

Subsidiary Body for Scientific and Technological Advice

Thirty-seventh session

Doha, 26 November to 1 December 2012

Agenda item 11(a)

Methodological issues under the Convention

Work programme on a common tabular format for the “UNFCCC biennial reporting guidelines for developed country Parties”

Methodological issues under the Convention

Draft conclusions proposed by the Chair

1. The Subsidiary Body for Scientific and Technological Advice (SBSTA) continued its consideration of the work programme on a common tabular format for electronic reporting of information in accordance with the “UNFCCC biennial reporting guidelines for developed country Parties” as contained in decision 2/CP.17, annex I (hereinafter referred to as the reporting guidelines), with a view to the Conference of the Parties (COP) adopting the format at its eighteenth session.
2. The considerations of the SBSTA were based on the views submitted by Parties,¹ the synthesis report based on these submissions² and the report on the workshop on a common tabular format for the reporting guidelines,³ held on 11 and 12 October 2012 in Bonn, Germany.
3. [The SBSTA recommended a draft decision on this subject for adoption by the COP at its eighteenth session (for the text of the decision, see FCCC/SBSTA/2012/L.X/Add.1)].

Draft decision -/CP.8

Common tabular format for the “UNFCCC biennial reporting guidelines for developed country Parties”

The Conference of the Parties,

¹ FCCC/SBSTA/2012/MISC.11 and Add.13.

² FCCC/SBSTA/2012/INF.4.

³ FCCC/SBSTA/2012/INF.13.

Recalling the relevant provisions of the Convention, in particular Articles 4, 5, 7, 10 and 12, and decisions 9/CP.2, 11/CP.4, 4/CP.5, 1/CP.16 and 9/CP.16 on national communications from Parties included in Annex I to the Convention (Annex I Parties),

Also recalling that by decision 2/CP.17 it decided that developed country Parties shall use the “UNFCCC biennial reporting guidelines for developed country Parties”⁴ (hereinafter referred to as the reporting guidelines) for the preparation of their first biennial reports, taking into account their national circumstances, and shall submit their first biennial reports to the secretariat by 1 January 2014,

Further recalling that by decision 2/CP.17 it requested the Subsidiary Body for Scientific and Technological Advice to develop, taking into account existing international methodologies, and based on experiences gained in preparing the first biennial reports, methodologies for reporting financial information, with a view to recommending a decision on this matter to the Conference of the Parties at its twentieth session,

Recalling that the Subsidiary Body for Scientific and Technological Advice, at its thirty-sixth session,⁵ agreed that the common tabular format will include tables for information specified in paragraphs 2, 5, 6, 9, 10, 11, 17, 18, 22 and 23 of the reporting guidelines and it may also include tables for information specified in paragraphs, inter alia, 13, 19 and 24 of the reporting guidelines,

1. *[Adopts* the common tabular format for the “UNFCCC biennial reporting guidelines for developed country Parties”, as contained in the annex to this decision;]

2. *Requests* the secretariat to develop a test version of an electronic reporting application for the common tabular format, for Parties included in Annex I to the Convention (Annex I Parties) by May, 2013 and to finalize the development by July 2013;

3. *Also requests* the secretariat [to revise the electronic application in time to allow Annex I Parties to use it for reporting and submission of their second biennial reports, due on 1 January 2016, while making a part of it related to reporting of greenhouse gas emission trends to be consistent with the guidelines contained in the annex to decision 15/CP.17.] [to update the tables for the reporting of trends in greenhouse gas emissions by sources and removals by sinks (table 1 to the annex of this decision) (and the tables for accounting for activities under Articles 3, paragraphs 3 and 4, of the Kyoto Protocol, table 4a to the annex of this decision)⁶ in the electronic reporting application referred to in paragraph 2 above following any future decisions taken by the Conference of the Parties to revise the equivalent tables in the common reporting format of the guidelines contained in the annex to decision 15/CP.17.]

