Welcoming proposed goals aimed at the eradication of poverty and promotion of sustainable, inclusive and equitable development in the outcome document of the Open Working Group on Sustainable Development Goals, with due consideration given to the promotion and protection of economic, social and cultural rights, as well as civil and political rights, in accordance with States' obligations under international human rights law, and emphasizing that these proposed goals and considerations should be taken into account in the formulation of the post-2015 development agenda,

2. *Reaffirms also* that each country must take primary responsibility for its own development and that the role of national policies and strategies cannot be overemphasized in the achievement of sustainable development and poverty eradication, and recognizes that increased, effective national efforts should be complemented by concrete, effective and supportive international programmes, measures and policies, including technical cooperation, aimed at expanding development opportunities and the building institutional and technical capacities of developing countries, while taking into account national conditions and ensuring respect for national ownership strategies and sovereignty, in line with General Assembly resolution 67/224 of 21 December 2012 on the Second United Nations Decade for the Eradication of Poverty (2008-2017);
