Sixth session

Item 11 (f) of the agenda

POLLUTION OF SEA WATER

Addendum to the report of the Secretary-General

Since documents E/CN.2/134, E/CN.2/134/Add.1 and E/CN.2/134/Add.2 were prepared, the Argentine Government has communicated, in a reply dated 5 March 1953, the draft sanitary code published by the Ministry of Health in 1951. Articles 120, 121 and 122 of this document contain provisions which prohibit without authorization the discharge of foul water into waterways, the sea, lakes and ponds and the deposit on their banks of refuse, oil or any other substances likely to be injurious to health. Articles 207, 210, 387 and 410 deal with the health regulations to be observed by the masters of vessels and aircraft and do not directly concern the problem of the pollution of sea water.
