened national, scientific and technological capacities for sustainable development. This can help countries, especially developing countries, to develop their own innovative solutions, scientific research and new, environmentally sound technologies, with the support of the international community. To this end, we support building science and technology capacity, with both women and men as contributors and beneficiaries, including through collaboration among research institutions, universities, the private sector, governments, non-governmental organizations and scientists.

273. We request relevant United Nations agencies to identify options for a facilitation mechanism that promotes the development, transfer and dissemination of clean and environmentally sound technologies by, inter alia, assessing the technology needs of developing countries, options to address those needs and capacity-building. We request the Secretary-General, on the basis of the options identified and taking into account existing models, to make recommendations regarding the facilitation mechanism to the General Assembly at its sixty-seventh session.

274. We recognize the importance of space-technology-based data, in situ monitoring and reliable geospatial information for sustainable development policymaking, programming and project operations. In this context, we note the relevance of global mapping, and recognize the efforts in developing global environmental observing systems, including by the Eye on Earth network and through the Global Earth Observation System of Systems. We recognize the need to support developing countries in their efforts to collect environmental data.

275. We recognize the importance of strengthening international, regional and national capacities in research and technology assessment, especially in view of the rapid development and possible deployment of new technologies that may also have unintended negative impacts, in particular on biodiversity and health, or other unforeseen consequences.

276. We recognize the need to facilitate informed policy decision-making on sustainable development issues and, in this regard, to strengthen the science-policy interface.

C. Capacity-building

277. We emphasize the need for enhanced capacity-building for sustainable development and, in this regard, we call for the strengthening of technical and scientific cooperation, including North-South, South-South and triangular cooperation. We reiterate the importance of human resource development, including training, the exchange of experiences and expertise, knowledge transfer and technical assistance for capacity-building, which involves strengthening institutional capacity, including planning, management and monitoring capacities.

278. We call for the continued and focused implementation of the Bali Strategic Plan for Technology Support and Capacity-building, adopted by the United Nations Environment Programme.⁶²

⁶² UNEP/GC.23/6/Add.1 and Corr.1, annex.

279. We encourage the participation and representation of men and women scientists and researchers from developing and developed countries in processes related to global environmental and sustainable development assessment and monitoring, with the purpose of enhancing national capabilities and the quality of research for policy- and decision-making processes.

280. We invite all relevant agencies of the United Nations system and other relevant international organizations to support developing countries and, in particular, the least developed countries in capacity-building for developing resource-efficient and inclusive economies, including by:

- (a) Sharing sustainable practices in various economic sectors;
- (b) Enhancing knowledge and capacity to integrate disaster risk reduction and resilience into development plans;
- (c) Supporting North-South, South-South and triangular cooperation for the transition to a resource-efficient economy;
- (d) Promoting public-private partnerships.

D. Trade

281. We reaffirm that international trade is an engine for development and sustained economic growth, and also reaffirm the critical role that a universal, rules-based, open, non-discriminatory and equitable multilateral trading system, as well as meaningful trade liberalization, can play in stimulating economic growth and development worldwide, thereby benefiting all countries at all stages of development as they advance towards sustainable development. In this context, we remain focused on achieving progress in addressing a set of important issues, such as, inter alia, trade-distorting subsidies and trade in environmental goods and services.

282. We urge the members of the World Trade Organization to redouble their efforts to achieve an ambitious, balanced and development-oriented conclusion to the Doha Development Agenda, while respecting the principles of transparency, inclusiveness and consensual decision-making, with a view to strengthening the multilateral trading system. In order to effectively participate in the work programme of the World Trade Organization and fully realize trade opportunities, developing countries need the assistance and enhanced cooperation of all relevant stakeholders.

E. Registry of commitments

283. We welcome the commitments voluntarily entered into at the United Nations Conference on Sustainable Development and throughout 2012 by all stakeholders and their networks to implement concrete policies, plans, programmes, projects and actions to promote sustainable development and poverty eradication. We invite the Secretary-General to compile these commitments and facilitate access to other registries that have compiled commitments, in an Internet-based registry. The registry should make information about the commitments fully transparent and accessible to the public, and it should be periodically updated.

Resolution II

Expression of thanks to the people and Government of Brazil

The United Nations Conference on Sustainable Development,

Having met in Rio de Janeiro, Brazil, from 20 to 22 June 2012, at the invitation of the Government of Brazil,

1. *Expresses its deep appreciation* to Her Excellency Dilma Rousseff, President of the Federative Republic of Brazil, for her outstanding contribution, as President of the United Nations Conference on Sustainable Development, to the successful outcome of the Conference;

2. *Expresses its profound gratitude* to the Government of Brazil for having made it possible for the Conference to be held in Brazil and for the excellent facilities, staff and services so graciously placed at its disposal;

3. *Requests* the Government of Brazil to convey to the people of Brazil and to the city of Rio de Janeiro the gratitude of the Conference for the hospitality and warm welcome extended to the participants.

Resolution III
Credentials of representatives to the United Nations Conference on Sustainable Development

The United Nations Conference on Sustainable Development,

Having considered the report of the Credentials Committee and the recommendation contained therein,¹

Approves the report of the Credentials Committee.

¹ A/CONF.216/6, para. 13.

Chapter II

Organization of work and other organizational matters

A. Date and place of the Conference

2. The United Nations Conference on Sustainable Development was held in Rio de Janeiro, Brazil, from 20 to 22 June 2012, pursuant to General Assembly resolution 66/197. During that period, the Conference held six plenary meetings.

B. Opening of the Conference

3. The United Nations Conference on Sustainable Development was opened on 20 June 2012 by the Secretary-General of the United Nations.

4. At the formal opening, during the 1st plenary meeting, on 20 June, after procedural and organizational matters, a statement was made by the President of the Economic and Social Council, Miloš Koterec (Slovakia).

5. At the same meeting, statements were made by the representatives of the following major groups: women, children and youth, indigenous people, non-governmental organizations, local authorities, workers and trade unions, business and industry, the scientific and technological community, and farmers.

6. At the ceremonial opening, during the 2nd plenary meeting, on 20 June, statements were made by the President of the Conference, Dilma Rousseff; the Secretary-General of the United Nations, Ban Ki-moon; the President of the sixty-sixth session of the General Assembly, Nassir Abdulaziz Al-Nasser; and the Secretary-General of the Conference, Sha Zukang.

C. Election of the President and other officers of the Conference

7. At its 1st, 2nd and 5th plenary meetings, on 20 and 22 June 2012, the Conference elected the following officers:

President of the Conference

The President of Brazil, Dilma Rousseff, was elected President of the Conference by acclamation.

Vice-Presidents

African States: Botswana, Congo, Kenya, Nigeria and Tunisia;

Asia-Pacific States: Bangladesh, Japan, Kazakhstan, Nepal and Tajikistan;

Eastern European States: Armenia, Belarus, Czech Republic, Latvia and Poland;

Latin American and Caribbean States: Ecuador and Jamaica;

Western European and other States: Canada, Israel, Italy, New Zealand and Norway.

Election of ex officio Vice-President

8. Brazil was elected, by acclamation, as ex officio Vice-President of the Conference.

Election of the Rapporteur-General

9. Tania Valerie Raguž (Croatia) was elected, by acclamation, as Rapporteur-General of the Conference.

D. Rules of procedure

10. At its 1st plenary meeting, on 20 June 2012, the Conference decided to function on the basis of the provisional rules of procedure (A/CONF.216/2).

E. Adoption of the agenda and other organizational matters

11. Also at its 1st plenary meeting, the Conference adopted the agenda (A/CONF.216/1):

1. Opening of the Conference.
2. Election of the President.
3. Adoption of the rules of procedure.
4. Adoption of the agenda of the Conference.
5. Election of officers other than the President.
6. Organization of work, including the establishment of subsidiary bodies, and other organizational matters.
7. Credentials of representatives to the Conference:
 - (a) Appointment of the members of the Credentials Committee;
 - (b) Report of the Credentials Committee.
8. General debate.
9. Reports of the round tables.
10. Outcome of the Conference.
11. Adoption of the report of the Conference.
12. Closure of the Conference.

