GENERAL DISCLAIMER

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the ECA secretariat concerning the legal status of any country or territory, or of its authorities or concerning the delimitation of its frontiers or boundaries. The designations and the presentation were adopted solely for the purpose of providing a convenient geographical basis for the statistical data.

In some tables the classification "developed" and "developing economies" have been used. This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country or area in the development process.

DENI DE RESPONSABILITE

Les appellations employées dans cette publication et la publication des données qui y figurent n'impliquent de la part du secrétariat de la CEA aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières. Lesdites appellations et ladite présentation n'ont été adoptées que pour donner un cadre géographique commode aux données statistiques publiées.

Dans certains tableaux les classifications "pays développés à économie de marché" et "pays en développement à économie de marché" ont été utilisées à des fins purement statistiques et n'impliquent aucune prise de position quant au degré de développement atteint par tel ou tel pays ou territoire.

INTRODUCTION

At the ninth session of the Conference of African Statisticians, held at Lomé in 1965, it was recognized that there was a need and a growing demand for complete analysis of African external trade data on a regional and sub-regional basis 1/ and this publication attempts to satisfy that need.

This first issue of Foreign Trade Statistics for Africa, Series C: Summary Tables presents data for the years 1966 to 1976 and comprises a set of 17 reference tables covering values of imports and exports by sections of the United Nations Standard International Trade Classification (SITC), quantities and values of principal exports, direction of trade, matrices of intra-African trade and indices of quantum, unit value and terms of trade. It also includes a detailed analytical review of the external trade situation in Africa over the period.

The following notes explain the concepts and definitions used in the tables:-

1. Boundary of the statistical territory

The data relate to all the countries of the African region divided as follows:

| | |
|--------------------------|--|
| North Africa: | Algeria, Egypt, Libyan Arab Jamahiriya (previously known as "Libya"), Morocco, Sudan and Tunisia; |
| West Africa: | Benin, Cape Verde, Gambia, Ghana, Guinea, Guinea-Bissau, Ivory Coast, Liberia, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone, Togo and Upper Volta; |
| Central Africa: | Angola, Burundi, United Republic of Cameroon, Central African Empire, Chad, Congo, Equatorial Guinea, Gabon, Rwanda, São Tomé and Príncipe and Zaire; |
| East Africa: | Botswana, Comoros, Ethiopia, Kenya, Lesotho (prior to October 1966, known as "Basutoland"), Madagascar, Malawi, Mauritius, Mozambique, Seychelles, Somalia, Swaziland, United Republic of Tanzania, Uganda and Zambia; |
| Other Developing Africa: | Djibouti (formerly known as the "French Territory of the Afars and the Issas" and prior to 3 July 1967 as "French Somaliland"), Namibia (prior to 12 June 1968 known as "South West Africa"), Reunion, Southern Rhodesia and Western Sahara; |
| South Africa: | The Republic of South Africa. |

1/ "Report of the ninth session of the Conference of African Statisticians" (E/CN.14/CAS.9/24).

2. System of trade

Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

- (a) Special trade: Special imports are the combined total of imports for direct domestic consumption (including transformation and repair) and withdrawal from customs bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods (nationalized goods are goods which having been included in special imports are then exported without transformation);
- (b) General trade: General imports are the combined total of imports for direct domestic consumption and imports into customs bonded warehouses or free zones. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from customs bonded warehouses or free zones without having been transformed.

Technically, direct transit trade, i.e. goods merely being transshipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade. However in the statistics of the following seven countries it is included: Botswana, Cape Verde, Egypt, Ethiopia, Niger, Nigeria and Togo.

The statistics of the following countries are on the special trade system:

| | | | | |
|------------|----------------|---------------|---------------------|-------------|
| Algeria | C. Afr. Empire | Guinea-Bissau | Morocco | Somalia |
| Angola | Chad | Liberia | Niger | Swaziland |
| Benin | Congo | Madagascar | Réunion | Togo |
| Burundi | Djibouti | Mali | Rwanda | Upper Volta |
| Cameroon | Egypt | Mauritania | São Tomé & Príncipe | Zaire |
| Cape Verde | Gabon | Mozambique | Senegal | Zambia |

The statistics for Seychelles are also on the special trade system except that petroleum imports are included when they enter and not when withdrawn from bonded warehouses and free zones.

The statistics of the following countries are on the general trade system:

| | | |
|-------------|------------------------|-----------------------|
| Comoros | Libyan Arab Jamahiriya | South Africa, Rep. of |
| Ethiopia | Lesotho | Southern Rhodesia |
| Gambia | Malawi | Sudan |
| Ghana | Mauritius | Tanzania |
| Ivory Coast | Nigeria | Tunisia |
| Kenya | Sierra Leone | Uganda |

3. Valuation

Generally imports are valued c.i.f. i.e. the value at which the goods were purchased plus the cost of transportation and insurance, where not included, to the frontier of the country of import (including unloading charges at the frontier if any. However in respect of the following countries the value reported is the c.i.f. value as herein defined plus customs duties or other customs charges.

| | | | |
|----------|---------------------|------------|-------------|
| Benin | Central Afr. Empire | Mozambique | Swaziland |
| Botswana | Lesotho | Niger | Upper Volta |
| Cameroon | Madagascar | Sudan | |

Exports are generally valued free on board (f.o.b) or free on rail or road vehicles (f.o.r.) at the frontier of the country, including export duties, internal taxes and similar charges imposed in the country of export in so far as they in fact remain charged on the goods exported. This is the value at which the goods were sold by the exporter including transportation and insurance to bring the goods onto the transporting vehicle at the frontier of the exporting country. However in respect of the following countries the value reported falls short of the definition by the exclusion of export duties and/or other internal expenses:

| | | | |
|------------|------------|--------------|-------------|
| Angola | Djibouti | Sierra Leone | Tunisia |
| Cape Verde | Madagascar | Seychelles | Upper Volta |
| Comoros | Rwanda | Togo | |

4. Merchandise

Merchandise is defined to include all goods which add to or subtract from the stock of material resources in a country as a result of their movement into or out of the country.

The following items are therefore excluded from the statistics:

- (a) Goods consigned by a government to its armed forces and diplomatic missions abroad 1/,
- (b) Trade of foreign missions stationed in the reporting country 2/,
- (c) Trade of foreign military forces stationed in the reporting country 3/,
- (d) Bank notes 4/ and coins 5/ in circulation,

1/ Included in the Statistics of Benin and Madagascar

2/ Included in the Statistics of Benin, Botswana, Central African Empire, Gambia, Mauritius, Niger, Nigeria, Rwanda, Sierra Leone and Togo.

3/ Included in the Statistics of Benin, Mauritius and Upper Volta.

4/ Included in the Statistics of Benin, Cape Verde, Comoros, Gambia, Sudan and Togo.

5/ Included in the Statistics of Benin, Cape Verde, Gambia and Malawi.

- (e) Vehicles engaged solely in carrying goods or passengers between countries, 6/
- (f) Vehicles of tourists and travellers, 7/
- (g) Other effects of tourists and travellers, 8/
- (h) Animals temporarily imported for raising or breeding 9/
- (i) Goods shipped only for temporary storage 10/
- (j) Goods for exhibition only 11/
- (k) Returnable samples 12/ and returnable containers 13/.

As regards the treatment of gold, it is the practice to include non-monetary gold only in the statistics of the following countries:

| | | |
|------------|--------------|-----------|
| Botswana | Ethiopia | Mauritius |
| Cape Verde | Sierra Leone | Swaziland |

and both monetary and non-monetary gold in the Statistics of the following:

| | | | | |
|------------------------|---------|------------|------------|----------|
| Algeria | Comoros | Ghana | Malawi | Tanzania |
| Benin | Egypt | Kenya | Reunion | Uganda |
| Centra. Afr. Empire | Gambia | Madagascar | Seychelles | |

However, largely because of technical difficulties and because the SITC revised treats all types of gold as non-merchandise trade, gold is also not included in the tables.

