GENERAL COMMITTEE

MEASURES TO ECONOMIZE THE TIME OF THE GENERAL ASSEMBLY

RESOLUTION PROPOSED BY THE CANADIAN DELEGATION

Item 7, Supplementary List

The large number of international conferences which are being held makes it difficult for states to provide adequate representation at each conference. This difficulty is increased if the conferences last for a long time. Moreover, unduly protracted international conferences diminish the prestige of the international organizations which are responsible for calling them.

During the present period, when new international organizations are being formed, it is difficult to reduce the number of conferences which must be held. It is therefore all the more important to ensure that the various conferences accomplish their tasks as expeditiously as possible. The General Assembly of the United Nations should set an example to all other conferences by the efficient and expeditious conduct of its business.

THEREFORE:

The General Assembly establishes a committee composed of fifteen Members to be designated by the President of the General Assembly. The President shall also designate the chairman and rapporteur of the committee. The committee shall consider and make recommendations to the General Assembly at this session on measures which the General Assembly might adopt to economize the time of future sessions of the General Assembly.