F. Accreditation of intergovernmental organizations

12. At the same plenary meeting, the Conference, recalling General Assembly decision 66/561 of 16 May 2012 and the decisions taken by the Preparatory Committee at its second and third sessions, and in accordance with rule 62 of its provisional rules of procedure, approved the requests for accreditation of the following four organizations to participate with observer status in the Conference:

the Intergovernmental Oceanographic Commission, the Central American Bank for Economic Integration, the Central African Forests Commission and the Mekong River Commission.

G. Organization of work, including the establishment of the Main Committee

13. Also at the same plenary meeting, the Conference established a Main Committee, in accordance with rule 46 of its provisional rules of procedure.

14. At the 1st plenary meeting, the Conference elected, by acclamation, John Ashe (Antigua and Barbuda) as Chair of the Main Committee of the Conference.

H. Credentials of representatives to the Conference

15. Also at its 1st plenary meeting, the Conference, in accordance with rule 4 of its provisional rules of procedure, appointed the following States as members of the Credentials Committee, on the basis of the composition of the Credentials Committee of the General Assembly at its sixty-sixth session, namely: China, Costa Rica, Egypt, Italy, Maldives, Panama, the Russian Federation, Senegal and the United States of America.

I. Documentation

16. The list of documents before the Conference is contained in the annex to the present report.

J. Attendance

17. The list of participants to the Conference is issued in document A/CONF.216/INF/2.

Chapter III

General debate

A. Opening statements pursuant to resolution 66/197

18. At its 1st plenary meeting held on 20 June, the Conference approved the organization of work (A/CONF.216/3) and decided to hear opening statements by the President of the Economic and Social Council and representatives of nine major groups.

19. At the same meeting, statements were made by Miloš Koterec (Slovakia), President of the Economic and Social Council; Hala Yousry, Desert Research Center, on behalf of the women major group; Karuna Rana, One Young World, on behalf of the children and youth major group; Joji Cariño, Tebtebba, on behalf of the indigenous peoples major group; Wael Hmaidan, Climate Action Network International, on behalf of the non-governmental organizations major group; David Cadman, ICLEI — Local Governments for Sustainability, on behalf of the local authorities major group; Trine-Lise Sundnes, International Trade Union Confederation, on behalf of the workers and trade unions major group; Kris Gopalakrishnan, Business Action for Sustainable Development, on behalf of the business and industry major group; Yuan Tseh Lee, International Council for Science, on behalf of the scientific and technological community major group; and Harry Saragih, La Vía Campesina, on behalf of the farmers major group.

B. General statements by high-level officials

20. The Conference held its general debate, under agenda item 8, at its 1st to 6th plenary meetings, from 20 to 22 June.

21. At the 1st plenary meeting, on 20 June, the Conference heard statements by the President of Tajikistan, Emomali Rahmon; the President of Zimbabwe, Robert Mugabe; the President of Maldives, Mohamed Waheed; the President of Sri Lanka, Mahinda Rajapaksa; the Vice-President of the Sudan, Al Haj Adam Yousuf; the President of the Council of the Nation of Algeria, Abdelkader Bensalah; the Prime Minister of Tuvalu, Willy Telavi; the Prime Minister of Nepal, Baburam Bhattarai; the Prime Minister of Barbados, Freundel Jerome Stuart; the Prime Minister of Fiji, Commodore Josaia Voreqe Bainimarama; the Prime Minister of Bhutan, Lyonchoen Jigmi Yoezer Thinley; the Prime Minister of Djibouti, Dileïta Mohamed Dileïta; and the Prime Minister and Minister for Foreign Affairs of Antigua and Barbuda, Winston Baldwin Spencer.

22. Also during the meeting, statements were made by the Minister for the Environment of New Zealand, Amy Adams; the Minister for Foreign Affairs of Paraguay, Jorge Lara Castro; the Chair of the delegation of Saint Vincent and the Grenadines, La Celia Prince; and the Chair of the delegation of Trinidad and Tobago, Hamza Rafeeq.

23. At the 2nd plenary meeting, on 20 June, the Conference heard statements by the President of Costa Rica, Laura Chinchilla Miranda; the President of the Islamic Republic of Iran, Mahmoud Ahmadinejad; the President of Guinea, Alpha Condé; the President of the Republic of Korea, Lee Myung-bak; the Premier of the State

Council of China, Wen Jiabao; the President of Kenya, Mwai Kibaki; the President of the Niger, Mahamadou Issoufou; the President of Peru, Ollanta Humala Tasso; the President of France, François Hollande; the President of Chile, Sebastian Piñera Echeñique; the President of Chad, General Idriss Déby Itno; the President of the Congo, Denis Sassou-Nguesso; the Head of State of Luxembourg, Grand Duke Henri; the President of Lithuania, Dalia Grybauskaitė; the President of Namibia, Hifikepunye Pohamba; the President of Benin, Boni Yayi; the President of Hungary, János Áder; the President of Kiribati, Anote Tong; the President of Uruguay, José Mujica Cordano; the President of the European Commission, José Manuel Durão Barroso; the Vice-President of Angola, Fernando da Piedade Dias dos Santos; the Prime Minister of Spain, Mariano Rajoy Brey; the Prime Minister of Vanuatu, Meltek Sato Kilman Livtuvanu; and the Prime Minister of the Central African Republic, Faustin Archange Touadéra.

24. Also at the same meeting, statements were made by the Deputy Prime Minister of the Republic of Moldova, Mihai Moldovanu; the Minister for Environment and Sustainable Development of Burkina Faso, Jean Couliaty; the Minister for Foreign Affairs of Japan, Koichiro Gemba; the Minister for Foreign Affairs and Immigration of the Bahamas, Frederick Mitchell; the Minister for Planning and International Cooperation of Jordan, Jafar Abed Hassan; the Minister for Environmental Protection of Kazakhstan, Nurlan Kapparov; the Minister for Foreign Affairs of Armenia, Edward Nalbandyan; the Minister for Economy and Sustainable Development of Georgia, Vera Kobalia; the Minister for Water and Environment of Ethiopia, Alemayehu Tegenu; the Minister for Foreign Affairs and Trade of Mongolia, Zandanshatar Gombojav; and the Minister for Foreign Trade and Economic Relations of Bosnia and Herzegovina, Mirko Šarović.

25. At its 3rd plenary meeting, on 21 June, the Conference heard statements by the President of Guyana, Donald Rabindranauth Ramotar; the Head of State of Monaco, Prince Albert II; the President of Colombia, Juan Manuel Santos Calderón; the President of the Plurinational State of Bolivia, Evo Morales Ayma; the President of Ecuador, Rafael Correa; the President of the Federated States of Micronesia, Emanuel Mori; the President of Gabon, Ali Bongo Ondimba; the President of Haiti, Michel Joseph Martelly; the Vice-President of the Gambia, Isatou Njie-Saidy; the President of Bulgaria, Rosen Plevneliev; the President of Indonesia, Susilo Bambang Yudhoyono; the President of Turkmenistan, Gurbanguly Berdimuhamedov; the President of Cape Verde, Jorge Carlos de Almeida Fonseca; the President of Cuba, Raúl Castro Ruz; the Vice-President of Seychelles, Danny Faure; the Vice-President of the United Republic of Tanzania, Mohamed Gharib Bilal; the Prime Minister of Montenegro, Igor Lukšić; the Prime Minister of Portugal, Pedro Passos Coelho; the Prime Minister of Norway, Jens Stoltenberg; the Prime Minister of Jamaica, Portia Simpson Miller; the Prime Minister of Grenada, Tillman Thomas; the Prime Minister of the Russian Federation, Dmitry Medvedev; the Prime Minister of Morocco, Abdelilah Benkirane; the Prime Minister of Qatar, Sheikh Hamad bin Jassim bin Jabr Al-Thani; and the Prime Minister of Solomon Islands, Gordon Darcy Lilo.

