The *UNCTAD Handbook of Statistics* provides essential data for analysing and measuring world trade, investment, international financial flows and development. Reliable statistical information is often considered as the first step during the preparation of making recommendations or taking decisions that countries will commit for many years as they strive to integrate into the world economy and improve the living standards of their citizens. Whether it is for research, consultation or technical cooperation, UNCTAD requires comparable, often detailed economic, demographic and social data, over several decades and for as many countries as possible.

In addition to facilitating the work of the secretariat's economists, the *UNCTAD Handbook of Statistics* also enables other users, such as policymakers, research specialists, academics, officials from national governments or international organizations, executive managers or members of non-governmental organizations (NGOs) from developing, transition or developed countries to have access to this rich statistical information. The *Handbook* further offers journalists comprehensive information in a presentation that meets their needs.

This publication is available in printed copy and DVD. Moreover, the underlying data of the *Handbook* are available online at *UNCTADstat* (<http://unctadstat.unctad.org>). Unlike the *Handbook*, which captures statistics at one point of time, *UNCTADstat* is continuously updated, enriched and providing users with the latest available data. In this regard, users should use caution when comparing data between the *Handbook* and *UNCTADstat*, as the date of update may differ.

In this edition of the *Handbook*, the presentation of data for trade in services by service category has changed. Table 5.2 now includes statistics for selected country groups, in addition to those on main exporters and importers among individual economies, by service category.

To provide better and more relevant statistics to users, you are invited to fill up the feedback questionnaire on the last page or you can send your comments directly to statistics@unctad.org.

Le but du *Manuel de statistiques de la CNUCED* est de fournir les données statistiques essentielles à l'analyse du commerce mondial, de l'investissement, des flux financiers internationaux et du développement. Une information statistique fiable est souvent le préalable à la formulation de recommandations et à la prise de décisions qui engageront les pays pour de longues années dans leur processus d'intégration dans l'économie mondiale et l'amélioration des conditions de leurs peuples. Que ce soit pour la recherche, la concertation ou la coopération technique, la CNUCED a besoin de données économiques, démographiques et sociales comparables et souvent détaillées, disponibles si possible sur plusieurs décennies et pour un maximum de pays.

Au-delà de la mobilisation et de la vérification des données, du calcul d'indicateurs dérivés qui alimentent les travaux des économistes du secrétariat, le *Manuel de statistiques de la CNUCED* est l'occasion de partager une base statistique riche avec les décideurs et les chercheurs, qu'ils soient universitaires, fonctionnaires d'administrations nationales ou d'organisations internationales, cadres d'entreprises ou membres d'organisations non gouvernementales de pays en développement, en transition ou développés. Les journalistes trouvent aussi dans ce manuel une information synthétique dans une présentation bien adaptée à leurs préoccupations.

Le *Manuel* est disponible en version imprimée et DVD. Les données présentées dans le *Manuel* sont disponibles en ligne, dans *UNCTADstat* (<http://unctadstat.unctad.org>). À la différence du *Manuel* qui présente des statistiques figées à un moment donné, *UNCTADstat* est actualisé et enrichi régulièrement pour mettre à la disposition des utilisateurs les données les plus récentes. À cet égard, il est important de signaler que les données d'*UNCTADstat* et du *Manuel* ne pourront être comparées systématiquement en raison de la différence de date de leur mise à jour et de publication.

Dans cette édition du *Manuel*, la présentation des données sur le commerce des services par catégories de services a été modifiée. Désormais, le tableau 5.2 comprend les statistiques d'une sélection de groupements de pays en plus des données des principales économies exportatrices et importatrices pour chacune des catégories de services.

Pour mieux nous adapter aux besoins de nos utilisateurs et mettre à leur disposition des statistiques pertinentes, nous vous invitons à remplir le questionnaire qui se trouve en fin de publication. Vous pouvez également nous faire part de vos commentaires en nous écrivant à statistics@unctad.org.

- 0 Zero means that the amount is nil or negligible.
 - The symbol underscore indicates that the item is not applicable
 - .. Two dots indicate that the data are not available or are not separately reported.
 - The use of a hyphen on data area means that data is estimated and included in the aggregation but not to be shown. A hyphen between years (e.g. 1985-1990) signifies the full period involved, including the initial and final years.
 - (b) Break in the series
 - (e) Estimate
 - (f) Forecast
 - (p) Provisional data
 - (r) Revised data
- Some exceptions are indicated in footnotes.

SIGNIFICATION DES SYMBOLES

- 0 Un zéro signifie que le montant est nul ou négligeable.
 - Un tiret signifie que la rubrique est sans objet.
 - .. Deux points signifient que les données ne sont pas disponibles ou ne sont pas communiquées séparément.
 - Le trait d'union dans le champ des données indique que le chiffre est estimé et inclus dans l'agrégation mais n'est pas publié. Le trait d'union entre deux millésimes (par exemple 1985-1990) indique qu'il s'agit de la période tout entière, y compris la première et la dernière année mentionnées.
 - (b) Interruption de la série
 - (e) Estimation
 - (f) Prévision
 - (p) Donnée provisoire
 - (r) Donnée révisée
- Les exceptions sont indiquées dans les notes en bas de page.

These notes summarize the content of each part of the *Handbook* according to the revised Table of Contents of the present issue of the *Handbook of Statistics*.

The tables included in this book represent analytical summaries of the full time series contained in the *UNCTAD Handbook of Statistics 2012* on DVD.

PART ONE

International merchandise trade

Table 1.1 shows the value of total exports (f.o.b.) and imports (c.i.f.), expressed in millions of dollars and percentages of the world total, of individual countries and geographical regions (1.1.1), economic groupings (1.1.2), and trade groups (1.1.3). The trade flows shown in table 1.1.1 refer to the General Trade System except for the countries which employ the Special Trade System and which are marked with an asterisk. The General Trade System is used when the statistical territory of a compiling country coincides with its economic territory. Consequently, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of the compiling country. The Special Trade System is used when the statistical territory comprises only a particular part of the economic territory within which "goods may be disposed of without customs restriction". In such a case, imports include all goods entering the free circulation area of the compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

Average annual growth rates of international trade derived from table 1.1 are presented in table 1.2.

Table 1.3 contains trade balances (exports f.o.b. minus imports c.i.f.) and these balances, as a percentage of imports of individual countries, geographical regions and economic groupings.

Table 1.4 shows the relative importance of trade among group members as compared to the regional or total trade of that group.

PART TWO

International merchandise trade by region

Table 2.1 shows the export and import structure of individual countries by main regions of destination and origin. Data are presented for as many individual countries as possible, while trade partners are grouped in 14 major clusters.

Table 2.2 (A to L) presents the structure of exports by destination and imports by origin by major commodity groups for 12 selected country groups. The table provides detailed information on the world trade network for 19 regions of origin and destination and six commodity groups.

Totals of international merchandise trade presented in the tables found in parts one and two are not strictly comparable due to complementary but different sources and remaining unallocated trade flows, despite efforts to distribute trade flows by destination, origin and commodity group.

Exports by destination may differ considerably in some cases from data on imports as reported by countries of destination for a variety of factors, among which the following may be of particular importance:

- Most import data are reported on a c.i.f. rather than an f.o.b. basis;
- There is a time lag between the date on which goods are recorded as exports and their arrival at their destination;
- There may be considerable differences between the recorded destination of exports and the actual destination as shown in import statistics.

PART THREE

International merchandise trade by product

Table 3.1 shows the export and import structure of individual economies by commodity groups for selected years for nine commodity groups (total, all food items, agricultural raw materials, fuels, ores and metals, manufactured goods, including chemical products, machinery and transport equipment and other manufactured goods).

Table 3.2 (A, B and C, respectively) presents the structure of exports for the world, for developing and developed economies, by product, at the SITC group (Revision 3, 3-digit) level. Each product share of world exports is calculated for each economic grouping as well as the average annual growth rate and the latter's deviation in relation to the world growth rate.

Table 3.2D establishes for each economy the list of main products exported (SITC group, Revision 3, 3-digit level). Each product's share of total exports of individual countries, geographical regions and the world is also indicated.

Table 3.2E lists major exporters of 70 leading products among developing economies at the SITC group (Revision 3, 3-digit) level as well as corresponding shares in world trade.

Table 3.3 provides concentration indices and structural change indices for exports and imports by product group at SITC (Revision 3, 3-digit) level. The first indicator shows how a product market is concentrated in a few countries or homogeneously distributed among several countries. The structural change indicator shows whether the market share for a given product among export countries has changed significantly when compared with a reference year.

Totals of international merchandise trade presented in the tables of this third part may also differ from the data contained in the first part for the above reasons, to which must be added margins of exports and imports not distributed by commodity group or the use of different product nomenclatures by the exporting and importing countries.

PART FOUR

International merchandise trade indicators

Table 4.1 includes calculation results of concentration and diversification indices for individual countries, geographical regions and economic groupings. This concentration index specifically shows how exports and imports of individual countries or country groupings are concentrated on several products or otherwise distributed in a more homogeneous manner among a series of products. The diversification indicator signals whether the structure of exports or imports by product of a given country or country grouping differs from the structure by product shown for the world.

