WORLD POPULATION PROSPECTS

ESTIMATES AND PROJECTIONS AS ASSESSED IN 1982

UNITED NATIONS

DEMOGRAPHIC PUBLICATIONS OF THE UNITED NATIONS

SELECTED LIST, February 1984*

Studies of population trends and problems

The Determinants and Consequences of Population Trends: New Summary of Findings on Interaction of Demographic, Economic and Social Factors. Volume I. English, Russian (French and Spanish in press). 611 pp., $24.00. ST/SOA/Series A/50. Sales No. 71.XIII.5. *Volume II. Bibliography and Index.* English only. 155 pp., $9.00. ST/SOA/Series A/50/Add.1. Sales No. E.71.XIII.6.

Measures, Policies and Programmes Affecting Fertility, with Particular Reference to National Family Planning Programmes. English, French, Russian, Spanish. 162 pp., $3.00. ST/SOA/Series A/51. Sales No. E.72.XIII.2.

Fertility and Family Planning in Europe Around 1970: A Comparative Study of Twelve National Surveys. English, French, Russian, Spanish. 192 pp., $10.00. ST/ESA/Series A/58. Sales No. 76.XIII.2.

Levels and Trends of Fertility Throughout the World, 1950-1970. English, French and Spanish. 361 pp., $19.00. ST/ESA/Series A/59. Sales No. 77.XIII.2.

Trends and Characteristics of International Migration Since 1950. English, French and Spanish. 172 pp., $12.00. ST/ESA/Series A/64. Sales No. 78.XIII.5.

Demographic Transition and Socio-Economic Development. English only. 153 pp., $10.00. ST/ESA/Series A/65. Sales No. E.79.XIII.2.

Patterns of Urban and Rural Population Growth. English, French and Spanish. 175 pp., $13.00. ST/ESA/Series A/68. Sales No. 79.XIII.9.

Factors Affecting the Use and Non-use of Contraception. English, French and Spanish. 110 pp., $9.00. ST/ESA/Series A/69. Sales No. 79.XIII.6.

Review and Appraisal of the World Population Plan of Action. English, French and Spanish. 60 pp., $4.50. ST/ESA/Series A/71. Sales No. 79.XIII.7.

Levels and Trends of Mortality Since 1950. English. French and Spanish in press. 190 pp., $15.00. ST/ESA/Series A/74. Sales No. 81.XIII.3.

Population Distribution Policies in Development Planning. English only. 241 pp., $16.00. ST/ESA/Series A/75. Sales No. 81.XIII.5.

World Population Trends and Policies: 1981 Monitoring Report. English only. Volume I: Population Trends. 235 pp., $27.00. ST/ESA/Series A/79. Sales No. E.82.XIII.2. Volume II: Population Policies. 196 pp., $21.00. ST/ESA/Series A/79/Add.1.

International Migration Policies and Programmes: A World Survey. English. French and Spanish in press. 111 pp., $10.00. ST/ESA/Series A/80. Sales No. E.82.XIII.4.

Concise Report of the World Population Situation in 1983. English, French and Spanish in press. ST/ESA/Series A/85. Sales No. E.83.XIII.6.

***Some Socio-Demographic Correlates of Income Inequalities: A Case Study of the Philippines.* English only. ST/ESA/Series R/39.

***Selected Factors Affecting Fertility and Fertility Preferences in Developing Countries.* English only. ST/ESA/Series R/37.

***Variations in the Incidence of Knowledge and Use of Contraception.* English only. ST/ESA/Series R/40.

***The Mapping of Interrelationships Between Population and Development.* English only. ST/ESA/Series R/43.

***Some Relationships between Nuptiality and Fertility in Countries of the East Indies.* English only. ST/ESA/Series R/46.

***Relationships between Fertility and Education: A Comparative Analysis of World Fertility Survey Data for Twenty-Two Developing Countries.* English only. ST/ESA/Series R/48.

***The Impact of Population Structure on Crude Fertility Measures: A Comparative Analysis of World Fertility Survey Results for Twenty-One Developing Countries.* English only. ST/ESA/Series R/49.

***Fertility Levels and Trends as Assessed from Twenty World Fertility Surveys.* English only. ST/ESA/Series R/50.

***Population and Human Rights.* English only. ST/ESA/Series R/51.

***Marital Status and Fertility.* English only. ST/ESA/Series R/52.

Reports on methods of demographic analysis and projections

Manual I: Methods of Estimating Total Population for Current Dates. English, French, Spanish. 45 pp., $0.75. ST/SOA/Series A/10. Sales No. 52.XIII.5. (Also in Russian non-sales edition.)

Manual II: Methods of Appraisal of Quality of Basic Data for Population Estimates. English, French, Spanish. 67 pp., $0.70. ST/SOA/Series A/23. Sales No. 56.XIII.2. (Also in Russian non-sales edition.)

Manual III: Methods for Population Projections by Sex and Age. English, French, Spanish. 81 pp., $1.50. ST/SOA/Series A/25. Sales No. 56.XIII.3. (Also in Russian non-sales edition.)

Manual IV: Methods of Estimating Basic Demographic Measures from Incomplete Data. English, French, Russian, Spanish. 132 pp., $2.00. ST/SOA/Series A/42. Sales No. 67.XIII.2.

Methods of Analysing Census Data on Economic Activities of the Population. English, French, Russian, Spanish. 152 pp., $2.50. ST/SOA/Series A/43. Sales No. E.69.XIII.2.

Manual V: Methods of Projecting the Economically Active Population. English, French, Russian, Spanish. 119 pp., $1.50. ST/SOA/Series A/46. Sales No. 70.XIII.2.

Manual VI: Methods of Measuring Internal Migration. English, French, Russian, Spanish. 72 pp., $1.50. ST/SOA/Series A/47. Sales No. 70.XIII.3.

Manual VII: Methods of Projecting Households and Families. English, French, Russian, Spanish. 108 pp., $5.00. ST/SOA/Series A/54. Sales No. 73.XIII.2.

Manual VIII: Methods for Projections of Urban and Rural Population. English, French, Russian, Spanish. 125 pp., $7.00. ST/ESA/Series A/55. Sales No. 74.XIII.3.

Methods of Measuring the Impact of Family Planning Programmes on Fertility: Problems and Issues. English only. 200 pp., $11.00. ST/ESA/Series A/61. Sales No. E.78.XIII.2.

Manual IX: The Methodology of Measuring the Impact of Family Planning Programmes on Fertility. English, French and Spanish. 153 pp., $12.00. ST/ESA/Series A/66. Sales No. 78.XIII.8.

Prospects of Population: Methodology and Assumptions. English only. 292 pp., $18.00. ST/ESA/Series A/67. Sales No. E.79.XIII.3.

Population and Development Modelling. English only. 129 pp., $12.00. ST/ESA/Series A/73. Sales No. E.81.XIII.2.

Evaluation of the Impact of Family Planning Programmes on Fertility: Sources of Variance. English only. 290 pp., $22.00. ST/ESA/Series A/76. Sales No. E.81.XIII.9.

Model Life Tables for Developing Countries. English only. 351 pp., $23.00. ST/ESA/Series A/77. Sales No. E.81.XIII.7.

POPULATION STUDIES, No. 86

WORLD POPULATION PROSPECTS

ESTIMATES AND PROJECTIONS AS ASSESSED IN 1982

UNITED NATIONS
New York, 1985

NOTE

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city, or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The term "country" as used in the text of this publication also refers, as appropriate, to territories or areas.

The designations "more developed" and "less developed" regions are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

PREFACE

The estimates and projections presented in this report are based on the ninth round of the global demographic assessments undertaken by the United Nations Secretariat. The various figures and demographic indicators are derived from data that were available generally by the beginning of 1983; therefore, the figures presented supersede those that were previously published by the United Nations.* The responsibility for this report rests with the United Nations Secretariat; however, the assessment was facilitated to a great extent by the close co-operation among the United Nations bodies, particularly the regional commissions and the Statistical Office of the Department of International Economic and Social Affairs, United Nations Secretariat.

In most instances, the estimates in this report have been derived from national data that have been evaluated and adjusted as necessary. For those countries for which data were unavailable or insufficient, the required demographic estimates were determined according to what was believed to be reasonable for the population in question and in agreement with any existing reliable information. As with all demographic projections, the figures in this report may deviate from actual reported trends in the future; this deviation is largely due to the fact that future trends of birth and death rates and especially migratory movements cannot be predicted precisely. The general objective of the United Nations population projections is to provide an assessment of plausible prospects for the population of the world, major regions and each country, taking into account available data.

A magnetic tape containing the major results of the present estimates and projections can be provided upon request for a nominal charge.** Inquiry about the tapes should be addressed to the Director of the Population Division, Department of International Economic and Social Affairs, United Nations, New York, N.Y. 10017.

---

*The previous demographic assessment as of 1980 was published as *World Population Prospects as Assessed in 1980* (United Nations publication, Sales No. E.81.XIII.8) and *Demographic Indicators of Countries: Estimates and Projections as Assessed in 1980* (United Nations publication, Sales No. E.82.XIII.5 and corrigendum).

**A description of the contents of the tape is given in annex II.

LIST OF TABLES IN THE TEXT

1. For countries of Africa: estimated total population for mid-year 1980 and, as of April 1983, the date and total population as reported in the most recent census or survey and official estimate ... 5
2. For countries of Latin America: estimated total population for mid-year 1980 and, as of April 1983, the date and total population as reported in the most recent census or survey and official estimate ... 6
3. For countries of Asia: estimated total population for mid-year 1980 and, as of April 1983, the date and total population as reported in the most recent census or survey and official estimate ... 7
4. For countries of Oceania: estimated total population for mid-year 1980 and, as of April 1983, the date and total population as reported in the most recent census or survey and official estimate ... 8
5. For countries of Northern America and Europe and the Union of Soviet Socialist Republics: estimated total population for mid-year 1980 and,

Page

as of April 1983, the date and total population as reported in the most recent census or survey and official estimate 9
6. Projection variants according to the combination of assumptions on fertility, mortality and international migration 10
7. World population and average annual growth rate, medium, high and low variants, 1950-2025 11
8. Average annual increment in population for the world, more developed regions and less developed regions, medium variant, 1950-2025, as assessed in 1982 11
9. Population size and rate of increase for the world, more developed regions and less developed regions, medium variant, 1950-2025 13
10. Population, percentage distribution and average annual growth rate by region, medium variant, 1950-2025 13
11. Twenty-five most populous countries in 1984 and 2025, medium variant, ranked by size 16
12. Twenty countries or areas with lowest and highest growth rates, medium variant, 1980-1985 17
13. Sex ratio, median age, and age dependency ratio for total, under 15 years and 65 years and over by region, medium variant, 1950-2025 18
14. Twenty countries with lowest and highest age structure according to percentage of population under 15 years and 65 years and over in 1984 19
15. Crude birth rate and gross reproduction rate by region, medium variant, 1950-2025 19
16. Twenty countries with lowest and highest crude birth rate and total fertility rate, 1980-1985 21
17. Crude death rate, life expectancy at birth and infant mortality rate by region, medium variant, 1950-2025 22
18. Twenty countries with lowest and highest crude death rate, life expectancy at birth and infant mortality rate, 1980-1985 29
19. Percentage urban and urban and rural average rates of increase by region, medium variant, 1950-2025 30
20. Annual net numbers of migrants ranked by country or area, medium variant, 1980-1985, 1995-2000 and 2020-2025 31
21. Annual net migration rates ranked by country or area, medium variant, 1980-1985, 1995-2000 and 2020-2025 31

LIST OF FIGURES

I. Annual average increment in population for the world, more developed regions, and less developed regions, medium variant, 1950-2025, as assessed in 1982 12
II. Average annual rates of population growth for major regions of the world, medium variant, 1950-2025 14
III. Percentage distribution of population by region, medium variant, 1950, 1980 and 2025 15
IV. Age dependency ratio for total, under 15 years and 65 years and over by region, medium variant, 1950, 1980 and 2025 18
V. Gross reproduction rate by region, medium variant, 1950-2025, as assessed in 1982 20
VI. Life expectancy at birth (both sexes) by region, medium variant, 1950-2025, as assessed in 1982 27
VII. Percentage of world population living in urban areas, medium variant, 1950, 1980 and 2025 27

Page

VIII. Percentage of the population in urban areas by region, medium variant, 1950, 1980 and 2025 28

LIST OF MAPS

1. Estimates of infant mortality rates, 1950-1955 23
2. Estimates of infant mortality rates, 1975-1980 24
3. Projections of infant mortality rates, 2020-2025 25
4. Estimates of infant mortality rates, 1975-1980 (sizes of countries are proportional to the estimated average annual number of births, 1975-1980) 26

Explanatory notes

The following symbols have been used in the tables throughout the report:

Three dots (. . .) indicate that data are not available or are not separately reported;

Two dots (. .) indicate that the category is not applicable;

A dash (—) indicates that the amount is nil or negligible.

Details and percentages in tables do not necessarily add to totals, because of rounding.

The following apply throughout the text and tables:

A hyphen (-) between dates representing years, e.g., 1970-1975, signifies the period from 1 July of the beginning year to 1 July of the end year;

Annual rates of growth or change, unless otherwise stated, refer to annual compound rates.