-
- 6/ Included in the Statistics of the Central African Empire, Ethiopia, Mauritius, Mozambique, Nigeria, Rwanda, Seychelles, Sudan and Togo.
 - 7/ Included in the Statistics of Benin, Central Afr. Empire, Djibouti, Niger, Mauritius, Mozambique, Nigeria, Seychelles and Togo.
 - 8/ Included in the Statistics of Cameroon, Central Afr. Empire, Ghana, Nigeria and Togo.
 - 9/ Included in the Statistics of Benin, Central African Empire, Egypt, Ghana, Malawi, Niger, Nigeria, Réunion and Sudan.
 - 10/ Included in the Statistics of Benin, Botswana, Mauritius, Mozambique, Niger, Nigeria and Reunion.
 - 11/ Included in the Statistics of Benin, Gambia, Ghana, Kenya, Malawi, Mozambique, Niger, Nigeria, Tanzania, Togo and Uganda.
 - 12/ Included in the Statistics of Benin, Ghana, Kenya, Niger, Nigeria, Sierra Leone, Tanzania, Togo and Uganda.
 - 13/ Included in the Statistics of Benin, Chad, Central African Empire, Gambia, Ghana, Mozambique, Niger, Nigeria, Sierra Leone, Sudan and Togo.

Other exclusions are:

- (a) Bunkers and stores for ships and aircraft, 14/
- (b) Fish and salvage sold abroad or to foreign vessels off national vessels 15/, and fish and salvage landed from foreign vessels in national ports 16/,
- (c) Goods on lease 17/,
- (d) Repairs to foreign ships and aircraft 18/,
- (e) Goods sent for 19/ and returned from repair 20/.

Included are the following:

- (a) International transactions of sales and purchases of ships and aircraft 21/,
- (b) Silver ore, concentrates, bullion, unissued coin and scrap and partly-worked and manufactured silver 22/,

14/ Included in the Statistics of Benin, Central Afr. Empire, Comoros, Ethiopia, Gambia, Kenya, Nigeria, Réunion, Seychelles, Somalia, Swaziland, Tanzania and Uganda .

15/ Included in the Statistics of Benin, Ethiopia, Somalia and Togo.

16/ Included in the Statistics of Benin, Cameroon, Central Afr. Rep., Comoros, Egypt, Ethiopia, Gambia, Ghana, Kenya, Madagascar, Malawi, Mauritius, Mozambique, Réunion, Seychelles, Sierra Leone, Somalia, Sudan, Tanzania, Togo and Uganda.

17/ Included in the Statistics of Benin, Botswana, Gambia, Ghana, Kenya, Libyan Arab Jam., Réunion, Seychelles, Sierra Leone, Somalia, Tanzania, Togo and Uganda.

18/ Included in the Statistics of Benin, Lesotho, Nigeria, Sudan, Swaziland, and Zambia.

19/ Included in the Statistics of Benin, Gambia, Ghana, Malawi, Mauritius, Niger, Nigeria, Sierra Leone, Sudan and Swaziland.

20/ Included in the Statistics of Benin, Botswana, Cameroon, Comoros, Egypt, Gambia, Ghana, Kenya, Lesotho, Malawi, Mauritius, Niger, Nigeria, Sierra Leone, Swaziland, Tanzania, Uganda and Zambia.

21/ Excluded from the Statistics of Cameroon, Gambia, Ghana and Niger.

22/ Excluded from the Statistics of Cameroon, Libya, Mozambique, Niger, Nigeria, Sierra Leone, Somalia and Zambia. In respect of the Seychelles, Sudan and Swaziland, only bullion and specie excluded

- (c) Trade in gas 23/, electricity 24/, and water 25/,
- (d) Parcel post 26/,
- (e) Trade on government account 27/ (but see the first three items under exclusions above),
- (f) Trade on account of foreign concessionaires operating in a country 28/,
- (g) Goods not liable to customs duty 29/.

5. Partner countries

The classification under "country" names of geographical parts of the world with which the various countries have trade is not uniform in their official statistics. Thus, the definition of trading partner varies for a number of countries and the following terms apply:

- (a) In respect of imports
 - (i) "Country of origin" or production (i.e. the last country in which the goods received appreciable physical transformation) for Algeria, Angola, Benin, Cameroon, Cape Verde, Central African Empire, Chad, Comoros, Congo, Ethiopia, Gabon, Ghana, Guinea-Bissau, Kenya 30/, Ivory Coast, Liberia, Madagascar, Malawi, Mali, Mauritius, Mauritania, Morocco, Mozambique, Niger, Nigeria, Reunion, Senegal, Sierra Leone, Seychelles, Somalia, Tunisia, Tanzania 30/, Uganda 30/ and Zambia.
 - (ii) "Country of consignment" (i.e. the country from which the goods were first despatched to the importing country) for Botswana, Egypt, Kenya 31/ Libya, Sudan, Tanzania 31/, Uganda 31/ and Zaire.
 - (iii) "Country of purchase" (i.e. country of residence of the seller) for Swaziland.
 - (iv) "Country of provenance" in respect of all other countries

23/ Excluded from the Statistics of Nigeria.

24/ Excluded from the Statistics of Central African Empire, Egypt, Niger, Nigeria and Somalia.

25/ Excluded from the Statistics of Djibouti, Egypt, Niger and Nigeria.

26/ Excluded from the Statistics of Mauritius (imports), Mozambique, Nigeria and Rwanda.

27/ Excluded from the Statistics of Egypt and Nigeria.

28/ Excluded from the Statistics of Egypt, Ghana, Mozambique, Nigeria, Seychelles and Sudan.

29/ Excluded from the Statistics of Cameroon, Ethiopia, Mauritius, Reunion and Sudan.

30/ Up to 1975.

31/ After 1975.

(b) In respect of exports

- (i) "Country of last consignment" (i.e. the last known destination) for Algeria, Cameroon, Central African Empire, Comoros, Egypt, Ethiopia, Gambia, Ghana, Ivory Coast, Kenya, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Niger, Nigeria, Reunion, Senegal, Sudan, Tanzania, Togo, Tunisia, Uganda and Upper Volta;
- (ii) "Country of consumption" (i.e. country where merchandise should receive treatment for which it was designed at the time of production or manufacture, or place where it should be transformed, repaired or submitted to further workmanship, not including blending, repacking or reassortment) for Angola, Cape Verde, Gambia, Benin and Mozambique;
- (iii) "Country of sale" (i.e. the country of the residence of the buyer) for Swaziland;
- (iv) "Country of destination" in respect of all other countries.

The country aggregates shown throughout this publication are based on those set forth in the United Nations Standard Country Code except as concerns the African sub-regions.

6. Index numbers of quantum, unit value and terms of trade

Index numbers of unit value in national currencies and of quantum and terms of trade are presented at tables 4 to 8. Apart from the estimates shown the indices are the official indices which show the changes in the average price of the aggregate merchandise imports or exports (indices of unit value) and the volume of the aggregate merchandise imports or exports (indices of quantum). Each index number represents a change in price or volume between the period to which the number relates, called the current period, and a fixed period, called the publication base, in which the index is represented by the percentage 100. In order to facilitate comparison the indices shown have been adjusted so that the calendar year 1970 is the publication base.