Table 4.2 contains volume indices of exports and imports, rounding out trade value available in tables 1.1 and 1.2, unit value indices of exports and imports and derived terms of trade and purchasing power of exports presented at the level of individual countries and geographical regions (4.2.1) and economic groupings (4.2.2).

To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:

- A set of average prices indices at SITC (Revision 3, 3-digit) group level was constructed using *UNCTADstat* Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates;
- At the country level, unit value indices were calculated using current year's trade values as weights at the SITC (Revision 3, 3-digit) level. Trade values are available in table 3.2.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most developing countries on a comparable basis.

Table 4.3 presents average applied import MFN tariff rates for major categories of non-agricultural and non-fuel products by individual markets.

PART FIVE

International trade in services

Tables 5.1.1, 5.1.2 and 5.1.3 present exports and imports of total trade in services by individual country, geographical region, economic grouping and trade group. The statistics shown are a result of the common work of UNCTAD and World Trade Organization (WTO) and they correspond to the definitions of the IMF *Balance of Payments Manual (BPM5, 1993)*. The aggregate data from tables 5.1 include estimates of missing values that are not shown separately. Services are defined as the economic output of intangible commodities that may be produced, transferred and consumed at the same time. However, services cover a heterogeneous range of intangible products and activities that are difficult to capture within a single definition and are sometimes hard to separate from goods. Services are outputs produced to order, and they typically include changes in the condition of the consumers realized through the activities of the producers at the demand of customers. By the time production of a service is completed, it must have been provided to a consumer.

Table 5.2 presents statistics on international trade in services by category of service for selected country groups and for major individual economy exporters and importers among developing and transition economies, as well as among developed countries. The data shown are a result of the common work of UNCTAD and WTO and they correspond to the definitions of the IMF *Balance of Payments Manual (BPM5, 1993)*. The following services categories are included: transport, travel, communication, construction, computer and information services, insurance, financial services, royalties and licence fees, other business services, and personal, cultural and recreational services.

To the extent possible, the inter-agency Task Force on Statistics of International Trade in Services aims to explain and reduce the divergences noticed in statistics for trade in services published by different international organizations. An overview of existing databases covering statistics on international trade in services is described at

<http://unstats.un.org/unsd/tradeserv/TFSITS/matrix.htm>.

Table 5.3 concerns international maritime transport. It contains data on the world merchant fleet by flag of registration and by type of ship by region and economy, highlighting the group of major open-registry countries. A ship owner who registers his or her vessel in an open-registry country does not need to have any connection with a country of registry. The number of open-registry countries has varied over the years. The group in this table includes 10 countries. Table 5.3 contains consolidated time series from various issues of the UNCTAD *Review of Maritime Transport*. The Review reports on the worldwide evolution of shipping, ports and multimodal transport related to the major traffics of liquid bulk, dry bulk and containers.

PART SIX

Commodities

Table 6.1 includes aggregated price indices for primary commodity groups such as food, tropical beverages, vegetable oilseeds and oils, agricultural raw materials and minerals, ores and metals, as well as an all groups price index in current United States dollars. Also included are the annual and quarterly free-market price indices for selected commodities exported by developing economies. The weight of price indices for the above mentioned commodity groups (2000=100) are based on the value of exports of developing countries from 1999 to 2001.

Table 6.2 presents instability indices and trends in free-market prices for selected primary commodities that are of particular interest to developing economies.

PART SEVEN

International finance

Tables 7.1.1, 7.1.2 and 7.1.3 present values of the current account net in millions of dollars and as percentages of GDP for individual countries, geographical regions, and trade and economic groupings. Balance-of-payments current account data cover all transactions between residents and non-residents of a reporting economy. In general, the current account balance describes the difference between current receipts and expenditures for internationally traded goods, services and income payments. At the same time, from a national perspective, the current account balance would equal the gap between national savings and domestic investment.

Tables 7.2.1, 7.2.2 and 7.2.3 contain information on foreign direct investment (FDI) inflows and outflows by individual country, geographical region, economic grouping and trade group. These figures correspond to the Statistical Annexes of the UNCTAD *World Investment Report 2012*. FDI is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates. A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

Tables 7.3.1 and 7.3.2 present values of receipts (credits) of total migrants' remittances, in millions of dollars, for individual economies and regional and economic groupings. They also show total remittances receipts as percentage of GDP and international trade. The *Balance of Payments Manual (BPM5, 1993)* classifies workers' remittances, compensation of employees and migrants' transfers separately. In this table, their sum is given in order to present a clearer picture of the flows that enter economies via transactions by migrants and temporary or cross-border workers. *BPM5* defines workers' remittances as goods and financial instruments transferred by migrants living and working (being residents) in a new economy to residents of the economy in which the migrants formerly resided. A migrant must live and work in the new economy for more than one year to be considered a resident there. Compensation of employees includes wages, salaries and other benefits, in cash or in kind, earned by individuals – in economies where they are not residents – for work performed for residents of those economies. It covers seasonal and other short-term workers and border workers. Migrants' transfers cover flows of goods and changes in financial items that arise from migration (change of residence for at least one year).

Tables 7.4.1 and 7.4.2 include data on payments (debits) of total migrants' remittances, based on the same approach used for tables 7.3.1 and 7.3.2.

Tables 7.5.1 and 7.5.2 present statistics on total international reserves (including gold) of developing countries by country, region and economic grouping, in millions of dollars. Other calculations included show months of imports that these reserves could finance at current import levels, as well as the annual change in total reserves. According to the IMF definition, international reserves consist of the sum of the country's foreign exchange, its reserve position in the IMF, the monetary gold reserves, and the United States dollar value of SDR holdings by its monetary authorities.

Tables 7.6 give a summary of official financial flows by type of flow, country, region and economic grouping. Flows from bilateral and multilateral sources are shown, as recorded by the Organization for Economic Cooperation and Development (OECD) Development Assistance Committee (DAC).

Tables 7.7 present time series on the external long-term indebtedness of developing economies. They also provide a detailed breakdown of public and publicly guaranteed debt by source of lending. External debt data in this table are based on the Debtor Reporting System (DRS) maintained by the World Bank.

PART EIGHT

Development indicators

Table 8.1 provides information on total and per capita nominal gross domestic product (GDP) (in United States dollars) by individual country, geographical region and economic grouping. The GDP figures in dollars are derived from GDP data provided in national currencies. The prevailing annual average market exchange rates, as reported by IMF, have been used for the conversion from national currencies to dollars.

Table 8.2 contains annual average growth rates of total and per capita real GDP by individual country, geographical region and economic grouping. The growth rates are based on GDP in United States dollars at constant 2005 prices.

Table 8.3 provides data on GDP by type of expenditure and kind of economic activity by country, geographical region and economic grouping.

Tables 8.4.1 and 8.4.2 provide some estimates on population and labour force: total population, urban population (as a percentage of total population), total labour force, female labour force (as a percentage of total labour force), total agriculture labour force and female labour force (as a percentage of total agriculture labour force). The figures for certain groups may be different from those published by the sources cited when the UNCTAD definitions for those groups are different.

OTHER NOTES

Unless otherwise specified, country aggregates are the sums of the relevant country data by group. Calculations of aggregates may in some cases include data estimated by the UNCTAD secretariat that are not necessarily all reported separately.

Because of rounding, details and percentages in tables do not necessarily add up to totals.

Data were collected and checked to ensure that they matched the geographical coverage of the countries, as described at the beginning of the *Handbook*. However, some gaps could not be avoided due to data unavailability and are described in the notes at the end tables.

Unless otherwise stated, dollars (\$) refer to United States dollars and data in dollars are expressed in current United States dollars of the year to which they refer.

Average annual growth rates are defined as the coefficient b in the exponential trend function $y = ae^{bt}$ where t stands for time. This method takes all observations in a period into account. Therefore, the resulting growth rates reflect trends that are not unduly influenced by exceptional values.

The country distributions presented are for statistical convenience only and follow those used by the Statistics Division, Department of Economic and Social Affairs (DESA), of the United Nations. They are grouped by economic criteria or by adhesion to commercial agreements for the purpose of statistical analysis and research.

The term “economies”, as used in this publication, refers to regions, countries and territories. In case of change in the statistical coverage of a country, it is identified by adding an end year after the country name. For example, Indonesia (...2002) indicates that the statistical coverage of Indonesia, including Timor-Leste, was valid until 2002.

The composition of country groupings is evolving in order to provide relevant statistics for research and analysis. In this regard, UNCTAD reviews and updates the definition and composition of groups every year. User should be aware that the changes may impact significantly the figures from one given release to the other. The detailed changes in the groups are thoroughly outlined in the section Methodology & Classifications at *UNCTADstat* website.

1. Geographical regions

There is no established convention for the designation of “developed” and “developing” countries or areas in the United Nations system. In common practice, Israel and Japan in Asia, Bermuda, Canada, Greenland, Saint Pierre et Miquelon, and the United States in North America, Australia and New Zealand in Oceania, and Europe are considered “developed” regions or areas. This section includes all countries and territories divided into three major categories: developing countries, transition economies and developed economies. Each category is further divided by geographical regions.