INTRODUCTION

Among the major activities of the Population Division of the Department of International Economic and Social Affairs of the United Nations Secretariat is the provision of up-to-date and internationally comparable estimates and projections of population and other major demographic variables for the countries, areas and regions of the world. Between the years 1950 and 1980, the United Nations completed eight rounds of its demographic estimates and projections, that is, in 1951, 1954, 1957, 1963, 1968, 1973, 1978 and 1980.[1] The present report is based on the results of the ninth round, that is, the 1982 assessment of demographic trends. For the period from 1950 to 2025 and in intervals of five years, the present report provides the age and sex structure of the populations and a large variety of demographic indicators relating to population composition, growth, fertility, mortality, urbanization and international migration.

As in the prior assessments, the present population estimates and projections are prepared for the world, the more developed and less developed regions, 8 major geographical regions, 24 subregions, and 210 countries and areas.[2] The estimates and projections for the subregions, regions, less developed regions, more developed regions and the world as a whole are the weighted sums of the derived figures for the individual countries or areas that make up the particular grouping. The demographic estimates and projections are generally provided for each quinquennial year or each quinquennial period of the 75 years between 1950 and 2025.

Most of the statistics presented are derived from available national data that have been evaluated and, whenever necessary, adjusted for deficiencies and inconsistencies. For those countries for which data are lacking or insufficient, the estimates assumed are those that are believed to be reasonable for the population in question and are in agreement with any existing reliable information. The age and sex structure of the population for each country is determined for the base year of 1980 in such a way that it is internally consistent and in line with current levels of fertility, mortality and migration.

For the period from 1980 to 2025, three variants of projections were prepared in the 1982 assessment: the medium, high and low variants. The major differences among the three variants are largely due to the assumed future fertility rates; however, varying assumptions are also adopted on future patterns of migration and mortality when such differentiations seem appropriate. By and large, the medium variant represents future demographic trends that seem likely to occur considering observed past demographic trends, expected social and economic progress, ongoing governmental policies and prevailing public attitudes towards population issues. The high and low variants indicate the plausible range of future deviations from the medium-variant projections. The range indicated is, however, not exhaustive since future fertility, mortality and migration rates can follow different courses under varying conditions. The constant variant, which is not published in this report, is available by country on magnetic tape (see annex II for a brief description of the contents of the tape). In United Nations projections, no catastrophes, such as wars, famines and epidemics, that would inevitably affect demographic trends are hypothesized in the formulation of future assumptions.

A description of the methods, data, assumptions and major findings of the 1982 assessment is given in sections I and II below. The discussion and tables in the text present the major findings primarily on a global and regional basis. The tables in annexes III and IV provide the age and sex structure and demographic indicators for countries, as well as for regions and subregions. Definitions of the demographic terms used in the report are given in the glossary in annex I.

I. METHODS, DATA AND ASSUMPTIONS

A. METHODS OF ESTIMATION

In preparing the various estimates for the 1982 United Nations assessment of population trends, direct as well as indirect demographic estimation techniques were utilized. Since these techniques are numerous and are described and illustrated in detail in the various demographic manuals issued by the United Nations,[3] the focus of the present section is primarily on the general strategy and major steps that are followed in producing the United Nations population estimates.

In general terms, the overall objective is the production of accurate and consistent series of demographic parameters for each country and territory of the world for each quinquennium in the estimation period which, in this assessment, is from 1950 to 1980. These demographic parameters include, among others: size of total population, age and sex structure, rate of growth of population, and basic measures of fertility, mortality, international migration and urbanization. As will be more evident in the next section, the estimation of the population for the base year (which in this assessment is 1980), classified by age and sex for each country, is necessary for the making of the population projections.

Usually, the estimation process is begun by establishing the size of the total population and its age and sex structure for a date closest to the base year. In most cases, this information is derived from a national population census. These data are evaluated and, when deemed necessary, adjustments are made. For example, the population may not have been fully enumerated in a national population census and, therefore, the reported population total may have to be adjusted upwards to take this into account. Other frequent problems are: the relative omission of certain age and sex groups, such as infants, female children and young males; the misreporting of age; the changing completeness of census coverage; the failure to report vital events; and the changes in definitions. Careful scrutiny, therefore, is given to the reported population total and its age and sex structure. Taken into account, whenever available, is information from previous censuses, civil registration and surveys, as well as the age and sex structures of similar countries and those taken from stable and quasi-stable population models.

In principle, the use of stable or quasi-stable population models in estimating the age and sex structure of the population is appropriate when there is some evidence that: (*a*) the population has been closed to international migration; (*b*) its fertility level has been constant over a long period of time; and (*c*) there have been constant or gradually declining mortality levels. However, when other methods were inappropriate or yielded insufficient or unacceptable results, these models were used to estimate the age and sex structure, even though the three conditions were not fully met.

After the size of the total population and its age and sex structure have been determined for the most recent date, they are adjusted forwards or backwards, as necessary, to the base year 1980. Usually, this adjustment is minor, covering a period of several years or less, since in most countries a census was taken around 1980 (for the dates of national population censuses, see tables 1-5 below). In addition to the estimates of total population and age and sex structure for the base year, corresponding estimates are needed for each quinquennium from 1950 to 1980 (i.e., 1950, 1955, 1960 etc.).

Frequently, especially for the developed countries and many of the more advanced developing countries, retrospective estimates of the size and the structure of the population are readily available and have been incorporated in previous United Nations assessments. However, if retrospective estimates of the total population and its age and sex structure are not available or not acceptable for various reasons, these estimates are prepared by the Population Division utilizing available information on fertility, mortality and international migration in combination with demographic and analytical techniques and stable or quasi-stable population models to reconstruct the needed estimates. An important requirement of the retrospective figures, whether reported or estimated, is that they be consistent with each other as well as with base-year population estimates. Abrupt or unusual departures from trend lines are carefully examined and verified.

In the process of preparing the retrospective estimates of the total population and its age and sex structure, past estimates of fertility, mortality and international migration are necessarily being implied at the same time. The reason for this is that the three demographic components, the population size and the age and the sex structure are intimately interrelated and interdependent. Estimates of one or more parameters generally define, within a relatively narrow range, the values of the estimates for the other parameters. For example, from the total size and the age and sex structure of a population for two points in time and estimates of net migration by age and sex during the time interval, a set of survival ratios for each age and sex group may be derived.

The specific methods employed in preparing the various past estimates of fertility, mortality and migration are dictated largely by the nature and quality of the available data (e.g., censuses, civil registration, surveys of fertility, mortality or migration etc.). Often, particularly for a large number of the less developed coun-

tries, demographic information for the past tends to be insufficient, inaccurate and inconsistent. In these instances, considerable use is made of stable and quasi-stable population models and indirect estimation techniques in order to derive estimates that appear reasonable and are consistent. Generally, for countries for which there are incomplete demographic data, past estimates of mortality are made before those for fertility, since this tends to be demographically more convenient.

Estimates of international migration, if significant, are probably the most problematic, owing to the lack of appropriate data. Consequently, these estimates are sometimes derived from the differences between the reported age and sex distribution and the expected distribution based on estimates of past fertility and mortality. After the basic parameters, such as total size, age and sex structure, mortality rate, age-specific fertility rate, and net migration by age and sex, are derived, the other demographic indicators presented in this report are calculated directly (e.g., median age, crude birth and death rates, age-dependency ratio, child-woman ratio).

B. Methods of projection

The component method is used in preparing the 1982 United Nations population projections. This technique, which has been used in previous assessments, considers the levels and trends in each of the three major components of population change, that is, fertility, mortality and migration. Although this method has been explained in detail in previous United Nations manuals, the major steps involved are summarized below.

First, age-specific and sex-specific survival rates are successively applied to the base-year population in order to determine the number of survivors in each age and sex category at the end of each five-year period. These survival rates are based on national life tables, when applicable, or on model life tables.[4] Since the age patterns of mortality in many populations differ from those in model life tables, the model life tables have been supplemented as much as possible by information from countries that had a reasonably reliable mortality rate classified by age.

Secondly, the number of births expected to take place during each five-year period is estimated. The expected age-specific fertility rate, which is derived from the assumed gross reproduction rate (explained in section D below, on assumptions), is multiplied by the corresponding number of females in the reproductive age groups to yield the total number of births. Next, these births are distributed by sex on the basis of an assumed sex ratio at birth. Finally, the numbers of survivors from these births at the end of each quinquennial period are calculated by applying the appropriate survival probabilities.

The third, and final, major step is to determine the net numbers of migrants (i.e., immigrants minus emigrants) that are to be added or subtracted to the projected survivors. The assumed net numbers of migrants during the five-year period, classified by age and sex, are combined with the projected age and sex structure to produce the projected population at the end of the five-year period.

Thus, at the end of each quinquennial period, there are at hand for each such period the projected population by age and sex and the assumed mortality, fertility and migration rates, also by age and sex. From this information, demographic indicators, many of which are presented in this report, are produced. For example, the net migration rate for a five-year period is simply the average annual net number of migrants divided by the average population during the period and multiplied by 1,000.

The above-described approach was used for all countries with a population size of about 300,000 or more as of 1980. For most countries with populations of less than 300,000, the projections were made for the total population only by applying assumed rates of growth.

From the above, it may be observed that the extent and accuracy of the initial population data are of paramount importance in the production of the projections, especially for the short term. The component method cannot discriminate between inaccurate and accurate data; only the demographic analyst is in a position to determine whether the initial data are of high quality. It is, therefore, not surprising that most of the time involved in producing the United Nations estimates and projections is spent in compiling, evaluating and adjusting demographic data.

C. Data

For most countries, the data used in the 1982 assessment were obtained from official national sources, such as censuses, national surveys and civil registration. The collection of these data is greatly facilitated by the work of the five regional commissions and the Statistical Office of the Department of International Economic and Social Affairs of the United Nations Secretariat. Given their close contact with individual countries, the secretariats of the regional commissions are able to monitor and to report on a country's demographic activities and publications. The work of the Statistical Office in the compilation of demographic data and in improving the methodology of data collection provides an invaluable source of up-to-date demographic statistics at both the national and subnational levels. Generally, these statistics are available in the *Population and Vital Statistics Report,* issued quarterly, and in the *Demographic Yearbook.* Other sources utilized in the 1982 assessment are the published and unpublished reports of non-governmental organizations, research institutes and research scholars.

In the preparation of most of the demographic estimates and projections, the basic data considered relate to the following five categories:

(*a*) Total population size;

(*b*) Age and sex structure;

(*c*) Period fertility rate (e.g., gross reproduction rate and age-specific fertility rate);

(*d*) Mortality rate (e.g., life expectancy at birth and survival ratio);

(*e*) Net volume of international migration and its age and sex distribution.

The sources of the data for these five categories are discussed below.

The sources for the data on total population for each major region of the world are shown in tables 1 to 5. These tables present the date of the most recent census or survey, the size of the population at that time and the most recent official estimate, as well as the population assumed to exist at the 1980 mid-year base date.[5]

During the two-year period between the current and previous assessments, new census results have been incorporated for 83 of the 204 countries or areas, or for about 41 per cent. In tables 1 to 5, the recently incorporated census data are indicated by an asterisk, which appears next to the most recent population census date.

The census or survey dates and reported population sizes and the mid-year 1980 total population estimates for the 56 African countries or areas are presented by subregion in table 1. Of these countries, only in Ethiopia and Somalia had a modern population census not been conducted at the time of the 1982 assessment. In addition, in a number of other countries or areas, British Indian Ocean Territory, Comoros, Djibouti, Chad, Equatorial Guinea, Gabon, Zaire, Guinea and Nigeria, recent and accurate census data were not available. In most of the remaining countries, censuses (or large-scale population surveys) had been conducted in the 1970s or early 1980s.

It is widely recognized that African population statistics are by and large inadequate. Many of the most recent surveys and censuses are seriously affected by under-enumeration of the total population and misreporting of fundamental population characteristics, such as age. Consequently, the resulting population statistics often lead to erroneous conclusions. Owing to such problems, the demographic data for the African countries are evaluated with particular care and adjustments are frequently made in order to obtain an acceptable total population size and age and sex structure. In more than a few instances, the age and sex structure has been taken from a neighbouring country, in which conditions are assumed to be similar, or from a population model, as discussed in section A above, on methods of estimation.

In contrast to Africa, in most of the countries in Latin America (see table 2) at least three population censuses have been taken since 1950, in all of them a census was conducted in the 1970s, and a majority of their Governments participated in the 1980 round of censuses. Although the population censuses are believed to be more accurate for Latin American countries than for African countries, there is marked variation in the quality of the census data. For example, while for some countries, such as Argentina, Chile and Uruguay, demographic data are of a relatively high quality, for others, such as Bolivia, Ecuador and Paraguay, data are reported to be poor (e.g., problems of under-enumeration and misreporting of age). In preparing the 1982 assessment, these problems were corrected whenever possible using available civil registration data, comparing age cohorts when two consecutive censuses were available, and utilizing other demographic techniques of analysis.

Given that the majority of the world's population in 1982 lives in Asia (58.3 per cent), it is especially worth while to consider the sources of data for total population size and the age and sex structure among Asian countries. Much of this information is presented in table 3. For China, the 1980 mid-year population was based on the 1982 census and annual registration figures of population size. The age and sex data from the 1982 census were not yet available at the time of the completion of the present assessment. Therefore, the age and sex structure of the base-year population of 1980 was estimated on the basis of the 1964 census and subsequent demographic trends in China. For India, the procedure was similar. The 1981 census population total (which had been adjusted for under-enumeration) was projected backwards to 1 July 1980, using the reported trends of vital rates; the age and sex structure for 1980 was estimated on the basis of the 1971 census results and subsequent demographic trends.