The formulae used for the computation of the Quantum and unit value indices are as follows:

| | <u>Quantum index</u> | <u>Unit value index</u> |
|----------------------------|-------------------------------------|-------------------------------------|
| Laspeyres (base weighted) | $\frac{\sum p_n q_n}{\sum p_o q_o}$ | $\frac{\sum p_n q_o}{\sum p_o q_o}$ |
| Paasche (current weighted) | $\frac{\sum p_n q_n}{\sum p_n q_o}$ | $\frac{\sum p_n q_n}{\sum p_o q_n}$ |

| | <u>Quantum index</u> | <u>Unit Value Index</u> |
|--------------|---|---|
| Fisher total | $\sqrt{\frac{p_o q_n}{p_o q_o} \times \frac{p_n q_n}{p_n q_o}}$ | $\sqrt{\frac{p_n q_o}{p_o q_o} \times \frac{p_n q_n}{p_o q_n}}$ |

Where "p" denotes "average price", "q" denotes "quantity", "o" denotes "base period" and "n" denotes "current period".

The unit value indices in respect of the following countries are based:-

(a) On the Laspeyres formula

Ghana, Libya 32/, Mauritius, Mozambique 32/, Nigeria and Senegal;

(b) On the Paasche formula

Algeria, Egypt, Gambia, Ivory Coast, Madagascar, Morocco, Malawi and Zaire;

(c) On the Fisher Ideal formula

Kenya, Tanzania, Uganda and Zambia.

The quantum indices in respect of the following countries are based:-

(a) On the Laspeyres formula

Algeria, Cameroon, Egypt, Gambia, Ghana, Ivory Coast, Libya 32/, Madagascar, Morocco, Mozambique 32/, Malawi, Sudan, Togo and Zaire;

(b) On the Paasche formula

Mauritius, Nigeria and Senegal;

(c) On the Fisher total formula

Kenya, Tanzania, Uganda and Zambia.

On the other hand for the estimates included in the tables the unit value indices have been computed on the basis of the Laspeyres formula while the quantum indices are based on the Paasche. Where no direct calculation could have been effected the estimates are based on apparent trends for countries or groups of countries in the same sub-region with broadly similar patterns of trade. Such estimates are linked to the existing national series.

The estimates in respect of unit value indices for the region as a whole and the sub-regional groupings are the averages of the country index numbers weighted by the US dollar equivalent of the relevant aggregate value of imports or exports. The corresponding quantum indices are interdependent and have been obtained by dividing the unit value indices thus computed into the relevant total value indices thus:

$$Q = \frac{\sum V_n}{\sum V_o} \div \frac{\sum n V_n}{\sum V_n}$$

32/ The indices are calculated on moving period weights and chained.

Where " V_n " denotes the total value of the imports or exports of a given country in the current year, " V_0 " denotes the corresponding value in the base year, and " P_n " denotes the unit value index number for that country in the current year.

The terms of trade have been calculated as the ratio of the unit value index numbers of Exports to those of the corresponding imports.

7. Symbols used

The following symbols have been used in the tables

- "..." denotes "not available"
- " - " denotes "magnitude of less than half the unit used"
- " * " denotes "Provisional or estimated figure"

8. Estimates used

The estimates of absolute value shown in the tables are by and large extrapolations or derivatives from monthly data, reported by the country or from the data of partner countries.

9. Sources of data

The following international publications have been used for compiling the tables:

- (a) United Nations:
 - (i) Yearbook of International Trade Statistics, Vol, Trade by Country 1966-1975
 - (ii) Foreign Trade Statistics for Africa
 - Series A, Direction of Trade Nos. 13-75
 - Series B, Trade by Commodity, Nos. 12-30
- (b) International Monetary Fund: Direction of Trade annuals 1970-74 and 1969-75.
- (c) Statistical Office of the European Communities: Acl: Yearbook of Foreign Trade Statistics, 1975

National annual statistical reports on external trade have also been used as well as current issues of the following periodicals:

- (a) African Research Ltd (England) Africa Research Bulletin
- (b) The Economist Intelligence Unit, Ltd (London) Quarterly Economic Review and
- (c) Marchés tropicaux et méditerranéens (Paris)

INTRODUCTION

A sa neuvième session, tenue à Lomé en 1965, la Conférence des statisticiens africains a reconnu qu'il devenait de plus en plus nécessaire de procéder à une analyse exhaustive des données concernant le commerce extérieur de l'Afrique, sur une base régionale et sous-régionale 1/. La présente publication vise à répondre à ce besoin.

Le premier numéro des Statistiques africaines du commerce extérieur, série C : tableau récapitulatif contient des données pour la période de 1966 à 1976 ainsi que 17 tableaux de référence concernant la valeur des importations et des exportations, par section de la Classification type pour le commerce international (CTCI) de l'ONU, les quantités et les valeurs des exportations principales, les courants d'échanges commerciaux, les matrices des échanges intra-africains ainsi que les indices du quantum, la valeur unitaire et les termes de l'échange. Il contient également un examen analytique détaillé de la situation du commerce extérieur en Afrique pendant la période considérée.

Les concepts et définitions utilisés dans les tableaux sont les suivants :

1. Limites du territoire statistique

Les données concernent tous les pays de la région africaine, divisée comme suit :

Afrique du Nord : Algérie, Egypte, Jamahiriya arabe libyenne (autrefois connue sous le nom de "Libye"), Maroc, Soudan et Tunisie;

Afrique de l'Ouest : Bénin, Cap Vert, Côte d'Ivoire, Gambie, Ghana, Guinée, Guinée-Bissau, Haute Volta, Libéria, Mali, Mauritanie, Niger, Nigéria, Sénégal, Sierra Leone et Togo;

Afrique du Centre : Angola, Burundi, Congo, Empire centrafricain, Gabon, Guinée équatoriale, République-Unie du Cameroun, Rwanda, Sao Tomé et Príncipe, Tchad et Zaïre;

Afrique de l'Est : Botswana, Comores, Ethiopie, Kenya, Lesotho (connu jusqu'en octobre 1966 sous le nom de "Basutoland", Madagascar, Malawi, Maurice, Mozambique, Ouganda, République-Unie de Tanzanie, Seychelles, Somalie, Souaziland et Zambie;

1/ "Rapport de la neuvième session de la Conférence des statisticiens africains" (E/CN.14/CAS.9/24).

Autres pays en développement d'Afrique :

Djibouti (connu à partir du 3 juillet 1967 sous le nom de "Territoire français des Afars et des Issas et auparavant sous le nom de "Côte française des Somalies"), Namibie (connue jusqu'au 12 juin 1968 sous le nom de "Sud-ouest africain"), Réunion, Rhodésie du Sud et Sahara occidental;

Afrique du Sud :

République sud-africaine

2. Systèmes du commerce

On utilise communément pour les échanges commerciaux deux systèmes qui diffèrent essentiellement par le mode d'enregistrement des marchandises entreposées et réexportées.

- a) Commerce spécial : Par importations spéciales, on entend le total combiné des importations pour la consommation intérieure directe (y compris la transformation et la réparation) et les marchandises retirées des entrepôts en douane ou des zones franches pour la consommation intérieure. Les exportations spéciales comprennent les exportations de produits nationaux, les marchandises totalement ou partiellement produites ou fabriquées dans le pays ainsi que les exportations de produits nationalisés (par produit nationalisé on entend des produits qui ont été inclus dans les importations spéciales puis sont exportés sans transformation);
- b) Commerce général : Les importations générales sont le total combiné des importations pour la consommation intérieure directe et des importations dans les entrepôts en douane ou dans les zones franches. Les exportations générales sont le total combiné des exportations et des réexportations nationales. Dans le système du commerce général, on entend par réexportation l'expédition à l'étranger de biens nationalisés et de biens qui, après avoir été importés, sont retirés des entrepôts en douane ou des zones franches sans avoir été transformés.

Techniquement, le commerce de transit direct, c'est-à-dire le transbordement ou le mouvement de biens à travers le pays aux seules fins du transport, est exclu des statistiques du commerce spécial et du commerce général. Il est cependant inclus dans les statistiques des sept pays suivants : Botswana, Cap Vert, Egypte, Ethiopie, Niger, Nigéria et Togo.