1) Developing economies

This category includes countries and territories in America, Africa, Asia and Oceania not specified below. The geographical regions are further subdivided into subregions in order to present more detailed statistics. Exceptions are specified in table footnotes.

2) Transition economies

This group includes countries in transition from centrally planned to market economies.

3) Developed economies

This category is subdivided into four geographical regions: America, Asia, Europe and Oceania.

World' total represents the sum of the figures of the three above-mentioned groups plus the figures of a group of territories and partners not elsewhere classified, whose composition is detailed below. Data of these territories are included in the world total if they have been reported but are not presented individually or in any group, either by geography, economy or trade.

The composition of the group “not elsewhere classified” is as follows:

- Territories: Antarctica, Bouvet Island, British Antarctic Territory, British Indian Ocean Territory, Christmas Island, Cocos (Keeling) Islands, French Southern Territories, Heard and McDonald Islands, Norfolk Island, Pitcairn, Saint Barthélemy, Saint Martin (French part), South Georgia and South Sandwich Islands, United States Minor Outlying Islands, and United States Miscellaneous Pacific Islands.

- Partners: “Confidential information and differences”, “Neutral zone”, “Free zones”, “Bunkers”, and “ship stores”. These specific partners are only used in the merchandise trade tables.

The total of each group presented in the *Handbook* is also completed, should the case arise, with data that have not been allocated to the different elements composing the group.

2. Economic groupings of developing countries

The *Handbook* provides numerous and varied groups of countries and territories in order to provide easy access to the statistics necessary for socio-economic analysis and development research.

Developing economies are presented at three levels of aggregation: the total group, the group excluding China (referring to continental China) and the group excluding the least developed countries.

The category of heavily indebted poor countries includes those economies benefiting from the HIPC debt reduction initiative of the World Bank and the International Monetary Fund.

LDCs and landlocked developing countries (LLDCs) are recognized by the United Nations as categories that require special attention from the international community.

Since 1994, the United Nations has recognized the particular problems of the Small Island Developing States (SIDS), even though the criteria for drawing up an official list of SIDS have not yet been determined. The unofficial list is used by UNCTAD for analytical purposes only.

The developing economies are also categorized into three subgroups according to their average 2004–2006 per capita GDP: high-income (above \$4,500), middle-income (between \$1,000 and \$4,500) and low-income (below \$1,000).

The group of major petroleum and gas exporters consists of countries whose share of petroleum and gas (SITC code 33 plus 34) was not less than 50 per cent of their total exports, and whose exports of these products amounted to at least 1 per cent of petroleum and gas world share for the period 2004–2006. This group is divided into three geographical zones: Africa, America and Asia.

The group of major manufactured goods exporters consists of economies whose share of manufactured products (SITC 5 to 8, excluding 667 and 68) was not less than 50 per cent of their total exports, and whose exports of these products amounted to at least 1 per cent of manufactured goods world share for the period 2004–2006. The group comprises countries in America and Asia.

The composition of the groups of emerging economies (in America and Asia) and newly industrialized Asian economies (composed of first and second tier) corresponds to UNCTAD's *Trade and Development Report*.

The different geographical regions are also presented at various levels of aggregation:

- Africa: Northern Africa excluding Sudan, sub-Saharan Africa, including Sudan, including and excluding South Africa.

- America: Central America and Greater Caribbean Islands excluding Puerto Rico, including and excluding Mexico, South America and Central America, and South America excluding Brazil.

- Asia: Eastern and South-Eastern Asia excluding China, and Southern Asia excluding India.

3. Trade groups and interregional groupings

Statistics of trade groups with special analytic interest are presented according to their pertinence. These groupings include all relevant economies and are sub-classified by geographical regions, with the exception of following interregional groups: African, Caribbean and Pacific Group of States; Asia-Pacific Economic Cooperation; Black Sea Economic Cooperation; and Commonwealth of Independent States.

Ces notes générales présentent le contenu de chaque tableau du *Manuel de statistiques* ainsi que les modifications introduites dans cette nouvelle édition, s'il y a lieu.

Les tableaux inclus dans cette publication constituent un résumé analytique des séries chronologiques complètes publiées dans le *Manuel de statistiques 2012 de la CNUCED* sur DVD.

PREMIÈRE PARTIE

Commerce international des marchandises

Les tableaux 1.1 donnent la valeur des exportations (f.a.b.) et des importations (c.a.f.) totales de marchandises, exprimée en millions de dollars et en pourcentage du monde, des pays et régions géographiques (1.1.1), groupements économiques (1.1.2) et groupements commerciaux (1.1.3). Les flux du commerce présentés dans le tableau 1.1.1 se réfèrent au Système du Commerce Général, à l'exception des pays et territoires qui utilisent le Système du Commerce Spécial et qui sont munis d'un astérisque. Le Système du Commerce Général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique, et en conséquence, les importations comprennent tous les biens admis sur le territoire du pays déclarant et les exportations tous les biens qui le quittent. Le Système du Commerce Spécial est utilisé lorsque le territoire statistique ne comprend qu'une partie du territoire économique à l'intérieur de laquelle « les biens peuvent être écoulés librement sans restriction douanière ». Dans ce cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant, c'est-à-dire qui ont été dédouanés pour mise à la consommation et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant.

Les taux d'évolution annuels moyens du commerce international des marchandises, calculés à partir des valeurs des tableaux 1.1, figurent dans les tableaux 1.2.

Les tableaux 1.3 présentent les balances commerciales (exportations f.a.b. moins importations c.a.f.), ainsi que ces mêmes balances en pourcentage des importations des pays, régions géographiques et groupements économiques.

Le tableau 1.4 indique l'importance des échanges entre pays membres de groupements commerciaux par rapport aux exportations régionales et totales de ces groupements.

DEUXIÈME PARTIE

Commerce international des marchandises par régions

Le tableau 2.1 présente la structure des exportations et des importations des pays par régions de destination et d'origine. Le plus grand nombre possible de pays en développement sont inclus tandis que les partenaires commerciaux sont regroupés en 14 groupes considérés comme particulièrement importants pour l'analyse du commerce international.

Les tableaux 2.2 (A à L) indiquent la structure des exportations par destination ainsi que des importations par origine et par groupes de produits pour le monde et une sélection de 12 groupements de pays. Le tableau fournit une information détaillée sur le réseau du commerce international avec le monde, 19 régions d'origine et de destination, et pour six différents groupes de produits.

Les totaux du commerce international des marchandises présentés dans les tableaux des première et deuxième parties ne sont pas strictement comparables en raison de sources complémentaires mais différentes et d'une marge d'exportations et d'importations non distribuées, en dépit des efforts déployés pour répartir les flux commerciaux par destinations et origines.

Les exportations ventilées par destinations peuvent accuser un écart parfois considérable par rapport aux importations déclarées par les pays destinataires en raison de divers facteurs dont les plus importants sont les suivants :

- Les importations sont déclarées en principe "valeur c.a.f." plutôt que "valeur f.a.b." ;
- Les importations de marchandises peuvent arriver à destination et être enregistrées longtemps après la date de leur enregistrement à l'exportation ;

- D'importantes différences peuvent exister entre la destination des exportations déclarée par les pays exportateurs et la destination réelle telle qu'indiquée dans les statistiques d'importation.

TROISIÈME PARTIE

Commerce international des marchandises par produits

Le tableau 3.1 fournit la structure des exportations et des importations des pays par produits classés en 9 groupes (total, produits alimentaires, matières premières d'origine agricole, combustibles, minerais et métaux, produits manufacturés, dont produits chimiques, machines et matériel de transport, articles manufacturés divers) pour plusieurs années.

Les tableaux 3.2A, B et C présentent respectivement les exportations par produits du monde, des économies en développement et développées, à un niveau très détaillé (CTCI révision 3, position à trois chiffres). Les parts que représente chaque produit dans les exportations du monde et de la région, sont calculées pour chaque groupe d'économies, ainsi que le taux annuel de croissance et l'écart de ce dernier par rapport au taux de croissance mondial.

Le tableau 3.2D établit, pour chaque économie, la liste des principaux produits qu'elle exporte (CTCI révision 3, position à trois chiffres). La part de chaque produit dans le total des exportations du pays, de la région et du monde est également indiquée.

Le tableau 3.2E liste les plus gros exportateurs de 70 produits parmi les produits les plus exportés par les économies en développement (CTCI révision 3, position à trois chiffres), ainsi que les parts correspondantes dans le commerce mondial.

Le tableau 3.3 fournit les indices de concentration et de changements structurels des exportations et des importations des produits au niveau de la CTCI (révision 3, position à trois chiffres). Le premier indicateur a vocation à montrer comment le marché d'un produit est concentré sur quelques pays ou réparti de façon plus homogène entre les pays. L'indicateur de changement structurel indique si la répartition du commerce d'un produit entre les pays exportateurs ou importateurs a connu une évolution importante par rapport à une année de référence.