26. Also at the same meeting, statements were made by the Minister for Foreign Affairs of Honduras, Arturo Corrales Álvarez; the Minister for Foreign Affairs of Estonia, Urmas Paet; the Minister for Agriculture and the Environment of Slovenia, Franc Bogovič; the Minister for Environment and Sustainable Development of Mauritius, Devanand Virahsawmy; the Minister for Foreign Affairs of Finland,

Erkki Tuomioja; the Federal Secretary of the Ministry of Climate Change of Pakistan, Mohammad Javed Malik; the Minister for Environment, Forests and Water Administration of Albania, Fatmir Mediu; the Minister for External Relations of Cameroon, Pierre Moukoko Mbonjo; the Minister for Environment and Natural Resources of El Salvador, Herman Humberto Rosa Chávez; the Minister for Foreign Affairs of Palestine, Riad Malki; and the Minister for Environment of Egypt, Moustafa Hussein Kamel.

27. At its 4th plenary meeting, on 21 June, the Conference heard statements by the President of South Africa, Jacob Zuma; the President of Zambia, Michael Chilufya Sata; the President of Nigeria, Goodluck Ebele Jonathan; the President of the Comoros, Ikililou Dhoinine; the President of the Marshall Islands, Christopher Loeak; the President of the Transition of the Republic of Madagascar, Andry Nirina Rajoelina; the President of the Dominican Republic, Leonel Fernández Reyna; the Vice-President of Myanmar, Sai Mauk Kham; the Vice-President of Burundi, Gervais Rufyikiri; the Prime Minister of India, Manmohan Singh; the Prime Minister of Lebanon, Najib Mikati; the Prime Minister of Turkey, Recep Tayyip Erdoğan; the Prime Minister of Australia, Julia Gillard; the Prime Minister of Côte d'Ivoire, Jeannot Kouadio-Ahoussou; and the Federal Councillor of the Department of Environment, Transport, Energy and Communications of Switzerland, Doris Leuthard.

28. Also at the same meeting, statements were made by the Deputy Prime Minister of the Lao People's Democratic Republic, Somsavat Lengsavad; the Deputy Prime Minister of the United Kingdom of Great Britain and Northern Ireland, Nick Clegg; the Deputy Prime Minister of Viet Nam, Nguyen Thien Nhan; the Deputy Prime Minister in charge of Economic Affairs of the former Yugoslav Republic of Macedonia, Vladimir Peshevski; the Deputy Prime Minister of Kuwait, Sheikhha Amthal Al Ahmad Al Jaber Al Sabah; the Deputy Prime Minister of Kyrgyzstan, Djoomart Otorbayev; the Minister for Environmental Protection and Regional Development of Latvia, Edmunds Sprūdžs; the Minister for the Environment of Brazil, Izabella Teixeira; the Minister for Environment of Botswana, O. K. Mokaila; the Minister for Rural Development of Mauritania, Brahim Ould M'bareck Ould Mohamed El Moctar; the Minister for Environmental Protection of Israel, Gilad Erdan; the Minister for European Affairs and International Cooperation of the Netherlands, Ben Knapen; the Minister for Energy of Brunei Darussalam, Mohammad Yasmin Umar; the Minister for Foreign Affairs, International Cooperation and Francophonie of the Democratic Republic of the Congo, Raymond N'tungamulongo Tshibanda; the Minister for the Environment, Community and Local Government of Ireland, Phil Hogan; the Minister for Foreign Affairs of Belarus, Sergei Martynov; the Minister for Land, Water and Environment of Eritrea, Tesfai Ghereselasie Sebhatu; the Minister for Development Cooperation of Belgium, Paul Magnette; the Minister for Energy, Water and Environment of Mali, Alpha Bocar Nafo; the Minister for Ecology and Natural Resources of Ukraine, Eduard Stavtyskyi; the Minister for Finance of Liberia, Amara Konneh; the State Secretary for Foreign Affairs of Austria, Wolfgang Waldner; the Minister for Environment, Science and Technology of Ghana, Hani Sherry Ayittey; the Minister for Environment and Natural Resources of Mexico, Juan Rafael Elvira Quesada; the Minister for Environment of Tunisia, Mamia Elbanna Zayani; the Minister for Water and Environment of Yemen, Abdoul Razaz Saleh; the Minister for Spatial Planning, Land and Forest Management of Suriname, Ginmardo Kromosoeto; the Chair of the

delegation of the Syrian Arab Republic, Mohammad Khaddour; the Chair of the delegation of Greece, Dimitri Alexandrakis; the Chair of the delegation of Cyprus, Egly Pantelakis; and the Chair of the delegation of Lesotho, Palesa Mokete.

29. At its 5th plenary meeting, on 22 June, the Conference heard statements by the Head of State of Swaziland, King Mswati III; the President of Mozambique, Armando Emilio Guebuza; the President of Equatorial Guinea, Teodoro Obiang Nguema Mbasogo; the President of Senegal, Macky Sall; the President of Serbia, Tomislav Nikolić; the Prime Minister of Denmark, Helle Thorning-Schmidt; the Prime Minister of Sweden, Fredrik Reinfeldt; and the Prime Minister of Samoa, Tuilaepa Sailele Malielegaoi.

30. Also at the same meeting, statements were made by the Secretary of State of the United States of America, Hillary Rodham Clinton; the Deputy Prime Minister of Croatia, Neven Mimica; the Deputy Prime Minister of Thailand, Princess Chulabhorn Mahidol; the Special Envoy of His Holiness Pope Benedict XVI of the Holy See, Cardinal Odilo Pedro Scherer; the Minister for Environment of Slovakia, Peter Ziga; the Minister for Environment of Canada, Peter Kent; the Minister for Environment of the Czech Republic, Tomáš Chalupa; the Minister for Planning of Iraq, Ali Yousif Abdalnabi Alshukri; the Minister for Public Service, Sustainable Development, Energy, Science and Technology of Saint Lucia, James Fletcher; the Minister for the Environment of Iceland, Svandis Svavarsdottir; the Minister for Natural Resources and Environment of Malaysia, Douglas Uggah Embas; the Minister for Environment of Libya, Saleh Amnissi; the Minister for Environment and Forests of Romania, Rovana Plumb; the Minister for Tourism, Culture and the Environment of Malta, Mario De Marco; the Minister for Forestry, Fisheries and Sustainable Development of Belize, Lisel Alamilla; the Minister for Socioeconomic Planning of the Philippines, Arsenio Balisacan; the Minister of the State Committee for Nature Protection of Uzbekistan, Nariman Umarov; the Federal Minister for the Environment, Nature Conservation and Nuclear Safety of Germany, Peter Altmaier; the Minister for Environment and Forests of Bangladesh, Hasan Mahmud; the Minister for Environment of Poland, Marcin Korolec; the Minister for the Environment and Water Resources of Singapore, Vivian Balakrishnan; the Minister for Environment and Climate Change Management of Malawi, Catherine Gotani Hara; the Minister for the Environment of Italy, Corrado Clini; the Minister for Natural Resources of Rwanda, Stanislas Kamanzi; the Minister for Foreign Affairs of Afghanistan, Zalmay Rassoul; the Minister for Environment and Natural Resources of Guatemala, Roxana Sobenes; the Minister for Environment and Forestry of Togo, Kossivi Ayikoe; the Vice-Minister for Foreign Affairs of Panama, Francisco Álvarez de Soto; the Vice-Minister for Foreign Affairs of the Bolivarian Republic of Venezuela, Claudia Salerno; and the Under-Secretary for Environment and Sustainable Development of Argentina, Silvia Merega.