4. *Requests* Annex I Parties to use the electronic reporting application when preparing and submitting their biennial reports in accordance with decision 2/CP.17;

5. *Encourages* Annex I Parties to ensure consistency, to the extent possible, between the information provided in their biennial reports and the national communications;

⁴ Contained in decision 2/CP.17, annex I.

⁵ FCCC/SBSTA/2012/2.

⁶ Refers to tables that have not yet been discussed among Parties.

6. *Requests* Parties to consider the best approach for future reporting on climate related private finance at the next revision of the reporting guidelines;

7. *Takes note* of the estimated budgetary implications of the activities to be undertaken by the secretariat pursuant to the provisions contained in paragraphs 2 and 3 above;

8. *Requests* that the actions of the secretariat called for in these conclusions be undertaken subject to the availability of financial resources; in the absence of adequate additional funding, as indicated in the budgetary estimates referred to above, the secretariat may not be in a position to undertake the requested activities.

Annex

Table 1
Emission trends: Summary^a

GREENHOUSE GAS EMISSIONS	Country Year Submission			
	Base year ^b	1990	(Years 1991 to latest reported year)	Change from base to latest reported year
	(kt CO ₂ eq)			(%)
CO ₂ emissions including net CO ₂ from LULUCF				
CO ₂ emissions excluding net CO ₂ from LULUCF				
CH ₄ emissions including net CH ₄ from LULUCF				
CH ₄ emissions excluding net CH ₄ from LULUCF				
N ₂ O emissions including net N ₂ O from LULUCF				
N ₂ O emissions excluding net N ₂ O from LULUCF				
HFCs				
PFCs				
SF ₆				
Total (including LULUCF)				
Total (excluding LULUCF)				

GREENHOUSE GAS SOURCE AND SINK CATEGORIES	Country Year Submission			
	Base year ^b	1990	(Years 1991 to latest reported year)	Change from base to latest reported year
	(kt CO ₂ eq)			(%)
1. Energy				
2. Industrial processes				
3. Solvent and other product use				
4. Agriculture				
5. Land use, land-use change and forestry ^d				
6. Waste				
7. Other				
Total (including LULUCF)^c				

Notes:

(1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report; (2) 20XX is the latest reported inventory year; (3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a For the second and subsequent biennial reports this table needs to be revised to be consistent with decision 15/CP.17, "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual greenhouse gas inventories".

^b The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^c Includes net CO₂, CH₄ and N₂O from LULUCF.

c-C ₄ F ₈	8 700
C ₅ F ₁₂	7 500
C ₆ F ₁₄	7 400
SF ₆	23 900

Abbreviation: GWP = global warming potential.

^a For the second and subsequent biennial reports this table needs to be revised to be consistent with decision 15/CP.17, “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual greenhouse gas inventories”.

^b The column “Base year” should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^c For the second and subsequent biennial reports, the global warming potential values need to be revised in accordance with decision 15/CP.17.

^d Enter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^e In accordance with the UNFCCC reporting guidelines, HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.

Abbreviations: AAU = assigned amount unit, BY = base year, CER = certified emission reduction, COP = Conference of the Parties, ERU = emission reduction unit, GHG = greenhouse gas, GWP = global warming potential, IPCC = Intergovernmental Panel on Climate Change, LULUCF = land use, land-use change and forestry.

^a Please specify the reference for the GWP: Second IPCC Assessment Report or Fourth IPCC Assessment Report.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation should be provided how these sectors relate to the sectors defined by the IPCC.

^c Transport is reported as subsector of the energy sector.

^d Industrial processes refers to the industrial processes and solvent and other product use sectors.

^e Parties may wish to include a supplementary table on LULUCF subcategories.

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
									20XX	2020

Note: The two final columns specify the year identified by the Party for estimating impacts (based on the status of the measure and whether an ex post or ex ante estimation is available).

Abbreviation: GHG = greenhouse gas.

^a Parties should use an asterisk (*) to indicate that a mitigation action is included in the ‘with measures’ projection.