Les totaux du commerce international des marchandises présentés dans les tableaux de cette troisième partie peuvent aussi être différents des données de la première partie pour les raisons précédemment citées, auxquelles il convient d'ajouter des marges d'exportations et d'importations non distribuées par groupes de produits ou l'utilisation de nomenclatures différentes de produits par le pays exportateur et le pays importateur.

QUATRIÈME PARTIE

Indicateurs du commerce international des marchandises

Les tableaux 4.1 contiennent les résultats du calcul des indices de concentration et de diversification des pays, régions géographiques et groupements économiques. Cet indice de concentration a vocation à montrer comment les exportations et importations d'un pays ou groupe de pays sont concentrées sur quelques produits ou réparties de façon plus homogène sur une gamme de produits. L'indicateur de diversification indique si la structure par produits des exportations ou importations d'un pays ou groupe de pays diverge de la structure par produits observée au niveau du monde.

Les tableaux 4.2 fournissent les indices de volume des exportations et des importations complétant ainsi l'information en valeur disponible dans les tableaux 1.1 et 1.2, les indices de la valeur unitaire des exportations et importations ainsi que les indices de termes de l'échange et le pouvoir d'achat des exportations dérivés des indices de valeur unitaire. Ces indices sont calculés au niveau des pays et régions géographiques (4.2.1) et des groupements économiques (4.2.2).

Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :

- Un ensemble d'indices de prix moyens au niveau des groupes de la CTCL (révision 3, position à 3 chiffres) a été construit en utilisant des données provenant de *UNCTADstat* Statistiques des produits de base, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.

- Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant comme pondération les valeurs des exportations et des importations de l'année courante disponibles dans la table 3.2 au niveau de la CTCL (révision 3, position à 3 chiffres).

Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays en développement.

Le tableau 4.3 contient les données sur les droits de douane NPF moyens appliqués à l'importation des principales catégories de produits non-agricoles et non-pétroliers, par marchés individuels.

CINQUIÈME PARTIE

Commerce international des services

Les tableaux 5.1.1, 5.1.2 et 5.1.3 présentent les exportations et les importations totales des services par pays, par régions géographiques, groupements économiques et groupements commerciaux. Les statistiques comprises sont le résultat d'un travail commun entre la CNUCED et l'Organisation mondiale du commerce (OMC) et elles correspondent aux définitions du *Manuel de la balance des paiements* du FMI (*MBP5*, 1993). Les agrégats inclus dans le tableau 5.1 comprennent les valeurs estimées qui ne sont pas présentées séparément. Les services sont définis comme rendements économiques de produits intangibles qui peuvent être produits, transférés et consommés au même moment. Cependant, les services recouvrent un groupe large et hétérogène de produits et d'activités que l'on peut difficilement englober dans une définition. Parfois, la démarcation entre services et marchandises n'est pas aisée. Les services sont produits sur commande et ont généralement pour résultat un changement des conditions des consommateurs qui ont demandé ces services. Pour que la production d'un service soit terminée, il doit être fourni au consommateur.

Le tableau 5.2 présente les statistiques sur le commerce international des services par catégories de services pour une sélection de groupements de pays, ainsi que pour les principaux exportateurs et importateurs parmi les économies en développement et en transition, et parmi les pays développés. Ces statistiques sont le résultat d'un travail commun entre la CNUCED et l'OMC et elles correspondent aux définitions du *Manuel de la balance des paiements* du FMI (*MBP5*, 1993). Le tableau présente des données pour les catégories de services suivantes: les transports; les voyages; les services de communications; les services du bâtiment et des travaux publics; les services d'assurance; les services financiers; les services informatiques et d'information; les redevances et droits de licence; les autres services aux entreprises; et les services personnels, culturels et relatifs aux loisirs.

Dans la mesure du possible, le but du groupe de travail inter-agences sur les statistiques du commerce international des services est d'expliquer et réduire les divergences relevées dans les statistiques sur les services publiées par différentes organisations internationales. Un aperçu des bases de données couvrant les statistiques du commerce international des services est disponible sur

<http://unstats.un.org/unsd/tradeserv/TFSITS/matrix.htm>.

Le tableau 5.3 concerne le transport maritime international. Il contient des données sur la flotte marchande mondiale par pavillons d'immatriculation et par types de navires et fait spécialement ressortir le groupe des principaux pays de libre immatriculation. Un propriétaire qui enregistre son navire dans un pays "libre d'immatriculation" ne doit avoir aucune relation avec ce pays. Le nombre de pays de libre immatriculation a changé au cours des années.

Dans le tableau 5.3, le groupe comprend 10 pays. Le tableau incorpore les informations consolidées provenant des différentes éditions de la publication *Review of Maritime Transport*.

Elle rend compte de l'évolution mondiale du transport multimodal, portuaire et maritime concernant les principaux trafics de vrac liquides, de vrac secs et de conteneurs.

SIXIÈME PARTIE

Produits de base

Le tableau 6.1 donne les indices annuels et trimestriels de prix en dollars courants sur le marché libre d'une sélection de produits de base exportés par les économies en développement. Ces indices sont aussi disponibles au niveau des groupes de produits de base suivants: produits alimentaires, boissons tropicales, huiles et graines oléagineuses, matières premières d'origine agricole, minéraux, minerais et métaux ainsi qu'un indice de l'ensemble. Les pondérations ont été calculées à partir de la valeur des exportations des pays en développement de 1999 à 2001 et les indices en utilisant 2000=100 comme année de base.

Le tableau 6.2 complète l'information sur les prix des produits de base par les indices d'instabilité et les tendances de prix sur le marché libre d'une sélection de produits de base ayant une importance particulière pour les économies en développement.

SEPTIÈME PARTIE

Finance internationale

Les tableaux 7.1.1, 7.1.2 et 7.1.3 fournissent les valeurs de compte courant net par pays, par régions et par groupements économiques et commerciaux. Les chiffres sont présentés en millions de dollars, ainsi qu'en pourcentage du produit intérieur brut. Le compte des transactions courantes de la balance des paiements recouvre toutes les transactions entre entités résidentes et non-résidentes de l'économie déclarante. En général, la balance du compte courant indique la différence entre les recettes et les paiements pour les biens, les services et les revenus faisant partie des transactions internationales. De même, de la perspective nationale, la balance du compte courant représente l'écart entre les épargnes nationales et l'investissement intérieur.

Les tableaux 7.2.1, 7.2.2 et 7.2.3 sont consacrés aux investissements directs en provenance de l'étranger (IED). Ils représentent les flux entrants et sortants de l'IED par pays et régions géographiques, groupements économiques et groupements commerciaux. Les chiffres correspondent aux données contenues dans l'Annexe statistique du *World Investment Report 2012* de la CNUCED. L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères, qu'elles soient constituées ou non en sociétés. L'entreprise d'investissement direct est définie comme une entreprise dotée ou non de la personnalité morale, dans laquelle un investisseur direct qui est résident d'une autre économie détient au moins 10% des actions ordinaires ou des droits de vote (ou l'équivalent).

Les tableaux 7.3.1 et 7.3.2 fournissent les informations sur les recettes (crédits) des envois de fonds des travailleurs et migrants - en millions de dollars - par pays, par régions et par groupements économiques. Ces données sont également communiquées en pourcentage du PIB et du commerce international. Le *Manuel de la balance des paiements* du FMI (*MBP5*, 1993) classe séparément les envois de fonds des travailleurs, la rémunération des salariés et les transferts des migrants. Dans ce tableau leur somme est présentée afin de mieux cerner les flux entrant une économie à travers les transferts liés aux travailleurs migrants ou autres travailleurs employés à l'étranger à court-terme. Selon la définition du *MBP5* les envois de fonds des travailleurs sont les transferts de biens ou d'actifs financiers effectués par les migrants qui vivent et travaillent (considérés comme résidents) dans une économie en faveur des résidents de leur ancien pays de résidence.

AUTRES NOTES

Un migrant doit vivre et travailler dans une nouvelle économie durant plus d'une année pour y être considéré résident. La rémunération des salariés comprend les salaires, traitements et autres prestations, en numéraire ou nature, gagnés par les particuliers, dans une économie où ils ne sont pas résidents, pour un travail exécuté au profit d'un résident de cette économie.

Les salariés peuvent être des travailleurs saisonniers ou d'autres travailleurs à temps limité ou encore des travailleurs frontaliers. Les transferts des migrants couvrent les flux de biens et les variations des actifs financiers qui résultent de la migration (changement de résidence pour une durée d'un an au moins).

Les tableaux 7.4.1 et 7.4.2 font apparaître les statistiques sur les paiements (débits) des envois des travailleurs et migrants, suivant la même approche utilisée dans les tableaux 7.3.1 et 7.3.2.

Les tableaux 7.5.1 et 7.5.2 incluent les données relatives aux réserves internationales (y compris l'or) des économies en développement par pays, par régions et par groupements économiques. Les mois d'importation que ces réserves peuvent financer, dans la situation actuelle du commerce international du pays, sont également indiqués, ainsi que la variation annuelle des réserves totales. Selon la définition du FMI, les réserves totales représentent la somme des avoirs du pays en devises, la position de ses réserves au FMI, les réserves de l'or monétaire, et la valeur en dollars des États-Unis des avoirs en DTS de ses autorités monétaires.