Among the remaining approximately 40 countries, most Governments had conducted at least one census (or large-scale population survey, e.g., Lebanon) and published official population estimates for the late 1970s or early 1980s that permitted the estimation of population size and the establishment of an age and sex structure for mid-year 1980. The large majority of Asian Governments participated in the 1980 round of population censuses. However, no recent census information was available for Oman, the Lao People's Democratic Republic and the Democratic People's Republic of Korea. In these cases, official estimates and indirect information were pieced together to estimate the total population size and age and sex structure. Problems were also encountered with the data for Bhutan, Democratic Kampuchea and Viet Nam, owing to the lack of up-to-date information about the age and sex structure. For example, while the total population size and sex ratio was known for Viet Nam, an age structure from the 1979 census was not available; this posed a difficult problem given the large number of males that the country lost in war. Demographic models and assumptions about the age distribution of males and females were used to produce the required age and sex structure.

Oceania (see table 4) is the smallest among the 8 regions, accounting for about 0.5 per cent of the world's population in 1982. Of the approximately 20 countries and islands in this region, Australia and New Zealand are by far the largest, contributing 63.9 and 13.8 per cent, respectively, to the region's population. For these two countries, their 1981 censuses provided the basis for the 1980 mid-year population by sex, but the age and sex structure was estimated on the basis of their 1976 censuses. Except for the Wallis and Futuna Islands, in which a census was conducted in 1969, in all the countries a census was carried out in the 1970s and for many there were official population estimates for the early 1980s.

* New census information incorporated since the 1980 United Nations assessment.

The quality of the data for total population and age and sex structure for Australia, New Zealand and Polynesia is considered very good. Also, because of the small population size of many of the countries and islands in Oceania, they were grouped into projection units. The units were Australia, New Zealand, Fiji, Papua New Guinea, other Melanesia (i.e., New Caledonia, Solomon Islands and Vanuatu), Micronesia (i.e., Canton and Enderbury Islands, Johnston Island, Midway Islands, Pitcairn Island, Tokelau and Wake Islands, Kiribati, Guam, Nauru, Pacific Islands and Tuvalu) and Polynesia (i.e., American Samoa, Cook Islands, French Polynesia, Niue, Samoa, Tonga, and Wallis and Futuna Islands).

For nearly all of the countries shown in table 5 (i.e., the more developed nations in Europe and Northern America, and the Soviet Union), there are good demographic data. Censuses are taken on a regular basis—every 5 or 10 years—and many of the Governments prepare annual estimates of the population size and age and sex structure, as well as national population projections. Therefore, the sources used for the data for population size and age and sex structure are the estimates of the national demographic and statistical offices.

After establishing a total population size and an age and sex structure for each country or area, estimates of fertility, mortality and migration are required for the projections. For fertility and mortality data, the major

* New census information incorporated since the 1980 United Nations assessment.

sources used are civil registration, censuses and sample surveys.[6] Most of the Governments of the developed countries and a large number of those of the developing countries provide the United Nations with estimates of age-specific fertility and mortality rates. These figures are reviewed and evaluated, and adjusted in order to maintain comparability among the various regions and subregions. For many developing countries, particularly those in Africa, the official estimates of fertility and mortality are based on unreliable registrations of births and deaths; consequently, the official estimates are often seriously inaccurate. In such cases, attempts were made to obtain, analyse and compare the estimates of fertility and mortality made by the regional commissions, governmental offices, research institutions and universities. Significant deviations among estimates were closely examined and final sets of mortality and fertility rates were reconciled. In addition, comparisons of countries with similar social and economic characteristics were also made in order to arrive at the most reasonable estimates of fertility and mortality rates.

In the present report, measures of internal distribution are limited to the number and the percentage of the population living in urban and rural areas. These figures

are provided by country, subregion, region and for the world, for the period from 1950 to 2025. The definitions of the terms "urban" and "rural" and the sources of available basic data on urbanization and other related indicators are given by region and country in the forthcoming United Nations publication, *Estimates and Projections of Urban, Rural and City Populations, 1950-2025: The 1982 Assessment.*

Owing to the lack of demographic statistics and the considerable difficulties of estimation, international migration is the most poorly documented component of population growth. For most countries, international migration is not a serious problem, since their net migration is relatively small, and for estimation and projection purposes it can usually be assumed to be zero. There are, however, a significant number of countries for which international migration cannot be easily dismissed. For instance, for the United States of America, it is currently estimated that no less than 20 per cent of the growth of the population is due to international migration; in Kuwait, the proportion of population growth due to international migration is about one third.

For many countries, the records of arrivals and departures are a major source of data on international migration. For island countries, this method produces data that do not seriously differ from the actual migration flows. For other countries, however, data derived from the use of this method are likely to be unreliable owing to the considerable number of undocumented border crossings. In many of these cases, census data on the percentages of the foreign-born provide indirect information that may be used to estimate the probable recent extent of international migration. Other important sources of data include official naturalization figures, work permits, official governmental policy statements on the extent of legal migration and reports on refugees from international organizations.

D. ASSUMPTIONS

Although the assumptions of future trends of fertility, mortality and international migration are prepared by country within a regional or subregional context and the specific conditions and circumstances of each country are considered, three principles are observed. First, as is the common practice in projections of this sort, the assumptions rest on the premise that orderly progress will be made and that during the projection period catastrophes, such as wars, famines and epidemics, will not occur. Secondly, as mentioned above, generally for countries with populations of less than 300,000 in 1980, the component method was not used; for these countries the projections were made only for the total population by the application of assumed rates of growth. Thirdly, the four variants of the projections, the high, medium, low and constant variants, were established by crossing the assumed levels of fertility, mortality (currently only one level, medium) and migration and selecting those combinations that generally yielded the maximum range for the projection of population size (see table 6). For example, the high variant is based on the high assumption of fertility, medium assumption of mortality and high (or medium, when high or low was not assumed) assumption of net migration.

The mortality assumptions in the United Nations projections are in the form of life expectancies at birth and

age and sex patterns of probabilities of surviving, corresponding to different levels of life expectancies at birth. The assumed schedules of age and sex survival rates are obtained from model life tables or from national life tables when reliable data are available. In addition, because age patterns of mortality in many populations differ from those given in the model life tables, for those countries for which there are limited, but reasonably reliable, age-specific mortality rates, this information is used to complement the model life tables in the derivation of required survival ratios.[7]

In general, mortality trends followed the assumption of a quinquennial gain of 2.5 years in the expectation of life at birth until life expectancy reaches 62.5 years, followed by a slow-down in the gain thereafter. However, for some developing nations for which recent evidence has indicated a retardation or an acceleration of improvement in mortality levels, the assumed future quinquennial gains were adjusted accordingly. For example, the quinquennial gains in life expectancy were lowered to 2 years or less for some sub-Saharan African and South Asian countries. For those countries in which

TABLE 6. PROJECTION VARIANTS ACCORDING TO THE COMBINATION OF ASSUMPTIONS ON FERTILITY, MORTALITY AND INTERNATIONAL MIGRATION

	Level of demographic component		
Variant	*Fertility*	*Mortality*	*International migration*[a]
High.....	High	Medium	High (or medium when high and low not assumed)
Medium.....	Medium	Medium	Medium
Low	Low	Medium	Low (or medium when high and low not assumed)
Constant.....	Constant	Medium	Medium

[a]The medium assumption of net migration also includes constant or zero net migration over the projection period.

life expectancy at birth has reached a high level, the maximum assumed level of life expectancy at birth that could be attained has been raised from the 73.5 years in the 1980 assessment to 75 years for males and from 80 to 82.5 years for females, which is in accordance with current demographic records in several developed countries.

In preparing the fertility assumptions, past and current fertility trends for each country are carefully evaluated and placed within the particular country's setting. Trends and anticipated changes in the socio-economic structure and cultural values of the society, as well as policies and programmes directed towards family planning, are considered *vis-à-vis* expected trends in fertility.

Nearly all of the fertility trend data and assumptions are given in the form of gross reproduction rates and age patterns of fertility or age-specific fertility rates for each quinquennial period. For those countries for which age patterns of fertility are not easily specified, one of the model age patterns of fertility (i.e., sub-Saharan African, Arab or Asian types) is utilized.[8] These models provide the percentage distribution of fertility rates by age for given levels of the gross reproduction rate.

The high, medium and low variants differ mainly according to their fertility assumptions which are essentially based on (*a*) the assumed length of time needed for the gross reproduction rate to reach 1.0, (*b*) the extent of knowledge concerning past and current fertility trends and (*c*) the degree of accuracy surrounding the current estimates of fertility. Generally, the higher the level of fertility, the longer the time period needed to reach a gross reproduction rate of 1.0, and the greater the uncertainty about past and current levels of fertility, the larger in absolute terms the range among the variants; in relative terms, however, there is no consistent pattern in the differences among the variants.

The high, medium and low variants of past trends and assumed future patterns of the gross reproduction rate by country and region for quinquennial intervals from 1950 to 2025 are given in, respectively, tables A-12, A-13 and A-14 of annex III to this report. For developed countries, fertility levels are assumed to decline or to remain below the replacement level until about the end of the century, after which they are expected to be close to the replacement level. For developing countries, fertility is expected to decline as countries advance in their social and economic development, which is generally assumed to progress as time passes. Also, for countries with a current high level of fertility, it is generally assumed that existing or anticipated governmental policies and programmes for family planning, as well as related non-governmental activities, would accelerate or expedite the process of fertility decline. Once the decline in fertility starts, it is expected to begin slowly, gain momentum and then slow down.

Since international migration is affected to a great extent by the social, economic and political circumstances in the countries of origin and destination, anticipating future trends in migration is a particularly precarious task. Migration trends may change dramatically, even reversing direction, in relatively short periods of time. In addition, in many instances, the current level of net migration is not known even to a reasonable extent. Figures of annual net migration for the United States, for example, have varied from 450,000 to 800,000 or higher.

In the United Nations projections, it is assumed that the volume of net migration will progressively move to zero as time passes except for those countries for which the evidence strongly suggests a continuation of current migration levels for a considerable time into the future (e.g., Mexico and the United States). While this assumption is not completely satisfactory, alternative hypotheses of future migration trends do not appear to be any more reasonable. The average annual net numbers of migrants and the net migration rates by country and region are provided in annex III for each quinquennial interval from 1980 to 2025. Owing to the relatively large uncertainty surrounding migration trends, only the medium variant has been calculated for most of the migration countries.

II. SUMMARY OF MAJOR FINDINGS[9]

A. POPULATION SIZE AND GROWTH

The total population of the world in 1983 is estimated to be approximately 4,685 million, with an annual growth rate of 1.7 per cent. These figures gain considerably more meaning when it is realized that the current population of the world has increased by nearly 2 billion over that of 1950 and that, in close to 50 years' time, the world's population is projected to double again. More specifically, world population was about 2.5 billion in 1950 and is projected to be 6.1 billion in the year 2000 and 8.2 billion in 2025 (see table 7).

Although the current average annual rate of growth is high in comparison to the rates of world population growth in the first half of the twentieth century and throughout the nineteenth century—approximately 0.8 and 0.5 per cent, respectively—it appears to be in line with the slow decline in the growth rate that began in the early 1970s. At the peak time, the world population was growing at an average annual rate of slightly above 2 per cent. Medium-variant projections predict that the growth rate will fall to about 1.5 per cent by the year 2000 and to slightly less than 1 per cent by 2025. In comparison, the high and low variants project the growth rate to be 1.7 and 1.3 for 2000 and 1.3 and 0.6 for 2025, respectively.

It is important to note that while the global growth rate is on the decline, the annual increment to the total world population has been increasing (see table 8 and figure I). For example, whereas in 1950 the annual increment to the world population was about 48 million, in 1980 the figure was about 77 million, which is approximately equivalent to the current population of Mexico. It is projected that the increment will peak at approximately 89 million near the end of the century and then decline, so that by 2025 the annual increment to the world's population will be about 74 million.

Although the global growth rate appears to be on the decline, considerable variations exist between the more developed and less developed regions, as well as among the less developed subregions. In 1980, the populations in the countries of the more developed regions (see table 9), which currently comprise about 1.16 billion people, or one out of every four people in the world, are increasing at an annual rate of growth of 0.7 per cent. According to the 1982 round of United Nations projections, this

Figure I. Annual average increment in population for the world, more developed regions, and less developed regions, medium variant, 1950-2025, as assessed in 1982

relatively low annual increase for the more developed regions will decline to 0.52 per cent by the year 2000 and to 0.29 per cent by 2025. Among other things, this projected decline in the growth rate means that the annual increase for the more developed countries will amount to close to 7 million from 1980 to 2000 and nearly 5 million from 2000 to 2025; in contrast, the average annual increase during the period from 1950 to 1980 was about 10 million. By the year 2025, the populations of the more developed regions are expected to number about 1.4 billion, or approximately 17 per cent of the world total. It is noteworthy that in 1950, the more developed regions represented 33 per cent of the world total, which is nearly twice the projected figure for 2025.