31. At its 6th plenary meeting, on 22 June, statements were made by the Deputy Prime Minister of Azerbaijan, Yagub Eyyubov; the Minister for Foreign Trade of the United Arab Emirates, Sheikha Lubna Al Qassimi; the Minister for Environment and Climate Affairs of Oman, Mohammed Al-Tobi; the Minister for Water and Environment of Uganda, Maria Mutagamba; the Minister for Agriculture, Forestry and Food Security of Sierra Leone, Joseph Samesay; the Minister for Environment of Cambodia, Mok Mareth; the Minister for Municipality and Urban Planning of Bahrain, Juma Bin Ahmed Alkaabi; the Minister for Public Works, Energy and Ports of Dominica, Rayburn Blackmoore; the Minister for Environment of South Sudan,

Lieutenant General Alfred Ladu-Gore; the Minister Adviser on International Relations and Borders of Nicaragua, Miguel d'Escoto Brockmann; the Special Envoy of Timor-Leste, José Ramos-Horta; the Director of the Office of Foreign Affairs of Liechtenstein, Martin Frick; the National Environmental Planner of the Office of the President of the Republic of Palau, Sebastian Marino; the Chair of the delegation of Papua New Guinea, Robert Aisi; the Chair of the delegation of Nauru, Marlene Moses; the Chair of the delegation of Tonga, Sonatane Taumoepeau-Topou; and the Chair of the delegation of Somalia, Elmi Dualeh.

Chapter IV

High-level round tables, partnerships forum, sustainable development learning centre and other events

32. In accordance with General Assembly resolution 66/197, the Conference held four round-table discussions on the theme “Looking at the way forward in implementing the expected outcomes of the Conference”, from 20 to 22 June 2012. A background note for the round tables was prepared by the secretariat (A/CONF.216/4). An account of the round tables is set out below.

Round table 1

33. On 20 June 2012, the co-chair of round table 1, Prince Albert II of Monaco, opened the round table and made a statement. The round table was co-chaired by the President of Mozambique, Armando Emilio Guebuza. The Minister for Environmental Protection of Kazakhstan, Nurlan Kapparov, served as rapporteur of the round table.

34. Statements were made by the representatives of Tajikistan, China, Thailand, Morocco, Mauritania, Ireland, Italy, India, Nepal, South Africa, Latvia, Norway, Montenegro, Malaysia, Serbia, the United Arab Emirates, the Plurinational State of Bolivia, Finland, Gabon, Slovenia, the Dominican Republic and Cyprus.

35. Statements were also made by the rapporteurs of the sustainable development dialogues and on behalf of the Nobel Laureate Symposium/High-level Panel on Global Sustainability.

36. The representative of the African Development Bank made a statement.

37. Representatives of the following entities of the United Nations system made statements: the World Trade Organization; the United Nations Human Settlements Programme; the United Nations Conference on Trade and Development; the United Nations Educational, Scientific and Cultural Organization; the Economic and Social Commission for Asia and the Pacific; and the Office of the United Nations High Commissioner for Human Rights.

38. Representatives of the following major groups made statements: Women in Europe for a Common Future International (women); the International Trade Union Confederation (workers and trade unions); Global Voices Australia (children and youth); and the Confederation of Indigenous Nationalities of the Ecuadorian Amazon (indigenous peoples).

39. The following summary, prepared by the rapporteur, was read out at the 6th plenary meeting, on 22 June 2012:

Participants saw the United Nations Conference on Sustainable Development as a new opportunity for sustainable development.

Much progress has been made since the United Nations Conference on Environment and Development, held in Rio de Janeiro in 1992 and the World Summit on Sustainable Development, held in Johannesburg, South Africa, in 2002. But much more must be done in order to meet the challenges of today.

The discussions pointed to strong support for the Rio Principles. Many participants said that the principle of common but differentiated responsibilities

was particularly critical at a time when billions of people still lived in poverty and the world was reaching an ecological tipping point.

Participants warmly welcomed the agreement on the outcome document. While some said it could have been stronger, the discussions also pointed to many strengths of the document.

A strong message was that the focus should now be on implementation. All actors must work together to achieve the objectives agreed at the Conference.

Other key messages from the round table included:

- Sustainable development goals should provide a foundation for sustainable development policies and effective participation in the green economy. The goals should be universal while allowing for national differences. They should be time bound and measurable — and their achievement should be kept under review. Goals could be identified on the themes of food, water, energy, agriculture and the oceans, but should not detract from ongoing efforts to achieve the Millennium Development Goals. Sustainable development goals for the development agenda beyond 2015 should integrate all three pillars of sustainable development: economic, social and environmental. The most vulnerable populations, including children and indigenous peoples, must receive continued special attention.
- An inclusive green economy has the potential to generate economic growth, create decent jobs and encourage small- and medium-size enterprises. It can also spur the development of renewable energy technologies and bolster more sustainable consumption and production patterns.
- Support needs to be provided to ease the transition to a green economy in developing countries. Eliminating distorting fossil fuel subsidies, better harmonizing trade and environmental regulations and engaging in green procurement are also important in this regard. Scientific and technical education also prepares people for the green jobs of the future.
- The outcome document of the Conference will not deliver on its promises unless adequate means are provided to support its implementation. Meeting official development assistance commitments would go a long way towards delivering those promises. Innovative sources of financing should also be mobilized. The transfer and diffusion of affordable green technologies is critical and there is a need for capacity-building and the sharing of knowledge, expertise and best practice.
- The private sector and innovative partnerships have an important role in the transition towards sustainable development.
- One concern pervading some interventions was the need to avoid unilateral measures when dealing with environmental challenges.
- Sustainable development requires strong bilateral, regional and global cooperation. It requires North-South as well as South-South and triangular partnerships.
- The high-level political forum on sustainable development, which is expected to be created by the General Assembly, should be geared

towards action. It should help to keep the focus on commitments made. It should allow for the sharing of best practices and experiences and the building of partnerships. The provisions of the outcome document on strengthening the coordination role of the Economic and Social Council are also welcomed.

- The dialogue days organized by Brazil, with the support of the United Nations, from 16 to 19 June 2012 called notably for:
 - (a) Restoring 150 million hectares of deforested and degraded lands by 2020 and achieving zero net deforestation by 2020;
 - (b) Ensuring universal, equitable and affordable access to sustainable energy services for all by the next decade;
 - (c) Eliminating food subsidies.

Round table 2

40. In the morning of 21 June 2012, the co-chair of round table 2, the Prime Minister of Saint Kitts and Nevis, Denzil L. Douglas, opened the round table and made a statement. The round table was co-chaired by the Minister for Environment of Chile, María Ignacia Benítez. The Minister for Environment of Poland, Marcin Korolec, served as rapporteur of the round table.

41. Statements were made by the representatives of Hungary, the Republic of Moldova, Kuwait, Germany, Canada, Egypt, Barbados, the United Kingdom of Great Britain and Northern Ireland, Poland, Chile, the Marshall Islands, Viet Nam, Luxembourg, the Sudan, Portugal, Israel, Ghana, the Lao People's Democratic Republic, Brunei Darussalam, Samoa, the Philippines, Nigeria, Angola, Liechtenstein, Croatia, Australia and Belarus.

42. The representative of the European Union made a statement.

43. Statements were also made by the rapporteurs of the sustainable development dialogues and on behalf of the Nobel Laureate Symposium/High-level Panel on Global Sustainability.

44. The representatives of the following intergovernmental organizations made statements: the Organization for Economic Cooperation and Development and the International Organization for Migration.

45. The representatives of the following entities of the United Nations system made statements: the World Health Organization, the International Labour Organization, the United Nations Children's Fund and the International Maritime Organization.

46. The representatives of the following major groups made statements: Canadian Federation of Agriculture (farmers); and Stockholm Environment Institute (scientific and technological community).

47. The following summary, prepared by the rapporteur, was read out at the 6th plenary meeting, on 22 June 2012:

Governance and participation are critical to keep the momentum for the implementation of the sustainable development agenda after the United Nations Conference on Sustainable Development. At the national level, parliaments will have a critical role to translate the outcome document into

action. Multi-stakeholder bodies can also provide sound advice on sustainable development policies. Strengthening civil society is also a way to stimulate greater transparency in public policies.

Women have a critical role in sustainable development, for example in the field of agriculture. Sustainable development can only be achieved if women are empowered and gender equality is achieved.

Speakers hailed the balanced agreement reflected in the outcome document regarding the institutional framework for sustainable development. Several countries supported the proposal for a United Nations environmental organization, as part of strengthening the institutional framework for sustainable development.