Les flux financiers publics sont présentés dans les tableaux 7.6 par catégories de flux, pays, régions géographiques et groupements économiques. La définition des flux bilatéraux et multilatéraux est conforme aux publications du Comité d'aide au développement (CAD) de l'OCDE.

Les tableaux 7.7 contiennent les données sur la dette extérieure à long terme des principaux groupes d'économies en développement, en particulier la ventilation détaillée de la dette publique ou garantie par l'État par sources d'emprunt. Les données de la dette extérieure présentées dans ces tableaux se basent sur le Système de notification des pays débiteurs (SNPD), géré par la Banque mondiale.

HUITIÈME PARTIE

Indicateurs du développement

Les tableaux 8.1 fournissent le produit intérieur brut (PIB) nominal total et par habitant des pays, régions géographiques et groupements économiques. Les données de PIB en dollars ont été obtenues à partir des valeurs de PIB exprimées à l'origine en monnaies nationales. Les taux de change moyens annuels sur le marché libre, obtenus des séries statistiques du FMI, ont été utilisés pour la plupart des pays lors de la conversion en dollars.

Les taux annuels moyens de variation du PIB réel total et du PIB réel par habitant des pays, régions géographiques et groupements économiques sont disponibles dans les tableaux 8.2. Les taux de croissance se basent sur le PIB aux prix constants en dollars de l'année 2005.

Le PIB total est décomposé par catégories de dépenses et la valeur ajoutée totale par branches d'activité économique dans les tableaux 8.3 pour les pays, régions géographiques et groupements économiques.

Les tableaux 8.4.1 et 8.4.2 présentent des estimations sur la population et la main-d'œuvre : population totale, population urbaine (en pourcentage de la population totale), main-d'œuvre totale, main-d'œuvre féminine (en pourcentage de la main-d'œuvre totale), main-d'œuvre dans l'agriculture, main-d'œuvre féminine (en pourcentage de la main-d'œuvre totale dans l'agriculture). Les chiffres pour certains groupes peuvent être différents de ceux publiés par la Division de la population lorsque les définitions de la CNUCED de ces groupes sont différentes.

Sauf indication contraire, les agrégats de pays sont obtenus en sommant les données des pays composant le groupe. Les calculs d'agrégats peuvent dans certains cas inclure des données estimées par le secrétariat de la CNUCED qui ne sont pas nécessairement toutes rapportées séparément.

Par ailleurs, la somme des chiffres et des pourcentages indiqués dans les tableaux ne correspond pas nécessairement aux totaux en raison des arrondis.

Les données ont été collectées et vérifiées pour qu'elles correspondent à la couverture géographique des pays, telle qu'elle est décrite en début de *Manuel*. Toutefois certains écarts n'ont pu être évités en fonction de la disponibilité des données. Ils sont alors décrits dans les notes de fin de tableau.

Sauf indication contraire, le terme «dollar» s'entend du dollar des États-Unis d'Amérique et les données en dollars sont exprimées en dollars courants de l'année à laquelle elles se réfèrent.

Les taux moyens d'évolution annuelle sont définis par le coefficient b de la fonction exponentielle de tendance $y = ae^{bt}$, où t représente le temps. Cette méthode permet de prendre en compte toutes les observations concernant une période donnée sans que le taux de croissance obtenu ne soit trop affecté par des valeurs exceptionnelles.

Les pays et territoires sont présentés suivant des critères géographiques conformes à ceux de la Division de statistique, Département des affaires économiques et sociales (DAES) de l'ONU. Les pays et territoires sont aussi regroupés suivant des critères économiques ou d'adhésion à des accords commerciaux à des fins d'analyse statistique et de recherche.

Dans cette publication, le terme «économie» couvre les régions, les pays et les territoires. Une année ajoutée au nom d'un pays indique un changement de la couverture statistique de ce pays. Par exemple, Indonésie (...2002) indique que la couverture statistique de l'Indonésie incluant le Timor-Leste était valide jusqu'à la fin 2002.

La composition des groupements de pays évolue constamment pour mettre des statistiques pertinentes à la disposition de la recherche et de l'analyse. C'est pourquoi la CNUCED révisé et met à jour la définition et la composition des groupes chaque année. Ces changements peuvent affecter de manière significative les chiffres d'une année de publication à l'autre. Le détail des changements est disponible dans la section Méthodologie & Nomenclatures sur le site web de *UNCTADstat*.

1. Régions géographiques

La distinction entre pays ou régions "développés" et "en développement" ne correspond à aucune nomenclature officielle à l'échelle du système des Nations Unies. Dans la pratique, on considère généralement comme développés Israël et Japon pour l'Asie, Bermudes, Canada, États-Unis, Groenland et Saint-Pierre-et-Miquelon pour l'Amérique septentrionale, Australie et Nouvelle-Zélande pour l'Océanie et l'Europe. Les pays et territoires sont répartis en trois grandes catégories, les économies en développement, les économies en transition et les économies développées, elles-mêmes subdivisées suivant des critères géographiques.

1) Économies en développement

Ces économies sont réparties entre quatre grandes régions géographiques : Afrique, Amérique, Asie et Océanie elles-mêmes subdivisées en sous-régions pour permettre la présentation de statistiques plus détaillées. Les exceptions à ce classement que l'on retrouve dans certains tableaux sont indiquées dans des notes.

2) Économies en transition

Il s'agit des pays opérant la transition d'une économie planifiée à une économie de marché.

3) Économies développées

Ces économies sont réparties entre quatre grandes régions géographiques : Amérique, Asie, Europe et Océanie.

Le total 'Monde' inclut la somme des données de ces trois groupes à laquelle s'ajoutent les données d'un groupement 'Autres territoires' (territoires ou partenaires non classés ailleurs), dont la composition est détaillée ci-dessous. Lorsqu'elles sont rapportées, les données relatives à ces territoires ne sont pas présentées individuellement.

La composition du groupement 'Autres territoires' est la suivante:

- Territoires non-classés ailleurs : Antarctique, île Bouvet, Territoire britannique de l'Antarctique, Territoire britannique de l'océan Indien, île Christmas, îles des Cocos (Keeling), Terres australes et antarctiques françaises, îles Heard et McDonald, île Norfolk, Pitcairn, Saint-Barthélemy, Saint-Martin (partie française), Géorgie du Sud et îles Sandwich méridionales, îles mineures éloignées des États-Unis et îles du Pacifique sous administration des États-Unis.

- Partenaires non classés ailleurs : 'combustibles de soute et provisions de bord', 'informations confidentielles et différences', 'zone neutre', 'zones franches' qui sont utilisés exclusivement dans les tableaux du commerce de marchandises.

Les statistiques présentées au niveau de chacun des groupements précédemment décrits sont calculées à partir des valeurs des économies qui entrent dans la composition du groupement et complétées le cas échéant par un reliquat qu'il n'a pas été possible de répartir entre les éléments du groupement.

2. Groupements économiques des économies en développement

Dans le *Manuel de statistiques de la CNUCED*, les regroupements des pays et territoires en développement sont nombreux et variés afin de disposer facilement des données statistiques nécessaires à l'analyse socio-économique et aux recherches sur le développement.

Les économies en développement sont présentées à trois niveaux d'agrégation : le groupe dans son intégralité, puis sans la Chine continentale et enfin sans les pays les moins avancés.

Le groupe des pays pauvres très endettés inclut les pays bénéficiant de l'initiative de désendettement de la Banque mondiale et du Fonds monétaire international.

Les PMA et les pays en développement sans littoral sont des groupes de pays qui requièrent une attention particulière de la communauté internationale. Les PMA sont présentés aux niveaux d'agrégation suivants : Afrique et Haïti, Asie et les îles. Depuis 1994, les Nations Unies ont également pris en compte les problèmes particuliers des petits États insulaires en développement mais n'ont pas établi de liste officielle de ces États. La liste présentée dans le *Manuel de statistiques* est utilisée par la CNUCED à des fins analytiques uniquement.

Les économies en développement sont également réparties en trois groupes de revenu en fonction du PIB par habitant pour la moyenne des années de 2004 à 2006 : revenu élevé (supérieur à 4 500 dollars), revenu intermédiaire (compris entre 1 000 et 4 500 dollars) et revenu faible (inférieur à 1 000 dollars).

Le groupement des principaux exportateurs de pétrole et de gaz comprend les pays, dont la part de pétrole et de gaz (CTCI codes 33 plus 34), ne représentait 1) pas moins de 50 % de leurs exportations totales, et les exportations de ces produits s'élevaient à 2) au moins 1% de la part mondiale pour la période 2004-2006. Les pays composant ce groupement sont répartis en trois zones géographiques : Afrique, Amérique et Asie.

Le groupement des principaux exportateurs d'articles manufacturés (CTCI 5 à 8 moins 667 et 68), répartis entre Amérique et Asie, comprend les économies dont la part d'articles manufacturés ne représentait 1) pas moins de 50 % de leurs exportations totales, et 2) leurs exportations d'articles manufacturés représentaient au moins 1% de la part mondiale pour la période 2004-2006.