Since 1950, the average annual growth rate for the less developed countries has been more than 2.2 per cent. The average current growth rate for these countries is estimated to be 2.1 per cent and is expected to decline to 1.7 per cent by the year 2000 and to 1.1 per cent by 2025. As a consequence of the relatively higher growth rate in the less developed regions, the proportion of the world's population living in less developed countries has increased steadily, from 67 per cent in 1950 to 74 per cent in 1980; the proportion by the year 2000 is expected to be 79 per cent and by 2025, 83 per cent. It is also noteworthy that the proportional contribution of the less developed regions to world population growth is increasing. Whereas from 1950 to 1955, 77 per cent of the growth in total world population (which was about 4.8 million per annum) occurred in less developed countries, it is projected that the contribution of the currently less developed regions to the increase in total world population in the year 2025 (which is expected to be about 7.0 million) will be around 95 per cent.

Looking more closely at the overall growth rate for the less developed regions during the past several decades, it may be observed that it declined from a high of 2.6 per cent in 1965-1970 to 2.0 per cent in 1980-1985. However, if China is excluded from the group of less developed countries, the growth rate for this group as a whole appears to have changed very little during this period, that is, from about 2.5 to 2.4 per cent. This does not mean, however, that the national population growth rates have been constant in each of these countries. For example, the growth rate for 39 per cent of the countries in the less developed regions (excluding China), or of about 44 per cent of the 1984 population living in these regions, is believed to have decreased by more than one tenth of a point between 1970-1975 and 1980-1985; in contrast, for about 47 per cent of these countries, accounting for only 16 per cent of the 1984 population in the less developed regions (excluding China), the growth rate is estimated to have increased during the same 10-year period.

The decline in the overall growth rate for the group of less developed countries (excluding China) has been very small during the recent past because despite the decline in fertility (which is estimated to be about 15 per cent in terms of the total fertility rate between 1970-1975 and 1980-1985), its effect on the growth rate was offset

[b] Including the countries of Africa, Latin America, East and South Asia and Oceania (excluding Australia, Japan and New Zealand).

[c] Average annual rate of increase for each five-year period since the preceding date.

by a corresponding decline in mortality. Of the 123 less developed countries, it is estimated that for 53 of them, which represent close to four fifths of the population in less developed regions, there was a decrease in the total fertility rate of at least 10 per cent between 1970-1975 and 1980-1985. In addition, for 27 of these 53 countries, which account for nearly two thirds of the population in the less developed nations, there has been a decline of 20 per cent or more in the total fertility rate during this ten-year period.

Continued differences in the population trends in the 8 major regions of the world constitute another important feature of current global demographic trends. In table 10, the total population, percentage distribution and average annual growth rate (medium variant) are given for the 8 regions during the period 1950-2025; the

[a] Average annual growth rate (exponential rate in percentage) in the preceding five-year period.

average growth rate and percentage distribution are also illustrated in figures II and III.

A cursory look at these statistics and figures clearly shows the high and rapid growth of the population of Africa. The growth rate for Africa was 2.1 per cent in 1950, reached 3.0 per cent in 1980, and is estimated to remain at about 3.1 per cent annually until the end of the century; thereafter, the growth rate is projected to decline to less than 2.0 per cent by 2025. In 1950, the population of Africa was about 223 million, or about 9 per cent of the total world population; by the year 2025, the African population is expected to be 1,643 million and to account for about 20 per cent of the world total. In 1950, Africa accounted for about 10 per cent of the average annual increment to the world's population; by 1980 this proportion had increased to nearly 19 per cent and, by 2025, Africa's contribution to this increase is expected to be 41 per cent.

Another rapidly growing area is Latin America. Until recently, the average annual growth rate for this area was 2.5 per cent or higher. In the late 1970s, the growth rate is believed to have fallen below 2.5 per cent and is expected to continue to decline during the projection period. By 2025, for example, the average annual rate of growth is anticipated to be around 1.2 per cent. As in the case of Africa, Latin America's share of the total world population also increased markedly between 1950 and 1980, that is, from 6.6 to 8.1 per cent; by 2025, Latin America's share of the world total is expected to be about 9.6 per cent.

The growth rate for South Asia is believed to have peaked during the mid-1960s at approximately 2.5 per cent per annum, and is projected to decline to around 1.5 per cent by the year 2000 and to about 0.9 per cent by 2025. Despite this reduction, South Asia's growth in absolute terms will be the largest in the world during the next 50 years. For example, during the next 20 years, it will contribute about 33 million people per annum, which will amount to 40 per cent of the total world increase during this period. This relatively rapid expansion in its population will increase the area's share of the world population from 31.6 per cent in 1980 to 39.9 per cent in 2025.

In contrast to South Asia, the relative contribution of East Asia to world population growth is rapidly declining. For instance, the average annual growth rate of East Asia fell from about 2.0 per cent in 1970-1975 to about 1.4 per cent in 1975-1980, which is the largest estimated decline for any major region during this 10-year period. In addition, whereas at present East Asia accounts for 26.5 per cent of the world's population, it is expected that it will account for 20.7 per cent in 2025.

The growth rates and relative proportions of world population for Northern America and the Soviet Union are similar. Currently, both are growing by approximately 0.9 per cent per annum and each accounts for about 6 per cent of the world's population. Given their relatively low growth rates, by 2025 each of their populations is expected to account for slightly more than 4 per cent of the world total.

Figure II. Average annual rates of population growth for major regions of the world, medium variant, 1950-2025

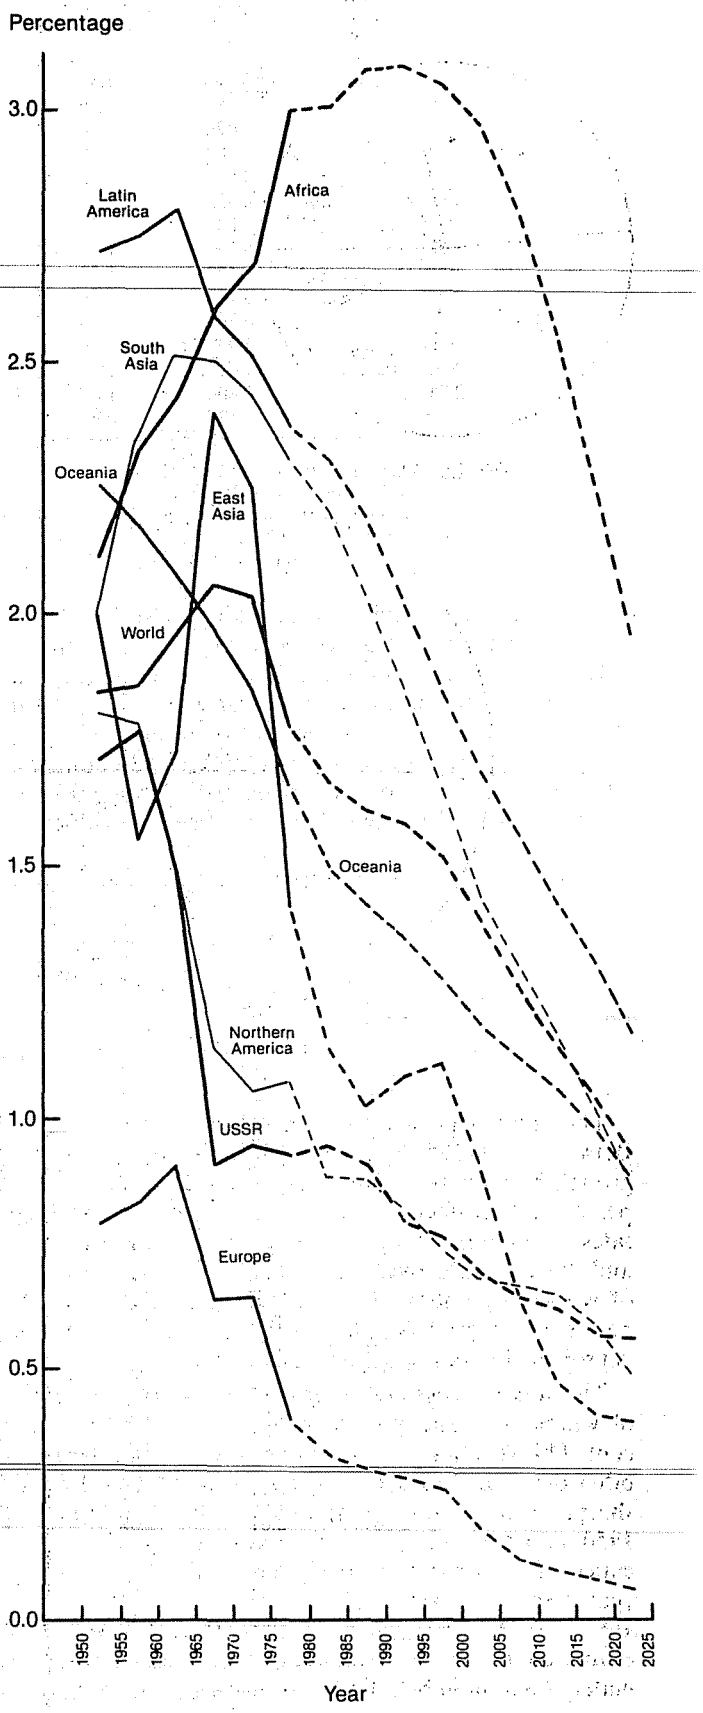

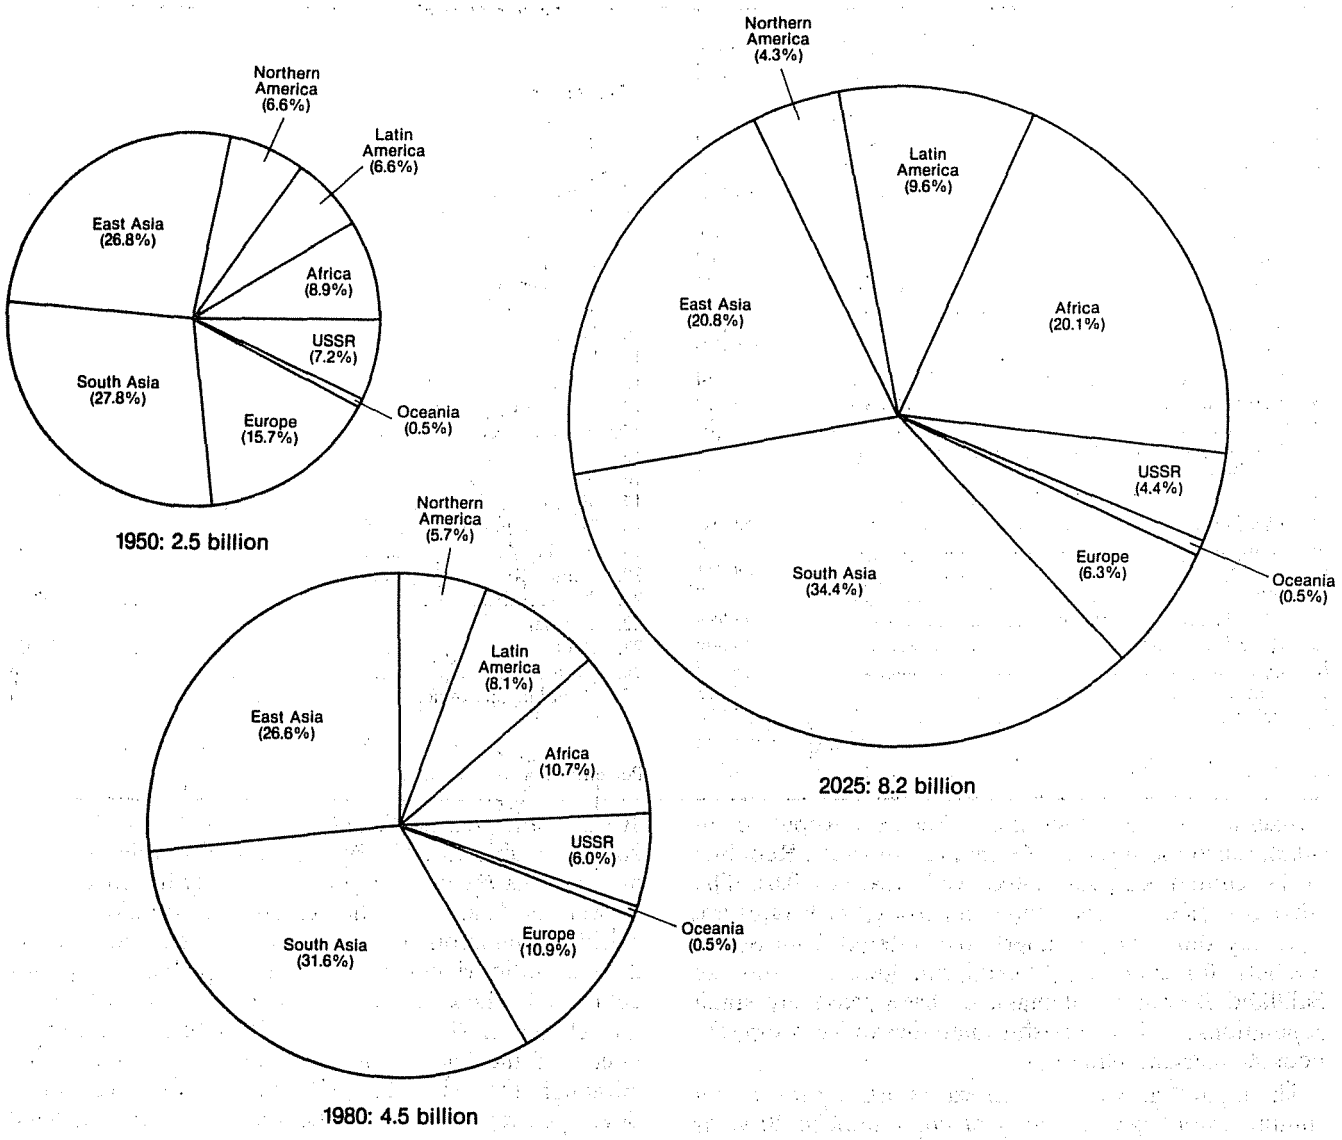

Figure III. Percentage distribution of population by region, medium variant, 1950, 1980 and 2025

The slowest growing region in the world is Europe. Between 1950-1955 and 1975-1980, the average annual growth rate for the region declined from about 0.8 to 0.4 per cent. This decline is expected to continue, with the rates of growth reaching 0.26 per cent in the year 2000 and close to zero by 2025. Accordingly, the proportion of world population living in Europe, which was 15.7 per cent in 1950, has fallen to 10.9 per cent in 1980 and is projected to fall to 6.4 per cent by 2025.