Representatives of intergovernmental organizations and of entities of the United Nations who took the floor confirmed their commitment to deliver on the outcomes of the Conference. It was believed that the “One United Nations” approach bolstered United Nations support to the sustainable development goals. Regional and subregional organizations also have a role to help Member States implement the outcomes of the Conference.

Participants were generally satisfied with the outcome document. Many considered that it provided a framework to develop national green economy strategies.

At the same time, there was a clear message that individual countries must be able to choose appropriate strategies in relation to their national priorities and capacities. There are many examples of good practices and experiences in implementing national solutions. Those should not only be supported but also be shared among countries and development cooperation actors. A transition to a green economy will probably entail major changes in the nature of jobs. Where there are negative effects, social protection floors and social multi-stakeholder dialogues can help ease such transition.

Sustainable development goals are one of the critical outcomes of the Conference. Such goals can have a long-term impact on the path of humanity. They can be reflected in national development strategies and provide a common metric to assess progress on sustainable development. They could relate to areas such as food, water, waste, energy, health, education and increasing the self-reliance of vulnerable groups.

Oceans and seas must receive special attention. As efforts are being made towards green development, there is a need to evolve towards a “blue economy”. The vulnerability of small island developing States to climate change cannot be left unattended. The conference on small island developing States, to be held in 2014, will be an important opportunity to address this issue.

Some speakers said that was important to make progress in defining alternative indicators to the commonly understood and used definition of gross domestic product. The United Nations has a role to play in this regard.

Given its role in sustainable development, the private sector should enhance its impact and responsibilities regarding sustainability. This requires the development of adequate tools and methodologies.

Development cooperation is critical to achieving sustainable development. It was hoped that the financing strategy mentioned in the outcome document would help to mobilize finance from all sources.

Some ideas were presented on how to finance sustainable development commitments and the transition to a green economy.

The dialogue days organized by Brazil and the United Nations prior to the Conference recommended tax reforms for environmental protection and for helping the poor. They also called for an international financial transaction tax whose proceeds might contribute to a fund for green jobs and green technology. Mobilizing resources from pension funds was also mentioned.

It is important to establish regional and subregional financing facilities and funds and remove trade barriers for developing countries. Technology transfer and capacity development are also essential to support sustainable development in developing countries.

Round table 3

48. In the afternoon of 21 June 2012, the co-chair of round table 3, the President of Lithuania, Dalia Grybauskaitė, opened the round table and made a statement. The round table was co-chaired by the President of Costa Rica, Laura Chinchilla Miranda, who also made a statement. The Minister for Environment and Climate Change Management of Malawi, Catherine Gotani Hara, served as rapporteur of the round table.

49. Statements were made by the representatives of Denmark, Burkina Faso, Japan, Malta, Romania, Afghanistan, Equatorial Guinea, Solomon Islands, Tuvalu, Togo, the United States of America, Bangladesh, Uzbekistan, Iceland, the Gambia, the Russian Federation, the Czech Republic, Slovakia, the Congo, Cuba, Guyana, Trinidad and Tobago, Grenada, Greece and the Bahamas.

50. Statements were also made by the rapporteurs of the sustainable development dialogues and on behalf of the Nobel Laureate Symposium/High-level Panel on Global Sustainability.

51. Representatives of the following intergovernmental organizations made statements: the International Union for Conservation of Nature, the International Federation of Red Cross and Red Crescent Societies, the Sahara and Sahel Observatory and the Regional Environment Center.

52. Representatives of the United Nations Entity for Gender Equality and the Empowerment of Women and the Convention on Biological Diversity made statements.

53. Representatives of the following major groups made statements: Oxfam Great Britain (United Kingdom of Great Britain and Northern Ireland) (non-governmental organizations); Lonxanet (farmers); the International Trade Union Confederation (workers and trade unions); Development Alternatives with Women for a New Era (women); Tebtebba (indigenous peoples); the Swedish Association of Local Authorities (local authorities); and the World Federation of Engineering Organizations (scientific and technological community).

54. The following summary, prepared by the rapporteur, was read out at the 6th plenary meeting, on 22 June 2012:

Major themes from the discussions in the round table included:

- Sustainable development is the only possible future. To embark on this path, strong political will is necessary — as is the involvement of both State and non-State actors.
- Respecting cultures, local communities and indigenous peoples is an integral part of sustainable development. One idea was that it would be important to understand better and conceptualize the link between nature and living.
- Sustainable development goals can help to bolster sustainable development and keep track of progress. The sustainable development goals should build on the Millennium Development Goals and be included in the United Nations development agenda beyond 2015.
- Transitioning to a green economy requires the transfer of clean technologies and the promotion of renewable energy and of more sustainable patterns of consumption and production. A market for green products also needs to be developed. Some delegations cautioned that a green economy needs to be adapted to national circumstances. It should not be a pretext for introducing new conditionalities.
- New and additional financing is also essential to support the transition to a green economy as well as to sustainable development. It is essential to respect international commitments in this area. It was also suggested that a financial transaction tax be created in order to leverage funds for a “green fund” for addressing climate change. New and innovative partnerships also have to be encouraged.
- There is a need to invest more in scientific research on sustainable development. Exchanging knowledge and sharing lessons learned can also be of value.
- Regarding the institutional framework for sustainable development, a number of participants mentioned the importance of upgrading the United Nations Environment Programme and strengthening its regional presence.
- Coherence and coordination also need to be stepped up at the international level to better support institutions at the regional and national levels.
- The rapporteurs of the dialogue days on sustainable development organized by Brazil and the United Nations before the Conference recommended:
 - (a) The promotion of food systems that are sustainable and contribute to the improvement of health;
 - (b) The development of policies for the sustainable production of food supplies;

(c) The empowerment of women farmers, small holder farmers, young farmers and indigenous people to eliminate poverty-related malnutrition.

- Participants also shared their vision and concerns on aspects such as oceans and seas, the nexus between water, food and energy, access to clean water, sanitation and adequate housing, sustainable cities, sustainable tourism and sustainable transport. Some representatives of civil society and major groups said that the outcome document should have included more concrete action plans.
- It was suggested that additional specific mechanisms be created to follow up on the Conference. One proposal was to set up national mechanisms to this end. Another was to create an intergovernmental committee with civil society representatives and to convene a summit in five years.

Round table 4

55. On 22 June 2012, the co-chair of round table 4, the Prime Minister and Minister for Foreign Affairs of Antigua and Barbuda, Winston Baldwin Spencer, opened the round table and made a statement. The round table was co-chaired by the Prime Minister of Nepal, Baburam Bhattarai, who also made a statement. The Minister of State for Environment of Uganda, Flavia Munaana, served as rapporteur of the round table.

56. Statements were made by the representatives of Vanuatu, the Central African Republic, Cape Verde, New Zealand, Spain, Madagascar, the Republic of Korea, Indonesia, Jamaica, Colombia, Eritrea, Mauritius, the Bolivarian Republic of Venezuela, Sri Lanka, Suriname and Turkey.

57. The observer of Palestine made a statement.

58. Statements were also made by the rapporteurs of the sustainable development dialogues and on behalf of the Nobel Laureate Symposium/High-level Panel on Global Sustainability.

59. Representatives of the following intergovernmental organizations made statements: the Global Environment Facility; the Organization of the Petroleum Exporting Countries; the Pacific Islands Forum; and the Community of Portuguese-speaking Countries.

60. Representatives of the following entities of the United Nations system made statements: the United Nations Office for Disaster Risk Reduction; the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa; the International Monetary Fund; the World Bank; and the United Nations Institute for Training and Research.

61. Statements were made by representatives of the following major groups: the World Business Council for Sustainable Development (business and industry); the South African National Biodiversity Institute (scientific and technological community); the International Council for Adult Education (women); the Green Economy Task Force (children and youth); the Indigenous Environmental Network (indigenous peoples); IBON International (non-governmental organizations); and the International Federation of Organic Agriculture Movements (farmers).