La composition des groupements des économies émergentes (réparties entre Amérique et Asie) et des économies nouvellement industrialisées d'Asie (première et deuxième génération) correspond à celle utilisée dans le *Rapport sur le commerce et le développement* de la CNUCED.

Les différentes régions géographiques sont également présentées à différents niveaux d'agrégation :

- Afrique : Afrique septentrionale sans le Soudan, Afrique subsaharienne, Soudan compris, avec et sans l'Afrique du Sud.
- Amérique : Amérique centrale et Grandes Antilles sans Porto Rico, avec et sans le Mexique, Amérique du Sud et centrale, Amérique du Sud sans le Brésil.
- Asie : Asie orientale et du Sud-Est sans la Chine et Asie méridionale sans l'Inde.

3. Groupements commerciaux et interrégionaux

Les statistiques des groupements régionaux et commerciaux sont présentées dès lors qu'elles sont pertinentes et présentent un intérêt analytique. Ces groupements englobent toutes les économies concernées et sont classés selon les grandes régions géographiques utilisées précédemment, à l'exception des groupements interrégionaux suivants : le groupe des États d'Afrique, des Caraïbes et du Pacifique, le groupe de Coopération économique de l'Asie et du Pacifique, le groupe de Coopération économique de la mer Noire et la Communauté des États indépendants.

3.3 Concentration and structural change indices of product markets

Source:
UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

(1) Concentration index:

The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

H_i = Value of concentration index for product i

x_{ij} = Value of exports or imports for country j and product i

$$X_i = \sum_{j=1}^n x_{ij}$$

and

n = maximum number of individual economies

An index value that is close to 1 indicates a very concentrated market. On the contrary, values closer to 0 reflect a more equal distribution of market shares among exporters or importers.

(2)

Structural change index:

This index, ranging from 0 to 1 reveals the structural change in trade for a particular product as compared to the reference year (1995 = 0).

An index value close to 1 indicates a significant change in the composition of exporters (importers). On the contrary, values closer to 0 would demonstrate a higher degree of "traditionality" in the markets over the period concerned.

The value is calculated as follows:

$$I_i = \frac{\sum_j |S_{ij}^1 - S_{ij}^0|}{2}$$

where

I_i = Value of structure index for product i

S_{ij}^0 = Share of trade of product i for country j in 1995

S_{ij}^1 = Share of trade of product i for the country j in the concerned year

3.3 Indices de concentration et de changement structurel des marchés de produits

Source :
Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises de *UNCTADstat* de la CNUCED

Notes :

(1) Indice de concentration :

L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

où

H_i = Valeur de l'indice de concentration pour le produit i

x_{ij} = Valeur des exportations ou des importations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij}$$

et

n = nombre maximum d'économies individuelles

Un indice proche de 1 indique une concentration très forte du marché pour ce produit en particulier. En revanche, une valeur proche de 0 démontre une répartition plus homogène du commerce entre les exportateurs ou les importateurs.

(2)

Indice de changement structurel :

Cet indice, dont la valeur est comprise entre 0 et 1, représente les changements de structure du commerce par rapport à une année de référence (1995 = 0).

Une valeur proche de 1 indique un important changement structurel du commerce de ce produit, c'est à dire, une grande variation des parts de marché au sein des exportateurs ou importateurs, par rapport à l'année de référence. Plus la valeur de l'indice est proche de 0, plus la structure du commerce de ce produit est stable.

Il est calculé comme suit :

$$I_i = \frac{\sum_j |S_{ij}^1 - S_{ij}^0|}{2}$$

où

I_i = Valeur de l'indice de changement structurel, pour le produit i

S_{ij}^0 = Part du commerce du produit i pour le pays j par rapport au commerce total de ce produit pour l'année 1995

S_{ij}^1 = Part du commerce du produit i pour le pays j, par rapport au commerce total de ce produit pour l'année concernée

4.1.1 Export and import concentration and diversification indices of countries and geographical regions

Source:

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (a) More than 30% of total trade under SITC Rev.3, code 931: "Special transactions & commodities not classified"
- (1) Number of products exported (or imported) at the three-digit SITC, Rev. 3 level; this figure includes only those products that are greater than \$100,000 or more than 0.3 per cent of the country's total exports (or imports).
Data for the country groupings are calculated as weighted averages of individual countries data, including those that are estimated and not shown separately.
- (2) The diversification index signals whether the structure of exports or imports by product of a given country or group of countries differ from the structure of product of the world. This index that ranges from 0 to 1 reveals the extent of the differences between the structure of trade of the country or country group and the world average. The index value closer to 1 indicates a bigger difference from the world average.

Diversification index is computed by measuring absolute deviation of the country share from world structure, as follows:

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

where

h_{ij} = share of product i in total exports or imports of country or country group j

h_i = share of product i in total world exports or imports.

This index is a modified Finger-Kreinin measure of similarity in trade. For more information, please consult the article of Finger, J. M. and M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses" in the *Economic Journal*, 89: 905-12.

- (3) Concentration index, also named Herfindahl-Hirschmann index, is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

where

H_j = country or country group index

X_{ij} = value of exports for country j and product i

$$X_j = \sum_{i=1}^n x_{ij}$$

and

n = number of products (SITC Revision 3 at 3-digit group level)

4.1.1 Indices de concentration et de diversification des exportations et importations des pays et des régions géographiques

Source :

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises de *UNCTADstat* de la CNUCED

Notes :

- (a) Plus de 30% du commerce sous la position 931 de la CTCI rév. 3 : "Transactions et articles spéciaux non classés"
- (1) Nombre de produits au niveau de groupes de la CTCI (rév. 3, position à 3 chiffres) exportés (ou importés) par chaque pays ; cependant, seuls les produits ayant une valeur supérieure à 100.000 dollars ou comptant pour plus de 0,3 % des exportations (ou des importations) totales du pays sont inclus.
Les indices de concentration et de diversification calculés au niveau des groupes de pays et du monde sont les moyennes arithmétiques des indices respectifs des pays, pondérées par la valeur de leurs exportations.
- (2) L'indice de Diversification indique si la structure par produits des exportations d'un pays ou groupe de pays diverge peu ou beaucoup de la structure par produits des exportations totales dans le monde. Cet indice dont la valeur est comprise entre 0 à 1, révèle l'ampleur des différences entre la structure des échanges d'un pays ou du groupe de pays et la moyenne mondiale. Plus l'indice est proche de 1, plus la divergence est forte.

L'indice de diversification mesure la déviation absolue de la structure du pays par rapport à la structure mondiale comme ci-dessous :

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

où

h_{ij} = part du produit i dans le total des exportations (ou importations) du pays j

h_i = part du produit i dans le total des exportations (ou importations) mondiales.

Cet indice est une variante de l'indicateur de Finger-Kreinin sur la similarité de la structure du commerce. Pour plus d'information, veuillez consulter l'article de Finger, J. M. et M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses", dans *l'Economic Journal*, 89: 905-12.

- (3) L'indice de concentration, aussi appelé indice de Herfindahl-Hirschmann, mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

où

H_j = Indice du pays ou groupe de pays

x_{ij} = valeur des exportations du pays j pour le produit i

$$X_j = \sum_{i=1}^n x_{ij}$$

et

n = nombre de produits (de la CTCI Révision 3, position à 3 chiffres)

Notes:

(a) Data refer to Netherlands Antilles

(c) From 2011 onwards, exports include commercial mining.

(1) To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:

- A set of average prices indices at SITC (Revision 3, 3-digit) group level was constructed using UNCTAD, Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates.

- At the country level, unit value indices were calculated using previous year's trade values at the SITC 3-digit level, available in table 3.2 as weights.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most countries on a comparable basis.

(2) From 2005 onwards, including customs free zones.

Notes :

- Les données se réfèrent aux Antilles néerlandaises.
- À partir de 2011, les exportations comprennent l'exploitation minière commerciale.
- (1) Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :
 - Un ensemble d'indices de prix moyens au niveau des groupes de la CTCI (révision 3, position à 3 chiffres) a été construit en utilisant des données de CNUCED, Statistiques des produits de base, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.
 - Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant comme pondération les valeurs des exportations et des importations de l'année précédente, disponibles dans la table 3.2.
 Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays.
- (2) À partir de 2005, y compris les zones franches douanières.

Notes:

- (1) Product categories are defined in terms of SITC Revision 3, and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.
- (2) Simple average for each product group calculated from simple average at HS 6-digit level.
- (3) Weighted average for each product group calculated from simple average at HS 6-digit level. Country's own imports at HS 6-digit level for corresponding years are used as weights. Where imports are not reported, mirror imports have been compiled using exports of partner countries.

Notes :

- (1) Les catégories de produits sont définies sur la base de la CTIC, révision 3, et pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.
- (2) Moyenne arithmétique, pour chaque catégorie de produits, calculée à partir des moyennes arithmétiques au niveau du code à 6 chiffres du SH.
- (3) Moyenne arithmétique pondérée, pour chaque catégorie de produits, calculée à partir des moyennes simples au niveau du code à 6 chiffres du SH. Pour chaque année, les coefficients de pondération sont les importations de chaque marché au niveau du code à 6 chiffres du SH. Lorsque les importations n'étaient pas disponibles, elles ont été évaluées par les données miroir basées sur les exportations des pays partenaires.