Les statistiques des pays suivants relèvent du système du commerce spécial :

| | | | |
|----------|----------------------|----------------------|------------|
| Algérie | Egypte | Maroc | Somalie |
| Angola | Empire centrafricain | Mauritanie | Souaziland |
| Bénin | Gabon | Mozambique | Tchad |
| Burundi | Guinée-Bissau | Niger | Togo |
| Cameroun | Haute-Volta | Réunion | Zaire |
| Cap Vert | Libéria | Rwanda | Zambie |
| Congo | Madagascar | Sao Tomé-et-Principe | |
| Djibouti | Mali | Sénégal | |

Les statistiques concernant les Seychelles relèvent aussi du système du commerce spécial, sauf en ce qui concerne les importations de pétrole qui sont incluses lorsqu'elles entrent dans le pays et ne sont pas retirées des entrepôts en douane et des zones franches.

Les statistiques des pays suivants relèvent du système du commerce général :

| | | |
|---------------------------|---------|--------------------------|
| Comores | Kenya | République sud-africaine |
| Côte d'Ivoire | Lesotho | Rhodésie du Sud |
| Ethiopie | Malawi | Sierre Leone |
| Gambie | Maurice | Soudan |
| Ghana | Nigéria | Tanzanie |
| Jamahiriya arabe libyenne | Ouganda | Tunisie |

3. Evaluation

En général, pour les importations, la valeur de transaction est la valeur à laquelle les marchandises auront été vendues, augmentée des frais de transport et d'assurance, s'ils ne sont pas déjà compris, jusqu'à la frontière du pays importateur (y compris les frais de déchargement à la frontière s'il y a lieu). Pour les pays suivants, la valeur donnée est cependant la valeur c.a.f telle qu'elle vient d'être définie, à laquelle s'ajoutent les droits et autres frais de douane.

| | | | |
|----------------------|-------------|-----------------------------|------------|
| Bénin | Haute-Volta | Mozambique | Soudan |
| Botswana | Lesotho | Niger | Souaziland |
| Empire centrafricain | Madagascar | République-Unie du Cameroun | |

La valeur des exportations est généralement estimée franco bord (f.o.b.) ou franco wagon ou véhicule routier, à la frontière du pays vendeur, les droits de sortie, impôts intérieurs et autres charges analogues imposés dans le pays d'exportation étant également inclus dans la mesure où ils restent réellement perçus sur les biens exportés. C'est la valeur à laquelle les biens ont été vendus par l'exportateur, les frais de transport et

d'assurance pour amener les marchandises jusqu'au véhicule utilisé pour les transporter à la frontière du pays exportateur. Dans les pays suivants cependant, la valeur ne correspond pas à la définition, du fait de l'exclusion des droits d'exportation et/ou autres dépenses internes :

| | | | |
|----------|-------------|--------------|---------|
| Angola | Djibouti | Rwanda | Togo |
| Cap Vert | Haute-Volta | Sierra Leone | Tunisie |
| Comores | Madagascar | Seychelles | |

4. Marchandises

On entend par marchandises tous les biens dont l'exportation ou l'importation contribuent à l'accroissement ou à la diminution du stock des ressources matérielles dans un pays.

Les marchandises suivantes sont donc à exclure des statistiques :

- a) Marchandises envoyées par un gouvernement à ses forces armées et à ses représentants diplomatiques à l'étranger 1/,
- b) Commerce des missions étrangères stationnées dans le pays 2/,
- c) Commerce des forces militaires étrangères stationnées dans le pays 3/,
- d) Billets de banque 4/ et pièces de monnaie 5/, en circulation,
- e) Véhicules utilisés uniquement pour transporter des marchandises ou des passagers entre les pays 6/,

1/ Incluses dans les statistiques du Bénin et de Madagascar.

2/ Inclus dans les statistiques du Bénin, du Botswana, de l'Empire centrafricain, de la Gambie, de Maurice, du Niger, du Nigéria, du Rwanda, de la Sierra Leone et du Togo.

3/ Inclus dans les statistiques du Bénin, de la Haute-Volta et de Maurice.

4/ Inclus dans les statistiques du Bénin, du Cap Vert, des Comores, de la Gambie, du Soudan et du Togo.

5/ Incluses dans les statistiques du Bénin, du Cap Vert, de la Gambie et du Malawi.

6/ Inclus dans les statistiques de l'Empire centrafricain, de l'Ethiopie, de Maurice, du Mozambique, du Nigéria, du Rwanda, des Seychelles, du Soudan et du Togo.

- f) Véhicules des touristes et des voyageurs 7/,
- g) Autres effets des touristes et des voyageurs 8/,
- h) Animaux importés temporairement pour l'élevage ou la reproduction 9/,
- i) Marchandises expédiées uniquement en vue d'un stockage temporaire 10/,
- j) Marchandises importées à des fins d'exportation seulement 11/,
- k) Echantillons 12/, et conteneurs 13/ restituables.

En ce qui concerne l'or, les pays suivants seulement incluent l'or non monétaire dans leurs statistiques :

Botswana
Cap Vert

Ethiopie
Sierra Leone

Maurice
Souaziland

et les pays suivants incluent aussi bien l'or monétaire que l'or non monétaire dans leurs statistiques :

Algérie
Bénin
Comores

Egypte
Empire centrafricain
Gambie

Ghana
Kenya
Malawi

Ouganda
Réunion
Tanzanie

Cependant, compte tenu des difficultés techniques et du fait que dans la CTCI révisée, les mouvements de tous les types d'or ne sont pas classés parmi les mouvements de marchandises, l'or non plus ne figure pas dans les tableaux.

7/ Inclus dans les statistiques du Bénin, de l'Empire centrafricain, de Djibouti, du Niger, de Maurice, du Mozambique, du Nigéria, des Seychelles et du Togo.

8/ Inclus dans les statistiques du Cameroun, de l'Empire centrafricain, du Ghana, du Nigéria et du Togo.

9/ Inclus dans les statistiques du Bénin, de l'Egypte, de l'Empire centrafricain, du Ghana, du Malawi, du Niger, du Nigéria, de la Réunion et du Soudan.

10/ Inclues dans les statistiques du Bénin, du Botswana, de Maurice, du Mozambique, du Niger, du Nigéria et de la Réunion.

11/ Inclues dans les statistiques du Bénin, de la Gambie, du Ghana, du Kenya, du Malawi, du Mozambique, du Niger, du Nigéria, de l'Ouganda, de la Tanzanie et du Togo.

12/ Inclus dans les statistiques du Bénin, du Ghana, du Kenya, du Niger, du Nigéria, de l'Ouganda, de la Sierra Leone, de la Tanzanie et du Togo.

13/ Inclus dans les statistiques du Bénin, de l'Empire centrafricain, de la Gambie, du Ghana, du Mozambique, du Niger, du Nigéria, de la Sierra Leone, du Soudan, du Tchad et du Togo.

Parmi les autres marchandises exclues figurent :

- a) Les combustibles de soute et les provisions de bord pour les navires et les aéronefs 14/,
- b) Poisson et épaves vendus à l'étranger ou à des navires étrangers par des navires nationaux 15/, et poisson et épaves débarqués des navires étrangers dans les ports nationaux 16/,
- c) Marchandises louées 17/,
- d) Travaux de réparation sur des navires et des aéronefs étrangers 18/,
- e) Marchandises envoyées à des fins de réparation 19/ et restituées 20/.

14/ Inclus dans les statistiques du Bénin, des Comores, de l'Empire centrafricain, de l'Ethiopie, de la Gambie, du Kenya, du Nigéria, de l'Ouganda, de la Réunion, des Seychelles, de la Somalie, du Souaziland et de la Tanzanie.

15/ Inclus dans les statistiques du Bénin, de l'Ethiopie, de la Somalie et du Togo.