The smallest region in terms of population is Oceania, of which Australia and New Zealand make up 79 per cent. This region's growth pattern has been similar to the other developed regions. Its rate of growth has declined sharply from a high of approximately 2.3 per cent in 1950 to about 1.5 per cent in 1975-1980; the rate is expected to continue to decline to 1.27 per cent by the year 2000 and 0.5 per cent by 2025. If these projections are accurate, the population of Oceania, which is estimated to be 23 million in 1980, will be approximately 40 million by 2025.

Further insight into the findings of the current assessment on population size and growth rates may be gained by considering the results for some individual countries. In table 11, the 25 most populous countries in 1984 and 2025 are ranked. Together, these countries account for 79.2 and 76.0 per cent of the world total, respectively. In 1984, 10 countries have populations greater than 80 million; by 2025, the number of countries is projected to increase to 22. Important changes include: (*a*) Nigeria's rise from tenth to fourth most populous; (*b*) the absence of the 6 largest European countries in 2025; and (*c*) the relatively rapid population increase in a number of African countries.

With respect to population growth rates, the 20 countries with the lowest and highest rates for 1980-1985 are presented in table 12. As might be expected from the discussion above, of the 207 countries considered, the lowest growth rates are found among Western and Northern European countries. For example, the lowest six national annual growth rates (in percentages) are

Switzerland (-0.3), Germany, Federal Republic of (-0.2), Luxembourg (-0.1), German Democratic Republic (-0.1), United Kingdom (-0.0) and Austria (-0.0). The other countries or areas with very low growth rates are generally those which either have suffered from armed conflicts, for example, Afghanistan, Lebanon and the Falkland Islands (Malvinas), or have relatively small populations, such as British Indian Ocean Territory, the Cook Islands and Niue.

The highest growth rates, in excess of 3.4 per cent per annum (implying a doubling of population in 20 years or less), occur almost exclusively among Arab and African countries. Although the highest rates of growth for some of the Arab countries are due in part to the effects of international migration, such as in the United Arab Emirates, Oman and Saudi Arabia, the rates of natural increase for many of these labour-importing countries are generally above 3.0 per cent. In terms of natural increase, Kenya, with a growth rate of 4.1 per cent for 1980-1985, is the most rapidly growing nation in the world. The effects of this high rate of growth on population size may be appreciated by considering the size of Kenya's population during the past and for the future. In 1950, for example, Kenya's population numbered approximately 5.8 million; by 1980, its population had nearly tripled to 16.8 million; and by the years 2000 and 2025, the population of Kenya is projected to be approximately 28.5 and 82.9 million, respectively.

B. AGE AND SEX DISTRIBUTION

The sex ratio for the world as a whole has been close to 100 since 1950 and is projected to increase slightly, to 101.2 by the year 2000, and then to decline to 100.6 by 2025 (see table 13). The projected trends in the sex ratio are the consequent of assumed mortality improvements, as well as changes in the regional distribution of the world's population. In Northern America and Europe, the sex ratio is currently about 4 percentage points below 100. The comparatively low sex ratio of 87.8 for the Union of Soviet Socialist Republics reflects the effects of the Second World War on the population. Although the sex ratio will increase for these more developed regions over the next 45 years, it is expected to remain at least several percentage points below 100. Since 1950, the sex ratio for Oceania has shown a slight excess of males (i.e., 102.2); this is mainly because the migration flows to this region have tended to be male-dominated.

Except for Africa, the sex ratios in the less developed regions have been 100 or above. For instance, in 1980, the ratios for Latin America, East Asia and South Asia were 100.0, 103.4 and 104.8, respectively. In contrast, the sex ratio for Africa has been a couple of points below 100 since 1950. The likely cause of this is the relatively lower sex ratios at birth for African populations *vis-à-vis* Asian and Latin American populations. With the projected changes in mortality, the sex ratios for the less developed regions are expected to be near 100 in the future, except for South Asia, for which a sex ratio of 104.1 in 2025 is projected.

During the period 1950-1980, changes in the age distribution varied among the 8 major regions. For example, while the median age of the populations of Europe and the Soviet Union increased by about 4 years

between 1950 and 1980, the median decreased by 1.6 years in Africa (see table 13). The median ages for the other regions decreased by about 2 years until about the early 1970s; they then began increasing and are currently at about the same level as they were in 1950.

In contrast to the past, the expected trends in the age structure for the future show increasing aging of populations in all regions. For instance, the median age of the world population is expected to increase from 22.4 years in 1980 to 26.4 years in 2000, and to 31.0 years in 2025. The oldest populations in 2025 will be in the regions of Europe, East Asia and Northern America, with median ages of 40.6, 38.4 and 38.0, respectively; the regions with the youngest populations will be Africa and Latin America, with median ages of 21.8 and 29.8 years, respectively.

The extent of current country differences in age structure may be appreciated by considering the 20 countries with the lowest and highest proportions of the population under 15 years and 65 years and over, shown in table 14. As is clear from the table, the countries of Northern and Western Europe have the lowest proportions under 15 years of age and the highest 65 years and above. For example, Switzerland and Sweden have approximately one sixth of their populations under 15 years of age and an equivalent proportion 65 years and above. In contrast, the youngest populations are predominantly in Africa and Asia. In Kenya, Botswana, Rwanda and the United Republic of Tanzania, for instance, approximately one half of their populations are under 15 years of age; in contrast, the proportion 65 years and above numbers a few percentage points.

As a result of the aging of the populations, the composition of the age dependency ratios is changing. For the less developed regions, the age dependency ratios are expected to decrease sharply over the next five decades, primarily owing to the relative reduction in the proportion of the population under 15 years of age (see table 13 and figure IV). For Africa, for example, whereas the age dependency ratio was 93.4 in 1980, it is projected to be 64.9 in 2025, with nearly all of the decline due to the decrease in the proportion of population under 15 years. For the more developed regions, however, the total age dependency ratios are projected to be somewhat greater in 2025 but with significant changes in the contributions of the young and aged dependants. This phenomenon is most apparent in Europe, where the total dependency ratio increases from 54.6 in 1980 to 58.5 in 2025, and the dependency ratios for the young and the aged change from 34.5 and 20.1 to 29.3 and 29.2, respectively. In short, while the contribution of the young to the dependency burden is expected to decrease rapidly over the next 45 to 50 years, the contribution of the aged is projected to increase markedly for most populations of the world.

C. FERTILITY

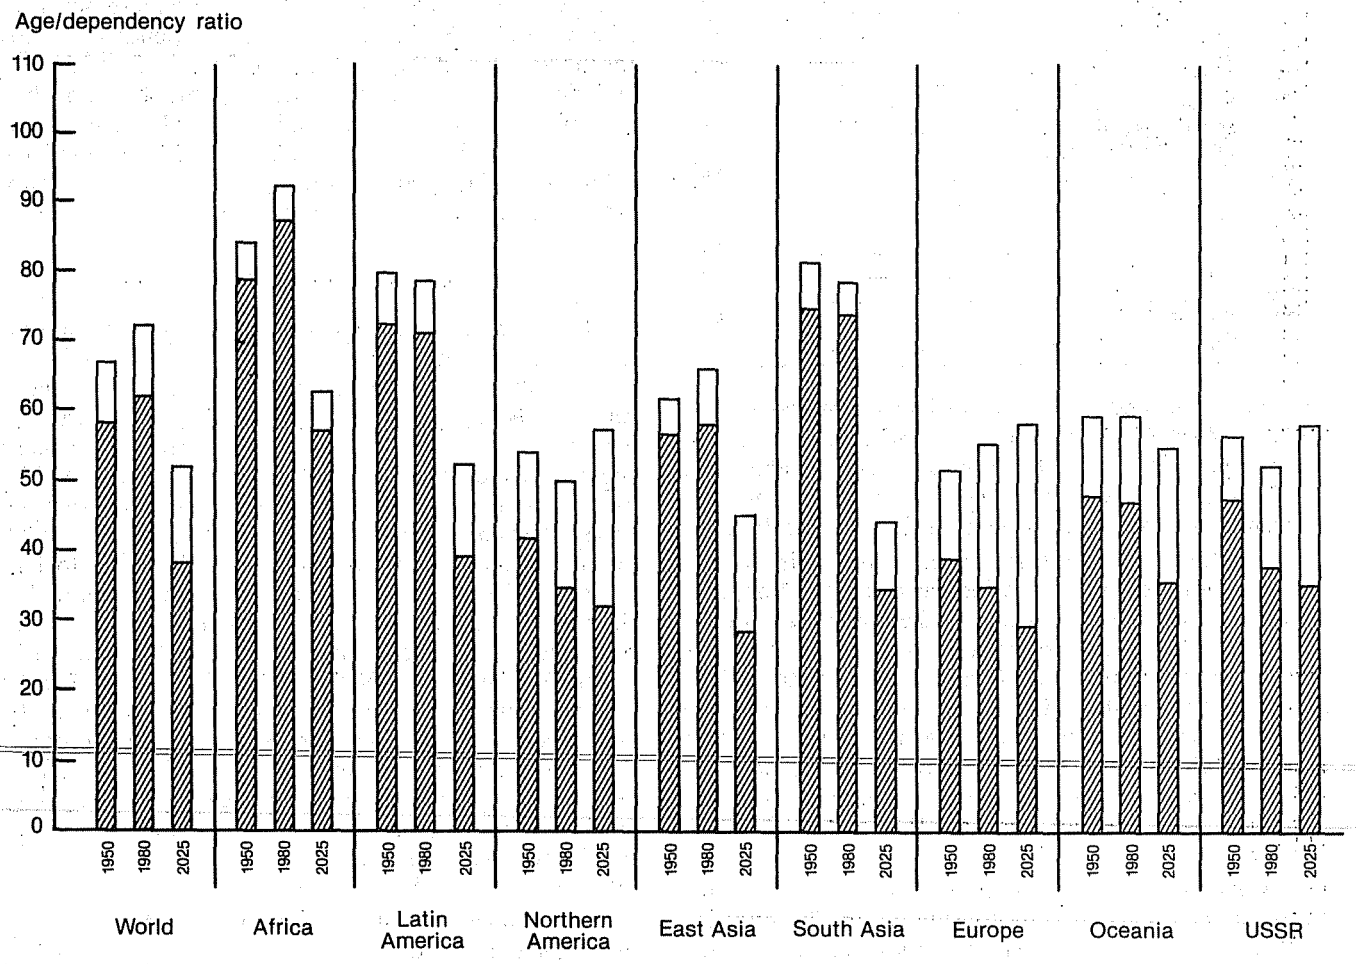

The estimates and projections from the 1982 assessment show steady declines from 1950 to 2025 in the crude birth rate and gross reproduction rate for all major regions of the world except Northern America and Europe, for which fertility is projected to increase slightly in the future (see table 15 and figure V). The gross reproduction rate for the world, for example, dropped from 2.44 in 1950-1955 to 1.91 in 1975-1980, and is projected to fall to 1.44 in 1995-2000 and to 1.13 in 2020-2025. Also, as may be observed in figure IV, significant declines in fertility have occurred and are projected to continue in East Asia, South Asia and Latin America. The decline of fertility in East Asia, which is largely influenced by the trend in China, is especially noteworthy. Between 1950 and 1980, the gross reproduction rate for East Asia fell from about 2.69 to 1.28, a decline of slightly more than 50 per cent. Future fertility levels in East Asia are expected to continue to drop rapidly so that, by the year 2000, the gross reproduction rate will be slightly below 1.0.

In contrast, fertility has remained relatively unchanged in Africa between 1950 and 1980. During this 30-year period, for example, the gross reproduction

TABLE 13. SEX RATIO, MEDIAN AGE, AND AGE DEPENDENCY RATIO FOR TOTAL, UNDER 15 YEARS AND 65 YEARS AND OVER BY REGION, MEDIUM VARIANT, 1950-2025

2020-2025	1.13	1.57	1.18	1.02	0.94	1.02	1.01	1.09	1.10

Figure V. Gross reproduction rate by region, medium variant, 1950-2025, as assessed in 1982

rate has been between 3.18 and 3.24. However, fertility is projected to decline relatively rapidly during the next 50 years, falling from a gross reproduction rate of 3.18 in 1975-1980 to 2.86 in 1995-2000 and to 1.57 in 2020-2025.