62. The following summary, prepared by the rapporteur, was read out at the 6th plenary meeting, on 22 June 2012:

Participants generally welcomed the outcome document. The United Nations Conference on Sustainable Development had brought forward a wealth of ideas and commitments. Some, however, felt that the outcome document should have been more ambitious. The Conference showed that the Rio Principles continue to serve as the overarching framework for sustainable development, including the principle of common but differentiated responsibilities. Concrete actions would be needed to address the vulnerabilities of small island developing States and the least developed countries.

There is a strong commitment to develop and pursue sustainable development goals. The goals must be an integral part of a unified development agenda beyond 2015. They should be defined through an inclusive and transparent process, drawing on expert advice and stakeholder participation. Possible priority areas for the sustainable development goals include poverty eradication, social protection, climate change and biodiversity, oceans, food, water, waste, energy, health, gender, education, the special vulnerabilities of small island developing States and consumption and production patterns, as well as human rights and peace and security.

The outcome document provides a common understanding of the green economy and lays the basis for implementing this concept. Green economy is a means for achieving sustainable development. There is no one-size-fits-all approach: Governments should implement green economy policies in accordance with their national circumstances. Community-based green growth strategies help to create jobs and provide social protection, thereby reconciling preservation of the environment with development. Concerns about the costs and risks associated with green economy policies were raised. Collaboration, knowledge-sharing and international support are essential. Multilateralism remains the preferred approach to address the global challenge to move towards more sustainable development paths. It is hoped that the new high-level political forum on sustainable development will secure high-level political engagement. Several participants called for upgrading the United Nations Environment Programme to a fully fledged United Nations organization.

There is a need to mobilize resources from all sources, promote technology transfer and build the capacity of all countries for achieving the sustainable development goals and a green economy. Actions in this regard should go hand in hand with good governance and effective monitoring and use of funds.

It was noted that global costs of disasters were 25 times greater than official development assistance flows since 1992.

Some recommendations emanating from the sustainable development dialogue days were presented. They included, notably, a global call for education; decent green jobs; water, sanitation and clean energy for all; and sustainable cities, as well as food production and security.

The international community must:

- Secure high-level political engagement in the follow-up to the sustainable development agenda.
- Engage all actors to concrete actions at all levels and honour commitments.
- Build a robust monitoring system to assess progress.
- Critically, go above and beyond the commitments in the outcome document.

Sustainable development dialogue

63. The Government of Brazil, with the support of the United Nations, organized the sustainable development dialogues, a forum for civil society, from 16 to 19 June 2012, in the context of the United Nations Conference on Sustainable Development.

64. In the four days prior to the Conference, representatives from civil society, including the private sector, non-governmental organizations, the scientific community and major groups, contributed to the dialogues. They engaged in an open and action-oriented debate on key topics related to sustainable development.

65. Three recommendations emanating from each of the dialogues, conveyed directly to the Heads of State and Government present at the Conference, were as follows:

Recommendations

Unemployment, decent work and migration

1. Put education at the core of the sustainable development goals agenda.
2. Commit to the goals of decent work for all by 2030, including the right to bargain collectively; unemployment reduction and the elimination of precarious work; gender equality in the workplace; and the promotion of green and decent jobs, taking into account the special needs of women and youth; as well as to a goal of social protection for all by 2030, guaranteeing social protection floors, at least at the national level, including minimum wages and guarantees for access to health care, and income support for the unemployed, aged and disabled, for children and for pregnant women.
3. Compel national Governments to respect the human rights of all migrant workers and their families including those in temporary foreign worker programmes and the climate refugees who will be displaced by environmental impacts.

Sustainable development as an answer to the economic and financial crises

1. Promote tax reforms that encourage environmental protection and benefit the poor.
2. Create a tax on international financial transactions with a view to contributing to a green fund for the promotion of decent jobs and clean technologies.
3. Adopt shared sustainable development goals that will be embraced by business, civil society and the public sector. These goals will include innovative metrics, public disclosure, public awareness, education at all levels,

and problem-solving, from the local to the global level, to map the pathways to achieve the goals. The five critical areas discussed were: (a) empowering every place in the world to ensure that every individual meets their basic needs of health, safe water, sanitation and the dignity of a decent life; (b) sustainable development of energy systems; (c) sustainable food supply, locally and globally; (d) sustainable urban environments, including initiatives on water systems, sewerage and other smart infrastructure; and (e) sustainable industry that is committed and required to clean up after itself. The sustainable development goals will be met through a shared set of principles and methods that would apply for all, including taxation where there is a very strong possibility of achieving success, financial reform, including innovative financing for green development, and a shift to sustainable technologies in general.

Sustainable development for fighting poverty

1. Promote global education to eradicate poverty and to achieve sustainable development.
2. Ensure universal health coverage to achieve sustainable development.
3. Promote equitable access to information, participation, representation and justice in decision-making at the local, national and global levels on sustainable development, and promote grass-roots innovation.

The economics of sustainable development, including sustainable patterns of production and consumption

1. Phase out harmful subsidies and develop green tax schemes.
2. Include environmental damages in the calculation of gross national product and balance this with measures of social development.
3. Promote sustainable public procurement worldwide as a catalyst for sustainable patterns, taking into account the need for a holistic approach to sustainable development and principles for a sustainable and fair economy.

Forests

1. Restore 150 million hectares of deforested and degraded lands by 2020.
2. Promote science, technology, innovation and traditional knowledge in order to address the main challenge in relation to forests, which is how to make productive use of them without destroying them.
3. Achieve zero net deforestation by 2020, while respecting the rights and knowledge of peoples living in and from the forests and responding to their sustainable development needs.

Food and nutrition security

1. Promote food systems that are sustainable and contribute to the improvement of health.
2. Develop policies to encourage the sustainable production of food supplies directed at both producers and consumers.

3. Eliminate poverty and poverty-related malnutrition. Empower women farmers, smallholder farmers, young farmers and indigenous people. Ensure their access to land, water and seeds, as well as their full involvement in public decision-making regarding food production and food and nutrition security.

Sustainable energy for all

1. Take concrete steps to eliminate fossil fuel subsidies.
2. Establish ambitious targets for moving towards renewable energy.
3. Scale up investments and political will to ensure universal, equitable and affordable access to sustainable energy services to all by the next decade, through clear strategies and actions.

Water

1. Secure water supply by protecting biodiversity, ecosystems and water sources.
2. Implement the right to water.
3. Adopt more ambitious global policies asserting the importance of integrated water, sanitation, energy and land-use planning, development, conservation and management at all scales, taking into account specific gender and cultural needs and with the full and effective participation of civil society.

Sustainable cities and innovation

1. Promote the use of waste as a renewable energy source in urban environments.
2. Plan in advance for sustainability and quality of life in cities.
3. Encourage each head of State to identify a sustainable city within which to develop a network for knowledge-sharing and innovation. Governments should channel resources to develop people-centred sustainable cities with timed and measurable goals, in a way that empowers local communities and promotes equality and accountability.

Oceans

1. Avoid ocean pollution by plastics through education and community collaboration.
2. Launch a global agreement to save marine biodiversity in the high seas.
3. Take immediate action to develop a global network of international protected marine areas, while fostering ecosystem-based fisheries management, with special consideration for small-scale fishing interests.

Full details of the sustainable development dialogue and a list of panellists and facilitators are available at www.uncsd2012.org/sddialoguedays.html.

Partnerships forum

66. The United Nations Conference on Sustainable Development featured a partnerships forum, as requested by the General Assembly in its resolution 66/197. The Partnerships Forum took place from 20 to 22 June 2012.

67. The overall objective of the Partnerships Forum was to reenergize and strengthen partnerships as a critical mechanism to implement sustainable development.

68. The Forum had five interactive sessions, which were co-organized by the Department of Economic and Social Affairs of the Secretariat in cooperation with the Supporting Entrepreneurs for Environment and Development Initiative (SEED Initiative), the Public Health Institute, the Renewable Energy and Energy Efficiency Partnership, the International Union for Conservation of Nature and the United Nations Environment Programme. The discussions highlighted the significant contributions of partnerships to the implementation of sustainable development, and covered such areas as:

- Discussion of how partnerships can advance the implementation of the agreements reached at the Conference;
- Showcasing of practical experiences and best practices and identifying successful models and opportunities for replication and scaling up;
- Announcement of new partnerships and initiatives and incentives for new collaborative efforts;
- Promotion of discussions on more effective accountability measures.