16/ Inclus dans les statistiques du Bénin, des Comores, de l'Egypte, de l'Empire centrafricain, de l'Ethiopie, de la Gambie, du Ghana, du Kenya, de Madagascar, du Malawi, de Maurice, du Mozambique, de l'Ouganda, de la République-Unie du Cameroun, de la Réunion, des Seychelles, de la Sierra Leone, de la Somalie, du Soudan, de la Tanzanie et du Togo.

17/ Incluses dans les statistiques du Bénin, du Botswana, de la Gambie, du Ghana, de la Jamahiriya arabe libyenne, du Kenya, de l'Ouganda, de la Réunion, des Seychelles, de la Sierra Leone, de la Somalie, de la Tanzanie et du Togo.

18/ Inclus dans les statistiques du Bénin, du Lesotho, du Nigéria, du Soudan, du Souaziland et de la Zambie.

19/ Incluses dans les statistiques du Bénin, de la Gambie, du Ghana, du Malawi, de Maurice, du Niger, du Nigéria, de la Sierra Leone, du Soudan et du Souaziland.

20/ Incluses dans les statistiques du Bénin, du Botswana, des Comores, de l'Egypte, de la Gambie, du Ghana, du Kenya, du Lesotho, du Malawi, de Maurice, du Niger, du Nigéria, de l'Ouganda, de la République-Unie du Cameroun, de la Sierra Leone, du Souaziland, de la Tanzanie et de la Zambie.

Les marchandises suivantes sont à inclure :

- a) Transactions internationales concernant la vente et l'achat de navires et d'aéronefs 21/,
- b) Minerai, concentrés, lingots d'argent, pièces de monnaie en argent non émises, déchets et argent partiellement ouvré 22/,
- c) Commerce de gaz 23/, d'électricité 24/ et d'eau 25/,
- d) Colis postaux 26/,
- e) Commerce pour le compte de l'Etat 27/ (voir cependant ci-dessus les trois premières catégories de marchandises à exclure),
- f) Commerce pour le compte de concessionnaires étrangers opérant dans un pays 28/,
- g) Marchandises auxquelles les droits de douane ne sont pas appliqués 29/.

21/ Exclues des statistiques de la Gambie, du Ghana, du Niger et de la République-Unie du Cameroun.

22/ Exclues des statistiques de la Jamahiriya arabe libyenne, du Mozambique, du Niger, du Nigéria, de la République-Unie du Cameroun, de la Sierra Leone, de la Somalie et de la Zambie. En ce qui concerne les Seychelles, le Soudan et le Souaziland, seuls les lingots et le numéraire sont exclus.

23/ Exclu des statistiques du Nigéria.

24/ Exclu des statistiques de l'Egypte, de l'Empire centrafricain, du Niger, du Nigéria et de la Somalie.

25/ Exclu des statistiques de Djibouti, de l'Egypte, du Niger et du Nigéria.

26/ Exclues des statistiques de Maurice (importations), du Mozambique, du Nigéria et du Rwanda.

27/ Exclu des statistiques de l'Egypte et du Nigéria.

28/ Exclu des statistiques de l'Egypte, du Ghana, du Mozambique, du Nigéria, des Seychelles et du Soudan.

29/ Exclues des statistiques de l'Ethiopie, de Maurice, de la Réunion, du Soudan et de la République-Unie du Cameroun.

5. Pays partenaires

On ne trouve pas, dans les statistiques officielles, de définition uniforme des "pays" de diverses régions géographiques du monde avec lesquels des échanges commerciaux ont lieu. La définition de "partenaire commercial" varie donc dans un certain nombre de pays et les termes suivants sont employés :

a) En ce qui concerne les importations

- i) "Pays d'origine" ou de production (c'est-à-dire le dernier pays dans lequel les marchandises ont subi une transformation matérielle appréciable) pour les pays suivants : Algérie, Angola, Bénin, Cap Vert, Comores, Congo, Côte d'Ivoire, Empire centrafricain, Ethiopie, Gabon, Ghana, Guinée-Bissau, Kenya 30/, Libéria, Madagascar, Malawi, Mali, Maroc, Maurice, Mauritanie, Mozambique, Niger, Nigéria, Ouganda 30/, République-Unie du Cameroun, République-Unie de Tanzanie 30/, Réunion, Sénégal, Sierra Leone, Seychelles, Somalie, Tchad, Tunisie et Zambie.
- ii) "Pays de consignation" (c'est-à-dire le pays d'où les marchandises ont été initialement expédiées au pays d'enregistrement) pour les pays suivants : Botswana, Egypte, Jamahiriya arabe libyenne, Kenya 31/, Ouganda 31/, Soudan, Tanzanie 31/ et Zaïre.
- iii) "Pays d'achat" (c'est-à-dire pays où réside le vendeur) pour le Souaziland.
- iv) "Pays de provenance" pour tous les autres pays.

b) En ce qui concerne les exportations

- i) "Pays de dernière consignation" (c'est-à-dire dernière destination connue) pour les pays suivants : Algérie, Comores, Côte d'Ivoire, Egypte, Empire centrafricain, Ethiopie, Gambie, Ghana, Haute-Volta, Jamahiriya arabe libyenne, Kenya, Libéria, Madagascar, Malawi, Mali, Maroc, Mauritanie, Maurice, Niger, Nigéria, Ouganda, République-Unie du Cameroun, Réunion, Sénégal, Soudan, Tanzanie, Togo et Tunisie;
- ii) "Pays de consommation" (c'est-à-dire pays où la marchandise devrait subir la transformation prévue au moment de la production ou de la fabrication, ou bien endroit où elle devrait être transformée, réparée ou subir un complément d'ouvrage, à l'exclusion des opérations de mélange, de reconditionnement ou de réassortiment) pour l'Angola, le Cap Vert, la Gambie, le Bénin et le Mozambique;

30/ Jusqu'à 1975.

31/ Après 1975.

iii) "Pays de vente" (c'est-à-dire pays où réside l'acheteur) pour le Souaziland;

iv) "Pays de destination" pour tous les autres pays.

Les groupes de pays cités dans la présente publication sont conformes au United Nations Standard Country Code, sauf en ce qui concerne les sous-régions de l'Afrique.

6. Indices du quantum, valeur unitaire et termes de l'échange

Les indices de la valeur unitaire en monnaies nationales et les indices du quantum ainsi que les termes de l'échange sont présentés aux tableaux 4 à 8. A l'exception des estimations, les indices sont les indices officiels qui montrent les modifications du prix moyen des importations ou exportations globales de marchandises (indices de la valeur unitaire) ainsi que le volume des importations ou exportations globales de marchandises (indices du quantum). Chaque indice représente une modification du prix ou du volume entre la période sur laquelle porte l'indice, appelée la période actuelle et une période fixe, appelée la base de publication pour laquelle l'indice est représenté par le pourcentage 100. Afin de faciliter la comparaison, les indices ont été ajustés de façon à faire de l'année civile 1970 la base de publication.

Les formules utilisées pour le calcul des indices du quantum et de la valeur unitaire sont les suivantes :

| | <u>Indice du quantum</u> | <u>Indice de la valeur unitaire</u> |
|--|---|---|
| Laspeyres (pondération de l'année de base) | $\frac{\sum p q}{\sum o o}$ | $\frac{\sum p q}{\sum n o}$ |
| Paasche (pondération de l'année en cours) | $\frac{\sum p q}{\sum n n}$ | $\frac{\sum p q}{\sum o n}$ |
| Fisher (formule idéale) | $\sqrt{\frac{\sum p q}{\sum o n} \times \frac{\sum p q}{\sum n n}}$ | $\sqrt{\frac{\sum p q}{\sum n o} \times \frac{\sum p q}{\sum o n}}$ |

- dans lesquelles "p" signifie "prix moyen", "q" signifie "quantité", "o" signifie "période de base" et "n" signifie "période actuelle".