Among the more developed regions, fertility has declined to slightly above or below replacement levels. For both Oceania and the Soviet Union, it is assumed that fertility will continue to decline and reach a gross reproduction rate of about 1.10 in 2020-2025. The current below-replacement levels of fertility for Northern America and Europe are expected to continue for some time, and to return to and remain at replacement levels by 1995 and 2025, respectively.

Additional observations on current fertility levels may be made by examining the extremes of fertility for countries around the world. In table 16, for example, the 20 countries with the lowest and highest crude birth rate and total fertility rate for 1980-1984 are presented. Of the 156 countries considered, Switzerland ranks as the lowest as regards both the crude birth rate and the total fertility rate: 8 per 1,000 and 1.3, respectively; close behind Switzerland are other Western European countries, as well as Northern European countries. Other countries with total fertility rates of 2.0 or less include Japan, Canada, New Zealand, the United States of America and Australia.

The 20 countries with the highest total fertility rate are dominated by African and Arab Middle Eastern countries. The highest fertility among the 156 countries occurs in Kenya, for which the crude birth rate and total fertility rate are 55 per 1,000 and 8.1, respectively, over six times the current fertility levels in Switzerland. Currently, there are 13 countries in the world with total fertility rates of 7.0 or more and 59 countries with total fertility rates of 6.0 or more.

D. Mortality

Between 1950 and 1980, significant improvements in mortality levels have occurred throughout the world. Globally, for example, life expectancy at birth increased from 45.8 years in 1950-1955 to 57.3 years in 1975-1980 (see table 17). The largest gains in mortality decline were achieved by the less developed regions (table 17 and figure VI). Over the period from 1950 to 1980, the average annual increase in life expectancy at birth for the less developed regions was about double the corresponding figure for the more developed regions: 0.55 as opposed to 0.28 years; as a consequence, the gap between the life expectancies between the more and the less developed regions declined from 24.1 years in 1950-1955 to 17.3 years in 1975-1980. Continued mortality improvements and a narrowing of the gap are also projected for the future. By the years 2000 and 2025, the life expectancies for the more and the less developed regions are expected to be approximately 75.7 and 62.5 years, and 77.0 and 68.9 years, respectively.

Of the 8 regions, life expectancy at birth is lowest in Africa and South Asia. In 1975-1980, life expectancies in those regions were 47.6 and 51.7 years, respectively. By the year 2025, it is projected that their life expectancies at birth will increase to 64.9 and 68.7 years, respectively. The levels of life expectancy at birth in the other two less developed regions, Latin America and East Asia, are markedly higher than those in Africa and South Asia. In 1975-1980, for example, the life expectancies at birth for Latin America and East Asia were between 10 and 18 years higher than those for Africa and South Asia (figure VI).

Among the less developed regions, the relatively rapid improvements in mortality levels in East Asia are also noteworthy. As can be observed from figure VI, whereas life expectancy at birth in South Asia in 1950-1955 was in the low forties, or about 8 years below the level in Latin America, by 1975-1980 it had reached 65.3 years, nearly 3 years higher than the corresponding level in Latin America. Furthermore, the rapid increase in life expectancy in East Asia is expected to continue so that by 2000 and 2025, life expectancy will be about 72 and 75 years, respectively, levels which are similar to those expected in the more developed regions.

Life expectancy at birth for both sexes in nearly all of the countries in the more developed regions is currently 70 years or more. The highest level for a region is found in Northern America, in which life expectancy at birth is about 73 years. On a country basis, however, the highest life expectancies are in the Scandinavian countries, averaging around 75 years for both sexes. The comparatively low levels of life expectancy in Oceania are due to higher mortality rates in some of the island countries (e.g., Melanesia and Papua New Guinea). Life expectancy in the Soviet Union made relatively rapid gains

[a] Countries with populations of less than 300,000 are not included.

during the 1950s. Between 1950-1955 and 1955-1960, life expectancy at birth for both sexes increased from 61.7 to 68.4 years. Since the early 1960s, life expectancy at birth has stabilized at close to 70 years, with only minor variation during the 1970s. Life expectancy in the Soviet Union is projected to reach 74 years by the end of the century and almost 77 years by 2025.

Another important indicator of the level of mortality is the infant mortality rate. In table 17, the infant mortality rate for the world and the major regions is shown for two time periods in the past and two in the future; also, the general level of the infant mortality rate is illustrated for countries in maps 1, 2, 3 and 4. In 1975-1980, for the world as a whole, infant mortality is estimated to have been about 88 per 1,000. For this period, the lowest rates among the major regions were for Northern America and Europe: 14 and 19 per 1,000, respectively. While these rates are comparatively low on an interregional basis, it is worth noting that they are about twice the lowest national infant mortality rate of 8 per 1,000 estimated for Sweden for 1975-1980.

In contrast, the highest infant mortality rates among the regions for 1975-1980 were for Africa and South Asia: 125 and 120, respectively. Stated in somewhat more graphic terms, these rates mean that, on the average, slightly more than one of every ten children born in Africa and South Asia die before reaching their first birthday. Again, these rates are regional averages and considerable variation exists within each region. In South Asia, the infant mortality rate for 1975-1980 ranged from a low of about 13 per 1,000 for Singapore to around 260 per 1,000 for Democratic Kampuchea.

Between 1950-1955 and 1975-1980, the infant mortality rate for the world declined from 138 to 88 per 1,000, a decline of 36 per cent. On a regional basis, the proportional decline in the infant mortality rate during this 25-

TABLE 17. CRUDE DEATH RATE, LIFE EXPECTANCY AT BIRTH AND INFANT MORTALITY RATE BY REGION, MEDIUM VARIANT, 1950-2025

				Infant mortality rate					
1950-1955	138	182	126	29	124	182	62	68	73
1975-1980	88	125	70	14	45	120	19	43	29
1995-2000	58	84	44	8	24	76	11	25	17
2020-2025	31	47	27	6	12	37	7	11	10

year period has been no less than 31 per cent, which rate occurred in Africa. The other two regions in which the declines were relatively low were South Asia, 34 per cent, and Oceania, 37 per cent. In the Americas, the improvements were intermediate: 44 and 52 per cent for Latin America and Northern America, respectively. Declines of 60 per cent or more occurred in the Soviet Union (60 per cent), East Asia (64 per cent) and Europe (69 per cent). Based on these estimates, it appears that while there have been improvements in the regional levels of infant mortality among regions, the extent of the decline varies considerably. Furthermore, the most rapid proportional declines have not been limited to the developed regions.

Further insight into the current patterns of infant mortality throughout the world may be gained from map 4. In contrast to the other maps, map 4 provides a perspective in which the sizes of the countries do not represent their geographical area but are drawn in proportion to the estimated average number of births for the period 1975-1980. While countries with low infant mortality rates (e.g., Canada, the Scandinavian countries and Australia) almost disappear on this map, South Asia—which includes India, the country with the largest number of births and infant deaths—becomes considerably greater, covering an area more than double that for Africa.

Improvements in infant mortality are projected to continue throughout the remainder of this century and into the next (table 17 and map 4). Globally, the rate of decline in infant mortality is anticipated to be approximately 34 per cent between 1980 and 2000 (i.e., from 88 to 58 per 1,000) and 47 per cent between the year 2000 and 2025 (i.e., from 58 to 31 per 1,000). While the rates for Africa and South Asia are projected to improve, the levels by the year 2000 are anticipated to remain well above 50 per 1,000: 84 and 76 per 1,000, respectively.

Of the approximately 160 countries or areas for which projections of infant mortality rates were made, in 69 the infant mortality rate is not expected to reach 50 per 1,000 live births by the year 2000, the maximum level stipulated among the objectives of the International Development Strategy for the third United Nations Development Decade. Of these 69 countries, 47 are in Africa, 3 are in Latin America, 18 are in South Asia and 1 is in Oceania. In terms of the projected number of births, South Asia is expected to have the largest share of children born in countries with infant mortality rates higher than 50 per 1,000. Based on these sets of projections, about 60 per cent of the births in the year 2000 are expected to take place in countries in which the average infant mortality will be in excess of 50 per 1,000.

In conclusion, it may be useful to consider briefly the 20 countries with the highest and lowest rates of mortality on the basis of the three indicators presented, that is, the crude death rate, life expectancy at birth and the infant mortality rate (see table 18). Owing to the effects of age structure, the countries that have the lowest crude death rate for 1980-1985 are not necessarily those that have the best mortality conditions. For example, the only European country listed is Albania, with a crude death rate of 6 per 1,000; under the other two mortality indicators, however, Albania does not appear. The lowest crude death rates (5 per 1,000 or below) are generally among young populations (e.g., Costa Rica and Fiji) or populations that have atypical age structures, such as Kuwait, United Arab Emirates, Bahrain and Qatar. The highest crude death rates (in excess of 20 per 1,000) are generally found in Africa; of the 20 countries with the highest rate, only two (Afghanistan and Yemen) are not in the African continent.

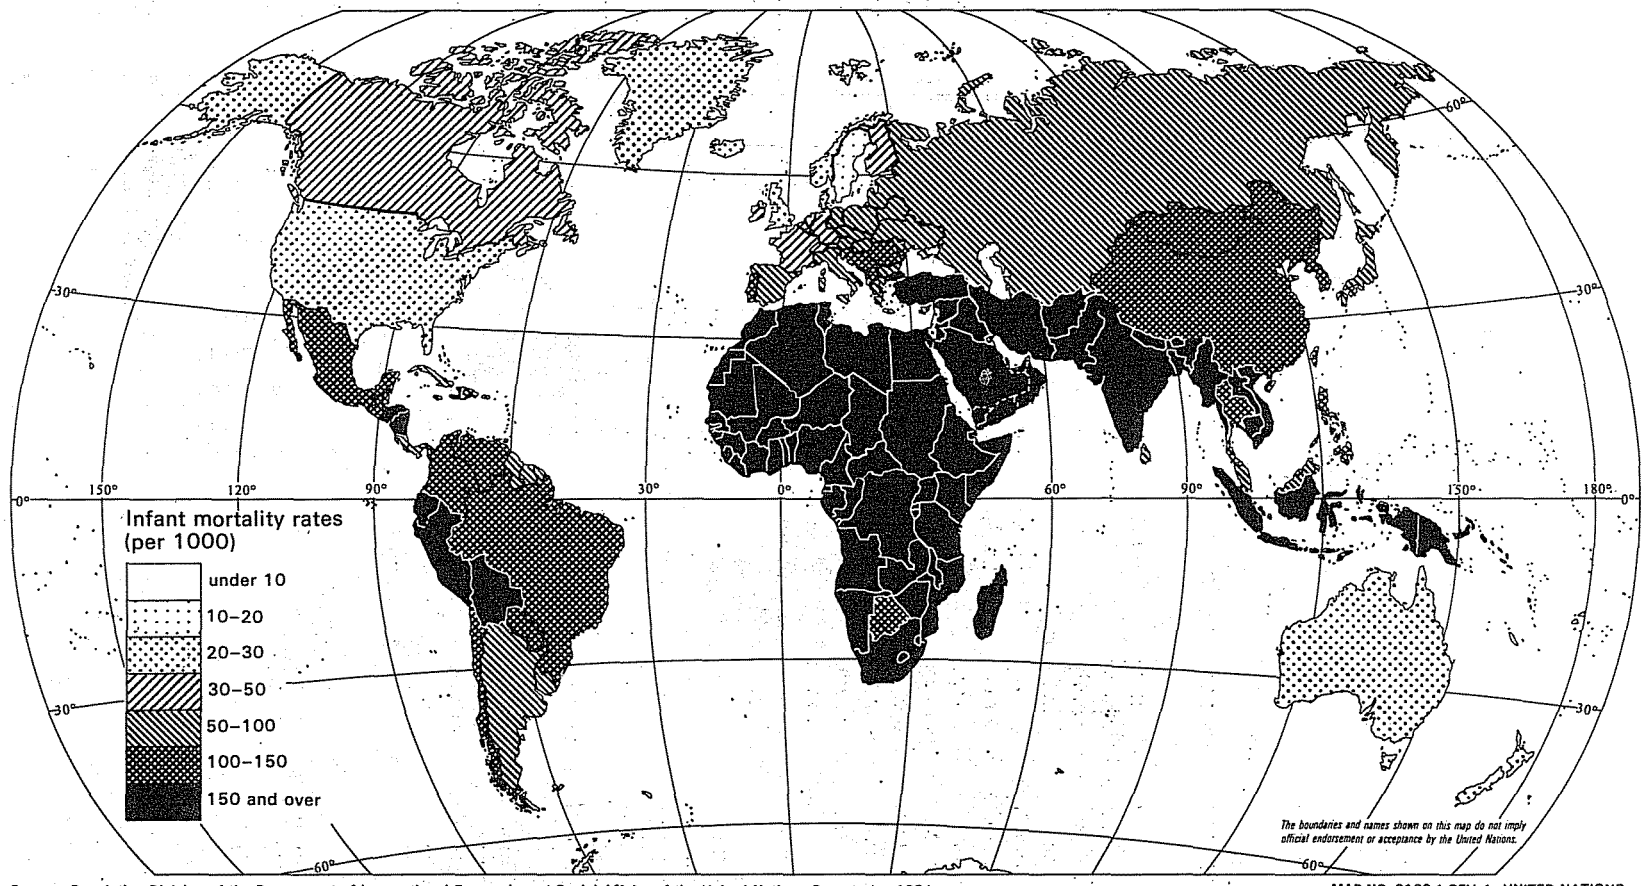

The correspondence between the rankings of the countries based on life expectancy at birth and the infant mortality rate is relatively high. For example, the highest life expectancies at birth and the lowest infant mortality rates are found predominantly in Northern and Western European countries and Japan. At the other extreme, the lowest life expectancies at birth and the highest infant mortality rates occur mainly among African countries.