^b To the extent possible, the following sectors should be used: energy, transport, industry, [industrial processes], agriculture, forestry, [LULUCF], waste management [waste] and [other sectors] [cross-cutting].

^c To the extent possible, the following types of instrument should be used: economic, fiscal, voluntary agreement, regulatory, information, education, research, other.

^d To the extent possible, the following descriptive terms should be used to report on the status of implementation: implemented, adopted, planned.

^e Additional information may be provided on the cost of the mitigation actions and the relevant timescale

^f Optional year or years deemed relevant by the Party.

Table 4

Progress in achievement of the quantified economy-wide emission reduction target: summary information

<i>Year</i>	<i>Total emissions excluding LULUCF (kt CO₂ eq)</i>	<i>Emissions/removals from LULUCF (kt CO₂ eq)</i>	<i>Total net emissions including LULUCF (kt CO₂ eq)</i>	<i>International units (transfers)</i>	<i>International units (acquisitions)</i>	<i>Total including emissions/removals from LULUCF and international units</i>
1990						
2000						
2005						
2010						
2011						
2012						

Note: Participants at the workshop supported the use of such a summary table. Tables 4(a) and 4(b) are examples of additional detailed tables on LULUCF and the use of market-based mechanisms but are more illustrative rather than presenting a convergence of views.

Abbreviation: LULUCF = land use, land-use change and forestry.

Table 4 (a)

Progress in achievement of the quantified economy-wide emission reduction target: further information on mitigation actions relevant to counting of emissions and removals from the land use, land-use change and forestry sector^a

<i>Greenhouse gas source and sink categories</i>	<i>Net CO₂ emissions/removals (kt)</i>	<i>CH₄ (kt)</i>	<i>N₂O (kt)</i>	<i>Accounting method or accounting rule^b</i>

CH ₄ emissions excluding net CH ₄ from LULUCF									
N ₂ O emissions including net N ₂ O from LULUCF									
N ₂ O emissions including net N ₂ O from LULUCF									
HFCs									
PFCs									
SF ₆									
Other (specify, e.g. NF ₃)									
Total with LULUCF^e									
Total without LULUCF									

Abbreviations: GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum, Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this report.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should

follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e Parties may choose to report total emissions with or without LULUCF, as appropriate.

Table 6(b)

Information on updated greenhouse gas projections under a ‘without measures’ scenario^a

net CH ₄ from LULUCF									
CH ₄ emissions excluding									
net CH ₄ from LULUCF									

Abbreviations: GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum, Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this report.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e Parties may choose to report total emissions with or without LULUCF, as appropriate.

Table 6(c)

Information on updated greenhouse gas projections under a ‘with additional measures’ scenario^a

	GHG emissions and removals ^b							GHG emission projections

CO ₂ emissions excluding									
net CO ₂ from LULUCF									
CH ₄ emissions including									
net CH ₄ from LULUCF									
CH ₄ emissions excluding									
net CH ₄ from LULUCF									

Abbreviations: GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum, Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this report.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should

follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e Parties may choose to report total emissions with or without LULUCF, as appropriate.

Table 7
Provision of public financial support: Summary information^a

Allocation channels	Year						
	Domestic currency			USD ^b			Type of contribution ^c
	Mitigation	Adaptation	Mitigation and Adaptation ^d	Mitigation	Adaptation	Mitigation and Adaptation ^d	Core Climate finance
Total contributions through multilateral channels:							
Multilateral climate change funds ^e							
Other multilateral climate change funds ^f							
Multilateral financial institutions, including regional development banks							
Specialized United Nations bodies							
Total contributions through bilateral, regional and other channels							
Total							
[Contribution in the total Official Development Aid(ODA) ^g]							

^a A single table should be prepared for each reported year.

^b Provide explanation on methodology used for currency exchange in the description box shown below.

^c Specify whether climate finance or core.

^d When Parties cannot distinguish whether the support was provided for mitigation or for adaptation.