Les indices de la valeur unitaire en ce qui concerne les pays suivants sont fondés :

a) Sur la formule Laspeynes

Pour le Ghana, la Jamahiriya arabe libyenne ^{32/}, Maurice, Mozambique ^{32/}, le Nigéria et le Sénégal;

b) Sur la formule de Paasche

Pour l'Algérie, la Côte d'Ivoire, l'Egypte, la Zambie, Madagascar, le Malawi, le Maroc et le Zaïre;

c) Sur la formule idéale de Fisher

Pour le Kenya, l'Ouganda, la Tanzanie et la Zambie.

Les indices du quantum en ce qui concerne les pays suivants sont fondés :

a) Sur la formule Laspeynes

Pour l'Algérie, la Côte d'Ivoire, l'Egypte, la Gambie, le Ghana, la Jamahiriya arabe libyenne, Madagascar, le Malawi, le Maroc, le Mozambique ^{32/}, la République-Unie du Cameroun, le Soudan, le Togo et le Zaïre;

b) Sur la formule de Paasche

Pour Maurice, le Nigéria et le Sénégal;

c) Sur la formule totale de Fisher

Pour le Kenya, l'Ouganda, la Tanzanie et la Zambie.

Par ailleurs, pour les estimations portées dans les tableaux, les indices de la valeur unitaire ont été calculés sur la base de la formule de Laspeynes, alors que ceux du quantum étaient calculés sur la base de la formule de Paasche. Dans les cas où aucun calcul direct n'a pu être fait, les estimations sont basées sur les tendances apparentes pour les pays ou les groupes de pays de la même sous-région présentant des structures commerciales analogues. Ces estimations sont liées aux séries nationales existantes.

^{32/} Ces indices sont calculés à partir de pondérations pour des périodes mobiles et mis en chaîne.

Les estimations concernant les indices de la valeur unitaire pour la région dans son ensemble et les groupements sous-régionaux sont des moyennes des indices nationaux pondérés par l'équivalent en dollars des Etats-Unis de la valeur pertinente globale des importations ou des exportations. Les indices correspondants du quantum sont interdépendants et ont été obtenus en divisant les indices de la valeur unitaire ainsi obtenus par les indices pertinents de la valeur totale, soit :

$$Q = \frac{V_n}{V_o} \quad \cdot \quad \frac{P_n V_n}{V_n}$$

- où " V_n " représente la valeur totale des importations ou des exportations dans un pays donné pour l'année en cours, " V_o " représente la valeur correspondante pendant l'année de base et " P_n " représente l'indice de la valeur unitaire pour ce pays pendant l'année en cours.

Les termes de l'échange ont été calculés en établissant le rapport des indices de la valeur unitaire des exportations et des indices des importations correspondantes.

7. Symboles utilisés

Les symboles suivants ont été utilisés dans les tableaux :

"..." signifie "non disponible"

" - " signifie "ordre de grandeur inférieur à la moitié de l'unité utilisée"

" * " signifie "chiffre provisoire ou estimatif".

8. Estimations utilisées

Les estimations de la valeur absolue figurant dans les tableaux sont en général des extrapolations ou des dérivés des données mensuelles établies soit par le pays ou sont tirées des données fournies par les pays partenaires.

9. Sources des données

Les publications internationales suivantes ont été utilisées pour l'établissement des tableaux :

a) Nations Unies : i) Yearbook of international trade statistics, Commerce par pays 1966-1975

ii) Statistiques du commerce extérieur de l'Afrique

- Séries A, Courants commerciaux d'ensemble; numéros 13-15

- Séries B, Echanges par produit et par pays; numéros 12-30

- b) Fonds monétaire international : Direction of Trade Annuals 1970-1974 et 1969-1975
- c) Bureau de statistique des Communautés européennes : Acl: Annuaire des statistiques du commerce extérieur, 1975

Des rapports statistiques annuels par pays sur le commerce extérieur ont aussi été utilisés ainsi que les numéros récents des revues suivantes :

- a) African Research Ltd. (Grande-Bretagne) Africa Research Bulletin
- b) The Economist Intelligence Unit, Ltd. (Londres) Quarterly Economic Review, et
- c) Marchés tropicaux méditerranéens (Paris).

REVIEW OF EXTERNAL TRADE IN AFRICA, 1966 to 1976

Imports, exports and balance of visible trade

Tables 1 and 2 present the total imports and exports, and table 3 the visible trade balance of the African region, classified by sub-region and country for the years 1966 to 1976 inclusive. It has been estimated that in 1976 the imports of the region had increased by three and a half times as compared with 1966 and amounted to US \$ 47.0 thousand million. The corresponding exports had increased by 3.6 times to US \$ 45.2 thousand million; and so there was an adverse trade balance of approximately US \$ 2 thousand million. However when the trade of the Republic of South Africa is deducted we are left with the trade of developing Africa, of which imports have been estimated at US \$ 40.2 thousand million so that the adverse balance is reduced to US \$ 110 million or approximately 0.3 per cent of exports.

The total visible trade balance for developing Africa over the 11 years under review have been estimated at a surplus of US \$ 17 thousand million. This has been attributed largely to the trade of six countries, namely, Libya, Nigeria, Gabon, Ivory Coast, Uganda and Liberia, in that order, which jointly built up an estimated visible balance of US \$ 43 thousand million accounting for 44 per cent of their pooled exports. The remaining 46 developing countries of the region, most of which consistently registered deficits, pooled an unfavourable balance of US \$ 36 thousand million accounting for 23 per cent of their exports. It is significant that most of the overall surplus was accumulated during the second half of the period and that in 1974 Nigeria and Libya alone had been able to account for more than two-thirds of the whole of this amount. Except in respect of three countries, namely, Congo, Guinea and Swaziland, the visible trade balance declined considerably in 1975 as compared with 1974 but in 1976 the position tended to improve for a majority of the countries. Generally however African international trade grew almost twice as rapidly during the second half of the period than in the first, and the acceleration in respect of exports was the greater.

Unit value, volume and terms of Trade

Indexes of unit value, volume and net barter terms of trade for the region as a whole, the subregions and countries for the years 1966 to 1975 are shown at tables 4 to 8 inclusive and are summarized at table A below so as to distinguish between the region as a whole, developing Africa, the petroleum exporting and non-petroleum exporting countries. As has already been explained these figures are at best very crude representations but they serve to give a general indication of trends.

The increase in the value of African international trade over the period may be attributed mainly to increases in prices although the physical volume of the merchandise traded also increased in respect both of imports and exports. Prices for exports increased on the average more rapidly than prices for imports, particularly after 1972, so that the African terms of trade are shown to be increasingly favourable.

However the greatest share of the increase in export prices has been attributed to the trade of the eight petroleum exporting countries of the region, namely, Algeria, Egypt, Libya and Tunisia in North Africa, Nigeria in West Africa and Angola, Congo and Gabon in Central Africa. When the trade of these countries is removed increasingly unfavourable terms of trade are observed for developing Africa indeed for the region as a whole with the exception of North Africa. Table B below shows the position by sub-region, net of the petroleum exporting countries.

At this juncture it is desirable to examine the significant changes in unit value and volume in respect of relevant specific commodities which influenced the terms of trade. However the available data do not permit such an analysis, and it is possible to describe these changes only in respect of exports as shown in Table C.