E. URBANIZATION

Another significant demographic trend that has taken place in the world during the past 30 years has been the

Figure VI. Life expectancy at birth (both sexes) by region, medium variant, 1950-2025, as assessed in 1982

increase in levels of urbanization (see table 19). In 1950, the proportion of the total world population of 2.5 billion that lived in urban areas was 29.4 per cent; by 1980, this proportion had reached 39.9 per cent (figure VII). It is estimated that slightly more than half of the world's expected population of 6.1 billion by the year 2000 will be residing in urban areas and that this proportion will reach nearly two thirds of the projected world population of almost 8.2 billion by 2025.

The trends in the percentage urban for the 8 major regions for 1950, 1980 and 2025, which are also illustrated in proportion to their relative population sizes, in figure VIII, suggest at least two important observations. First, irrespective of the region considered, the transformation has been to ever-increasing proportions of the population living in urban areas. For example, by the year 2025, the least urban region is expected to be East Asia; 51.2 per cent of its population will be living in urban areas, which is somewhat less than double the current level of 28 per cent.

Secondly, the proportion of the population living in urban areas has generally been lower in the less developed regions. Except for Latin America, which in terms of urbanization is similar to more developed regions, the proportion of the population living in urban areas in 1980 was close to 25 per cent in the less developed regions. In contrast, the percentage urban in the more developed regions and Latin America in 1980 ranged from about 65 per cent in the Soviet Union and Latin America to nearly 74 per cent in Northern America. By the year 2025, the percentage urban in the more developed regions and Latin America is anticipated to be between 78 and 86 per cent; the expected range for the less developed regions at this future time is from 51 to 58 per cent.

[a]Countries with populations of less than 300,000 are generally not included.

The rapid changes in the levels of urbanization may also be appreciated from consideration of the average rates of annual increase in urban and rural areas. Generally speaking, during the past three decades, the rates of annual increase in urban areas have been between 3 and 5 per cent for the less developed regions and between 1 and 3 per cent for the more developed regions. In contrast, the average annual growth rates of rural areas were zero or negative for the more developed regions and, in most cases, below 2 per cent for the less developed regions. These trends in the growth rates for urban and rural areas are expected to continue over the next 45 years but at somewhat lower levels. Globally, for example, the average rates of annual increase in urban and rural areas are projected to be 2.5 and 0.6 per cent for 2000 and 1.9 and -0.5 per cent for 2025, respectively.

F. INTERNATIONAL MIGRATION

The final demographic phenomenon to be highlighted in this summary of the results of the 1982 assessment is international migration. In this volume, the indicators relating to international migration by country and region are the net annual numbers of migrants and the net migration rates.[10] For most countries, net migration is relatively small and, consequently, in the preparation of estimates and projections at the national level it is usually assumed to be zero. However, there is a significant number of countries for which international migration cannot be assumed to be negligible. For instance, the proportion of population growth due to international migration in Kuwait and the United States is currently estimated to be about one third and one fifth, respectively. Also, the net outflow of migrants from

TABLE 19. PERCENTAGE URBAN AND URBAN AND RURAL AVERAGE RATES OF INCREASE BY REGION, MEDIUM VARIANT, 1950-2025

Year	World	Africa	Latin America	Northern America	East Asia	South Asia	Europe	Oceania	USSR
				Percentage urban					
1950	29.4	14.8	41.1	63.9	17.8	16.1	55.9	61.3	39.3
1980	39.9	28.7	65.3	73.8	28.0	25.4	71.1	71.6	63.2

				Rural average rate of annual increase[a]					
1955	1.3	1.7	1.3	0.0	1.5	1.7	−0.2	0.9	0.1
1980	1.3	2.1	0.3	1.1	1.2	1.7	−1.2	1.7	−0.7
2000	0.6	1.9	0.1	−0.6	0.4	0.6	−1.3	0.7	−1.0
2025	−0.5	0.5	−0.4	−1.2	−1.0	−0.7	−1.6	−0.2	−1.2

[a] Average rate of annual increase (percentage) in the preceding five-year period.

Cuba and Jamaica was about 26 and 44 per cent, respectively, of the natural increase in population during the period 1975-1980.

The estimated annual net numbers of migrants and net migration rates for those countries for which net migration is assumed in 1980-1985 are ranked from high to low and are shown for the periods 1980-1985, 1995-2000 and 2020-2025 in tables 20 and 21. In 1980-1985, there were 63 countries for which net migration was not zero. The annual net numbers of migrants in 1980-1985 ranged from 450,000 in the United States to -320,000 in Afghanistan (see table 20). For 28 of the countries, the annual net number of migrants fell within the range of plus and minus 10,000 in 1980-1985.

In general, the 25 receiving countries are the more developed countries or the relatively wealthy less developed nations. For example, among the top 10 receiving countries, most were either more developed countries with a tradition of immigration (e.g., Australia, Canada and the United States) or oil-exporting countries (e.g., Saudi Arabia, Venezuela and the United Arab Emirates). Notable exceptions are Pakistan and Somalia, which recently received large numbers of refugees.

In contrast, the sending countries are, by and large, less developed. Among these countries, those that fall near the bottom of the list in table 20 have suffered from civil conflicts (e.g., Afghanistan, Ethiopia, Lebanon and Viet Nam). The only sending countries that are in more developed regions are Portugal and the United Kingdom, for which the net annual numbers of migrants in 1980-1985 are about -9,000 and -29,000, respectively.

Additional information about the international flows of migrants may be obtained by considering the annual net migration rates (see table 21). Of the top 10 receiving countries, half are oil-exporting Arab countries (i.e., United Arab Emirates, Kuwait, Qatar, Saudi Arabia and Oman). In terms of rates, the ranking of the major receiving more developed countries (i.e., Canada, Australia and the United States) has changed. For example, the United States, which had the single largest annual net number of migrants, is ranked eighteenth on the basis of its annual net migration rate in 1980-1985. At the other extreme of the list in table 21 are mainly countries with relatively small populations. For example, of the 10 countries or areas at the bottom of the list in table 21, 8 have populations of approximately 3 million or less.

As was mentioned in the section dealing with assumptions, predicting likely trends in international migration is a precarious task because international migration is affected to a great extent by the social, economic and political circumstances in the countries of origin as well as destination. In addition, international migration can change dramatically, even reversing direction, in comparatively short spans of time. Therefore, the reader is urged to view the figures as general indicators of migration flows and to use caution in interpreting the projections of the net numbers of migrants.

TABLE 20. ANNUAL NET NUMBERS OF MIGRANTS RANKED BY COUNTRY OR AREA, MEDIUM VARIANT, 1980-1985, 1995-2000 AND 2020-2025[a]

[a] Blanks in the table indicate that the net number of migrants is zero.

NOTES

[1] The previous United Nations population estimates and projections have been published in the following: "The past and future growth of world population—a long range view", *Population Bulletin of the United Nations*, No. 1, December 1951 (United Nations publication, Sales No. 52.XIII.2), pp. 1-12; "The past and future population of the world and its continents" and "Framework for the future population estimates, 1950-1980, by world regions", *Proceedings of the World Population Conference, 1954*, vol. III (United Nations publication, Sales No. 55.XIII.8), pp. 265-282 and 283-328; *The Future Growth of World Population* (United Nations publication, Sales No. 58.XIII.2); *World Population Prospects as Assessed in 1963* (United Nations publication, Sales No. 66.XIII.2); *World Population Prospects as Assessed in 1973* (United Nations publication, Sales No. E.76.XIII.4 and corrigenda); *World Population Trends and Prospects by Country, 1950-2000: Summary Report of the 1978 Assessment* (ST/ESA/SER.R/33); *Selected Demographic Indicators by Country, 1950-2000: Demographic Estimates and Projections as Assessed in 1978* (ST/ESA/SER.R/38); *World Population Prospects as Assessed in 1980* (United Nations publication, Sales No. E.81.XIII.8); and *Demographic Indicators of Countries: Estimates and Projections as Assessed in 1980* (United Nations publication, Sales No. E.82.XIII.5 and corrigendum).

[2] For convenience in presenting global demographic trends, the Population Division has been using the three levels of country classification mentioned in the text, of which the latter two are essentially geographical groupings. The grouping of the 24 subregions into "less developed" and "more developed" regions has also been made on the basis of demographic and other social and economic indicators. The less developed regions include all of the subregions of Africa, Asia (excluding Japan), Latin America and Oceania (excluding Australia and New Zealand). The more developed regions include all other subregions.

[3] United Nations publications dealing with the application of demographic analysis, estimation or projection methodology, with particular reference to the methods used by the United Nations, include: *Manual II: Methods of Appraisal of Quality of Basic Data for Population Estimates* (Sales No. 56.XIII.2); *Manual IV: Methods of Estimating Basic Demographic Measures from Incomplete Data* (Sales No. 67.XIII.2); *Manual X: Indirect Techniques for Demographic Estimation* (Sales No. E.83.XIII.2); and *Population Projections: Methodology of the United Nations* (Sales No. E.83.XIII.7). For the urban and rural projection methodology, which is not discussed in the text, refer to *Patterns of Urban and Rural Population Growth* (Sales No. E.79.XIII.9).

[4] The model life tables prepared by Coale and Demeny were used, when appropriate, along with the model life tables of the United Nations. See Ansley J. Coale and Paul Demeny, *Regional Model Life Tables and Stable Populations* (Princeton, New Jersey, Princeton University Press, 1966); and *Manual III: Methods for Population Projections by Sex and Age* (United Nations publication, Sales No. 56.XIII.3).

[5] The majority of the most recent population census figures and official estimates were obtained from the United Nations *Population and Vital Statistics Report* (ST/ESA/STAT/SER.A/144). Reference should be made to that study for details and important notes concerning the populations in tables 1 to 5 of the present publication.

[6] For details on the quality of the data on births and deaths, refer to *Population and Vital Statistics Report* (ST/ESA/STAT/SER.A/142, 143 and 144).

[7] For information on the model life tables used in conjunction with reliable age-specific mortality rates, refer to *A Modified Method Estimating Age-Specific Survival Ratios* (ESA/P/WP.61).

[8] See *World Population Prospects as Assessed in 1973* (United Nations publication, Sales No. E.76.XIII.4).

[9] It should be noted that some of the demographic estimates and projections given in the present report differ from those in the data sheets published by the regional commissions. For example, *Demographic and Socio-economic Data Sheet for the ECA Member States* (Economic Commission for Africa, 1983) was used as the basis for the estimates and projections for Africa, with further modifications made upon the receipt of additional data. Also, data in *1983 ESCAP Population Data Sheet* (Economic and Social Commission for Asia and the Pacific, 1984) differ slightly to the extent that the Commission obtained more recent data after the deadline for the preparation of the estimates and projections in the present report.

[10] Recent United Nations publications on international migration include *Trends and Characteristics of International Migration since 1950* (Sales No. E.78.XIII.5) and *International Migration Policies and Programmes: A World Survey* (Sales No. E.82.XIII.4).

ANNEXES

Annex I

GLOSSARY

Age-specific fertility rate: the number of births occurring during a specified period (usually a calendar year) to women of a specified age or age group divided by the number of person-years lived during that period by women of that age or age group (usually by the mid-year population of women of that age).

Child-woman ratio: the number of children under 5 years of age per 1,000 females aged 15 to 49 years in a given year.

Crude birth rate: the number of births in a year per 1,000 mid-year population.

Crude death rate: the number of deaths in a year per 1,000 mid-year population.

Dependency ratio or age dependency ratio: the ratio of the combined child population under 15 years of age and adult population 65 years and over to the population of intermediate age per 100.

Distribution of age-specific fertility rates: the percentage distribution of a set of age-specific fertility rates to total fertility (i.e., the sum of the age-specific fertility rates).

General fertility rate: the annual number of births divided by the mid-year population of women aged 15 to 49 years multiplied by 1,000.

Gross reproduction rate: a measure of the reproduction of a population expressed as an average number of daughters to be born to a cohort of women during their reproductive age, assuming no mortality and a fixed schedule of age-specific fertility rates. More specifically, it is the sum of age-specific fertility rates for the period multiplied by the proportion of the total births of girl babies.

Infant mortality rate: the probability of dying between birth and age 1 multiplied by 1,000; commonly calculated as the number of deaths of infants under one year of age in any given calendar year divided by the number of births in that year and multiplied by 1,000.

Life expectancy at birth: a life-table function to indicate the expected average number of years to be lived by a newly born baby, assuming a fixed schedule of age-specific mortality rates.