5.2 Exports and imports of services by service category

Sources:

- UNCTAD and WTO secretariats, based on:
 - IMF, *Balance of Payments Statistics*
 - Eurostat, *Statistics database*
 - UN DESA Statistics Division, *UN Service Trade*
 - OECD, *OECD.Stat*
 - Other international and national sources

Notes:

- The statistics presented correspond to the concepts and definitions from the IMF *Balance of Payments Manual*, fifth edition (BPM5, 1993). UNCTAD and WTO may use different definitions for certain country groups ("developed" and "developing" economies, for example). Consequently, some aggregates will be different, although the individual-country underlying data are the same. Individual economies are ranked based on both reported and estimated 2010 figures. Non-publishable estimates are indicated by a - sign.

- (a) Refers to Belgium-Luxembourg Economic Union.
- (1) Owing to the lack of data, the country groups aggregates for imports are available only for Transport and Travel categories.
- (2) Covers all transportation services that involve carriage of passengers, movement of goods (freight), rentals with crew, and related supporting services. Excludes freight insurance, which is included with insurance services. Excludes goods procured in ports by non-resident carriers and repairs on transport equipment, which are included in goods.
- (3) Includes goods and services acquired from an economy by non-resident travellers during visits shorter than one year.
- (4) Consists of postal, courier and telecommunications services between residents and non-residents.
- (5) Covers the work performed on construction projects and installations by an enterprise outside the economy of residence of that enterprise.
- (6) (1) Computer services consist of hardware and software-related services and data-processing.
(2) New agency services include the provision of news, photographs and feature articles to the media.
(3) Other information services cover database services: database conception, data storage and dissemination of data. Direct non-bulk subscriptions to periodicals regardless of means of information transmission also belong to this service category.
- (7) Covers all types of insurance, reinsurance and related auxiliary services. Insurance services are estimated or valued by the service charges included in total premiums rather than by total value of the premiums.
- (8) Includes financial intermediation and auxiliary services, except those directly related to life insurance and pension funds (covered under insurance services).
- (9) Covers franchising fees, royalties paid for the use of registered trade marks, and other fees paid for authorised use of intangible, non-produced non-financial assets and proprietary rights. Distributive rights with limitations for audiovisual products are not included here.
- (10) Includes merchanting and other trade-related services; operational leasing services; and miscellaneous business, professional and technical services (legal, advertising, consulting, accounting, R&D, etc.)
- (11) (1) Audiovisual and related services cover the production of motion pictures, video and radio programmes, musical recordings, (and similar) including fees paid to personnel involved. Related limited distribution rights are also covered. Fees paid for sporting, theatrical and similar events belong to this category as well.
(2) Other personal cultural and recreational services encompass services associated with museums, libraries, archives, and other cultural and sporting activities. Education and health services are covered under this category (excluding, however, the expenses for health and education services paid by travellers, which belong to travel services).

5.2 Exportations et importations des services par catégories de services

Sources :

- Secrétariats de la CNUCED et de l'OMC, basés sur :
 - FMI, *Statistiques de la balance des paiements*
 - Eurostat, *Base de données statistiques*
 - ONU DAES Division de statistique, *ONU Service Trade*
 - OCDE, *OECD.Stat*
 - Autres sources internationales et nationales

Notes :

- Les statistiques présentées correspondent aux concepts et définitions du *Manuel de la balance des paiements* du FMI, cinquième édition (MBP5, 1993). La composition de certains groupements de pays peut être différente pour la CNUCED et l'OMC ("pays en développement" et "pays développés", par exemple). Par conséquent, certains agrégats seront différents bien que les données des pays individuels soient les mêmes. Les économies individuelles sont classées en fonction des données rapportées et estimées de l'année 2010. Les estimations qui ne sont pas publiables sont indiquées par le signe -.

- (a) Se réfère à l'Union économique belgo-luxembourgeoise.
- (1) En raison du manque de données, les agrégats pour les groupements de pays ne sont pas disponibles pour les importations, hormis pour les catégories des transports et voyages.
- (2) Recouvre tous les services de transport de passagers, l'acheminement des marchandises (fret), la location de moyens de transports avec leur équipage et les services annexes qui s'y rapportent. L'assurance du fret n'est pas comprise. Elle fait partie des services d'assurance. Les achats effectués dans les ports par les transporteurs non résidents, ainsi que les réparations du matériel de transport ne sont pas compris. Ils sont classés dans les biens.
- (3) Comprend les biens et services acquis dans une économie par les voyageurs non-résidents au cours d'un séjour inférieur à un an.
- (4) Englobe les services postaux (y compris les messageries) et les services de télécommunication, entre résidents et non-résidents.
- (5) Recouvre les travaux de construction et d'installation par une entreprise en dehors de l'économie dans laquelle l'entreprise est résidente.
- (6) (1) Les services informatiques englobent les services liés aux matériels et logiciels informatiques et les services de traitement de données.
(2) Les services d'agence de presse incluent la communication d'informations, de photographies et d'articles de fond aux médias.
(3) Les autres services d'information couvrent les services concernant les bases de données : leur conception, le stockage et la diffusion des données. Les abonnements directs individuels aux périodiques font partie de cette catégorie de services.
- (7) Comprend diverses formes d'assurances, réassurances et services auxiliaires connexes. Ces services sont évalués ou estimés au montant des frais de service inclus dans le total des primes perçues, et non au montant total des primes proprement dites.
- (8) Comprend les services d'intermédiation financière et les services auxiliaires, à l'exception de ceux directement liés à l'assurance-vie ou aux fonds de pension (déjà compris dans les services d'assurance).
- (9) Recouvre les redevances de franchises et les redevances payées pour l'utilisation des marques déposées, ainsi que les autres redevances et droits de licence liés à l'utilisation légale d'actifs intangibles non produits non financiers et de droits de propriété. Les droits de distribution limitée des produits audiovisuels ne sont pas compris dans cette catégorie.
- (10) Y compris le négoce international et les autres services liés au commerce, la location-exploitation et divers services aux entreprises, spécialisés et techniques (juridiques, comptabilité, conseil, publicité, R&D, etc.).
- (11) (1) Les services audiovisuels et connexes sont attachés à la production de films cinématographiques, d'émissions de radio et de télévision, d'enregistrements musicaux (et similaires). Les cachets versés au personnel impliqué et les droits limités de distributions figurent également dans cette catégorie, ainsi que les paiements liés aux événements sportifs, théâtraux et spectacles divers.
(2) Les autres services personnels, culturels et relatifs aux loisirs englobent les services associés aux musées, bibliothèques, archives et autres activités culturelles et sportives. Les services d'éducation et de santé figurent aussi dans cette catégorie. Cependant, ne sont pas comprises les dépenses liées à l'éducation ou à la santé encourues par des voyageurs (et qui figurent sous la catégorie 'voyages').

Notes:

- (1) DWT (deadweight ton) is the weight measure of a vessel's carrying capacity. It includes cargo, fuel and stores.
- (2) Including passenger/cargo combined.
- (3) Year 2002: break in series; from 2002 onwards, ships registered under the flag of the Marshall Islands (developing country) are shown separately; before they were included with the United States of America (developed country).
- (4) From 2002 onwards, ships registered under the flag of the Marshall Islands are shown separately; before they were included with the United States of America.
- (5) Year 2002: break in series; from 2002 onwards, ships registered under the flag of the Marshall Islands are shown separately; before they were included with the United States of America.
- (6) Including San Marino.
- (7) UNCTAD has grouped the 10 major open and international registries to include the 10 largest fleets with more than 90 per cent foreign-controlled tonnage. Accordingly, the following 10 economies appear in the group: Antigua and Barbuda, Bahamas, Bermuda, Cyprus, Isle of Man, Liberia, Malta, Marshall Islands, Panama, and Saint Vincent and Grenadines. From 1995 onwards, the data for this group cover also the fleet of the Isle of Man, included otherwise with figures of the United Kingdom and not shown separately.
- (8) Before 1995, Isle of Man is included.

Notes :

- (1) TPL (Tonne de port en lourd) : c'est une mesure de poids de la capacité de charge d'un navire. Il inclut la cargaison, le carburant et les magasins.
- (2) Y compris les cargos mixtes.
- (3) Année 2002 : rupture de série ; les navires immatriculés aux Îles Marshall (pays en développement) sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis (pays développé).
- (4) Les navires immatriculés aux Îles Marshall sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis.
- (5) Année 2002 : rupture de série ; les navires immatriculés aux Îles Marshall sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis.
- (6) Y compris Saint-Marin.
- (7) La CNUCED a regroupé les pays de libre immatriculation en incluant les 10 plus grandes flottes dont le tonnage, contrôlé par les non-résidents, dépasse 90% du tonnage total du pays. Par conséquent, les 10 pays suivants font partie du groupe : Antigua-et-Barbuda, Bahamas, Bermudes, Chypre, Îles Marshall, Île de Man, Libéria, Malte, Panama et Saint-Vincent-et-les Grenadines. À partir de 1995, les données de ce groupe comprennent aussi la flotte de l'Île de Man. Les données de l'Île de Man ne sont pas présentées séparément, mais incluses dans la flotte du Royaume-Uni.
- (8) Y compris l'Île de Man avant 1995.