The pattern and distribution of trade

Tables 9 and 10 show the values of imports and exports respectively, classified by sub-region and country and sections of the Standard International Trade Classification (SITC). In Tables D and E these data have been summarized and expressed as percentages of totals and in table E a distinction is made between petroleum exporting countries and other developing countries as well as the various ECA sub-regions.

a/ The Sections of the S.I.T.C. are as follows:-

- Section 0: Food and live animals chiefly for food
- Section 1: Beverages and tobacco
- Section 2: Crude materials, inedible, except fuels
- Section 3: Mineral fuels, lubricants and related materials
- Section 4: Animal and vegetable oils, fats and waxes
- Section 5: Chemicals and related products, not elsewhere specified
- Section 6: Manufactured goods classified chiefly by material
- Section 7: Machinery and transport equipment
- Section 8: Miscellaneous manufactured articles
- Section 9: Commodities and transactions not classified elsewhere

The most striking feature in table D is the rapidly increasing relative importance of exports of mineral fuels, lubricants and related materials and to a lesser extent of imports of machinery and transport equipment. The former increased from 19 per cent of total exports in 1966 to 55 per cent in 1976, while the latter increased from 31 per cent of total imports in 1966 to 39 per cent in 1975. On the other hand, the share of external trade attributed to food, drink and tobacco and to exports both of manufactured goods and inedible raw materials apart from fuels declined considerably over the period.

The net result of all these changes was that mineral fuels, lubricants' and related materials became the most important group of exports in place of other crude inedible materials which declined in importance to a level below that of foodstuffs which continued to account for the second place in the share of total exports. Machinery and transport equipment continued to be the most important group of imports, followed by manufactured goods, and, in fact, there was no significant change in the pattern of imports during the period under review.

The most striking feature in table E is the rapidly growing predominance in the trade of the petroleum exporting countries in the nineteen-seventies, particularly after 1972, and this is reflected in the trade of North and West Africa. This predominance is evidenced in the exports of mineral fuels, lubricants and related materials and of beverages and tobacco as well as in the imports of foodstuffs, inedible crude materials other than fuel, of animal and vegetable oils, fats and waxes and of machinery and transport equipment. The share both of imports and exports enjoyed by the developing non-petroleum exporting countries, particularly East Africa has steadily declined over the period, and their importance in the trade of the region is evident only in the exports of foodstuff and the imports of mineral fuels, lubricant's and related material.

Direction of trade

African imports and exports from and to main economic groups of countries and geographical areas of provenance and destination are shown at tables 11 and 12 by sub-region and country for the years 1966 to 1975. These data have been summarized and the results net of intra-African trade are presented as percentages of total imports and exports at table F below, The importance of intra-african trade is shown at the bottom of that table.

The principal trading partners of the region are countries with developed market economies. Chiefly among these are the members of the European Economic Community which have accounted for approximately 57 per cent of the trade of the region over the ten year period, that is, 55 per cent of imports and 58 per cent of exports. However it should be observed that there has been a steady relative decline in the trade with that Community, particularly as regards exports, in favour of the United States of America, the Latin America Free Trade Association countries and Japan. It has been estimated that these groups of countries have in real terms jointly tripled their intake and doubled their share of the exports of the region.

On the other hand while a favourable trade balance has been enjoyed with the USA and LAFTA, it should be noted that on the average Africa is a net importer from Japan.

Intra-African trade

The recorded data on intra-African exports are unreliable. This is so mainly because certain commodities, particularly from land-locked countries, shipped in bulk on consignment through depôts in neighbouring independent states are often recorded by the exporting country as exports to the country wherein the depôt is located rather than to the country or countries of final destination which are unknown and in fact may most likely be outside of Africa. On the other hand such commodities are considered as goods in transit by certain of these neighbouring states and are not accounted for in their trade statistics. One example is copper from Zaire shipped to depôts in Mozambique for subsequent onward transmission. The copper is reported as an export to Mozambique in the statistics of Zaire but is not accounted for in the imports statistics of Mozambique. For this reason an account of intra-African trade may best be rendered by considering imports only.

It has been estimated that intra-African trade has accounted for approximately six per cent of the entire trade of the region and that the Republic of South Africa has contributed approximately 17 per cent of this. If the trade of that Republic is excluded, we are left with that of Developing Africa, in respect of which intra-African trade accounts for five per cent.

While North Africa contributes the largest share to the region's trade with the rest of the world, the West African sub-region plays the greatest role in intra-African trade specifically with regard to developing Africa. Trade with the Republic of South Africa, on the other hand, is undertaken mainly by the East and Central African sub-regions as may be seen at tables 11 and 12.

The three-fold increase in the value of intra-African trade - from U.S. \$1.3 million to U.S. \$4.6 million over the period - has been attributed entirely to price increases. In fact the volume of this trade tended slightly to decline as shown in the following table:

Importations, exportations et balance commerciale (échanges visibles)

Les tableaux 1 et 2 présentent les importations et exportations totales et le tableau 3 la balance commerciale (échanges visibles) de la région de l'Afrique, classées par sous-région et pays pour les années 1966 à 1976 inclus. On estime qu'en 1976 les importations de la région ont augmenté trois fois et demie par rapport à 1966 et se sont chiffrées à 47 milliards de dollars des États-Unis. Les exportations correspondantes ont augmenté 3,6 fois pour passer à 45,2 milliards de dollars des États-Unis, de sorte que la balance commerciale a accusé un déficit d'environ 2 milliards de dollars des États-Unis. Néanmoins, si l'on déduit les échanges de la République sud-africaine, il reste pour les pays en voie de développement d'Afrique un chiffre estimatif de 40,2 milliards de dollars des États-Unis pour les exportations, de sorte que le déficit de la balance de paiements tombe à 110 millions de dollars des États-Unis soit environ 0,3 p. 100 des exportations.

Pour la période de 11 ans considérée l'excédent de la balance commerciale globale (échanges visibles) des pays en développement d'Afrique a été estimé à 17 milliards de dollars des États-Unis. Cet excédent est essentiellement le fait des échanges de six pays, à savoir la Libye, le Nigéria, le Gabon, la Côte d'Ivoire, l'Ouganda et le Libéria, pris dans cet ordre, qui ont accumulé ensemble un excédent estimatif de la balance commerciale (échanges visibles) de 43 milliards de dollars des États-Unis, ce qui représente 44 p. 100 de leurs exportations globales. En ce qui concerne les 46 pays en développement restant de la région, dont la plupart ont continuellement enregistré des déficits, le déficit global s'est chiffré à 36 milliards de dollars des États-Unis, soit à 23 p. 100 de leurs exportations. Il est significatif que la plus grande partie de l'excédent global a été accumulée au cours de la deuxième moitié de cette période et qu'en 1974 le Nigéria et la Libye ont pu accumuler, à eux deux, plus de deux tiers de ce montant. Si l'on excepte trois pays, à savoir le Congo, la Guinée et le Souaziland, la situation de la balance commerciale (échanges visibles) s'est dégradée considérablement en 1975 par rapport en 1974, mais en 1976 la situation a eu tendance à s'améliorer dans la plupart des pays. Dans l'ensemble, cependant, l'expansion du commerce extérieur de l'Afrique a été presque deux fois plus rapide au cours de la deuxième moitié de cette période qu'au cours de la première et l'accélération, en ce qui concerne les exportations, a été la plus importante.

Valeur unitaire, volume et termes de l'échange

Les indices de valeur unitaire, le volume et les termes de l'échange nets pour l'ensemble de la région, les sous-régions et les différents pays pour les années 1966 à 1976 sont indiqués aux tableaux 4 à 8 inclus et sont résumés dans le tableau A ci-après de façon à distinguer entre l'ensemble de la région, les pays en développement d'Afrique, les pays exportateurs de pétrole et les pays non exportateurs de pétrole. Comme il est indiqué plus haut, ces chiffres sont tout au plus des estimations approximatives, mais ils donnent néanmoins une indication générale des tendances.

L'accroissement de la valeur des échanges internationaux de l'Afrique au cours de la période considérée peut être attribué principalement, à la hausse des prix, mais le volume des échanges a également augmenté tant en ce qui concerne les importations que les exportations. Le prix des exportations a, en moyenne, augmenté plus rapidement que celui des importations en particulier après 1972, de sorte que les termes de l'échange de l'Afrique apparaissent comme étant de plus en plus favorables.