28

^e Multilateral climate change funds listed in paragraph 17(a) of the UNFCCC biennial reporting guidelines for developed country Parties in decision 2/CP.17.

^f Multilateral climate change funds listed in paragraph 17(b) of the UNFCCC biennial reporting guidelines for developed country Parties in decision 2/CP.17.

^g [Suggestion to provide contribution in the total Official Development Aid was made.]

Describe what “new and additional” resources have been provided and how “new and additional” resources have been determined:
Description box:

Total							

Abbreviations: ODA = official development assistance, OOF = other official flows.

^a A separate table must be filled in for each year, namely 20XX-3 and 20XX-2, where 20XX is the reporting year.

^b Specify whether climate finance or core.

^c The parameters will be included in a drop-down menu.

^d If Parties cannot distinguish whether the support was provided for mitigation or for adaptation, the lump sum should be reported under “Other”.

^e Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under “Other”.

^f Option 1 is to include Provided, Pledged or Committed in the same column; Option 2 is Provided to report in the separate column, and Pledged or Provided in one column.]

^g Provide explanation and reference to the relevant section of the report in the description box shown below.

Description box:

Table 7(b) ^a**Provision of public financial support: Contribution through bilateral, regional and other channels for the year 20XX-3^b**

[Recipient country/ region/programme] ^e	Total amount		Status ^c	Funding source ^c	Financial instrument ^c	Type of support ^c	Sector, ^{c,d}
	Domestic currency	USD	[Provided, Pledged, Committed] ^f	ODA OOF Other ^g	Grant Concessional loan Other ^g	Mitigation Adaptation Core/general Climate-specific Other ^g	Energy Transport Industry Agriculture Water and sanitation Other ^g

Abbreviations: ODA = official development assistance, OOF = other official flows.

^a [Suggestion to separate table 7(b) into two tables, one for bilateral and one for regional and other channels, has been made.]

^b A separate table must be filled in for each year, namely 20XX-3 and 20XX-2, where 20XX is the reporting year.

^c The parameters will be included in a drop-down menu.

^d Parties may report sectoral disaggregation, as appropriate.

^e [Suggestion has been made that Parties still need to discuss more detail for the reporting of project level.]

^f [Two different suggestions are made. Option 1 is to include Provided, Pledged or Committed in the same column; Option 2 is Provided in the separate column, and Pledged or Provided in one column.]

^g Provide explanation and reference to the relevant section of the report in the description box shown below.

Description box:

Table 8
Provision of technology development and transfer support^{a,b}

Recipient country and / or region	Targeted area ^c	Measures and activities related to technology transfer	Sector ^{c,d}	Source of the funding for technology transfer	Activities undertaken /implemented by,	Total funding for technology transfer provided		Status ^c	Additional information ^e
	Mitigation Adaptation Mitigation and adaptation		Energy Transport Industry Agriculture Water and sanitation Other	Private Public	Private Public	Domestic currency	USD	Implemented Planned	

^a To be reported to the extent possible.

^b The tables should include measures and activities since the last national communication or biennial report.

^c The parameters will be included in a drop-down menu.

^d Parties may report sectoral disaggregation, as appropriate.

^e Additional information may include, for example, a short description of the measure or activity and co-financing arrangements.

Table 9
Provision of capacity-building support^a

<i>Recipient country/ region</i>	<i>Targeted area^b</i>	<i>Programme or project title</i>	<i>Description of programme or project^{c,d}</i>
	<i>Mitigation</i>		
	<i>Adaptation</i>		
	<i>Technology development and transfer</i>		
	<i>Multiple areas</i>		

^a To be reported to the extent possible.

^b The parameters will be included in a drop-down menu.

^c [Reference to be provided on existing and emerging capacity-building needs identified by Parties not included in Annex I to the Convention in the areas of mitigation, adaptation and technology development and transfer].

^d Additional information may be provided on, for example, the measure or activity and co-financing arrangements.