69. The first session was entitled “Delivering sustainable development at the entrepreneurial and grass-roots levels: challenges, lessons learned and opportunities”. It reflected on how to respond better to the needs of entrepreneurs and grass-roots initiatives wishing to enhance their contribution to the implementation of the outcome of the Conference. New partnerships involving and supporting small-, micro- and medium-sized enterprises were launched. There was also a discussion on the need for a new online platform to bring together entrepreneurs and grass-roots organizations. Such a platform would provide more coordinated support to those actors and report on their achievements and lessons learned. It would be hosted by the Department of Economic and Social Affairs.

70. The second session was entitled “Partnerships for the integration of food and nutrition security, health and gender equality”. It discussed the interlinkages between food and nutrition security, health, gender equality, environmental degradation and climate change. The session emphasized that principles of participation, transparency and accountability are critical for making development more inclusive, equitable and sustainable. A policy brief on “Food and nutrition security, health and gender equality: partnerships for climate-resilient sustainable development” was launched.

71. The third session was entitled “Partnerships for advancing gender equality and sustainability”. It showcased how partnerships can help to mainstream gender in critical areas, such as agriculture, cities, oceans, jobs, forests, energy, disaster reduction and water. An interactive “marketplace” on such partnerships produced concrete recommendations on gender-sensitive goals and indicators, which should contribute to the definition of sustainable development goals. The launch of a

knowledge platform or community of practice was also discussed. The meeting recommended that the Department of Economic and Social Affairs launch a consultative process to discuss the details of such a platform among different stakeholders, taking into account existing efforts.

72. The fourth session was entitled “Speed-brokering for partnerships: scaling up and replicating best practices in sustainable development”. It focused on three themes: energy, sustainable cities and water. Governments, international organizations, the representatives of major groups, financiers and key leaders were able to forge strategic contacts with each other as well as with sustainable development partnerships. This exchange provided opportunities for creating, scaling up and replicating partnerships.

73. The fifth session was entitled “Partnerships contributing to the future we want”. It offered the opportunity for a forward-looking reflection and identified concrete guidance on how partnerships can be best positioned to help expedite the implementation of agreements reached at the Conference, as well as contribute to the development agenda beyond 2015 (see para. 77 for further details).

74. A more detailed account of the issues discussed, deliverables from each session, background documents, video interviews and organizing partners is available at www.uncsd2012.org/partnerships.html.

75. The keynote speakers and panellists included the Minister for Foreign Affairs of Denmark, Villy Søvndal; the Minister for Environment of Sweden, Lena Ek; the Minister for Development Cooperation of Denmark, Christian Friis Bach; the Minister for Women, Children and Youth Affairs of Ethiopia, Zenebu Tadesse; the Minister for European Affairs and International Cooperation of the Netherlands, Ben Knapen; the Vice-Minister for Environment of Colombia, Adriana Soto; a representative of the Municipal Government of Shanghai, Zhou Hanmin; the President of the Academy of Sciences of Hungary, Professor József Pálincás; the founder of Development Alternatives (India), Ashok Khosla; the Assistant Secretary-General for Policy Coordination and Strategic Planning, Robert Orr; the Executive Director of the SEED Initiative, Helen Marquard; the deputy chief executive officer of the Global Reporting Initiative, Teresa Fogelberg; the senior programme director of Development Alternatives, Vijay Chaturvedi; the Director of the International Institute for Environment and Development, Camilla Toulmin; the Director of the Department for Job Creation and Enterprise Development of the International Labour Organization (ILO), Peter Poschen; the Deputy Director General of the Department of Environmental Affairs of South Africa, Blessing Manale; the Global Business Line Leader for Sustainable Business Advisory Services of the International Finance Corporation, Monika Weber-Fahr; the Director of the Centre for Public Health and Climate Change at the Public Health Institute, Cristina Tirado; the Executive Director of the World Food Programme, Ertharin Cousin; the Deputy Director General of the Food and Agriculture Organization of the United Nations, Ann Tutwiler; the chair of the Mary Robinson Foundation for Climate Justice, Mary Robinson; the Director of the Department for Public Health and Environment of the World Health Organization, Maria Neira; the Chief Development Strategist of the International Fund for Agricultural Development, Carlos Seré; the Director of Oxfam Great Britain, Barbara Stocking; the Director of the Division for Multilateral and NGO Relations of the World Food Programme, Paul Larsen; the Assistant Secretary-General and Director of the Bureau for Development Policy of the United

Nations Development Programme, Olav Kjørven; the Global Senior Gender Adviser of the International Union for Conservation of Nature, Lorena Aguilar; the Special Adviser on Gender Issues of the International Union for Conservation of Nature, François Rogers; the Deputy Executive Director of the United Nations Environment Programme, Amina Mohammed; a Member of Parliament from Bangladesh, Saber Hossain Chowdhury; the Special Representative of the Secretary-General for Disaster Risk Reduction, Margareta Wahlström; the Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs of the Department of Economic and Social Affairs, Thomas Stelzer; the Director General of the Renewable Energy and Energy Efficiency Partnership, Martin Hiller; representatives of The Youngers, Marvin Nala and Esther Agbarakwe; a news anchor for South-South News, Afaf Konja; and a senior sustainable development officer of the Division for Sustainable Development of the Department of Economic and Social Affairs, Patricia Chaves.

76. The moderators were: the Executive Coordinator for the United Nations Conference on Sustainable Development, Elizabeth Thompson; the Deputy Secretary-General of the United Nations Conference on Environment and Development (1992) and Secretary-General of the World Summit on Sustainable Development (2002), Nitin Desai; the Special Representative of the Secretary-General on Food Security and Nutrition, David Nabarro; and the Director General of the Renewable Energy and Energy Efficiency Partnership, Martin Hiller.

77. Presentations of registered partnerships and organizations were made at the fifth session, on partnerships for the future we want, by the following entities: (a) African Wildlife Foundation; (b) Eco Agriculture Partners; (c) Partnership on Sustainable, Low Carbon Transport; (d) Vinyl Plus; (e) Global Partnership for Capacity-building to Implement the Globally Harmonized System of Classification and Labelling of Chemicals; (f) International Partnership for Expanding Waste Management Services of Local Authorities; (g) the SEED Initiative; (h) Microsoft; (i) The Mountain Partnership; (j) Renewable Energy and Energy Efficiency Partnership; (k) International Institute for Environment and Development; (l) The Nature Conservancy; (m) Energy and Environment Partnership with Central America; (n) Programme for South-South Cooperation Benin, Bhutan and Costa Rica; and (o) Clean Air Initiative for Asian Cities Centre.

Sustainable development learning centre

78. During 10 consecutive days of the Conference, the learning centre offered 17 courses related to the Conference's two themes: a "green economy in the context of sustainable development and poverty eradication" and an "institutional framework for sustainable development". Participants had the opportunity to gain knowledge, acquire practical know-how, share national experiences and discuss best practices in areas related to social and environmental protection, sustainable consumption and production, sustainable cities, sustainable transport, renewable energies, health, water, natural resources, organic agriculture and energy planning.

79. The main purpose of the courses was capacity development and to exchange knowledge. The courses employed a variety of tools, including videos, case studies and interactive discussions. The instructors represented various universities, research institutions, non-governmental organizations and international institutions.

80. More than 800 participants from national delegations, non-governmental organizations, international organizations and other institutions attended the courses.

81. A number of high-level speakers contributed to the courses, including the Prime Minister of Bhutan, Lyonchoen Jigmi Yoezer Thinley; the Minister for Environment and Energy of Seychelles, Rolph A. Payet; the Minister for Environmental Protection of Israel, Gilad Erdan; the Head of the National Secretariat of Citizenship Income of Brazil, Luis Henrique Paiva; the Head of the Environment Protection Agency of Sierra Leone, Haddijatou Jallow; the Director-General of the United Nations Industrial Development Organization, Kandeh K. Yumkella; the Executive Director of the United Nations Human Settlements Programme (UN-Habitat), Joan Clos; and the Deputy Secretary-General of the United Nations Conference on Environment and Development and Secretary-General of the World Summit on Sustainable Development, Nitin Desai, who introduced the courses.