6.2 Instability indices and trends in free-market prices for selected primary commodities 2000 = 100

Source:
UNCTAD calculations based on *UNCTADstat* Commodity Price Statistics

Notes:

- (1) The measure of price instability is

$$1/n \sum_{t=1}^n \left[\left(\frac{Y(t) - y(t)}{y(t)} \right) \right] * 100$$

where

$Y(t)$ is the observed magnitude of the variable

$y(t)$ is the magnitude estimated by fitting an exponential trend to the observed value

n is the number of observations

Accordingly, instability is measured as the percentage deviation of the variables concerned from their exponential trend levels for a given period.

- (2) The growth rate of each period has been calculated using the formula:

$$\log(p) = a + b(t)$$

where

p is the price index and t is time.

- (3) Constant 2000 dollars (current dollars divided by the United Nations unit value index of manufactured goods exported by developed economies).
(4) Excluding petroleum

6.2 Indices d'instabilité et tendances des prix d'une sélection de produits de base sur le marché libre 2000 = 100

Source :
Calculs du secrétariat de la CNUCED basés sur les statistiques des prix des produits de base de *UNCTADstat*

Notes :

- (1) L'indice d'instabilité des prix est calculé selon

$$1/n \sum_{t=1}^n \left[\left(\frac{Y(t) - y(t)}{y(t)} \right) \right] * 100$$

où

$Y(t)$ est la valeur observée de la variable

$y(t)$ est la valeur estimée par ajustement à la tendance exponentielle des valeurs observées

n est le nombre d'observations

L'instabilité est le pourcentage de déviation des variables en question par rapport à la ligne de tendance exponentielle pour une période donnée.

- (2) Le taux de croissance de chaque période a été calculé selon la formule :

Notes:

- Balance-of-payments current account data cover all transactions between residents and non-residents of a reporting economy, involving economic values and mainly concerning goods, services, income and current transfers. In general, the current account balance describes the difference between current receipts and expenditures for internationally traded goods, services and income payments. At the same time, from a national perspective, the current account balance would equal the gap between national savings and domestic investment.

Notes:

- Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates.

FDI inflows and outflows comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to a FDI enterprise, or capital received by a foreign direct investor from a FDI enterprise. FDI includes the three following components: equity capital, reinvested earnings and intra-company loans. Data on FDI flows are presented on net bases (capital transactions' credits less debits between direct investors and their foreign affiliates). Net decreases in assets or net increases in liabilities are recorded as credits, while net increases in assets or net decreases in liabilities are recorded as debits. Hence, FDI flows with a negative sign indicate that at least one of the three components of FDI is negative and not offset by positive amounts of the remaining components. These are called reverse investment or disinvestment.

- (1) Data from 1988 to 1991 inclusive refer to Slovenia only, except for the FDI inflows that also cover other Republics of the former SFR Yugoslavia.
- (2) Partial data; total USSR territory is not covered.
- (3) Data from 1970 to 2001 inclusive refer to Belgium-Luxembourg Economic Union; from 2002 onwards data cover Belgium only.

Notes :

- L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères.

Les flux entrants et sortants de l'IED comprennent les capitaux fournis par l'investisseur direct (soit directement, soit par l'intermédiaire d'autres entreprises avec lesquelles il est lié) à l'entreprise d'investissement direct ou les capitaux reçus de cette entreprise par l'investisseur. L'IED est composé des trois catégories suivantes : le capital social, les bénéfices réinvestis et les emprunts intra-compagnie. Les données sur l'IED se présentent sur une base nette (les crédits moins les débits des transactions en capital entre l'investisseur direct et son entreprise apparentée). Les augmentations nettes en passifs et les décroissances nettes en actifs se déclarent comme crédits, tandis que les augmentations nettes en actifs et les décroissances nettes en passifs se déclarent comme débits. Les flux de l'IED précédés d'un signe négatif indiquent qu'au moins une des trois catégories de l'IED est négative et n'est pas contrebalancée par les valeurs positives des autres catégories. Il s'agit alors de désinvestissements ou de réductions d'investissement.

- (1) Les données de 1988 à 1991 se réfèrent seulement à la Slovaquie, à l'exception des flux entrants qui comprennent aussi d'autres Républiques de l'ex Yougoslavie (RSF).
- (2) Données partielles : elles ne couvrent pas la totalité du territoire de l'URSS.
- (3) Les données de 1970 à 2001 se réfèrent à l'Union économique belgo-luxembourgeoise ; à partir de 2002 les données couvrent uniquement la Belgique.

Notes:

- (1) Total Official Flows: The sum of Official Development Assistance (ODA) and Other Official Flows (OOF) represents the total net disbursements by the official sector at large to the recipient country.
- (2) The Total Official Development Assistance (ODA) includes grants or loans to countries and territories on the DAC List of Developing Countries which are:
 - undertaken by the official sector;
 - with promotion of economic development and welfare as the main objective;
 - at concessional financial terms (if a loan, have a grant element of at least 25%).
- (3) The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).
- (4) Total Donors is the sum of the three following donor types:
 - DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.
 - Multilateral Donors (i.e. AfDB, IBRD, IMF, UNDP).
 - Other Bilateral Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey)
- (5) Developing economies is the sum of:
 - Developing economies: Africa
 - Developing economies: America
 - Developing economies: Asia
 - Developing economies: Oceania
 - Developing economies n.e.s.
- (6) "n.e.s." refers to Unallocated or Unspecified economies, i.e. a group of recipient economies and not an individual recipient economy.

Notes :

- (1) Apports totaux du secteur public: il s'agit du total de l'aide publique au développement (APD) et des autres apports du secteur public (AASP). Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.
- (2) Par aide publique au développement (APD), on entend l'ensemble des apports de ressources qui sont fournis aux pays en développement et aux institutions multilatérales par des organismes officiels, y compris les collectivités locales, ou par leurs agents d'exécution et qui, considérés au niveau de chaque opération, répondent aux critères suivants :
 - a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et
 - b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25%.
- (3) Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).
- (4) Tous Donneurs est la somme des 3 types de donateurs suivants :
 - Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
 - Donneurs Multilatéraux (i.e. AfDB, BIRD, FMI, PNUD).
 - Autres Donneurs Bilatéraux : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).
- (5) Économies en développement est la somme de :
 - Économies en développement : Afrique
 - Économies en développement : Amérique
 - Économies en développement : Asie
 - Économies en développement : Océanie
 - Économies en développement n.d.a.
- (6) "n.d.a." se réfère à des économies "Non ventilées" ou "Non spécifiées", c-à-d un groupe d'économies bénéficiaires et non pas une économie bénéficiaire individuelle.

Source:
OECD, *OECD.Stat Extracts*

Notes:

- The groupings presented in this table do not include "n.e.s." recipient countries.

- (1) Total Official Flows: The sum of Official Development Assistance (ODA) and Other Official Flows (OOF) represents the total net disbursements by the official sector at large to the recipient country.
- (2) The Total Official Development Assistance (ODA) includes grants or loans to countries and territories on the DAC List of Developing Countries which are:
 - undertaken by the official sector;
 - with promotion of economic development and welfare as the main objective;
 - at concessional financial terms (if a loan, have a grant element of at least 25%).
- (3) The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).
- (4) Total Donors is the sum of the three following donor types:
 - DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.
 - Multilateral Donors (i.e. AfDB, IBRD, IMF, UNDP).
 - Other Bilateral Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey)
- (5) Developing economies is the sum of:
 - Developing economies: Africa
 - Developing economies: America
 - Developing economies: Asia
 - Developing economies: Oceania
 - Developing economies n.e.s.

7.6.2 Flux financiers publics bilatéraux et multilatéraux à destination des économies en développement par groupements économiques

Source :
OCDE, *OECD.Stat Extracts*

Notes :

- Les groupements présentés dans ce tableau n'incluent pas les pays bénéficiaires "n.d.a."

- (1) Apports totaux du secteur public: il s'agit du total de l'aide publique au développement (APD) et des autres apports du secteur public (AASP). Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.
- (2) Par aide publique au développement (APD), on entend l'ensemble des apports de ressources qui sont fournis aux pays en développement et aux institutions multilatérales par des organismes officiels, y compris les collectivités locales, ou par leurs agents d'exécution et qui, considérés au niveau de chaque opération, répondent aux critères suivants :
 - a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et
 - b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25%.
- (3) Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).
- (4) Tous Donneurs est la somme des 3 types de donateurs suivants :
 - Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
 - Donneurs Multilatéraux (i.e. AfD, BIRD, FMI, PNUD).
 - Autres Donneurs Bilatéraux : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).
- (5) Économies en développement est la somme de :
 - Économies en développement : Afrique
 - Économies en développement : Amérique
 - Économies en développement : Asie
 - Économies en développement : Océanie
 - Économies en développement n.d.a.