Life table: a statistical table used to study mortality, consisting primarily of a listing of the number of survivors at various ages in a hypothetical cohort subject from birth to a given set of age-specific mortality rates.

Mean age of child-bearing: the average age at which a mortality-free cohort of women would bear their children according to a set of age-specific fertility rates.

Median age: the age which divides the population into two groups of equal size, one of which is younger and the other of which is older.

Model life table: a demographic model that expresses a distinctive age and sex pattern of mortality experience derived from a group of observed life tables.

Natural rate of increase: the difference between the crude birth rate and the crude death rate.

Net migration: the difference between gross immigration and gross emigration.

Net migration rate: the difference between gross immigration and gross emigration per 1,000 of the mid-year population.

Net reproduction rate: a refined measure of the reproduction of population expressed as an average number of daughters that a cohort of newly born girl babies will bear during their lifetime, assuming a fixed schedule of age-specific fertility rates and a fixed set of mortality rates. In other words, it is the measure of the extent to which a cohort of newly born girls will replace themselves under given schedules of age-specific fertility and mortality rates.

Rate of growth: the exponential average annual rate of population growth, expressed as a percentage.

Sex ratio: the number of men per 100 women.

Survival ratio: the probability of surviving from one age to an older one; it is often computed for five-year age groups and a five-year time period.

Total fertility rate: the sum of the age-specific fertility rates over all ages of the child-bearing period; if five-year age groups are used, the sum of the rates is multiplied by 5. This measure gives the approximate magnitude of "completed family size", that is, the total number of children an average woman will bear in her lifetime, assuming no mortality.

Annex II

TAPE DESCRIPTION

The major results of the 1982 United Nations assessment of demographic trends may be obtained on a magnetic computer tape upon written request for a nominal charge. Inquiry about the computer tape should be addressed to the Director of the Population Division, Department of International Economic and Social Affairs, United Nations, New York, N.Y. 10017. The specifications and contents of the tape are described below.

Tape specifications:

9-track
EBCDIC mode
1600 BPI
Standard label
DEN = 3

File specifications:

1. File 1: Population and its age-sex composition by country, 1980-2025, four variants, as assessed in 1982.

Record format = FB
Record length = 476 DSN='FILE1'
Block size = 15232
Total number of records = 22,920
Record format and contents = (5I4,38F12.3)

Byte	*Format*	*Contents*
1-4	I4	Sequence number (see list 1 below)
5-8	I4	United Nations country code (see list 1 below)
9-12	I4	Variant code: Medium = 1 High = 2 Low = 3 Constant = 4
13-16	I4	Year of projection data, 1980, . . . ,2025
17-20	I4	Sex code: Males = 1 Females = 2 Both sexes = 3
21-32	F12.3	Population total
33-236	17F12.3	17 age groups, each occupying 12 bytes. The first 16 groups are five-year age groups arranged consecutively from ages 0-4, 5-9, . . . to 75-79, and the last age group is 80+.
237-476	20F12.3	20 single-year ages, each occupying 12 bytes. They are arranged consecutively from ages 5, 6, . . . to 24.

Arrangement of records:

For a given country, the first three records give the population of males, females and both sexes consecutively for 1980; the second three records give the population for 1985; etc.

2. File 2: Population and its age-sex composition by country, 1950-2025, medium variant, as assessed in 1982.

Record format = FB
Record length = 232 DSN = 'FILE2'
Block size = 1856
Total number of records = 9,168
Record format and contents: (4I4,18F12.3)

Byte	*Format*	*Contents*
1-4	I4	Sequence number
5-8	I4	United Nations country code
9-12	I4	Year of projection data, 1950 , . . . , 2025
13-16	I4	Sex code: Males = 1 Females = 2 Both sexes = 3
17-28	F12.3	Population total
29-232	17F12.3	17 age groups. The first 16 are five-year age groups arranged consecutively from ages 0-4, 5-9, . . . to 75-79, and the last age group is 80+.

3. File 3: Selected 45 demographic indicators and population figures, 1950-2025, four variants, as assessed in 1982.

Record format = FB
Record length = 204 DSN = 'FILE3'
Block size = 2040
Total number of records = 34,380
Record format and contents: (4I3,16F12.3)

187	953	Other Melanesia[u]
188	929	23. Micronesia-Polynesia
189	954	Micronesia[v]
190	957	Polynesia[w]
191	810	F. 24. Union of Soviet Socialist Republics

Explanatory notes

Data for small countries or areas, generally those with a population of 300,000 or less, have been included in their regional population figures.

More developed regions include Northern America, Japan, all regions of Europe, Australia-New Zealand and Union of Soviet Socialist Republics.

Less developed regions include all regions of Africa, all regions of Latin America, China, Other East Asia, all regions of South Asia, Melanesia and Micronesia-Polynesia.

Notes

[a] Including British Indian Ocean Territory, Djibouti and Seychelles.
[b] Including Agalega, Rodriguez and St. Brandon.
[c] Including Sao Tome and Principe.

[d] Including Western Sahara.

[e] Including St. Helena.

[f] Including Dominica, Grenada, Saint Lucia and Saint Vincent and the Grenadines.

[g] Including Antigua, Bahamas, British Virgin Islands, Cayman Islands, Montserrat, Netherlands Antilles, St. Kitts-Nevis-Anguilla, Turks and Caicos Islands and United States Virgin Islands.

[h] Including Belize.

[i] Including Falkland Islands (Malvinas).

[j] Including French Guiana.

[k] Including Bermuda, Greenland and St. Pierre and Miquelon.

[l] Including Macau.

[m] Including Brunei.

[n] Including Maldives.

[o] Including Gaza Strip (Palestine).

[p] The data which relate to the Federal Republic of Germany and the German Democratic Republic include the relevant data relating to Berlin for which separate data have not been supplied. This is without prejudice to any question of status which may be involved.

[q] Including Channel Islands, Faeroe Islands and Isle of Man.

[r] Including Andorra, Gibraltar, Holy See and San Marino.

[s] Including Liechtenstein and Monaco.

[t] Including Cocos (Keeling) Islands, Christmas Island and Norfolk Island.

[u] Including New Caledonia, Solomon Islands and Vanuatu.

[v] Including Guam, Kiribati (which also includes Canton and Enderbury Islands), Nauru, Pacific Islands (comprising Caroline, Mariana, and Marshall Islands), Tuvalu, Johnston Island, Midway Islands, Pitcairn, Tokelau and Wake Islands.

[w] Including American Samoa, Cook Islands, French Polynesia, Niue, Samoa, Tonga, and Wallis and Futuna Islands.

Annex III

TABLES BY SUBJECT

TABLE A-1. TOTAL POPULATION AND ANNUAL RATE OF CHANGE BY REGION AND AREA, MEDIUM, HIGH AND LOW VARIANTS

NO.	REGION AND AREA	POPULATION (THOUSANDS)

NOTES : -

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLIC.
(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA, AND MICRONESIA-POLYNESIA.
(1) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(2) INCLUDING ASCENSION AND TRISTAN DA CUNHA.
(3) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(4) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(5) ALSO INCLUDES CANTON AND ENDERBURY ISLANDS
(6) COMPRISING THE CAROLINE, MARIANA AND MARSHALL ISLANDS.
(7) INCLUDING JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU, AND WAKE ISLANDS.

NOTES : -

THE ANNUAL MID-YEAR POPULATION ESTIMATES ARE OBTAINED THROUGH STATISTICAL INTERPOLATIONS FROM THE QUINQUENNIAL ESTIMATES FOR YEARS ENDING IN 0 AND 5, AND THEREFORE DO NOT NECESSARILY CORRESPOND TO OFFICIAL GOVERNMENT FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLIC.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA, AND MICRONESIA-POLYNESIA.

(1) INCLUDING AGALEGA, RODRIGUES AND ST. BRANDON.

(2) INCLUDING ASCENSION AND TRISTAN DA CUNHA.

(3) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.

(4) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.

(5) ALSO INCLUDES CANTON AND ENDERBURY ISLANDS

(6) COMPRISING THE CAROLINE, MARIANA AND MARSHALL ISLANDS.

(7) INCLUDING JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU, AND WAKE ISLANDS.

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEICHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

TABLE A-9. CRUDE DEATH RATE BY REGION AND COUNTRY OR AREA, 1950-2025, MEDIUM VARIANT

NO.	REGION AND COUNTRY OR AREA	CRUDE DEATH RATE (PER 1,000 POPULATION)

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAO.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

TABLE A-9...(CONTINUED)

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAO.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

TABLE A-11. CRUDE DEATH RATE BY REGION AND COUNTRY OR AREA, 1980-2025, LOW VARIANT

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAO.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

TABLE A-14. GROSS REPRODUCTION RATE BY REGION AND COUNTRY OR AREA, 1980-2025, LOW VARIANT

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

TABLE A-15. LIFE EXPECTANCY AT BIRTH BY REGION AND COUNTRY OR AREA, 1950-2025, MEDIUM VARIANT

NOTES : -

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.

(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.

(3) INCLUDING SAO TOME AND PRINCIPE.

(4) INCLUDING WESTERN SAHARA.

(5) INCLUDING ST. HELENA.

(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.

(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.

(8) INCLUDING BELIZE.

(9) INCLUDING FALKLAND ISLANDS (MALVINAS).

(10) INCLUDING FRENCH GUIANA.

(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.

(12) INCLUDING MACAU.

(13) INCLUDING BRUNEI.

(14) INCLUDING MALDIVES.

(15) INCLUDING GAZA STRIP (PALESTINE).

(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.

(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.

(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.

(19) INCLUDING LIECHTENSTEIN AND MONACO.

(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.

(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.

(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.

(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS

FOOTNOTES

DATA FOR SMALL COUNTRIES OR AREAS, GENERALLY THOSE WITH POPULATION OF 300,000 OR LESS IN 1975, ARE NOT GIVEN IN THIS TABLE SEPARATELY. THEY HAVE BEEN INCLUDED IN THEIR REGIONAL POPULATION FIGURES.

(*) MORE DEVELOPED REGIONS INCLUDE NORTHERN AMERICA, JAPAN, ALL REGIONS OF EUROPE, AUSTRALIA-NEW ZEALAND AND UNION OF SOVIET SOCIALIST REPUBLICS.

(+) LESS DEVELOPED REGIONS INCLUDE ALL REGIONS OF AFRICA, ALL REGIONS OF LATIN AMERICA, CHINA, OTHER EAST ASIA, ALL REGIONS OF SOUTH ASIA, MELANESIA AND MICRONESIA-POLYNESIA.

(1) INCLUDING BRITISH INDIAN OCEAN TERRITORY, DJIBOUTI AND SEYCHELLES.
(2) INCLUDING AGALESA, RODRIGUES AND ST. BRANDON.
(3) INCLUDING SAO TOME AND PRINCIPE.
(4) INCLUDING WESTERN SAHARA.
(5) INCLUDING ST. HELENA.
(6) INCLUDING DOMINICA, GRENADA, SAINT LUCIA AND SAINT VINCENT AND THE GRENADINES.
(7) INCLUDING ANTIGUA, BAHAMAS, BRITISH VIRGIN ISLANDS, CAYMAN ISLANDS, MONTSERRAT, NETHERLANDS ANTILLES, ST. KITTS-NEVIS-ANGUILLA, TURKS AND CAICOS ISLANDS AND UNITED STATES VIRGIN ISLANDS.
(8) INCLUDING BELIZE.
(9) INCLUDING FALKLAND ISLANDS (MALVINAS).
(10) INCLUDING FRENCH GUIANA.
(11) INCLUDING BERMUDA GREENLAND AND ST. PIERRE AND MIQUELON.
(12) INCLUDING MACAU.
(13) INCLUDING BRUNEI.
(14) INCLUDING MALDIVES.
(15) INCLUDING GAZA STRIP (PALESTINE).
(16) THE DATA WHICH RELATE TO THE FEDERAL REPUBLIC OF GERMANY AND THE GERMAN DEMOCRATIC REPUBLIC INCLUDE THE RELEVANT DATA RELATING TO BERLIN FOR WHICH SEPARATE DATA HAVE NOT BEEN SUPPLIED. THIS IS WITHOUT PREJUDICE TO ANY QUESTION OF STATUS WHICH MAY BE INVOLVED.
(17) INCLUDING CHANNEL ISLANDS, FAEROE ISLANDS AND ISLE OF MAN.
(18) INCLUDING ANDORRA, GIBRALTAR, HOLY SEE AND SAN MARINO.
(19) INCLUDING LIECHTENSTEIN AND MONACO.
(20) INCLUDING COCOS (KEELING) ISLANDS, CHRISTMAS ISLAND, AND NORFOLK ISLAND.
(21) INCLUDING NEW CALEDONIA, SOLOMON ISLANDS AND VANUATU.
(22) INCLUDING GUAM, KIRIBATI (WHICH ALSO INCLUDES CANTON AND ENDERBURY ISLANDS), NAURU, PACIFIC ISLANDS (COMPRISING THE CAROLINE, MARIANA, AND MARSHALL ISLANDS), TUVALU, JOHNSTON ISLAND, MIDWAY ISLANDS, PITCAIRN, TOKELAU AND WAKE ISLANDS.
(23) INCLUDING AMERICAN SAMOA, COOK ISLANDS, FRENCH POLYNESIA, NIUE, SAMOA, TONGA, AND WALLIS AND FUTUNA ISLANDS