82. Details of the courses are available at www.uncsd2012.org/rio20/meetings_sdlearning.html.

Side events

83. More than 500 on-site side events organized by Governments, major groups, organizations of the United Nations system and other international organizations were held in the RioCentro Exhibition and Convention Centre, in the context of the Third Preparatory Commission, the sustainable development dialogue days and the Conference.

84. More detailed information on the side events is available at www.uncsd2012.org/meetings_sidevents.html.

Chapter V

Adoption of the outcome document

85. At its 6th plenary meeting, on 22 June 2012, under agenda item 10, the Conference considered the draft outcome as contained in document A/CONF.216/L.1, entitled “The future we want”. The President made a statement, in the course of which he orally corrected the draft resolution.

86. At the same meeting, the Conference adopted the outcome document, as orally corrected (for the text, see chap. I, resolution I, annex).

87. Statements in explanation of position after the adoption were made by the representatives of Algeria (on behalf of the Group of 77 and China), the Plurinational State of Bolivia,¹ the European Union, Ecuador, the Bolivarian Republic of Venezuela,² Iceland (also on behalf of Norway), Peru, Canada,³ the United States,⁴ Kenya, Switzerland, the Congo, Chile and Nicaragua. The observer of the Holy See also made a statement.

¹ See A/CONF.216/8.

² See A/CONF.216/11.

³ See A/CONF.216/12.

⁴ See A/CONF.216/15.

Chapter VI

Report of the Credentials Committee

88. At its 1st plenary meeting, on 20 June 2012, the Conference, in accordance with rule 4 of its provisional rules of procedure, appointed a Credentials Committee having the same composition as that of the Credentials Committee of the General Assembly of the United Nations at its sixty-sixth session, namely, China, Costa Rica, Egypt, Italy, Maldives, Panama, the Russian Federation, Senegal and the United States of America.

89. The Credentials Committee held one meeting, on 21 June 2012, at which Juan Carlos Espinosa (Panama) was unanimously elected Chair.

90. The Committee had before it a memorandum prepared by the secretariat of the Conference, dated 21 June 2012, on the credentials of representatives of Member States participating in the Conference. A representative of the Office of Legal Affairs of the United Nations made a statement relating to the memorandum, in which, inter alia, he updated the memorandum to indicate credentials and communications received subsequent to its preparation.

91. As noted in paragraph 1 of the memorandum and in the statement relating thereto, formal credentials of representatives to the Conference, in the form required by rule 3 of the provisional rules of procedure of the Conference, had been received as at the time of the meeting of the Credentials Committee from the following 69 Member States: Algeria, Angola, Argentina, Armenia, Austria, Belarus, Belgium, Brunei Darussalam, Bulgaria, Burkina Faso, Chile, China, Costa Rica, Croatia, Cyprus, Czech Republic, Democratic Republic of the Congo, Djibouti, Egypt, Finland, Germany, Guyana, Hungary, Iceland, India, Indonesia, Iraq, Israel, Italy, Jamaica, Japan, Kuwait, Liechtenstein, Lithuania, Luxembourg, Madagascar, Malawi, Maldives, Mali, Mauritius, Mexico, Mongolia, Montenegro, New Zealand, Norway, Pakistan, Panama, Paraguay, Poland, Portugal, Republic of Moldova, Romania, Russian Federation, Sao Tome and Principe, Senegal, Serbia, Slovakia, Slovenia, South Sudan, Spain, Sri Lanka, Thailand, Trinidad and Tobago, Tuvalu, Uganda, United States, Uzbekistan, Viet Nam and Yemen.

92. As noted in paragraph 2 of the memorandum and in the statement relating thereto, information concerning the appointment of representatives of Member States to the Conference had been communicated to the Secretary-General of the Conference as at the time of the meeting of the Credentials Committee, by means of a cable or a telefax from the Head of State or Government or the Minister for Foreign Affairs, or by means of a letter or note verbale from the mission concerned, by the following 122 Member States: Afghanistan, Albania, Antigua and Barbuda, Australia, Azerbaijan, Bahamas, Bahrain, Bangladesh, Barbados, Belize, Benin, Bhutan, Bolivia (Plurinational State of), Bosnia and Herzegovina, Botswana, Brazil, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Colombia, Comoros, Congo, Côte d'Ivoire, Cuba, Democratic People's Republic of Korea, Denmark, Dominica, Dominican Republic, Ecuador, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, France, Gabon, Gambia, Georgia, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Haiti, Honduras, Iran (Islamic Republic of), Ireland, Jordan, Kazakhstan, Kenya, Kiribati, Kyrgyzstan, Lao People's Democratic Republic, Latvia, Lebanon, Lesotho, Liberia, Libya, Malaysia, Malta, Marshall Islands, Mauritania, Micronesia (Federated States of),

Monaco, Morocco, Mozambique, Myanmar, Namibia, Nauru, Nepal, Netherlands, Nicaragua, Niger, Nigeria, Oman, Palau, Papua New Guinea, Peru, Philippines, Qatar, Republic of Korea, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Saudi Arabia, Seychelles, Sierra Leone, Singapore, Solomon Islands, Somalia, South Africa, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syrian Arab Republic, Tajikistan, the former Yugoslav Republic of Macedonia, Timor-Leste, Togo, Tonga, Tunisia, Turkey, Turkmenistan, Ukraine, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, United Republic of Tanzania, Uruguay, Vanuatu, Venezuela (Bolivarian Republic of), Zambia and Zimbabwe.

93. As noted in paragraph 3 of the memorandum and the statement related thereto, the following two Member States invited to participate in the Conference had not, as at the time of the meeting of the Credentials Committee, communicated to the Secretary-General of the Conference any information regarding their representatives to the Conference: Andorra and San Marino.

94. The Committee decided to accept the credentials of the representatives of all Member States listed in paragraphs 1 and 2 of the memorandum (paras. 91 and 92 of the present report) and the statement relating thereto, on the understanding that formal credentials for representatives of the Member States referred to in paragraph 92 of the present report would be communicated to the Secretary-General of the Conference as soon as possible.

95. The Committee adopted the following draft resolution without a vote:

“The Credentials Committee,

Having examined the credentials of the representatives to the United Nations Conference on Sustainable Development,

Accepts the credentials of the representatives of the Member States referred to in paragraphs 1 and 2 of the above-mentioned memorandum.”

96. The Committee decided, without a vote, to recommend to the Conference the adoption of a draft resolution approving the report of the Committee.

Action taken by the Conference

97. At its 6th plenary meeting, on 22 June 2012, the Conference considered the report of the Credentials Committee (A/CONF.216/6). The Conference was informed that since the formal meeting of the Committee, credentials in due form had been received from the following States: Côte d’Ivoire, Eritrea, Republic of Korea, Switzerland, United Arab Emirates and Zambia.

98. The Conference adopted the draft resolution recommended by the Committee in its report (for the text, see chap. I, resolution III).

Chapter VII

Adoption of the report of the Conference

99. At its 6th plenary meeting, on 22 June 2012, the Rapporteur-General, Tania Valerie Raguž (Croatia), introduced the draft report of the Conference (A/CONF.216/L.3).

100. At the same meeting, the Conference adopted the draft report and authorized the Rapporteur-General to finalize the report.

Chapter VIII

Closure of the Conference

101. At the 6th plenary meeting, on 22 June 2012, the Conference considered a draft resolution expressing its gratitude to the host country (A/CONF.216/L.2).

102. At the same meeting, the Conference adopted the draft resolution (for the text, see chap. I, resolution II).

103. Also at the same meeting, statements were made by the Secretary-General of the Conference, the President of the sixty-sixth session of the General Assembly and the Secretary-General of the United Nations.

104. At the same meeting, the President of the Conference made a statement and declared the Conference closed.