Toutefois, la plus grande part de l'accroissement des prix d'exportation a été attribuée au commerce des huit pays exportateurs de pétrole dans la région, à savoir l'Algérie, l'Égypte, la Libye et la Tunisie en Afrique du Nord, le Nigéria en Afrique de l'Ouest et l'Angola, le Congo et le Gabon en Afrique du Centre. Si l'on fait abstraction du commerce de ces pays on observe des termes de l'échange de plus en plus défavorables pour les pays en développement d'Afrique et même pour l'ensemble de la région, à l'exception de l'Afrique du Nord. Le tableau B ci-après indique la situation par sous-région à l'exclusion des pays exportateurs de pétrole.

A ce stade il serait souhaitable d'examiner les importantes modifications intervenues dans la valeur unitaire et le volume de certains produits pertinents qui ont influé sur les termes de l'échange. Les données disponibles ne permettent cependant pas de procéder à une telle analyse et il n'est possible de décrire ces modifications qu'en ce qui concerne les exportations (voir tableau C qui précède).

Structure et répartition des échanges

Les tableaux 9 et 10 indiquent la valeur des importations et des exportations, respectivement, classées par sous-régions, par pays et par section de la classification type pour le commerce international (CTCI). Dans les tableaux D et E, ces données sont résumées et exprimées en tant que pourcentages du total et dans le tableau E une distinction est faite entre les pays exportateurs de pétrole, les autres pays en développement et les diverses sous-régions de la CEA.

a/ Les sections de la CTCI sont les suivantes :

Sections : Produits alimentaires et animaux vivants destinés principalement à l'alimentation humaine

Section 1 : Boissons et tabacs

Section 2 : Matière brutes non comestibles, carburants non compris

Section 3 : Combustibles minéraux, lubrifiants et produits connexes

Tableau D. (suite)

a/ Les sections de la CTCI sont les suivantes :

Section 4 : Huiles, graisses et cires d'origine animale et végétale

Section 5 : Produits chimiques et produits connexes, non désignés ailleurs

Section 6 : Articles manufacturés classés principalement d'après la matière première

Section 7 : Machines et matériel de transport

Section 8 : Articles manufacturés divers

Section 9 : Articles et transactions non classés ailleurs.

La caractéristique plus frappante qui apparaît au tableau D est l'accroissement rapide de l'importance relative des exportations de combustibles minéraux, de lubrifiants et de produits connexes et, dans une moindre mesure, des importations de machines et de matériel de transport. Les premières sont passées de 19 p. 100 du total des exportations en 1966 à 55 p. 100 en 1976, alors que les dernières sont passées de 31 p. 100 du total des importations en 1966 à 39 p. 100 en 1975. Par contre, l'importance de la place qu'occupent dans le commerce extérieur les produits alimentaires, les boissons et les tabacs ainsi que les exportations tant d'articles manufacturés que de matières brutes non comestibles, à l'exception des carburants, a diminué considérablement au cours de la période considérée.

Le résultat net de toutes ces modifications est que les combustibles minéraux, les lubrifiants et produits connexes ont remplacé, en tant que groupe d'exportation le plus important, les autres matières brutes non comestibles dont l'importance a diminué au point de les placer après les produits alimentaires qui ont continué à occuper la deuxième place dans les exportations totales. Les machines et le matériel de transport ont continué à constituer le plus important groupe d'importations, suivi des articles manufacturés et, en fait, la structure des importations n'a pas évolué sensiblement au cours de la période considérée.

La caractéristique la plus frappante qui apparaît au tableau E est la place de plus en plus importante qu'occupent dans les échanges les pays exportateurs de pétrole depuis le début des années 1970, en particulier depuis 1972, et cela ressort surtout du commerce de l'Afrique du Nord et de l'Afrique de l'Ouest. Cette prédominance apparaît dans les exportations de combustibles minéraux, de lubrifiants et produits connexes et de boissons et de tabacs, ainsi que dans les importations de produits alimentaires, de matières brutes non comestibles, carburants non compris, d'huiles, de graisses et de cires d'origine animale et végétale ainsi que de machines et de matériel de transport. La part des importations et des exportations des pays en développement non exportateurs de pétrole, en particulier ceux de l'Afrique de l'Est, a progressivement baissé au cours de la période considérée et l'importance du rôle que ces pays jouent dans le commerce de la région se limite aux exportations de produits alimentaires et aux importations de combustibles minéraux, de lubrifiants et de produits connexes.

Courants commerciaux

Les importations et les exportations africaines en provenance et à destination des principaux groupements économiques de pays et les zones géographiques d'origine et de destination sont indiquées aux tableaux 11 et 12, par sous-région et par pays, pour les années 1966 et 1975. Ces données ont été résumées et les résultats, dans lesquels il n'est pas tenu compte du commerce intra-africain, sont présentés en tant que pourcentages des importations et exportations totales dans le tableau F ci-après. L'importance du commerce intra-africain est indiquée au bas de ce tableau.

Les principaux partenaires commerciaux de la région sont les pays développés à économie de marché. Parmi ceux-ci la première place revient aux membres de la Communauté économique européenne avec lesquels se sont réalisés environ 57 p. 100 des échanges de la région au cours de la période de dix ans, c'est-à-dire 55 p. 100 des importations et 58 p. 100 des exportations. Il convient toutefois de noter que les échanges avec cette communauté ont diminué progressivement en valeur relative, en particulier en ce qui concerne les exportations, au profit des Etats-Unis d'Amérique, de l'Association latino-américaine de libre-échange et du Japon.

On estime que ces groupes de pays, pris ensemble, ont, en chiffres réels, triplés leurs importations et doublé leur part des exportations de la région.

Commerce intra-africain

Les données disponibles sur les exportations intra-africaines sont peu sûres. Cela tient essentiellement au fait que certains produits, en particulier ceux en provenance des pays sans littoral, expédiés en vrac et consignés dans des dépôts de pays indépendants voisins, sont souvent comptabilisés par le pays exportateur, comme exportation vers le pays où le dépôt est situé et non pas vers le pays ou les pays de destination finale qui sont inconnus et qui, en fait, se trouvent même fort probablement hors d'Afrique. Par contre, ces produits sont considérés comme des marchandises en transit par certains de ces pays voisins qui ne les font pas figurer dans leurs statistiques commerciales. Un exemple est le sucre expédié du Zaïre vers des dépôts au Mozambique d'où il est par la suite réexpédié. Le cuivre est considéré comme exportation à destination au Mozambique dans les statistiques du Zaïre mais ne figure pas dans les statistiques des importations du Mozambique. C'est pourquoi, la meilleure façon de procéder, dans une analyse du commerce intra-africain, est de ne considérer que les seules importations.

On estime que le commerce intra-africain représente environ 6 p. 100 de l'ensemble des échanges de la région et que la République sud-africaine y participe à raison d'environ 17 p. 100. Si l'on exclut les échanges de cette République, il ne reste que ceux des pays en développement d'Afrique, dont le commerce intra-africain représente 5 p. 100.

Alors que l'Afrique du Nord occupe la première place dans le commerce de la région avec le reste du monde, la sous-région de l'Afrique de l'Ouest joue le plus grand rôle dans le commerce intra-africain, en particulier en ce qui concerne les pays en développement d'Afrique. Les échanges avec la République sud-africaine, par contre, sont essentiellement le fait des sous-régions de l'Afrique de l'Est et du Centre comme il ressort des tableaux 11 et 12.

Le triplement de la valeur des échanges intra-africains - qui est passée de 1,3 million à 4,6 millions de dollars des Etats-Unis au cours de la période considérée - a été entièrement attribué aux hausses de prix. En fait, le volume de ces échanges a eu tendance à baisser légèrement, comme il ressort du tableau G.

Par contre, alors que la balance commerciale avec les Etats-Unis et l'ALALE a été favorable, il convient de noter que dans l'ensemble, l'Afrique est un importateur net du Japon.
